## Metropolitan Water District of Southern California State Legislation Matrix May 8, 2023 – First Year of Legislative Session

Bill Number Author	Amended Date Location	Title-Summary	MWD Position	Effects on Metropolitan
AB 400 B. Rubio (D – Baldwin Park)  Sponsors: California State Association of Counties, League of California Cities	Amended 5/1/2023 Assembly Appropriations Committee	Local agency design-build projects: authorization.  This measure would extend the existing sunset date to January 1, 2031, for the use of design-build as a delivery method for public works contracts and allow the use of design-build to continue indefinitely.	Based on October 2021 Board Action	Metropolitan's current authority to use design-build under AB 1845 (Calderon, CH. 275, 2022) will sunset on January 1, 2028. The provisions of this bill would allow Metropolitan to use design-build for future projects through January 1, 2031.
AB 1572 Friedman (D - Glendale)  Sponsors: Heal the Bay, National Resources Defense Council	Amended 4/20/23 Assembly Appropriations Committee	Potable water: nonfunctional turf. This measure prohibits the use of potable water for the irrigation of non-functional turf located on commercial, industrial, institutional and multifamily residential properties by specified dates. This measure would also require the State Water Resources Control Board to establish compliance and certification requirements by July 1, 2025.	Support and Consider Co- Sponsorship if amended  Based upon April 2023 Board action	This bill's intent is consistent with Metropolitan's efforts to conserve water and reduce non-functional turf in the service area. Based on input from the Board and member agencies, Metropolitan is seeking amendments to exclude multi-family residential buildings, clarify definitions of terms, secure funding for institutional customers in disadvantaged communities and protect the authority and local control of public water systems.
AB 1573 Friedman (D - Glendale)	Amended on 3/23/2023  Assembly Appropriations Committee: 5/03/2023 hearing	Water conservation: landscape design: model ordinance.  This measure would require the updated model water efficient landscape ordinance for all plants installed in new or renovated nonresidential areas to be at least 75% local native plants and have a 0.3 plant factor. This measure would also prohibit the use of nonfunctional turf in nonresidential landscape projects after January 1, 2026.	Support, if Amended  Based upon 2023 Legislative Priorities and Principles, adopted December 2022	This measure is consistent to Metropolitan's effort to address the reduction of nonfunctional turf within its service area. Metropolitan staff have identified implementation challenges due to a requirement for 75 percent local native plants and 3 plant factor and are working with the author and sponsor to address the concerns.  Metropolitan is seeking clarifying amendments that include: (1) removal of the .3 plant factor, (2) reduction of the native plant requirement from 75 percent to 50 percent, with a phased approach from 25 percent up to 50 percent, and (3) require water efficient irrigation methods.
