1964-2014

LETTER TO  
THE EDITOR

2010  
BEYOND

The Director General of the Department of Health and Human Services, Dr. David Satcher, announced that the Department is launching a new initiative to improve the health of the nation. The initiative is called the "National Health and Medical Research Service" and is designed to provide a comprehensive approach to health care. The service will focus on the following areas:

- **Research and Development:** The service will support research and development in the areas of health care, including the development of new drugs, medical devices, and health care services.
- **Health Care Delivery:** The service will support the delivery of health care services, including the development of new health care services and the improvement of existing health care services.
- **Health Care Financing:** The service will support the financing of health care services, including the development of new health care financing mechanisms and the improvement of existing health care financing mechanisms.
- **Health Care Regulation:** The service will support the regulation of health care services, including the development of new health care regulations and the improvement of existing health care regulations.

The service will be managed by the Department of Health and Human Services, and will be funded by the Federal Government. The service will be a key component of the Department's efforts to improve the health of the nation.

### 2010 & BEYOND

The 50th anniversary of the National Sanitation Foundation is a time to reflect on the progress made in the field of sanitation and the challenges that remain. The foundation has been instrumental in the development of the water supply, the sewerage system, and the solid waste management system. The foundation has also been instrumental in the development of the water supply, the sewerage system, and the solid waste management system. The foundation has also been instrumental in the development of the water supply, the sewerage system, and the solid waste management system.
