OF SOUTHERN CALIFORNIA

Board Report

Water Resource Management Group

• Water Resource Management December Activities

Summary

The Water Resource Management Group, December 2025 Activities as of December 15, 2025

Purpose

Informational

Detailed Report

Execute CAMP4W Implementation Strategy to Integrate Climate Adaptation District-Wide

On December 3, staff participated in a meeting with the City of Long Beach for a progress report on Long Beach's Future Supply Actions Funding Program study. The goal of Long Beach's FSA study is to develop a novel method for optimizing the siting of future groundwater injection and extraction wells. Study results will allow Long Beach to maximize the potential benefits of integrating supplies from Metropolitan's Pure Water Southern California Project into its supply portfolio.

On December 4, staff hosted a board meeting of the Southern California Salinity Coalition (SCSC) at Metropolitan's Water Quality Lab at Weymouth. The meeting included a tour of Metropolitan's shops and other facilities. Staff provided comments on the development of a Salinity Communications Toolbox, which will be a priority project for the SCSC in 2026. Metropolitan is a founding member of the SCSC, and staff participates on the organization's board and other committees.

Provide Organizational Stability and Deliver Operational Excellence

Staff attended the Colorado River Water Users Association (CRWUA) conference. At this three-day annual conference, stakeholders from across the Basin gather to exchange ideas and perspectives on Colorado River use and management with the intent of developing and advocating common objectives, initiatives, and solutions. Staff supported Metropolitan's booth, provided input on the CRWUA Resolutions, attended conference sessions, and met with colleagues on a variety of topics, strengthening partnerships within California and across the Basin.

On December 15, 2025, Metropolitan staff shared a review draft of its 2025 Urban Water Management Plan (UWMP) with the member agencies. This draft UWMP was prepared in compliance with the UWMP Act and California Water Code. Metropolitan made this draft UWMP available as part of continued regional planning coordination and to assist member agencies with the preparation of their UWMPs. Comments received by member agencies will be considered for the Public Review Draft of the 2025 UWMP to be released in February 2026.
