

Engineering, Operations, & Technology Committee

Management Announcements and Highlights

Item 7a

March 9, 2026

Presented by: John Bednarski and Shane Chapman

Engineering Services

CRA Shutdown - Engineering Support

Gene PP transformer annunciator panel installation

Freda Siphon Internal Bands Installation

San Jacinto Diversion Structure Slide Gates Replacement

Iron Mtn. Head Gate Inspection

March 9, 2026

Engineering, Operations, & Technology Committee

Hinds Inlet Manifold Inspection

Item # 7a Slide 3

Career Launch Program

Module #4 – Weymouth Plant Tour

- Workforce Development – 6 Modules
- 14th year since inception
- Total FY 25-26 Participants – 18
- **Grand Total – 257**

Sepulveda Feeder
PCCP Rehabilitation
– Reach 2

HDR Engineering Inc. – New Agreement

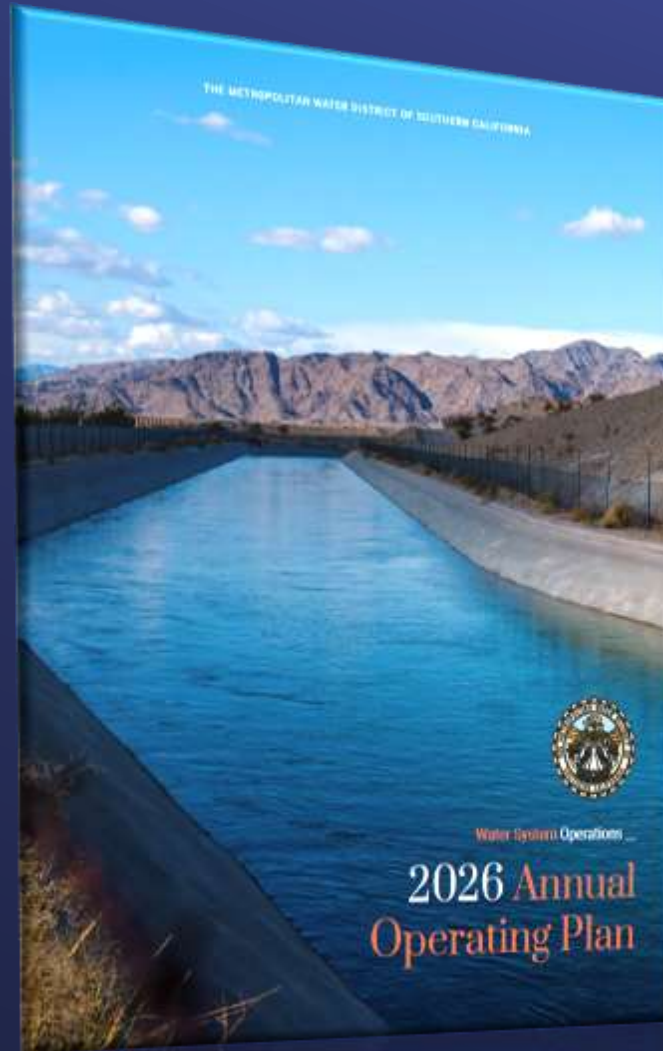

- Board authorized new agreement in Jan 2026 (Item 8-1)
- Prequalified under RFQ No. 1404*
- Engineer of Record
- Scope of Work
 - Construction technical support
 - Review submittals & respond to requests for information
 - Prepare record drawings
- New agreement for a NTE amount of \$1.3 M
- SBE participation level: 25%

* Incorrectly reported as “selected based on RFP No. 1374” in Jan 2026 Board action

Water System Operations

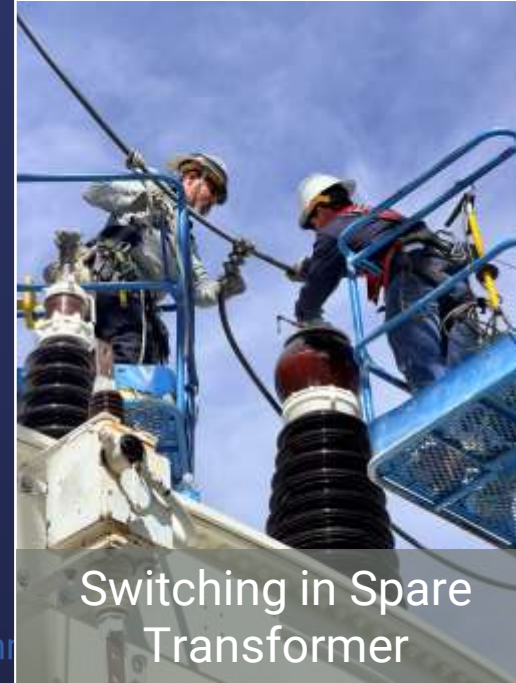

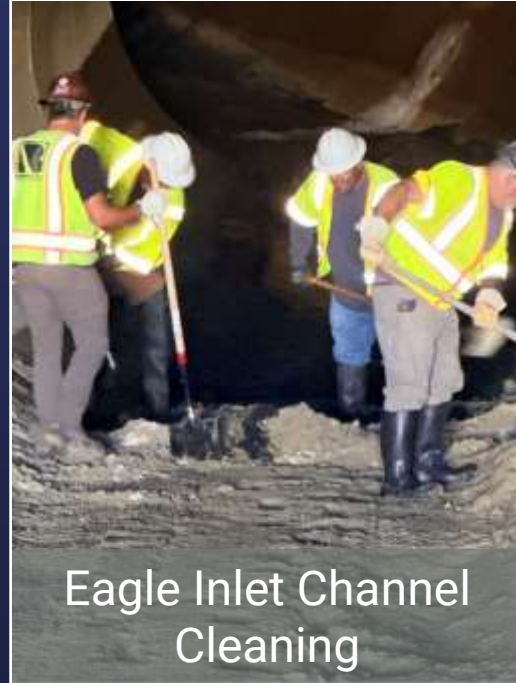

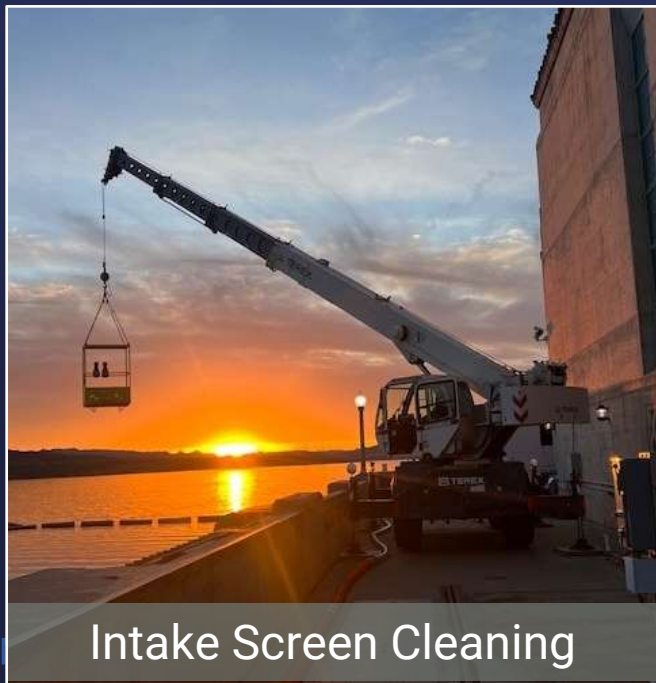

Strategic Operations for Maximum Reliability

2026 Annual Operating Plan

- Review of operations and challenges overcome in 2025
- Plans for a full range of conditions in 2026
- Communicates expected future operations to member agencies and partners

2026 CRA Shutdown – 34 Consecutive Days of Maintenance

Award Winning Water

2026
Weymouth
Silver
Medalist

- 2026 Berkeley Springs International Water Tasting competition
- Over 100 entries from five continents
- Treated water from Weymouth won the silver medal for Best Municipal Water

Managing State Water Project Supplies

Current Operational Conditions

- 2026 State Water Project (SWP) Allocation at 30%
- Colorado River Aqueduct (CRA) at 4-pump flow
- Deliveries to DWCV at 50 cfs and will ramp up to 630 cfs by the end of March
- SWP blend targets are 50% at Weymouth, Diemer, and Skinner
- February 2026 deliveries were 59 TAF, which is 9 TAF lower than February 2025

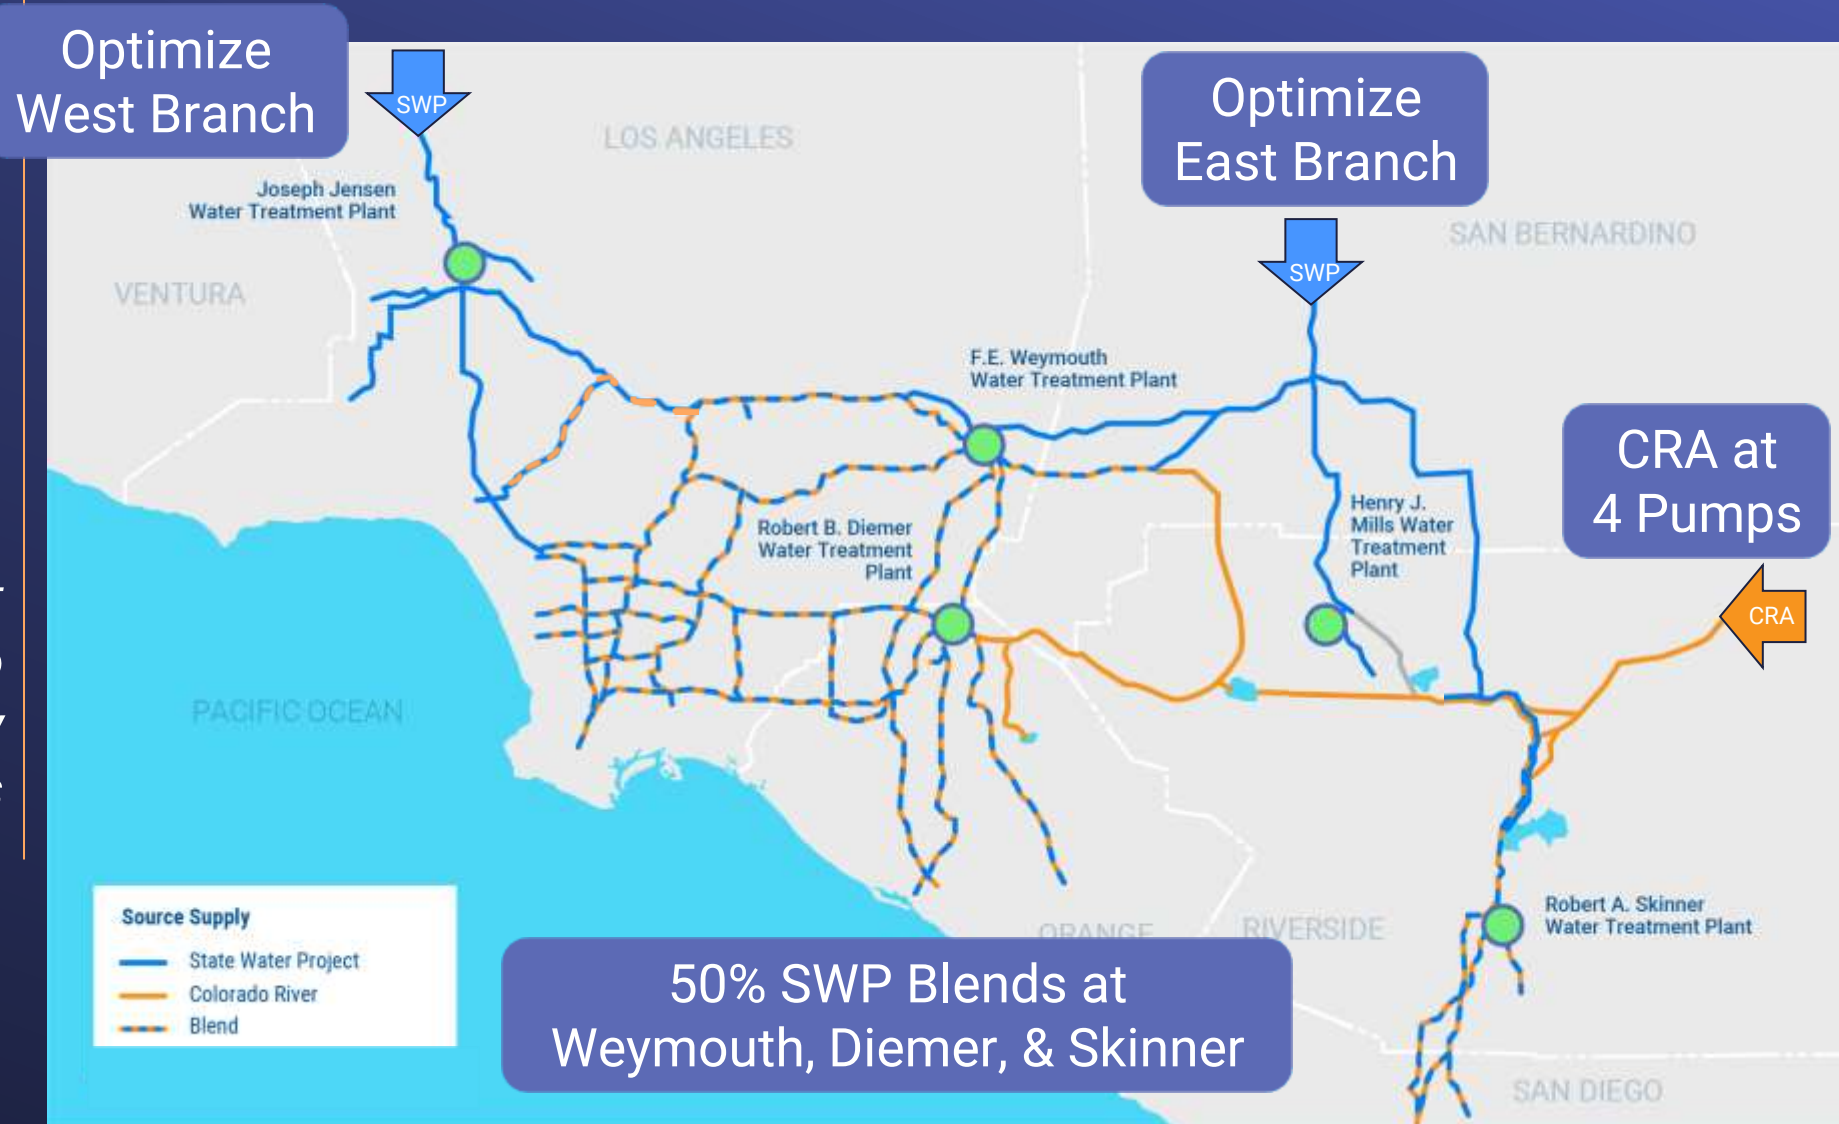

San Jacinto Tunnel Weir Measurement

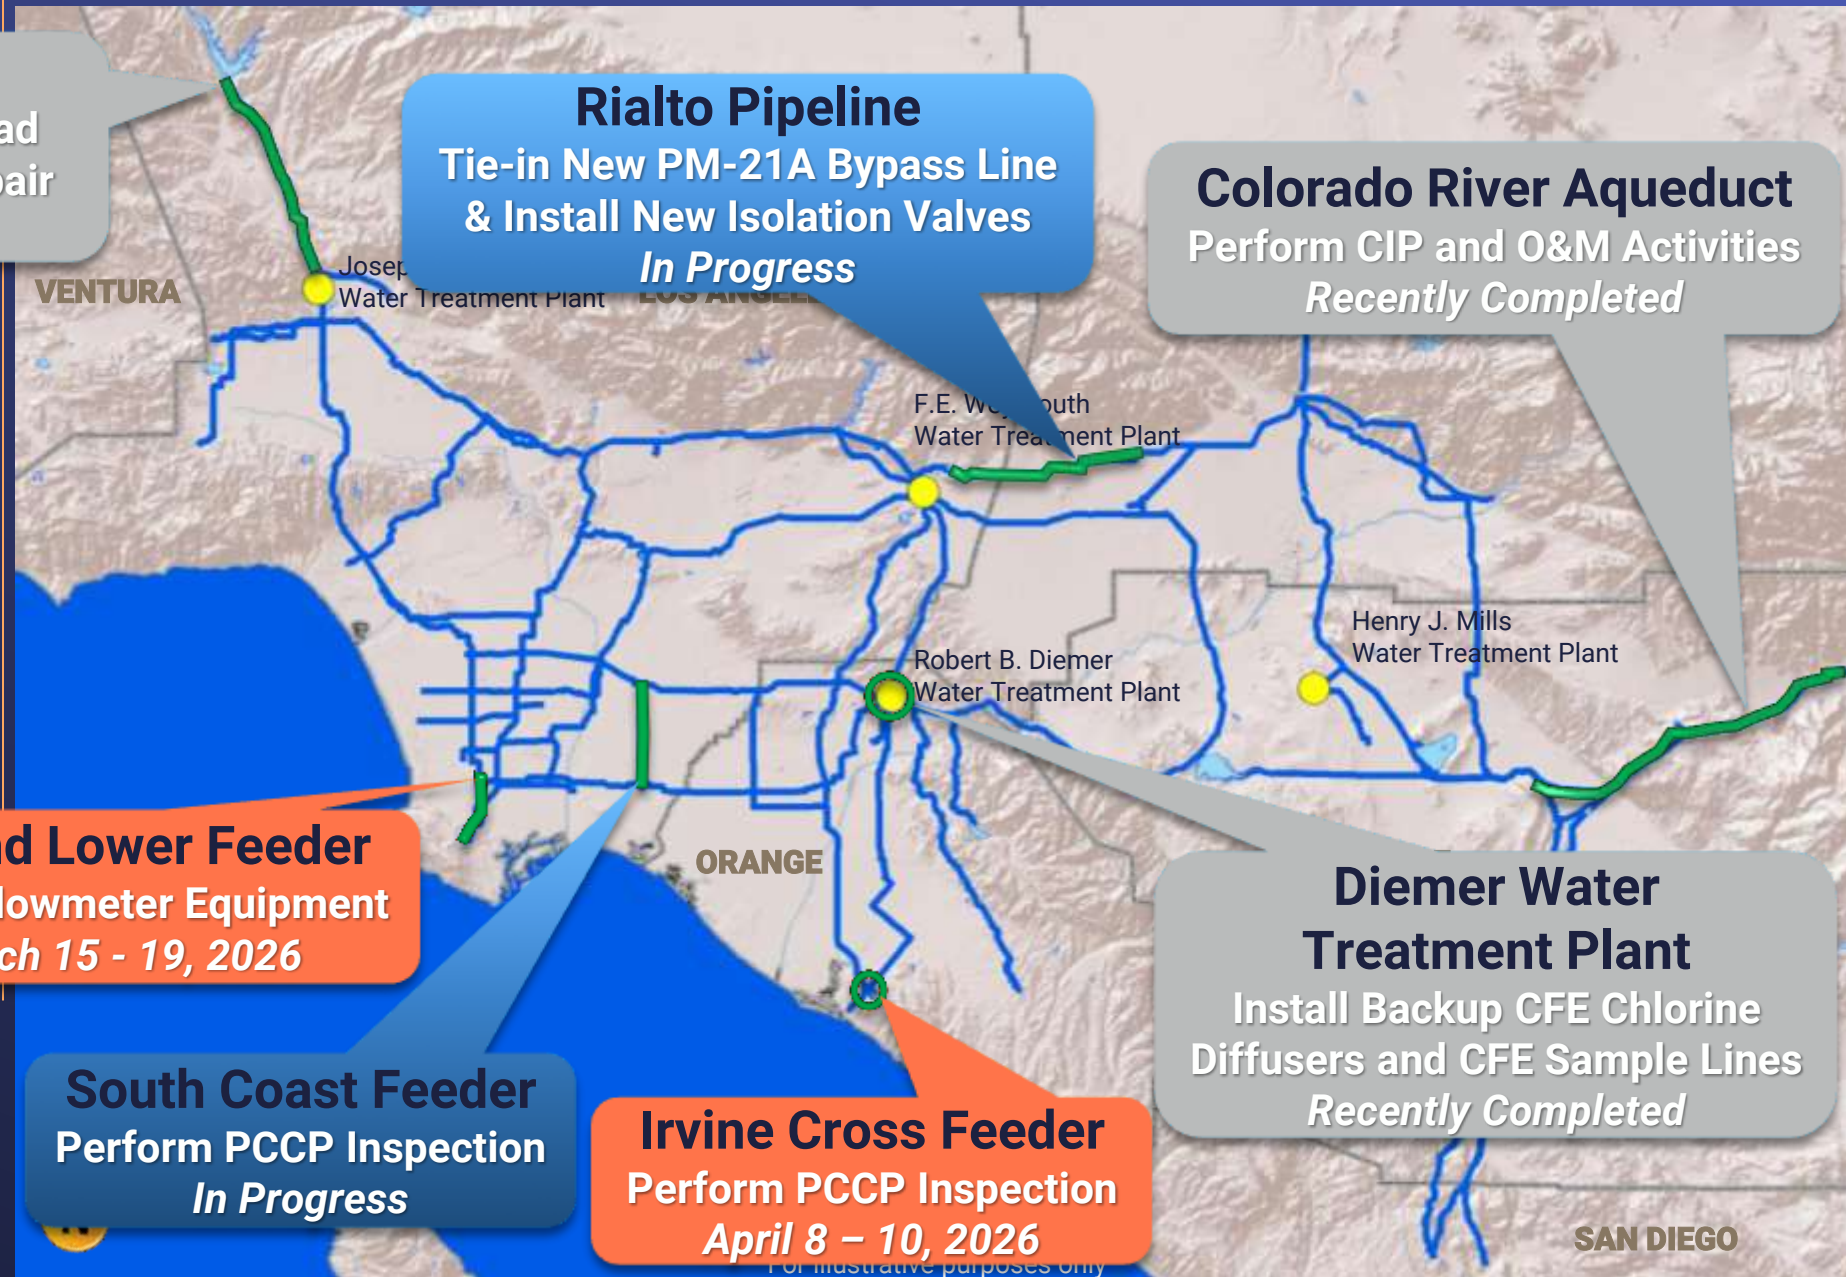

Managing State Water Project Supplies

March 2026 Operations

Preparing to adapt operations to respond to improving water supply conditions

Ensuring Continued System Reliability

Information Technology

Headquarters and Field Wi-Fi Upgrade

The Wi-Fi upgrade is essential to replace aging, unreliable hardware and bring the network up to modern performance and security standards. By deploying a new Meraki platform, the organization gains significantly faster speeds, stronger coverage, and enhanced stability to support growing operational and device demands. This modernization ensures a more secure, scalable, and resilient foundation for current needs and future technology initiatives.

- Replaced legacy access points with modern, high-capacity Meraki units at Jensen
- Reduced dead zones by expanding coverage throughout the facility
- Implemented improved roaming to ensure uninterrupted connectivity across all areas
- Improved security posture through updated encryption and centralized management controls

The LA Basin region is nearing full completion, with only two remaining sites—Soto and Diemer
