OF SOUTHERN CALIFORNIA

# Board Report

## Water Resource Management Group

- **Water Resource Management November Activities**

### Summary

---

The Water Resource Management Group, November 2025 Activities as of November 13, 2025

### Purpose

---

Informational

### Detailed Report

---

#### **Execute CAMP4W Implementation Strategy to Integrate Climate Adaptation District-Wide**

Metropolitan staff presented on the Public Agency Turf Replacement Program at the West Basin Water Association meeting in Carson, CA.

#### **Provide Organizational Stability and Deliver Operational Excellence**

Metropolitan staff set up and attended an implementation kickoff meeting for the settlement agreement with San Diego County Water Authority (SDCWA). At this meeting, staff from both agencies discussed invoice changes necessary to implement the agreement as well as SDCWA's status in soliciting interest from Metropolitan's member agencies under the agreement's first right of refusal.

On November 14, staff hosted a coordination workshop with member agencies, groundwater basin managers, and sanitation districts as part of its interagency collaboration for Metropolitan's 2025 Urban Water Management Plan, which will be due to the State by July 1, 2026. The focus of the workshop was on discussing Metropolitan's technical assumptions and preliminary analysis results.
