

One Water Committee

Non-functional Turf Efforts Update

Item 9-3 August 15, 2022 Four Options for Metropolitan to Explore

Advancing Regional Non-functional Removal

- Incentives-based
- Sample ordinance / Board resolution
- New water allocation methodology for drought emergency
- State legislation

Non-Functional Turf Efforts

Defining Non-Functional Turf

- Options to define NFT
 - SWRCB developed
 - SNWA developed
 - MWD to be developed
- Generally includes:
 - Potable water irrigation only
 - CII turf not used for recreation / community gathering
 - Tree health considerations
 - Exclusion of residential turf

Non-functional Turf Removal Incentives

Turf Replacement Program Incentive Structure Change

Increased Turf Replacement Program Incentive

- Grants received to increase incentive
- Potential further temporary increase in incentive
- Decrease incentive over time as ordinances/legislation are passed
- Continue to seek outside funding to achieve effort

Non-functional Turf Ordinance Development

Non-Functional Turf Ordinance Development

What Can Metropolitan do to Encourage Ordinance Adoption?

- Cities have water efficiency ordinances
 - Most have permanent ban section
- MWD could provide sample language
- MWD Board resolution encouraging adoption of ordinance language

Non-Functional Turf Ordinance Development (continued)

Ordinance Language Options

- Language that could be included:
 - Permanent ban on irrigating NFT with potable water
 - Permanent ban on installation of turf on new development
 - Removal of NFT on CII properties by a specific date
 - Exceptions
 - Tree health
 - HOA community spaces

Non-Functional Turf Ordinance Enforcement

Enforcement Funding

- Enforcement funds available in MAAP
- Create new category of MAAP funding for NFT ordinance enforcement
- Funded activities may include:
 - Outreach/marketing
 - Enforcement patrol
 - Fine / penalty administration

Proposed Water Allocation Methodology

Proposed Water Allocation Methodology

Change to Emergency Water Allocation Methodology

- No water allocation from MWD supply for NFT during declared emergency
- Utilize turf dashboard currently in development by Dr. Marx
- Additional data would need to be provided by water agencies

Statewide Legislation to Ban Watering of Non-Functional Turf

Non-Functional Turf Legislation

Current Legislation

- Conservation Emergency Regulation
 - Adopted by SWRCB on May 24, 2022
 - In effect from June 10, 2022 June 10, 2023
 - Bans watering of NFT on CII properties with potable water
 - Does not include recreation or community space
 - Exception for tree health

Non-Functional Turf Legislation Other State Efforts

Nevada Assembly Bill 356

- Prohibits SNWA/Colorado River water supplies from watering NFT by 2027
- "Non-functional Turf" means irrigated lawn grass area not meeting definition of Functional Turf
- Functional Turf
 - Grass area providing recreational benefit
 - At least 10 feet from the street
 - Less than 25% slope
 - Not medians, parkways, or entryways
 - Includes residential, pet areas, athletic fields, play areas

Non-Functional Turf Legislation

Benefits of Introducing Legislation

- Current drought conditions provide an opportunity for effective change
- Legislation sends unified message with statewide outreach and marketing
- Stronger enforcement
- Greater long-term benefits and higher reduction in water use

NFT Option Snapshot

Option	Benefits	Considerations
Incentives	 Motivates CII customers to remove NFT Takes advantage of policy window opened by SWRCB emergency regulations banning irrigation of NFT 	 De-escalation needs ordinance/legislation to promote change Budget considerations
Ordinances	 Codifies ban on NFT irrigation Allows local control Municipalities can adjust language as needed for their specific situation 	 NFT definition could vary widely Difficult to understand why large differences between municipalities Relies on municipalities to adopt/enforce
Allocation Methodology in Drought Emergency	 Removes NFT irrigation from water demand during declared emergencies Provides water for HH&S / other needs 	 Additional data needed from member agencies Complex
Legislation	 Statewide or regional ban on NFT Unified message and outreach Higher expected water savings Greater compliance/enforcement 	 Buy-in needed from state reps and other agencies/organizations Lengthy process Difficult to develop statewide approach given California's diversity climate & community values

Next Steps

- Receive Board feedback on presented options
- Continue efforts to seek outside funding of turf replacement program
- Continue developing NFT dashboard to assist MAs with decision-making
