# The Metropolitan Water District of Southern California

The mission of the Metropolitan Water District of Southern California is to provide its service area with adequate and reliable supplies of high-quality water to meet present and future needs in an environmentally and economically responsible way.

**Board of Directors - Final** 

April 8, 2025

12:00 PM

Tuesday, April 8, 2025 Meeting Schedule	
08:30 a.m. FAAME 10:15 a.m. LEGAL 11:30 a.m. Break 12:00 p.m. BOD 01:30 p.m. CWC	

Agenda

Agendas, live streaming, meeting schedules, and other board materials are available here: https://mwdh2o.legistar.com/Calendar.aspx. Written public comments received by 5:00 p.m. the business days before the meeting is scheduled will be posted under the Submitted Items and Responses tab available here: https://mwdh2o.legistar.com/Legislation.aspx.

If you have technical difficulties with the live streaming page, a listen-only phone line is available at 1-877-853-5257; enter meeting ID: 891 1613 4145.

Members of the public may present their comments to the Board on matters within their jurisdiction as listed on the agenda via teleconference. To participate via teleconference 1-833-548-0276 and enter meeting ID: 815 2066 4276 or to join by computer <u>click here</u>.

MWD Headquarters Building • 700 N. Alameda Street • Los Angeles, CA 90012

### 1. Call to Order

- a. Invocation: Director Larry D. Dick, Municipal Water District of Orange County
- b. Pledge of Allegiance: Director Jay Lewitt, Las Virgenes Municipal Water District
- 2. Roll Call
- 3. Determination of a Quorum
- 4. Opportunity for members of the public to address the Board on matters within the Board's jurisdiction. (As required by Gov. Code §54954.3(a))
- 5. OTHER MATTERS AND REPORTS

### **Board of Directors**

Α.	Report on Directors' Events Attended at Metropolitan's Expense	<u>21-4393</u>

- **B.** Nomination and Election of nonofficer member of the Executive <u>21-4399</u> Committee for remaining two-year term effective March 11, 2025
- C. Approve Committee Assignments

### 7. CONSENT CALENDAR ITEMS - ACTION

7-1 Authorize an increase to a professional services agreement with Grid Subject Matter Experts, LLC for a new not-to-exceed total amount of \$1.245 million for electric transmission planning and North American Electric Reliability Corporation-related electric reliability compliance services; the General Manager has determined the proposed action is exempt or otherwise not subject to CEQA (EOT)

<u>Attachments</u>: 04082025 EOT 7-1 B-L 04072025 EOT 7-1 Presentation

7-2 Authorize an agreement with Red8 in an amount not to exceed \$850,000 for the implementation of the Data Storage Infrastructure Refresh project; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (EOT)

<u>Attachments</u>: 04082025 EOT 7-2 B-L 04072025 EOT 7-2 Presentation

### **Board of Directors**

Page 4

7-3 Authorize an agreement with Metal Toad Media, Inc. for a new fixed cost of \$299,000 per year with a not-to-exceed amount of \$996,200 for the duration of the three-year agreement to host, manage, and maintain Metropolitan's external websites; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (EOT)

Attachments: 04082025 EOT 7-3 B-L 04072025 EOT 7-3 Presentation

7-4 Authorize an increase of \$3.3 million to an existing agreement with Stantec Consulting Services Inc. for a new not-to-exceed total amount of \$4.99 million for final design of a mechanical dewatering facility at the Joseph Jensen Water Treatment Plant; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (EOT)

Attachments: 04082025 EOT 7-4 B-L 04072025 EOT 7-4 Presentation

 7-5 Authorize an amendment to a reimbursable agreement with BH Luxury Residences LLC for the relocation of the Santa Monica Feeder within the city of Beverly Hills; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (EOT)

<u>Attachments</u>: 04082025 EOT 7-5 B-L 04072025 EOT 7-5 Presentation

**7-6** Approve Climate Adaptation Master Plan for Water Five-Year Implementation Strategy; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (FAAME)

Attachments: 04082025 FAAME 7-6 B-L 04082025 FAAME 7-6 Presentation 7-7 Adopt resolutions fixing and adopting a Readiness-to-Serve <u>21-4420</u> Charge and a Capacity Charge for calendar year 2026; the General Manager has determined the proposed action is exempt or otherwise not subject to CEQA (FAAME)

Attachments: 04082025 FAAME 7-7 B-L 04082025 FAAME 7-7 Presentation 9372 Resolution.pdf 9373 Resolution.pdf

7-8 Approve amendments to the Metropolitan Water District Administrative Code to conform oversight of the General Auditor and Audit Department duties and responsibilities to the current committee structure, to streamline reporting on professional services agreements, and make a minor non-substantive change; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (LEGAL)

<u>Attachments</u>: 04082025 LC 7-8 B-L 04082025 LC 7-8 Presentation

 7-9 Express support if amended for AB 523 (Irwin) Metropolitan water districts: alternate representative; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (LEG)

Attachments: 04082025 LEG 7-9 B-L 04072025 LEG 7-9 Presentation

7-10 Approve the Metropolitan Water District of Southern California's salary schedules pursuant to CalPERS regulations; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (OPE)

<u>Attachments</u>: <u>04082025 OPE 7-10 B-L</u> <u>04082025 OPE 7-10 Presentation</u>

 7-11 Authorize the General Manager to extend California Contractor Forbearance for Intentionally Created Surplus; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (OWA)

Attachments: 04082025 OWA 7-11 B-L 04072025 OWA 7-11 Presentation Page 6

7-12 Authorize the General Manager to terminate the Foothill Area Conjunctive Use Program Agreement; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (OWA)

Attachments: 04082025 OWA 7-12 B-L 04072025 OWA 7-12 to 7-17 Presentation

7-13 Authorize the General Manager to terminate the Live Oak Basin Conjunctive Use Program Agreement; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (OWA)

Attachments: 04082025 OWA 7-13 B-L 04072025 OWA 7-12 to 7-17 Presentation

 7-14 Authorize the General Manager to terminate the Long Beach Conjunctive Use Program Agreement; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (OWA)

Attachments: 04082025 OWA 7-14 B-L 04072025 OWA 7-12 to 7-17 Presentation

7-15 Authorize the General Manager to terminate the Long Beach Expansion into Lakewood Conjunctive Use Program Agreement; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (OWA)

Attachments: 04082025 OWA 7-15 B-L 04072025 OWA 7-12 to 7-17 Presentation

 7-16 Authorize the General Manager to terminate the Orange County Conjunctive Use Program Agreement; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (OWA)

<u>Attachments</u>: 04082025 OWA 7-16 B-L 04072025 OWA 7-12 to 7-17 Presentation Page 7

7-17 Authorize the General Manager to terminate the Compton Conjunctive Use Program Agreement; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

Attachments: 04082025 OWA 7-17 B-L 04072025 OWA 7-12 to 7-17 Presentation

7-18 Authorize increase in the maximum amount payable under contract with outside counsel Liebert, Cassidy Whitmore, in the amount of \$200,000 for a total amount not to exceed \$450,000; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA (LEGAL)

Attachments: 04082025 LC 7-18 B-L 04082025 LC 7-18 Presentation

### \*\* END OF CONSENT CALENDAR ITEMS \*\*

### 8. OTHER BOARD ITEMS - ACTION

8-1 Adopt the CEQA determination that the proposed action was previously addressed in the certified 2024 Program Environmental Impact Report and authorize an increase of \$12.4 million to an agreement with La Cañada Design Group Inc. for a new not-to-exceed total amount of \$16.8 million for final design to upgrade the Michael J. McGuire Water Quality Laboratory (EOT)

<u>Attachments</u>: 04082025 EOT 8-1 B-L 04072025 EOT 8-1 Presentation

8-2 Report on litigation in Maria Carmen Zarate v. Metropolitan Water District of Southern California, Los Angeles County Superior Court Case No. 23STCV15786; and authorize an increase in the maximum amount payable under contract for legal services with Seyfarth Shaw LLP, in the amount of \$250,000 for a total amount not to exceed \$750,000; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA [Conference with legal counsel—existing litigation; to be heard in closed session pursuant to Gov. Code Section 54956.9(d)(1)] (LEGAL)

### 9. BOARD INFORMATION ITEMS

### 10. OTHER MATTERS

NONE

### 11. FOLLOW-UP ITEMS

NONE

### 12. FUTURE AGENDA ITEMS

### 13. ADJOURNMENT

NOTE: Each agenda item with a committee designation will be considered and a recommendation may be made by one or more committees prior to consideration and final action by the full Board of Directors. The committee designation appears in parenthesis at the end of the description of the agenda item, e.g. (EOT). Board agendas may be obtained on Metropolitan's Web site https://mwdh2o.legistar.com/Calendar.aspx

Writings relating to open session agenda items distributed to Directors less than 72 hours prior to a regular meeting are available for public inspection at Metropolitan's Headquarters Building and on Metropolitan's Web site https://mwdh2o.legistar.com/Calendar.aspx.

Requests for a disability-related modification or accommodation, including auxiliary aids or services, in order to attend or participate in a meeting should be made to the Board Executive Secretary in advance of the meeting to ensure availability of the requested service or accommodation.

### April 8, 2025 Board Meeting

Item 5A

### Metropolitan Water District of Southern California Summary of Events Attended by Directors at Metropolitan's Expense in March 2025

Date(s)	Location	Meeting Hosted by:	Participating Director(s)
March 12	San Jacinto, CA	MWD – San Jacinto Tunnel Naming Dedication event in honor of Randy Record	Gloria Gray
March 20	Costa Mesa, CA	MWDOC 2025 Water Policy Forum & Dinner	Brenda Dennstedt
March 24 – 27	Sacramento, CA	2025 ACWA Legislative Symposium	Miguel Luna

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

### **Board Report**

### • Chair of the Board Adán Ortega Jr.'s Monthly Activity Report – March 2025

### Summary

This report highlights my activities as Chair of the Board, as well as Board Member highlights during the month of March 2025 on matters relating to The Metropolitan Water District of Southern California's business.

### **Monthly Activities**

### **Key Activities**

 Attended the San Fernando City Council meeting, providing updates on policy initiatives, including advancements in the Pure Water Southern California project and progress on the Climate Adaptation Master Plan for Water (CAMP4Water). I also highlighted Metropolitan's preparedness to meet the region's 2025 water needs and shared information on conservation programs, rebates, and educational resources for residential and commercial users.

I attended Metropolitan's San Jacinto Tunnel Naming Dedication event in honor of Randy Record, who chaired Metropolitan's Board of Directors from 2014 to 2018 and served on the Board for two decades, representing Eastern Municipal Water District. I joined other members of the Metropolitan family along with Randy Record and his family, and members of the community who celebrated his achievements and accomplishments. I wish to express my appreciation to former Board Chair Gloria Gray for accepting my invitation to introduce Randy Record at the event. Board Vice Chair Michael Camacho provided opening remarks stating that his deep knowledge of water, commitment to doing the right thing, and tireless efforts to maintain strong relationships with our communities made him an inspiring leader and colleague. Our General Manager, Deven Upadhyay, also reflected on Metropolitan's accomplishments during Randy Record's terms as Board Chair. In attendance were also Board Members Stephen Faessel, Jeff Armstrong, Anthony Fellow, Brenda Dennstedt, Dennis Erdman, Cynthia Kurtz, Jacquelyn McMillan, and former Director Glenn Peterson. Former General Manager Ron Gastelum was also in attendance.

- General Manager Deven Upadhyay and I were invited to attend the Los Angeles-MWD Directors Caucus Meeting at Los Angeles City Hall, where we discussed Metropolitan's policy priorities as well as regional water supply and stewardship initiatives.
- Recorded a podcast for "Watershed Moments" which is produced by the San Bernardino Valley Municipal Water District and hosted by their General Manager, Heather Dyer. Ms. Dyer asked me to summarize the history and mission of Metropolitan in providing water delivery to Southern Californians; we also discussed water affordability, addressing the needs of older, smaller and poorer communities, as well as our leadership philosophies. I emphasized the need for continued efforts to develop solutions for the future to address climate

impacts and vulnerabilities facing the region's water system and the communities served to advance strategies for an equitable and resilient water future.

 I met with newly elected Councilmember Patricia Lopez from the City of San Fernando to discuss strategies for engaging the residents and council members to learn more about our organization and its initiatives. We were joined by Metropolitan's Education Team Manager, Benita Horn, and explored the opportunities made available to schools and the community to impart water knowledge. Our discussion also highlighted key initiatives, including the Community Partnership Program, Workforce Education, and the Conservation Program, as avenues for greater collaboration and community involvement.

• Joined General Manager Deven Upadhayay and Chief Sustainability Officer Liz Crosson in briefing the City of Anaheim's Public Utilities Board. We addressed the interrelation between CAMP4Water, the Biennial Budget Process, Bay-Delta Issues, and the Colorado River, as well as our collective efforts addressing the State Water Project Exclusive Areas challenges. We thanked the Board, including Anaheim's representative on Metropolitan's Board, Director Stephen Faessel, for his leadership through his years of service to Metropolitan.

### **Regularly Scheduled/Ongoing Meetings**

I continue to meet regularly to review the Board's organizational issues and coordinate activities with the Board Vice Chairs, the General Manager, and his executive team.

# General Manager's Monthly Report

Activities for the Month of March 2025

Executive Summary	10-12
Reflections	13
Water Supply Conditions Report	14
Reservoir Report	15

### Message from the General Manager

As we close out March, we are nearing the completion of several essential and intensive repair and maintenance projects, including the shutdown of the Colorado River Aqueduct (CRA). This operation involved completely turning off one of the region's main supplies of water and deploying hundreds of staff and experts to inspect, rehabilitate and repair this massive system.

While the CRA is the highest profile of our annual projects, it represents just one of many essential projects underway across the District. From replacing aging valves along the Middle Feeder to the sleeve valve refurbishments that were schedule to coincide with our member agency's relining work along the San Diego Pipeline, our work comes in all shapes and sizes. These projects are planned months in advance and yet can also require immediate mobilization in response to unforeseen needs and emergencies. They involve procurement from overseas suppliers as well as custom fabrication in our own shop in La Verne. The work is both routine and innovative, with every step backed by community engagement, staff and safety training, and member agency coordination.

The end of a shutdown doesn't mean the work is done. We are constantly tuning up the system while it's in full operation. For example, following the CRA shutdown, we will begin the demolition phase of a project to replace and upgrade domestic water treatment systems at all five CRA pumping plants, an initiative set to be completed by this time next year.

In addition to these ongoing projects, the District is facing additional challenges related to emerging contaminants, cybersecurity and impacts from a rapidly changing climate. These challenges demand innovative approaches and new investments. Two current initiatives are a district-wide, mandated transition to Zero Emission Vehicles (ZEV), and upgrading and replacing the power line to our Black Metal Mountain communication site.

It takes a skilled and experienced team to design, oversee and complete the work needed to ensure Metropolitan meets its mission of delivering reliable high-quality water to Southern California in an environmentally and economically responsible way. Our team is constantly proving itself up to the task and investing today to minimize risk tomorrow.

Deven Upadhyay General Manager

The General Manager's Strategic Priorities guide actions in key areas of change and opportunity that will strengthen Metropolitan and its ability to fulfill its mission. Review the General Manager's <u>Business Plan for FY24-25</u> and the <u>"SMART Tracker"</u> dashboard of specific actions that advance the Strategic Priorities.

# Empower the workforce and promote diversity, equity, and inclusion

### Goal Dashboard

8 Outcomes in progress and on target.

Build a safe, inclusive, and accountable workplace where all employees feel valued, respected, and able to meaningfully contribute to decisions about their work to fulfill Metropolitan's Mission.

A new dashboard is being piloted to streamline transparency and reporting of safety data. A curriculum is being developed in partnership with the National Safety Council to provide safety leadership training. Roughly 80 percent of all employees have taken the Civil and Inclusive Workplace training. In partnership with DEI and HR, Metropolitan staff are developing the agenda for next year's training needs, including for managers and new hires.

Ethics Office was featured in the March meeting of Group Managers, leading a discussion about the prohibition on certain Board member communications to prevent the perception of unethical influence.

Prepare and support the workforce by expanding training and skill development and updating strategies to recruit and retain diverse talent, to meet the evolving needs and expectations of the workplace.

Completed four of six modules in Career Launch Program to support career development within Metropolitan. Module 4 included a tour of the Weymouth Treatment Plant, Water Quality Lab, MSU Shops and Field Engineering Bldg.

In addition to engagement on Workforce Development with Native Nations, Metropolitan continues a focus on veterans in collaboration with the Employment Development Department, engaging in the Careers in Water Webinar for Veterans with member agencies Long Beach and LADWP, in support of veterans exploring careers in the water sector and the Veteran Job Fair in Woodland Hills to support veteran employment initiatives. Metropolitan staff also partnered with Unite LA to present a Step into Tech webinar on IT and cybersecurity careers for young adults, and an Alumni Panel for USC Viterbi School of Engineering. Staff participated in the Los Angeles Regional Consortium (LARC) Careers in Water Webinar in partnership with City of Glendale Water & Power, Central Basin MWD, Las Virgenes

Water District, WRD, and Beverly Hills. LARC represents 19 community colleges in Los Angeles County. Additionally, Metropolitan has convened the Member Agency Workforce Development Working Group, which has held two meetings in March 2025.

# Sustain Metropolitan's mission with a strengthened business model

### Goal Dashboard

5 Outcomes in process. 1 Outcome behind schedule.

Develop revenue and business model options that support the needs of the member agencies as well as Metropolitan's financial sustainability and climate adaptation needs.

Business model refinement working groups met and focused discussion on water exchanges, local resource program, treatment surcharge, reserve policies, and engineering resilience. The GM Ad Hoc group met to advance refinement proposals and prepare for a presentation to the CAMP4W Taskforce, anticipated for April.

### Identify and secure programmatic cost savings, organizational efficiencies and external funding.

The Large-Scale Recycled Water Program grant for Pure Water Southern California was executed with US Bureau of Reclamation (USBR) in January. In March, Metropolitan submitted the first two invoices to USBR, for \$63M in pre-award expenditures, and received \$15.6M in reimbursement. Pure Water Grant Funding

Metropolitan has begun to receive federal funding that was awarded but, as with all federal grants, had been uncertain due to Executive Orders.

Adapt to changing climate and water resources

### Goal Dashboard

10 Outcomes in process. 1 Outcome behind schedule.

### **Provide each member agency access to an equivalent level of water supply reliability.**

The CAMP4W Task Force reviewed and discussed the CAMP4W Implementation Strategy. Discussions focused on the adaptive management process for decision-making as well as the components and five-year timelines in the Implementation Strategy. The Task Force advanced the Implementation Strategy to the FAAME Committee and Board for consideration in April. Approval would provide staff direction to assess eligible projects and programs using the CAMP4W evaluative criteria and follow the implementation timelines for the development of new and enhanced climate adaptation strategies.

As part of the discussion of the Implementation Strategy, WRM presented an overview of Local Resource Program (LRP) production, potential projects and performance. This understanding of current conditions and challenges facing member agency projects is an important starting point for further exploration of LRP opportunities.

Task Force review advances CAMP4W Implementation Strategy to Committee and full Board.

Made progress on several projects to enhance long-term water supply reliability for the State Water Project dependent areas:

- Sepulveda Pump Stations Phase 1 is 96 percent complete. Staff is currently negotiating terms and conditions for Phase 2 work with the Progressive Design-Build (PDB) entity.
- Wadsworth Pump Plant Bypass The contractor began installing guard rails on valve structure. Construction is 93% complete and is scheduled to be complete in June 2025.
- Inland Feeder Badlands Tunnel Surge Protection The contractor is backfilling the area surrounding the valve vault. Construction is approximately 80 percent complete and is scheduled to be complete in June 2025.
- Surface Water Storage Study, Phase 2 The study is 87 percent complete with a shortlist of potential sites identified and a set of proposed evaluation criteria. The Phase 2 study is anticipated to complete by June 2025.

General Manager's Monthly Report

Advance the long-term reliability and resilience of the region's water sources through a One Water approach that recognizes the interconnected nature of imported and local supplies, meets both community and ecosystem needs and adapts to a climate change.

#### Imported Water – Colorado River

Metropolitan and IID met to advance negotiations for intra-state agreements for sharing shortages in California. The goal now is to reach agreement by end of June 2025.

#### **Climate Action**

Work continues on multiple strategies in the Climate Action Plan. To support the transition to zero emission vehicles (ZEVs), Metropolitan joined the Advanced Clean Transportation Fleet Forum, which provides educational opportunities for staff involved in the ZEV project. SRI and Engineering held a four-day ZEV infrastructure workshop to review infrastructure design for vehicle charging at Union Station that will be used by fleet, employees, and Metropolitan board members. At the end of the workshop, employees presented potential design improvements that included cost estimates. Construction is scheduled to begin in early 2026.

The Climate Action Plan Annual Progress Report is planned to be released on Earth Day, April 22, 2025.

#### **Demand Management**

The MWD/Member Agency Water Use Efficiency coordinator meeting took place in March. The California Water Efficiency Partnership (Calwep) Plenary was also held in March, presentation by the State Water Board on the CAACWOL legislation. They shared updates. This meeting featured a presentation on the data collected so far, discussed common challenges, and explained how the state is understanding the information reported. The first set of data they have received will help guide ongoing implementation.

Staff is gearing up for the One Water Awards event, scheduled for May 21. All interviews for- the honoree videos have been completed. Save the Dates have been sent out, including to the Board of Directors, MWD executive leadership, and general managers for our member agencies. The official invitation with the sign-up link will be sent out in April, one month before the event.

### Pure Water

Metropolitan met with the Central Arizona Project on the potential investment in the Pure Water program. A workshop was also held with Los Angeles County Flood Control District, the Main San Gabriel Basin Water Master, Upper San Gabriel Municipal Water District, and Three Valley Municipal Water District to explore the alternative recharge basin options.

Development of request for qualifications (RFQs) for progressive design build (PDB) of the advanced water purification facility and Construction Manager/General Contractor (CM/GC) for the initial two pipeline reaches is in progress. A market sounding for pipeline Reach 1 and Reach 2 CM/GC was conducted in March, to be followed by advertisement this summer.

The Conceptual Design Report for Pure Water Conveyance Facilities is anticipated to be complete in the next couple months. Preliminary design of the first two pipeline reaches is anticipated to be complete later this year. Current work includes utility and geotechnical investigations, incorporating value engineering comments to increase the amount of tunneling in the first reach, and development of preliminary design report and drawings.

(continued)

Protect public health, the regional economy, and Metropolitan's assets

### Goal Dashboard

9 Outcomes in process and on target.

Proactively identify, assess, and reduce potential vulnerabilities to Metropolitan's system, operations, and infrastructure.

The installation for the DVL emergency monitoring system upgrade began on March 10, and its forecasted completion is on target. The monitoring system for Garvey has been installed, as previously reported.

Staff are finalizing a Risk and Resiliency Assessment with outside professional support.

The final preliminary design of the Water Quality Lab seismic retrofit was completed this month, and the request to proceed with final design will be presented to the Board in April.

Staff is preparing for an April workshop to prepare the CIP and have incorporated climate impacts and benefits into the updated CIP scoring criteria to better prioritize projects for the next biennium.

Apply innovation, technology, and sustainable practices across project lifecycles.

Contracting Services is finalizing training materials for a new procurement policy that prioritizes sustainable products and practices, currently under Legal review; a Unit-level training is planned in April.

This month Innovation Program staff hosted the Spring Western Water Technology Approval Group (TAG). With over 300 participating utilities globally, TAG's peer collaboration helps reduce the risk of adopting new technologies. The meeting included a guided visit to areas impacted by the Altadena fires to illustrate the criticality of emergency preparation and climate resiliency.

Innovation staff also partnered with Dr. Seyoum Gebremariam in Water Quality to present his real-time remote sensing work on cyanobacteria detection to the Utility Innovation Network, a group of peer water managers across the country.

Meanwhile, the second internal Met Data Group meeting fostered cross-organizational collaboration by showcasing excellent staff-led data work. Met's Innovation team has begun collaborating with business units to develop the Met Innovation Strategic Plan, ensuring alignment with organizational priorities.

A Member Agency Water Quality Managers meeting this month attracted over 140 participants. Presentations and discussion covered quagga and golden mussels in the State Water Project, a newly identified chloramine disinfection byproduct called chloronitramide, a regulatory update and the wildfire impacts on water systems. Our annual nitrification workshop will be scheduled for summer.

Partner with interested parties and the communities we serve

### Goal Dashboard

5 Outcomes on target. 1 Outcome uncertain pending federal developments.

Grow and deepen collaboration and relationships among member agencies, interested parties and leaders on the issues most important to them and toward mutual and/or regional benefits.

Metropolitan hosted a hybrid virtual and in-person lunch discussion with environmental, communitybased and environmental justice organizations on March 20. The focus was on Metropolitan's climate resilience initiatives, including the CAMP4W Implementation Strategy, the Climate Action Plan Annual Progress Report, and the upcoming release of the Pure Water Southern California Draft EIR. Participants left with a call to action to be engaged in these efforts in the coming months.

### **Reach** disadvantaged communities and non-traditional interested parties to better understand their needs and ensure their inclusion in decision making.

Metropolitan's water conservation advertising and outreach campaign strategies are informed by audience demographics and metrics, including census tract data for disadvantaged communities throughout Southern California. Under the media placement services agreement requirements, 30 percent of all media buy expenditures must be allocated to reaching underserved and underrepresented communities within the district's service area. The FY 24-25 media plans are designed to engage diverse audiences across multiple platforms and languages, from digital spaces to community-based approaches that meet residents where they live, work and play.

To promote opportunities in the water industry among Tribal communities, staff participated in outreach events across the service area and in the desert communities, including at Mohave Community College, the Colorado River Indian Tribes (CRIT) Establishment Days, the Hemet Unified School District Technical Career Fair, and a Job and Resource Fair in Needles, CA, hosted by San Bernardino County and the Employment Development Department. Metropolitan sponsored and staff attended the CRIT Mega Throw cultural event to share workforce opportunities, and staff continued engagement with the Chemehuevi language class, discussing our industry and job opportunities.

Metropolitan launched the Consultant Bench Workshop, in support of the Equity in Infrastructure Program. The Bench connects small and large construction firms in a mentor-protégé program. In this inaugural partnership, ten small business enterprises were rigorously vetted for a one-to-one with Jacobs Engineering, to learn about small business teaming opportunities, so that firms can be invited to register with the large prime. This ultimately supports the growth of small business utilization in Metropolitan contracts.

### **Executive Summary**

This executive summary is added to this report to provide a high-level snapshot of key accomplishments from each area of the organization.

### **Bay-Delta Resources**

Staff submitted the draft Statutory Exemption for Restoration Projects application for the Webb Tract Wetland Restoration Project to the California Department of Fish and Wildlife for comment. Staff received the 60 percent design drawings for the Webb Tract Wetland Restoration Project. Bay Delta Resources, Engineering, Construction Management, and Environmental Planning have provided review.

### **Chief Financial Officer**

In February, an informational report was provided to the Finance and Asset Management Committee to review Second Quarter Financial Results and projections for Fiscal Year 2024/25. In addition, the Committee provided an update from the Business Model Review and Refinement Ad Hoc Working Group on treated water cost recovery, fixed versus volumetric revenues, and unrestricted reserve policy.

### **Colorado River Resources**

In response to Texas farmers not receiving their full deliveries from Mexico on the Rio Grande, the United States Department of State informed Metropolitan that planned deliveries to Tijuana, Mexico, through Metropolitan's system have been canceled for the month of April.

### **Diversity, Equity & Inclusion**

In March 2025, Metropolitan actively participated in multiple industry and community events to strengthen workforce development and business partnerships and to increase industry awareness. These engagements provided valuable networking opportunities, fostered collaboration with government and business entities, and supported small and diverse businesses. Key highlights included participation in the Palo Verde Career Technical Advisory Committee, NAWIC-LA Week, SAME-LA Industry Day, the Western Winter Workshop, and the Black Business Association's Salute to Black Women Business Conference, which Metropolitan also sponsored.

### **Engineering Services**

Following the Eaton Fire, Metropolitan Engineering services assisted sub-agencies in Altadena through damage assessment, emergency planning, and restoration support. Several reservoirs of the subagencies (Rubio Canyon and Las Flores) were damaged, severely limiting water deliveries to their service areas. To resolve one such supply issue, Engineering designed a new pressure-reducing station to connect existing pipelines among agencies. The new facility enables water flow from an operational higher-pressure zone to a non-operational lower-pressure zone. Engineering also provided field support during construction by Met Construction Services. This facility was completed and operational in early March 2025 to provide the needed relief for the affected communities.

### **Equal Employment Opportunity Office**

EEO worked in partnership with DEI and General Counsel to identify potential changes to the EEO office resulting from a series of executive orders signed by President Trump in January 2025. An update on the current state of Equal Employment Opportunity, Diversity, Equity, and Inclusion at Metropolitan in light of the recent executive orders was presented at the Ethics, EEO, Diversity, Equity & Inclusion Committee Board presentation on March 10. This included the rescinding of Executive Order 11246, the underlying authority requiring annual Affirmative Action Programs for minorities and women at the federal level, Executive Order 14151 "Ending Radical and Wasteful Government DEI Programs and Preferencing," and Executive Order 14173 "Ending Illegal Discrimination and Restoring Merit-Based Opportunity."

## **Executive Summary**

### **External Affairs**

Metropolitan named the San Jacinto Tunnel in honor of former board chair and longtime director Randy Record in tribute to his many years of service and strong leadership. In attendance were Chair Ortega, former Chairwoman Gray, Vice Chair Camacho, Directors Armstrong, Dennstedt, Erdman, Fellow, Faessel, Kurtz, and McMillan, GM Upadhyay, Chief Counsel Scully, Ethics Officer Salinas, AGMs Bednarski, Chapman and Zinke and many other local officials, water industry leaders and Metropolitan staff. The event garnered press coverage including KABC TV and the Los Angeles Times.

### Human Resources

The Business Support Team planned, organized, and coordinated a "Plant-Based Meal Planning" wellness webinar. The live webcast was held on March 19, 2025, and was hosted by Kaiser Permanente. The webinar provided employees with the opportunity to learn how to create healthy plates by using plant-based proteins and identified ways to meet their nutritional needs. Employees were invited to create a realistic action plan to design plant-based meals.

### Information Technology

Our Pasadena Microwave project will serve as a new communication link for Metropolitan's Eagle Rock Operations Control Center (OCC), Metropolitan's Headquarters building at Union Station, and Garvey Reservoir Site by improving the reliability of Metropolitan's microwave communications network. We recently completed Phase 1 of the project, which involved completing a fully executed lease agreement between the City of Pasadena and Metropolitan for us to use space within Pasadena's property. Phase 2 of the project is underway with our engineering services group, which is conducting the pre-work activities required for their upcoming design task.

### **Operations Groups**

After months of planning and collaborating, Metropolitan staff completed the annual Colorado River Aqueduct (CRA) and San Diego Canal shutdown. During this month-long shutdown, staff maintained high-voltage transmission and distribution systems at the CRA pumping plants, performed corrosion and condition inspection of key facilities, and recoated delivery line isolation gates. Along the CRA, staff cleaned tunnel and conduit sections of the aqueduct using a custom-made tunnel cleaning machine. During the San Diego Canal shutdown, a contractor removed and replaced concrete panels for a section of canal. All these efforts help ensure continued reliability and efficiency of Metropolitan's water system.

### Safety, Security, and Protection

The Security and Emergency Management Unit (SEMU) continues to strengthen collaboration with local, state, and national partners in the water sector. Through industry events, joint training, and interagency efforts, SEMU enhances intelligence sharing, emergency preparedness, and security strategies, reinforcing Metropolitan's role as a leader in critical infrastructure protection.

Emergency Management staff is analyzing lessons from the January 2025 wildfires and developing an After Action Report (AAR). Regular emergency exercises resumed, including a drill at the Skinner Water Treatment Plant and a Seismic Resilient Water Task Force workshop with DWR and LADWP. Staff also continue updating Dam Emergency Action Plans, with the Garvey Plan completed this month.

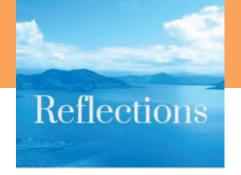

The Safety Team released the 2025 Safety Toolbox Book and the Union Station Headquarters Newsletter. The Environmental Team submitted various regulatory compliance reports for wastewater discharge. Apprenticeship continued recruiting for the Desert Region and began inviting candidates for written testing, and Technical Training met with all training coordinators to provide instructions on managing training records in the MyLearning database.

#### Sustainability, Resiliency, and Innovation

Environmental Planning Section continued oversight of reserve management activities to protect valuable natural resources and meet Metropolitan's mitigation obligations. Security patrols were conducted throughout the Lake Mathews Multiple Species Reserve and the Southwestern Riverside County Multi-Species Reserve (MSR) to prevent trespassing, vandalism, poaching, and theft and to protect the reserves' natural and cultural resources, facilities, and equipment.

#### Water Resource Management

WRM staff continued efforts to promote outdoor water use by holding landscape training and certification classes for nearly 150 attendees. Staff attended and presented at a multi-day tour of the Colorado River hosted by the Water Education Foundation and participated in a working meeting with the U.S. Bureau of Reclamation and California parties to coordinate information on Quantification Settlement Agreement activities in 2024. Staff provided outreach and coordination in the service area through presentations to groups in the Upper Water service area and in San Diego County.

Metropolitan's Colorado River Aqueduct

Metropolitan staff worked in the emergency command centers during the January 2025 wildfires in Los Angeles County, providing technical and operational support.

### **PROGRAM DESCRIPTION**

The Colorado River Aqueduct was built at the height of the Great Depression, costing approximately one-tenth of the entire assessed valuation of the Southern California region at that time. Regional leaders looked to the future with cleareyed conviction, focusing not only on current needs but on those of tomorrow, while Metropolitan staff pioneered the necessary steps to bring that bold vision to life.

That historical yardstick is the foundation for Metropolitan's innovation program. In November 2024, Metropolitan hired its first Innovation Program Manager, Patrick Atwater, to build on past work by other Metropolitan staff to promote innovative approaches to water management.

In January, the Innovation Program facilitated a discussion with Metropolitan's executive team on implementing management best practices. In March, Metropolitan hosted the Western Regional Technology Advisory Group (TAG) to scout frontier technologies for useful pilot projects.

### **IMPORTANCE TO METROPOLITAN**

Southern California's water industry faces major challenges. Climate change upends century old assumptions. Aging infrastructure and the "silver tsunami" of retirees in the workforce compound cost pressures. Extreme weather like January's hurricane force firestorms and other "known unknowns" like the next big earthquake require increased resiliency.

Therefore, simply maintaining the status quo is unsustainable. Pioneering new practices is mission critical. By working together smartly and collaboratively, Metropolitan's talented staff can ensure our region is prepared for whatever the future holds.

### **MEMORABLE MOMENT**

On the first day of the March TAG meeting, Metropolitan's Innovation Program led water managers from other utilities on a tour of Altadena's fire scar. Seeing that devastation firsthand offered a sobering reality and an urgent imperative to safeguard the region's future.

### Katano Kasaine v. Metropolitan (Los Angeles County Superior Court)

**Metropolitan Cases** 

On February 24, 2025, employee Katano Kasaine filed an employment lawsuit against Metropolitan and Adel Hagekhalil in Los Angeles County Superior Court. Plaintiff served the lawsuit on Metropolitan on March 3, 2025. The complaint alleges causes of action for discrimination, hostile work environment, retaliation, failure to prevent discrimination, whistleblower retaliation, equal pay violations, intentional infliction of emotional distress, and defamation. The Legal Department has retained Davis Wright Tremaine LLP to defend the lawsuit.

#### Samer Samir Shafik Shahat v. Metropolitan (Los Angeles County Superior Court)

On January 17, 2025, plaintiff Samer Samir Shafik Shahat filed a lawsuit against Metropolitan and an employee in Los Angeles County Superior Court for alleged injuries arising out of a vehicle collision on June 12, 2023. Plaintiff served the lawsuit on Metropolitan on February 4, 2025. The complaint alleges causes of action for negligence, motor vehicle, negligent entrustment, and negligent hiring. The Office of the General Counsel is defending this lawsuit and answered the plaintiff's complaint on March 20, 2025.

### **Matters Impacting Metropolitan**

### EPA Seeks Input on New Definition of "Waters of the United States"

On March 12, 2025, the U.S. Environmental Protection Agency (EPA) and the Army Corps of Engineers (Corps) announced plans to seek stakeholder input on implementing a new definition of "waters of the United States" (WOTUS) under the Clean Water Act (CWA). The agencies' goal is to align their WOTUS implementation with the agencies' pre-2015 definition of "WOTUS" and the U.S. Supreme Court's 2023 decision in Sackett v. Environmental Protection Agency, 598 U.S. 651 (2023) (Sackett). The EPA will host six stakeholder listening sessions to solicit recommendations beginning in April through May 2025. Registration information and dates are available at https://www.epa.gov/wotus/public-outreach-andstakeholder-engagement-activities#wotusnotice. Written recommendations on specific topics -including the scope of "relatively permanent" waters, "continuous surface connection," and jurisdictional ditches -- are due by April 23, 2025.

EPA also issued new implementation guidance clarifying what wetlands qualify as a jurisdictional

WOTUS. The new guidance explains that the Supreme Court in Sackett provided a clear twopart test for determining CWA jurisdiction over adjacent wetlands. First, the adjacent water must be a traditional navigable water or relatively permanent water body connected to a traditional navigable water. Second, the wetland must have a continuous surface connection to that water in a way that makes it difficult to distinguish where the water ends and the wetland begins. Thus, the guidance clarifies that the agencies interpret WOTUS to include "only those adjacent wetlands that have a continuous surface connection because they directly abut the [requisite jurisdictional water]." Wetlands separated by uplands, a berm, dike, or similar feature will no longer be considered WOTUS. Also, wetlands with only an intermittent, physically remote hydrologic connection to WOTUS do not have the necessary connection to covered waters that triggers CWA jurisdiction.

Metropolitan staff will submit written recommendations consistent with the Boardadopted Policy Principles and continue to track any future rulemakings or other actions affecting the definition of WOTUS, and any related litigation.

### **Other Matters**

#### Miscellaneous

On March 19, 2025, Metropolitan issued \$99,400,000 of Tax-Exempt Flexible Rate Revolving Note, Series 2025 A-1 to reimburse the District for expenditures made from cash in fiscal year 2024-25 for Board-approved debt-financed projects for the Antelope Valley East Kern (AVEK) High Desert Water Banking Program and to prepay the District's Tax-Exempt Flexible Rate Revolving Note, Series 2024 A1 and the Tax-Exempt Flexible Rate Revolving Note, Series 2024 A-7. Legal Department staff attorneys worked with and assisted outside bond counsel with the drafting and negotiation of several contracts and closing certificates.

San Diego County Water Authority v. Metropolitan, et al.			
Cases	Date	Status	
2014, 2016	Sept. 30	Based on the Court of Appeal's Sept. 21 opinion in the parties' earlier 2010/2012 cases, and the Board's Sept. 28 authorization, Metropolitan paid \$35,871,153.70 to SDCWA for 2015-2017 Water Stewardship Rate charges under the Exchange Agreement and statutory interest.	
2017	July 23, 2020	Dismissal without prejudice entered.	
2018	April 11, 2022	Court entered order of voluntary dismissal of parties' WaterFix claims and cross-claims.	
2014, 2016, 2018	June 11, 2021	Deposition of non-party witness.	
	Aug. 25	Hearing on Metropolitan's motion for further protective order regarding deposition of non-party witness.	
	Aug. 25	Court issued order consolidating the 2014, 2016, and 2018 cases for all purposes, including trial.	
	Aug. 30	Court issued order granting Metropolitan's motion for a further protective order regarding deposition of non-party witness.	
	Aug. 31	SDCWA filed consolidated answer to Metropolitan's cross-complaints in the 2014, 2016, and 2018 cases.	
	Feb. 22	Metropolitan and SDCWA each filed motions for summary adjudication.	
	April 13	Hearing on Metropolitan's and SDCWA's motions for summary adjudication.	
	May 4	Court issued order granting Metropolitan's motion for summary adjudication on cross-claim for declaratory relief that the conveyance facility owner, Metropolitan, determines fair compensation, including any offsetting benefits; and denying its motion on certain other cross- claims and an affirmative defense.	
	May 11	Court issued order granting SDCWA's motion for summary adjudication on cross-claim for declaratory relief in the 2018 case regarding lawfulness of the Water Stewardship Rate's inclusion in the wheeling rate and transportation rates in 2019-2020; certain cross- claims and affirmative defenses on the ground that Metropolitan has a duty to charge no more than fair compensation, which includes reasonable credit for any offsetting benefits, with the court also stating that whether that duty arose and whether Metropolitan breached that duty are issues to be resolved at trial; affirmative defenses that SDCWA's claims are untimely and SDCWA has not satisfied claims presentation requirements; affirmative defense in the 2018 case that SDCWA has not satisfied contract dispute resolution requirements; claim, cross-claims, and affirmative defenses regarding applicability of	

Cases	Date	Status
2014, 2016, 2018 (cont.)		Proposition 26, finding that Proposition 26 applies to Metropolitan's rates and charges, with the court also stating that whether Metropolitan violated Proposition 26 is a separate issue; and cross-claims and affirmative defenses regarding applicability of Government Code section 54999.7, finding that section 54999.7 applies to Metropolitan's rates. Court denied SDCWA's motion on certain other cross-claims and affirmative defenses.
	May 16-27	Trial occurred but did not conclude.
	June 3, June 24, July 1	Trial continued, concluding on July 1.
	June 24	SDCWA filed motion for partial judgment.
	July 15	Metropolitan filed opposition to motion for partial judgment.
	Aug. 19	Post-trial briefs filed.
	Sept. 14	Court issued order granting in part and denying in part SDCWA's motion for partial judgment (granting motion as to Metropolitan's dispute resolution, waiver, and consent defenses; denying motion as to Metropolitan's reformation cross-claims and mistake of fact and law defenses; and deferring ruling on Metropolitan's cost causation cross- claim).
	Sept. 21	Metropolitan filed response to order granting in part and denying in part SDCWA's motion for partial judgment (requesting deletion of Background section portion relying on pleading allegations).
	Sept. 22	SDCWA filed objection to Metropolitan's response to order granting in part and denying in part SDCWA's motion for partial judgment.
	Sept. 27	Post-trial closing arguments.
	Oct. 20	Court issued order that it will rule on SDCWA's motion for partial judgment as to Metropolitan's cost causation cross-claim simultaneously with the trial statement of decision.
	Dec. 16	Parties filed proposed trial statements of decision.
	Dec. 21	SDCWA filed the parties' stipulation and proposed order for judgment on Water Stewardship Rate claims for 2015-2020.
	Dec. 27	Court entered order for judgment on Water Stewardship Rate claims for 2015-2020 as proposed by the parties.
	March 14, 2023	Court issued tentative statement of decision (tentatively ruling in Metropolitan's favor on all claims litigated at trial, except for those ruled to be moot based on the rulings in Metropolitan's favor)

Cases	Date	Status
2014, 2016, 2018 (cont.)	March 14	Court issued amended order granting in part and denying in part SDCWA's motion for partial judgment (ruling that Metropolitan's claims for declaratory relief regarding cost causation are not subject to court review).
	March 29	SDCWA filed objections to tentative statement of decision
	April 3	Metropolitan filed response to amended order granting in part and denying in part SDCWA's motion for partial judgment (requesting deletion of Background section portion relying on pleading allegations).
	April 25	Court issued statement of decision (ruling in Metropolitan's favor on all claims litigated at trial, except for those ruled to be moot based on the rulings in Metropolitan's favor)
	Jan. 10, 2024	Parties filed joint status report and stipulated proposal on form of judgment
	Jan. 17	Court issued order approving stipulated proposal on form of judgment (setting briefing and hearing)
	April 3	Court entered final judgment
	April 3	Court issued writ of mandate regarding demand management costs
	April 3	SDCWA filed notice of appeal
	April 17	Metropolitan filed notice of cross-appeal
	May 3	Participating member agencies filed notice of appeal
	May 31	Parties filed opening briefs on prevailing party
	June 28	Parties filed response briefs on prevailing party
	July 17	Court issued tentative ruling that there is no prevailing party due to mixed results
	July 18	Hearing on prevailing party; court took matter under submission, stating it expects to rule in mid-Aug.
	Aug. 15	Court issued ruling that Metropolitan is the prevailing party and is entitled to SDCWA's payment of its litigation costs and fees under the Exchange Agreement
	Sept. 25	Court issued order extending time for Metropolitan to file its memorandum of costs and motion for attorneys' fees
	Sept. 27	Metropolitan filed its memorandum of costs in the amount of \$372,788.64

Cases	Date	Status
2014, 2016, 2018 (cont.)	Oct. 18	Parties filed a joint application to extend the briefing schedule in the Court of Appeal
	Oct. 21	Court of Appeal granted parties' joint briefing schedule; briefing begins April 11, 2025 and ends October 10, 2025
	Oct. 29	SDCWA filed its motion to tax (reduce) Metropolitan's costs
	Nov. 26	SDCWA withdrew its motion to tax (reduce) Metropolitan's costs and requested that the court cancel the Dec. 11 motion hearing
	Dec. 17	The court entered the parties' stipulated order that Metropolitan's recoverable attorneys' fees are \$3,402,408.71 and its recoverable costs are \$372,788.64; unless the Court of Appeal reverses the order that Metropolitan is the prevailing party, SDCWA is to pay Metropolitan these amounts, plus interest; and briefing on Metropolitan's motion for attorneys' fees is vacated.
	Dec. 17	The court issued an order reassigning the cases from the Honorable Anne-Christine Massullo to the Honorable Ethan P. Schulman.
	Jan. 28, 2025	Court of Appeal granted parties' modified joint briefing schedule; briefing begins July 11, 2025 and ends January 9, 2026.
All Cases	April 15, 2021	Case Management Conference on 2010-2018 cases. Court set trial in 2014, 2016, and 2018 cases on May 16-27, 2022.
	April 27	SDCWA served notice of deposition of non-party witness.
	May 13-14	Metropolitan filed motions to quash and for protective order regarding deposition of non-party witness.
	June 4	Ruling on motions to quash and for protective order.

## **Office of the General Auditor**

## • General Auditor's Report for March 2025

#### Summary

This report highlights significant activities of the Office of the General Auditor for the month ended March 31, 2025.

### Purpose

Informational

### Attachments

Three audit reports were issued during this period:

- 1. Operational Audit: Employee Tuition Reimbursement Program
- 2. Contract Audit: Sensis, Inc., Agreement No. 185391
- 3. Cybersecurity Audit: Inventory & Control of IT Assets

### **Detailed Report**

#### Audit & Advisory Projects

Twenty-six projects are in progress:

- Seven audit projects are in the report preparation phase.
  - One management response is outstanding:
    - Operational Audit: Fallowed Land; management response was due 3/27/2025
- Nineteen projects are in the execution phase, including nine audits and ten advisories.
  - One new advisory project was added this month per management's request:
    - Process Matters Efficiency Initiative

Work priority is being given to the seven (down two from last month) carryforward audits.

#### **Audit Report Details**

- 1. Operational Audit: Employee Tuition Reimbursement Program issued March 24, 2025.
  - Audit scope included the review of the Employee Tuition Reimbursement Program for the period January 1, 2018 through October 31, 2021.
  - Ten recommendations with the following ratings: nine **Priority 2**; one **Priority 3**.

- 2. Contract Audit: Sensis, Inc. Agreement No. 185391 issued March 24, 2025.
  - Audit scope included evaluating selected accounting and administrative controls over the agreement with Sensis, Inc. for the mwdh2o.com redesign project from July 1, 2018 to February 28, 2022.
  - Five recommendations with the following ratings: four **Priority 1**; one **Priority 3**.
- 3. Cybersecurity Audit: Inventory & Control of IT Assets issued March 26, 2025.
  - Audit scope included Information Technology Group (ITG) inventory records and all IT assets under the control of the ITG with the potential to store or process data, including end-user devices (e.g., laptops, desktop computers), network devices (e.g., firewalls, switches), non-computer/IoT devices, and servers connected to Metropolitan's network as of March 31, 2024.
  - Two recommendations with the following ratings: one **Priority 2**; one **Priority 3**.

#### Follow-Up Reviews

Thirteen audits are in the follow-up phase:

- Seven follow-up reviews are in progress.
- Two follow-up reviews are in planning.
- Four follow-up review forms have been received; however, validation of management action is pending.

No follow-up audit forms are overdue; one form previously reported as overdue was received.

#### **Other General Auditor Activities**

#### 1. Global Internal Audit Standards

Evaluation and adoption of the updated standards issued by the Institute of Internal Auditors, effective January 9, 2025, is in progress. Board roles and responsibilities, per the Standards, will be presented as an information item at the September meeting of the Audit Committee.

#### 2. Internal Quality Assessment

**Completed.** Results of the annual Internal Quality Assessment were presented at the March meeting of the Audit Committee.

#### 3. Annual Risk Assessment

The General Auditor's risk assessment methodology is being refreshed and will be presented at the April meeting of the Audit Committee. Board input on risk areas and internal control concerns will be solicited.

#### 4. Annual Audit Plan

Planning is underway for next fiscal year's audit plan, which includes meetings with Metropolitan senior management. The FY 2025/26 audit plan will be presented to Board for approval at the June meetings of the Audit Committee and Board of Directors.

#### 5. Department Head Collaboration

The General Auditor is participating with the General Manager, General Counsel, and Ethics Officer in facilitated workshops.

#### 6. Senior Audit Manager Recruitment

An initial strategy meeting was held with a professional recruiting firm, and a tentative recruiting calendar was set.

#### 7. External Resources RFQ

Collaboration with Contracting Services to draft and issue an RFQ for specialty internal audit services is ongoing.

Date of Report: April 8, 2025

#### 8. On-Demand Advisory Services

Completed one advice request involving a contract extension.

#### 9. Training

Audit staff attended The Art of the Audit Interview, TeamMate+ Reporting API Basics, and the IIA Western District Conference.

Metropolitan Audit Department Staff with Anthony Pugliese, President & CEO – Institute of Internal Auditors at the IIA Western District Conference in Anaheim, CA

Anthony Pugliese, President & CEO – Institute of Internal Auditors, presenting at the IIA Western District Conference on what internal audit will look like in 2035 and what internal audit departments need to do to get there.

## **Executive Summary**

#### BACKGROUND

One of Metropolitan's most effective ways to communicate with the public and provide access to information is via Metropolitan's enterprise website, mwdh2o.com. The website allows Metropolitan to strategically communicate water issues in its service area with member agencies, local officials, media, educators, and the public on a broad number of topics, including water policy and operational issues, Board meetings, events, programs, and projects. As the public face of the organization and with an ever-growing number of users, the site must effectively deliver information on a wide range of staff and Board activities, projects, programs, and initiatives that support Metropolitan's mission.

On April 9, 2019, the Metropolitan Board authorized a professional services agreement with Sensis, Inc., not to exceed \$1,500,000, to design, develop, and deploy the new mwdh2o.com website, create a multi-site content management system (CMS), and redesign bewaterwise.com. The prior Metropolitan website required replacement to enhance the mobile experience, integrate with social media, optimize search results, improve navigation and technology, and communicate key strategic goals. The agreement was effective from May 28, 2019 through February 28, 2023. As of September 25, 2024, Metropolitan has paid \$965,903 to Sensis, Inc. for the project and three other purchase orders (for hosting/support).

#### WHAT WE DID

Our audit scope included evaluating selected accounting and administrative controls over the agreement with Sensis, Inc. (No. 185391) for the mwdh2o.com redesign project from July 1, 2018 to February 28, 2022.

Our audit objectives were to:

- (1) Determine if invoices were certified, payments were accurate and valid, and project charges were properly accounted for.
- (2) Determine if the most qualified bidder was recommended for selection and if the project was properly approved.
- (3) Determine if agreement monitoring for insurance and project progress was performed.

#### WHAT WE CONCLUDED

- Invoice payments were accurate and valid and project charges were properly accounted for; however, invoice certification was not performed by the vendor as required.
- (2) The most qualified bidder was recommended for selection; however, there are opportunities to improve transparency in Board Letter reporting, and the contracted scope of services should better align with the request for proposal (RFP).
- (3) Agreement monitoring for insurance and project progress was performed.

#### WHAT WE RECOMMEND

We recommend Metropolitan: (1) review significant variances between the RFP and contracted scope of services; (2) provide training to project managers; (3) update policies and procedures; (4) include additional key information in Board Letters; and (5) ensure contractor invoices comply with agreement terms and conditions.

Management agreed with our observations and recommendations.

## **OBSERVATIONS & RECOMMENDATIONS**

**1** Scope of Services The scope of services awarded to the contractor differed significantly from the RFP and evaluation committee recommendation.

Section 2 of the request for proposal (RFP) for Metropolitan Website Redesign (RFP-PL-1186) stated that Metropolitan was seeking proposals for:

- redesign/replacement of mwdh2o.com;
- (2) an updated and user-friendly content management system (CMS) for mwdh2o.com;
- (3) content migration of mwdh2o.com to the new platform;
- (4) search engine optimization of mwdh2o.com; and
- (5) knowledge transfer for information technology staff and content owners.

The RFP also mentioned that Metropolitan would like a cloudhosted site option.

On December 18, 2018, the RFP evaluation committee recommended an agreement for website redesign services not to exceed \$750,000, with a follow-on agreement for annual hosting and website support not to exceed \$250,000, totaling a recommended \$1 million, be awarded to Sensis, Inc.

However, Board approval was sought for an agreement valued at \$1.5 million, or 50% higher than the RFP's recommendation, and included a redesign of an additional website not mentioned in the RFP and the creation of a multi-site CMS. Additionally, the recommended hosting and support were not included in the contract and were ultimately covered by separate purchase orders.

The original proposal for the website development was \$604,191. This was revised to \$509,347 and additional options were added to increase the agreement amount to \$1.5 million; see Observation No. 2 below for a breakdown.

Priority 1 Significant variances between the RFP and the final agreement could result in a

vendor bid protest.

### **Recommendation 1**

We recommend management review variances between the RFP and contracted scope of services for appropriateness.

### Management Response Agree.

Current practice now requires the contract analyst to advise Agreement Administrators/Project Managers (AAs) during contract development/negotiations that the services awarded must be from/within the scope of work of the RFP. The analyst may participate or be an observer in the scope negotiations to reenforce this requirement. Contracting workflow requires that the draft agreement from the contract analyst be reviewed by a principal analyst for scope issues. Legal also participates in

5E

the review of the contract. Contracting team manager further reviews as part of the final routing prior to contract execution.

Management's action plan was implemented in November 2021.

#### **Recommendation 2**

5E

We recommend management provide training to project managers to ensure the contracted scope of services is reasonably derived from the RFP.

## Management Response Agree.

Current practice requires each agreement administrator/project manager to enroll in training to be certified as an agreement administrator. Recertification is required every 3 years. The recertification process has been updated to include specific training to ensure the contracted scope of services is reasonably derived from the solicitation.

Management's action plan was implemented in January 2025.

#### **Recommendation 3**

We recommend management update policies and procedures to require reviews and training related to RFP and contract scope of services variances.

#### Management Response Agree.

The Contracting Procedures Manual has been updated (Chapter 17, section C)

Management's action plan was implemented in November 2021.

## **2 Board Letter**

Key information was not presented in the Board Letter.

At the April 9, 2019 Board meeting, the subject for Item 7-2 was "Authorize a professional services agreement with Sensis, Inc. not to exceed \$1,500,000 to design, develop, and deploy the new mwdh2o.com website."

The Board Letter and presentation for Item 7-2 did not include:

• Addition of bewaterwise.com to the scope of work. The agreement included an option for redesign services of an additional website, bewaterwise.com for \$324,000.

- **RFP evaluation committee recommendation details.** In its December 18, 2018 memo, the evaluation committee recommended that Sensis, Inc. be awarded an agreement not to exceed \$750,000 to provide Metropolitan Website Redesign Services and a follow-on agreement not to exceed \$250,000 annually to provide hosting and support of the website.
- Breakdown of the \$1.5 million to design, develop, and deploy the new mwdh2o.com website. Exhibit C of the agreement shows primary services to include redesigning mwdh2o.com, migrating all external facing websites to a hosting platform, Amazon Web Services, and building a bulk loader for .pdf files for \$509,347. Additionally, there were two options including \$580,276 for a CMS (\$399,276 to create a multi-site CMS, \$126,000 to migrate seven websites into CMS, \$55,000 the to migrate bewaterwise.com into the CMS), \$324,000 to redesign bewaterwise.com, and \$86,377 (not-to-exceed hourly billing) for additional related services.
- Discussion of costs to support/host the website (part of the RFP). Three purchase orders were issued to Sensis, Inc. to cover hosting/support separately from the agreement reviewed in this audit in the following amounts: \$216,000, \$246,000, and \$24,000.

### Priority 1

Not disclosing RFP evaluation committee results, breaking down the scope of service cost components, or discussing RFP components not included in the award could result in a lack of transparency on how Metropolitan funds will be expended and impede the Board's ability to make informed decisions during agreement award proceedings.

### **Recommendation 4**

We recommend management with respect to future Board Letters:

- (1) Include RFP evaluation committee recommendation details, especially if it differs significantly from the agreement to be awarded.
- (2) Break down the agreement amount by services and options.
- (3) Disclose additional costs of operation covered by other procurement means, especially for RFP scope of work items not awarded.

#### Management Response Agree.

Implement the recommended actions under this Priority for all future Board Letters. IT PMO staff will be trained regarding these recommendations.

The estimated implementation date is April 2025.

## 3 Agreement Terms & Conditions

Contractor invoices did not comply with the agreement's terms and conditions.

Failure to comply with the

terms and conditions of the

agreement could result in a financial loss to Metropolitan

due to fraudulent, erroneous,

or unauthorized invoicing.

All seven contractor invoices reviewed were not certified as true and correct by the contractor, as required by the agreement terms and conditions.

### Recommendation 5

We recommend management ensure invoices comply with the terms and conditions of the agreement and are certified as correct and accurate.

## Management Response Agree.

IT PMO staff will be trained to ensure invoices are certified by the contractor as correct and accurate.

The estimated implementation date is April 2025.

## EVALUATION OF MANAGEMENT'S RESPONSE

Internal Audit considers management's responses are appropriate to the recommendations, and their corrective actions should resolve the conditions identified in the report.

## AUDIT TEAM

Chris Gutierrez, CPA, CIA, Audit Program Manager

## APPENDIX A: SUPPLEMENTAL INFORMATION

## SCOPE & OBJECTIVES

Our audit scope included evaluating selected accounting and administrative controls over the agreement with Sensis, Inc. (No. 185391) for the mwdh2o.com redesign project from July 1, 2018 to February 28, 2022.

Our audit objectives were to:

- (1) Determine if invoices were certified, payments were accurate and valid, and project charges were properly accounted for.
- (2) Determine if the most qualified bidder was recommended for selection and if the project was properly approved.
- (3) Determine if agreement monitoring for insurance and project progress was performed.

## EXCLUSIONS

Our audit scope did not include internal costs incurred in the administration of the agreement nor review of purchase orders issued to Sensis, Inc. for work separate from this audit.

### PRIOR AUDIT COVERAGE

We have not completed any audit reports with a similar scope within the last five years.

## AUTHORITY

We performed this audit in accordance with the FY 2021/22 Audit Plan presented to the former Audit & Ethics Committee and our FY 2023/24 Audit Plan approved by the Board.

## PROFESSIONAL INTERNAL AUDIT STANDARDS

Our audit was conducted in conformance with the International Standards for the Professional Practice of Internal Auditing issued by the International Internal Audit Standards Board.

## FOLLOW-UP REVIEWS

The Office of the General Auditor has implemented a new follow-up process to ensure management has effectively implemented corrective action related to our recommendations. Management is required to report recommendation implementation status to our office within six months following the issuance of this report and a first follow-up review will occur shortly thereafter. All audit recommendations are expected to be implemented within a year of this report and if necessary, a second follow-up review will occur approximately six months after issuance of the first follow-up review report. Any audit recommendations not implemented after the second follow-up review will be shared with the Board/Audit Committee at its next scheduled meeting.

## INTERNAL CONTROL SYSTEM

An internal control system is a continuously operating and integrated component of Metropolitan's operations. Internal controls are implemented by the Metropolitan team and seek to provide reasonable (not absolute) assurance that the District's business objectives will be achieved. However, limitations are inherent in any internal control system no matter how well designed, implemented, or operated. Because of these limitations, errors or irregularities may occur and may not be detected. Specific examples of limitations include but are not limited to, poor judgment, carelessness, management override, or collusion. Accordingly, our audit would not necessarily identify all internal control weaknesses or resultant conditions affecting operations, reporting, or compliance. Additionally, our audit covers a point in time and may not be representative of a future period due to changes within Metropolitan and/or external changes impacting the District.

## METROPOLITAN'S RESPONSIBILITY FOR INTERNAL CONTROL

It is important to note that Metropolitan management is responsible for designing, implementing, and operating a system of internal control. The objectives of internal controls are to provide reasonable assurance as to the reliability and integrity of information; compliance with policies, plans, procedures, laws, and regulations; the safeguarding of assets; the economic and efficient use of resources; and the accomplishment of established goals and objectives. In fulfilling this responsibility, management judgment is required to assess the expected benefits and related costs of internal control policy and procedures and to assess whether those policies and procedures can be expected to achieve Metropolitan's operational, reporting, and compliance objectives.

## **APPENDIX B: PRIORITY RATING DEFINITIONS**

The Office of the General Auditor utilizes a priority rating system to provide management with a measure of urgency in addressing the identified conditions and associated risks. We assess the significance of each observation identified during the audit using professional judgment and assign priority ratings to each recommendation using the criteria listed below. Factors taken into consideration in assessing the priority include the likelihood of a negative impact if not addressed, the significance of the potential impact, and how quickly a negative impact could occur.

		PRIORITY	
Definition	Observation is <i>serious</i> enough to warrant <i>immediate</i> corrective action. The condition may represent a serious financial, operational, or compliance risk. A priority 1 recommendation may result from a key control(s) being absent, not adequately designed, or not operating effectively.	Observation is of a <i>significant</i> nature and warrants <i>prompt</i> corrective action. It may represent a moderate financial, operational, or compliance risk. A priority 2 recommendation may result from a process or less critical control(s) not being adequate in design and/or not operating effectively on a consistent basis.	Observation involves an internal control issue or compliance lapse that can be corrected in the <i>timely</i> course of normal business. A priority 3 recommendation may result from a process or control that requires enhancement to better support Metropolitan's objectives and manage risk.
Response Time	Immediate	Within 90 Days of report issuance	Within 180 Days of report issuance

## APPENDIX C: MANAGEMENT'S RESPONSE

# **Executive Summary**

#### BACKGROUND

Metropolitan has established a Tuition Reimbursement Program (Program) aimed at facilitating educational opportunities at accredited educational institutions that benefit both the organization and its employees. The Program covers tuition expenses, course-specific registration fees, costs associated with textbooks, and essential course materials. Eligible individuals can receive financial support up to a maximum of \$9,000 per calendar year for undergraduate courses and up to \$11,000 per calendar year for graduate programs. There is a prescribed limit of 12 units per quarter or semester for course enrollment.

The Human Resources Group directs and administers the Program, which encompasses evaluating the accreditation status of academic and professional institutions, making definitive decisions regarding the approval or denial of reimbursement requests, and facilitating the submission of approved applications along with their requisite supporting documentation to the Controller Section for payment processing.

The Program is open to regular full-time and part-time employees who have completed a minimum of six months of service and meet specific requisites, such as selecting courses relevant to their current job responsibilities. For fiscal years 2017/18 through 2020/21, the Program had an average of 107 participants per fiscal year, with an average program cost of \$545,186 per fiscal year, or \$5,095 per participant.

#### WHAT WE DID

Our audit scope included the review of the Employee Tuition Reimbursement Program (Program) for the period January 1, 2018 through October 31, 2021.

Our audit objectives were to:

- (1) Evaluate compliance with established policies, procedures, and guidelines.
- (2) Evaluate the employee tuition reimbursement process for operational efficiency opportunities.

#### WHAT WE CONCLUDED

- (1) Compliance with established policies and procedures should be improved.
- (2) Operational efficiencies should be implemented in the employee tuition reimbursement process.

#### WHAT WE RECOMMEND

We recommend management: (1) formalize the review process for tuition requests and reimbursements; (2) form a working group or, at a minimum, ensure the review and approval process for all submissions is applied consistently and occurs at an appropriate management level; (3) establish a monitoring process to identify trends requiring further focus; (4) implement EForm approvals that incorporate proper duties segregation and align with policy; (5) implement distinct EForms for the initial application and for the reimbursement; (6) retain sequentially numbered EForms in the EForm database; (7) perform EForm testing in a test environment; (8) establish criteria for evaluating trade/ correspondence schools; (9) post the approved trade and correspondence schools list; (10) update tuition reimbursement policies and procedures.

Management agreed with our observations and recommendations.

#### 5E

# RESULTS

#### **RECOGNITION**

Positive aspects observed during our audit include:

• The Employee Tuition Reimbursement Program remained within budget for fiscal years 2018/19, 2019/20, and 2020/21.

### **RESULTS OVERVIEW**

	OBSERVATION	RISK	RECOMMENDATION	MANAGEMENT AGREEMENT
		PRIORI	FY 1	
	None			
		PRIORI	FY 2	
1	Review of application requirements was not sufficient.	Enrollment granted for non-qualifying individuals and/or non- qualifying classes/programs	Formalize the review process for tuition requests and reimbursements. Form a working group	Agree
		Disparity in the application of program rules	or, at a minimum, ensure the review and approval process is applied consistently	19.00
2	Adherence to reimbursement requirements did not occur consistently.	Invalid/unauthorized claims paid	and occurs at an appropriate management level.	
3	Tuition Reimbursement Policy was not applied consistently.	Financial loss Claims of bias	Establish a monitoring process to identify trends requiring further focus.	Agree
4	Improvements should be made to the EForm design, and retention, approval, and testing controls.	Unauthorized approvals Applicant confusion Increased administrative errors	Implement EForm approvals that incorporate proper duties segregation and align with policy.	Agree
			Implement distinct EForms for the initial application and for the reimbursement.	Agree
			Retain sequentially numbered EForms in the EForm database.	Agree
			Perform EForm testing in a test environment.	Agree

	OBSERVATION	RISK	RECOMMENDATION	MANAGEMENT AGREEMENT
5	A process for the evaluation and communication of approved trade and correspondence	Applicants may enroll in non-qualifying courses	Establish criteria for evaluating trade/ correspondence schools.	Agree
	schools does not exist.		Post the approved trade and correspondence schools list.	Agree
		PRIORIT	TY 3	
6	Employee Tuition Reimbursement Program policy and procedures were not current.	Inconsistent or incorrect treatment of application/ reimbursement requests	Update tuition reimbursement policies and procedures.	Agree

### **OBSERVATIONS & RECOMMENDATIONS**

### 1 Application Requirements

The review of application requirements was not sufficient.

The Employee Tuition Reimbursement Program (Program) is available to all regular full-time and part-time employees who have completed a minimum of six months of service. Temporary and contracted staff and employees with less than six months of service are not eligible to participate in the Program. The courses must relate to the employee's current job or to Metropolitan work the employee can reasonably be expected to perform in the future. Courses are to be taken on the employee's own time. (See Appendix A for the specifics on the Program requirements/guidelines regarding the application process.)

We statistically selected 56 tuition reimbursement application requests for testing.

#### Form Completion

- 32 of 56 (57%) had incomplete information wherein the taking of the course outside of working hours could not be substantiated.
- 30 of 56 (54%) of the EForms were incomplete, missing items such as school name, course title, or program name.
- 26 of 56 (46%) requests for first-time degree or certificate programs were missing a copy of the program plan.

As such, the applicability of the degree or program to Metropolitan-related work could not be ascertained.

Approvals

- 30 of 56 (54%) did not contain the appropriate management approvals per policy; thus, authorization by department management could not be ascertained.
- 20 of 56 (36%) did not contain the Human Resources (HR) Group Manager or designee signature; thus, an acknowledgment that the employee qualified under the program requirements could not be substantiated.
- In one instance, three employees from different departments applied for the same course. One of the submissions incorrectly indicated the class was a "onetime course," requiring no group manager approval, resulting in insufficient approval being obtained.

<u>Submission</u>

• 10 of 56 (18%) were submitted late, ranging from 1 to 89 days after the course start date, which could result in the enrollment in the course or class not being reimbursable.

5E

• 3 of 56 (5%) did not include the course start date, preventing the assessment of timely submission.

#### Course Applicability

 1 of 56 (2%) requested a course not applicable to Metropolitan-related work (home inspection). The request has been neither approved nor denied and remains open in the system.

#### **Recommendation 1**

We recommend Human Resources management formalize the review process for:

- (1) Applications and reimbursements, including remediation of non-compliant submissions.
- (2) Non-conforming reimbursement recovery requests.
- (3) Documenting exceptions made to the published policy, including appropriate approvals.

# Management Response Agree.

- (1) This is addressed in the operating policy update (Tuition Reimbursement J-01), which is under final review with the Technical Writing Team and due to be distributed via email memo, published on the MWD intramet, as well as hyperlinked to the updated Tuition Reimbursement e-form.
- (2) This is addressed in the updated policy (Tuition Reimbursement J-01).
- (3) Approvals are to be made by Training Administrator or Specialist. Any exceptions will be documented and based on a decision made by the HR Group Manager.

The estimated implementation date is May 2025.

#### **Recommendation 2**

We recommend Human Resources management form a working group to review application, reimbursement, and nonconforming reimbursement recovery requests, or at a minimum, ensure the review and approval process is applied consistently and occurs at an appropriate management level.

# Management Response Agree.

The review and approval process are now supported with an updated submission process (eForm) that collects the information required to evaluate the request. Along with the updated operating policy, this allows HR staff to accurately and consistently process requests. Any exceptions will be documented and based on a decision made by the HR Group

#### Priority 2

Inadequate tuition reimbursement application oversight controls can result in enrollment being granted for non-qualifying individuals or non-qualifying classes/ programs and create disparity in the application of rules among participants.

Manager. These changes have been implemented and will continue to improve once the latest version of the eForm and operating policy are finalized.

The estimated implementation date for the EForm and operating policy is May 2025.

#### **Recommendation 3**

5E

We recommend Human Resources management establish a monitoring process to identify trends requiring further focus.

# Management Response Agree.

This is addressed in the policy update (Tuition Reimbursement J-01) and outlines the new internal audit process that will ensure employees do not exceed annual limits.

The estimated implementation date is May 2025.

# 2 Reimbursement Requirements

Adherence to reimbursement requirements did not occur consistently.

Per the Tuition Reimbursement Policy (J-01), when requesting reimbursement for tuition, an employee must prepare and submit the Reimbursement EForm, provide transcripts showing a grade of "C" or better, and provide original receipts to Human Resources within 30 days after completion of the course.

We statistically selected 61 paid tuition reimbursements for testing.

- For 6 of 61 (10%) totaling \$15,656, transcripts for the courses could not be provided.
- For 5 of 61 (8%) totaling \$10,589, receipts for \$9,580 could not be provided.
- For 1 of 61 (2%) totaling \$4,257, the EForm requesting reimbursement could not be located.
- For 1 of 61 (2%) totaling \$2,440, neither the grade report nor the receipt contained the name of the university or organization; thus, the reimbursement could not be substantiated.

#### Priority 2

Inadequate oversight controls can result in invalid/ unauthorized claims being paid. See Recommendation Nos. 1 through 3 and associated Management Responses at Observation No. 1.

# 3 Reimbursement Recovery

The Tuition Reimbursement Policy was not applied consistently. The Tuition Reimbursement Policy requires a minimum oneyear work commitment after receiving tuition reimbursement.

We statistically selected 65 refund requests for testing.

- For 1 of 65 (2%), Human Resources permitted a pro-rated collection of the reimbursed amount based on the number of months an employee had worked subsequent to receiving the reimbursement.
- For 1 of 65 (2%), reimbursement of \$14,592 was not sought, although the employee left before meeting the one-year work commitment.

No approved exception to the policy was documented to file by the HR Group Manager.

See Recommendation Nos. 1 through 3 and associated Management Responses at Observation No. 1.

#### **Priority 2**

Inconsistent application of the Tuition Reimbursement Policy can result in financial loss and claims of bias.

### **4 EForm Improvements**

Improvements should be made to the EForm design, and retention, approval, and testing controls. When an employee seeks approval for enrollment in a class or course, the employee is to submit the request using the Tuition Reimbursement EForm. Upon clicking on the EForm, a sequentially numbered EForm is generated and saved, regardless of whether the EForm is submitted or abandoned. As a result, the database contains many incomplete, nonsubmitted forms creating tracking and reconciliation challenges.

Further, when an employee seeks reimbursement for tuition, the employee initiates the process by modifying the same EForm used to apply for the Tuition Reimbursement program. Within this EForm, the employee provides additional details, including the exact tuition and fee amounts, a description of the expenses, and the date the tuition and fees were paid. Moreover, the employee is to change the dropdown selection in the "Reason Section" from "Enroll in a new course" to "Request for reimbursement."

Per review of the 61 tuition reimbursements selected for testing:

 58 of 61 (95%) did not have the appropriate field selected. Specifically, the "Reason Section" of the EForm showed "Enroll in a new course" rather than "Request for Reimbursement."

• EForm signature lines do not agree to the required signatures per the Tuition Reimbursement Operating Policy (Policy). The Policy states that a request for a new degree or certificate program is to be approved by the submitter's group manager and supervisor. In contrast, the EForm states signatures from a section manager and supervisor are needed.

We also noted that the EForm date is not updated when the employee modifies the request to submit the reimbursement, making it impossible to determine if the employee submitted the request within 30 days of course completion, as required by the Policy.

Moreover, the EForm approval process allows an individual to e-sign for all four required approvals (i.e., requestor, supervisor, group manager, and Human Resources).

One such EForm was noted in our sample. The creator of the EForm indicated it was a test; however, nowhere on the EForm did it indicate it was a test document. Further, the EForm was created in the production environment, not the test environment. We did not identify any reimbursements made for EForm requests where all signatures were by the same individual.

#### Priority 2

Insufficient design of the EForm may lead to unauthorized approvals, applicant confusion, and increased administrative errors.

#### Recommendation 4

We recommend Human Resources management, in coordination with Administrative Services, implement EForm approvals that:

- (1) Limit those with approval authority to authorized personnel at each approval level.
- (2) Align to the Tuition Reimbursement Operating Policy.

#### Management Response Agree.

- (1) The EForm is being updated to streamline the approval process to require only one departmental approval by the Unit Manager (or one level up if Unit Manager is submitting) before submission to Training for final approval and initiation.
- (2) The form also now only generates and registers a number when the request is submitted. If it is a new request, certain fields are now pre-populated to improve accuracy. When submitting for reimbursement, the form is adjusted to show the boxes for all appropriate information (e.g. populates itemization fields).

The estimated implementation date for (1) is April 2025. Management's action plan for (2) has been implemented.

#### **Recommendation 5**

5E

We recommend Human Resources management, in coordination with Administrative Services, implement two distinct EForms or, at a minimum, two distinct EForm records, one for applying to the Tuition Reimbursement Program prior to course enrollment and one for requesting reimbursement after course completion.

#### Management Response Agree.

HR partnered with the Administrative Services Eforms team to upgrade the form to be able to better serve both purposes (initial application and reimbursement).

Management's action plan was implemented.

#### Recommendation 6

We recommend Human Resources management, in coordination with Administrative Services, only retain submitted EForms in the EForm database and ensure that only submitted EForms are assigned a sequential number.

# Management Response Agree.

This has been corrected within the existing system in early 2024.

Management's action plan was implemented.

#### **Recommendation 7**

We recommend Human Resources management, in coordination with Administrative Services, perform EForm testing only in the test environment. If testing in production is necessary, clearly mark all created files as test documents.

# Management Response Agree.

All Eform changes occurred in the testing environment in early 2024 before being deployed in the production environment. This practice will continue.

Management's action plan was implemented.

### 5 Trade/ Correspondence Schools

A process for the evaluation and communication of approved trade and correspondence schools does not exist.

In accordance with the Tuition Reimbursement Policy, a college/university degree program must be affiliated with educational institutions officially recognized and accredited by the United States Department of Education. Additionally, courses may be pursued at academically accredited entities, including colleges, universities, university extensions, adult education schools, and approved trade or correspondence schools.

Per review of the 56 tuition reimbursement application requests selected for testing:

9 of 56 (16%) listed schools were not accredited, as per the United States Department of Education Database.

Furthermore. evaluation criteria used to assess а college/university degree or certificate program has not been established, nor could a list of approved trade schools eligible for tuition reimbursement be provided. Evaluation criteria would allow for consistency in assessment, and a list would serve as a valuable reference during the consideration process by employees and the authorization process.

#### **Recommendation 8**

We recommend Human Resources management establish specific criteria for evaluating and designating trade and/or correspondence schools approved for tuition reimbursement to ensure a standardized approach when assessing eligibility.

#### **Management Response** Agree.

This was updated in the policy (Tuition Reimbursement J-01) and the new Eform. As an additional control, the Eform will include the link to the approved institutions.

The estimated implementation date is April 2025.

#### **Recommendation 9**

We recommend Human Resources management post the approved trade and correspondence school list on the IntraMET or another easily accessible location.

#### **Management Response** Agree.

This has been included in the updated policy (Tuition Reimbursement J-01), which is in final review stages with the Administrative Services Technical Writing Team. Once finalized, the policy will be updated on the IntraMET.

The estimated implementation date is April 2025.

Insufficient or conflicting trade/correspondence school information may result in applicants enrolling in nonqualifying courses.

### 6 Policy & Procedures

Employee Tuition Reimbursement Program policy and procedures were not current. Human Resources staff refer to the HR Training Administrators Handbook for Tuition Reimbursement Administration and Metropolitan's Operating Policy J-01: Tuition Reimbursement for administering the Program. These documents establish the policy applicable to employees not covered by a Memorandum of Understanding (MOU) that includes a negotiated tuition reimbursement provision.

The latest revision of Operating Policy J-01 (Policy) was in 2009 and does not incorporate the modifications implemented in the MOUs since 2009 or the current Administrative Code (Section 6524). For instance, the Policy specifies a reimbursement rate of 85% for tuition costs up to \$9,000 annually. However, per Administrative Code Section 6524 and the current MOUs with all four employee organizations, the reimbursement rate stands at 100% of tuition expenses, capped at a maximum of \$9,000 per year for undergraduate degrees. In addition, the Policy does not address current Human Resources practices such as approving "grandfathered in" non-accredited trade school classes for reimbursement such as American Water Works Association (AWWA), California Water Board, and American Water College, and does not agree to the HR Training Administrators Handbook for Tuition Reimbursement Administration.

#### Priority 3

Outdated policies and procedures can result in inconsistent or incorrect treatment of application/ reimbursement requests.

#### Recommendation 10

We recommend Human Resources management revise both Operating Policy J-01: Tuition Reimbursement and HR Training Administrators Handbook for Tuition Reimbursement Administration to ensure:

- (1) Alignment with the Administrative Code and the current Memorandums of Understanding.
- (2) Address the inclusion/exclusion of trade schools.

#### Management Response Agree.

- (1) Reimbursement standards have been updated in the new policy to align to MOU's and Administrative Code.
- (2) AWWA and American Water College were added to the policy.

The estimated implementation date is April 2025.

### EVALUATION OF MANAGEMENT'S RESPONSE

Internal Audit considers management's response appropriate to the recommendations, and management's corrective actions should resolve the conditions identified in the report.

### AUDIT TEAM

Kathryn Andrus, CPA, Assistant General Auditor Chris Gutierrez, CPA, CIA, Audit Program Manager Bonita Leung, Senior Deputy Auditor, CPA, CIA, CRMA, CGMA Neena Mehta, Senior Deputy Auditor Faviola Sanchez, Deputy Auditor III

# **APPENDIX A: SUPPLEMENTAL INFORMATION**

### ADDITIONAL INFORMATION

#### **Application Policy Details**

The program requirements/guidelines in place for application requests, including required documentation, are summarized below.

#### Application Information

Submitted applications are to contain the following data:

- (1) Requestor details
- (2) School name
- (3) Type of degree program (graduate or undergraduate)
- (4) Course title, course number, credit hours
- (5) Start and end dates of the course
- (6) Course tuition, associated fees
- (7) Rationale for enrolling in the class/program
- (8) Endorsements
- (9) Copy of the program plan if a first-time degree or certification program

#### **Documentation Requirements/Approvals**

For a new degree or certification program, applications must:

- (1) Meet the defined criteria for reimbursement, including:
  - (a) A regular employee with at least six months at the District
  - (b) A completed reimbursement EForm 63
  - (c) Approval prior to the start of the course
  - (d) A program or schedule of courses for first-time degrees or certificates
- (2) Receive the group manager's and supervisor's approvals

For continuing degree or certificate courses, one-time professional examination preparation courses, and one-time professional courses at accredited institutions, applications must be:

- (1) Approved by the employee's supervisor
- (2) Submitted to the Human Resources Group Manager or designee

Any exceptions to the policy require approval of the Human Resources Group Manager or designee. All approvals are to be obtained prior to the start of a class/course and are to be documented on the EForm.

### **SCOPE & OBJECTIVES**

Our audit scope included the review of the Employee Tuition Reimbursement Program (Program) for the period January 1, 2018 through October 31, 2021.

5E

Our audit objectives were to:

- (1) Evaluate compliance with established policies, procedures, and guidelines.
- (2) Evaluate the employee tuition reimbursement process for operational efficiency opportunities.

#### EXCLUSIONS

Our audit scope did not include (1) the effectiveness of the Program and (2) the cost-benefit analysis of the Program.

#### PRIOR AUDIT COVERAGE

We have not completed any audit reports with a similar scope within the last five years.

#### AUTHORITY

We performed this audit in accordance with the FY 2021/22 Audit Plan presented to the former Audit & Ethics Committee and our FY 2023/24 Audit Plan approved by the Board.

### PROFESSIONAL INTERNAL AUDIT STANDARDS

Our audit was conducted in conformance with the International Standards for the Professional Practice of Internal Auditing issued by the International Internal Audit Standards Board.

### FOLLOW-UP REVIEWS

The Office of the General Auditor has implemented a new follow-up process to ensure management has effectively implemented corrective action related to our recommendations. Management is required to report recommendation implementation status to our office within six months following the issuance of this report and a first follow-up review will occur shortly thereafter. All audit recommendations are expected to be implemented within a year of this report and if necessary, a second follow-up review will occur approximately six months after issuance of the first follow-up review report. Any audit recommendations not implemented after the second follow-up review will be shared with the Board/Audit Committee at its next scheduled meeting.

#### INTERNAL CONTROL SYSTEM

An internal control system is a continuously operating and integrated component of Metropolitan's operations. Internal controls are implemented by the Metropolitan team and seek to provide reasonable (not absolute) assurance that the District's business objectives will be achieved. However, limitations are inherent in any internal control system no matter how well designed, implemented, or operated. Because of these limitations, errors or irregularities may occur and may not be detected. Specific examples of limitations include but are not limited to, poor judgment, carelessness, management override, or collusion. Accordingly, our audit would not necessarily identify all internal control weaknesses or resultant conditions affecting operations, reporting, or compliance. Additionally, our audit covers a point in time and may not be representative of a future period due to changes within Metropolitan and/or external changes impacting the District.

#### METROPOLITAN'S RESPONSIBILITY FOR INTERNAL CONTROL

It is important to note that Metropolitan management is responsible for designing, implementing, and operating a system of internal control. The objectives of internal controls are to provide reasonable assurance as to the reliability and integrity of information; compliance with policies, plans, procedures, laws, and regulations; the safeguarding of assets; the economic and efficient use of resources; and the accomplishment of established goals and objectives. In fulfilling this responsibility, management judgment is required to assess the expected benefits and related costs of internal control policy and procedures and to assess whether those policies and procedures can be expected to achieve Metropolitan's operational, reporting, and compliance objectives.

# **APPENDIX B: PRIORITY RATING DEFINITIONS**

The Office of the General Auditor utilizes a priority rating system to provide management with a measure of urgency in addressing the identified conditions and associated risks. We assess the significance of each observation identified during the audit using professional judgment and assign priority ratings to each recommendation using the criteria listed below. Factors taken into consideration in assessing the priority include the likelihood of a negative impact if not addressed, the significance of the potential impact, and how quickly a negative impact could occur.

		PRIORITY	
Definition	Observation is <i>serious</i> enough to warrant <i>immediate</i> corrective action. The condition may represent a serious financial, operational, or compliance risk. A priority 1 recommendation may result from a key control(s) being absent, not adequately designed, or not operating effectively.	Observation is of a <i>significant</i> nature and warrants <i>prompt</i> corrective action. It may represent a moderate financial, operational, or compliance risk. A priority 2 recommendation may result from a process or less critical control(s) not being adequate in design and/or not operating effectively on a consistent basis.	Observation involves an internal control issue or compliance lapse that can be corrected in the <i>timely</i> course of normal business. A priority 3 recommendation may result from a process or control that requires enhancement to better support Metropolitan's objectives and manage risk.
Response Time	Immediate	Within 90 Days of report issuance	Within 180 Days of report issuance

# APPENDIX C: MANAGEMENT'S RESPONSE

5E

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

- Date: March 2, 2025
- To: Scott Suzuki, General Auditor

From: Mark Brower, Human Resources Group Manager

cc: Deven Upadhyay, General Manager Katano Kasaine, Assistant General Manager / Chief Financial Officer

#### Subject: Management Response to Audit Number (22-4060)

#### The General Manager has reviewed and concurs with the following response.

Included is the management response to the Employee Tuition Reimbursement Program Audit (22-4060) covering Fiscal Years 2017/18 – 2020/21. Since the audit was conducted, the Human Resources team had already made significant changes to the administration of tuition reimbursement. The team also made changes as a direct result of feedback received through this audit process. We appreciate the time the Audit team took to evaluate this work and for your insight into opportunities to improve.

Thank you for your continued partnership and please do not hesitate to contact me if you would like to discuss the response or any other matters related to this audit.

Mark Brower

Mark Brower, Group Manager - Human Resources

Katano Kasaino.

Katano Kasaine, Assistant General Manager / Chief Financial Officer

Deven Upadhyay, General Manager

lanagement Response	
OBSERVATION 1	Application Requirements
	The Employee Tuition Reimbursement Program (Program is available to all regular full-time and part-time employees who have completed a minimum of six months of service Temporary and contracted staff and employees with less than six months of service are not eligible to participate in the Program. The courses must relate to the employee's current job or to Metropolitan work the employee car reasonably be expected to perform in the future. Courses are to be taken on the employee's own time. (See Appendix A for the specifics on the Program requirements/guidelines regarding the application process.)
	We statistically selected 56 tuition reimbursemen application requests for testing.
	<ul> <li>Form Completion</li> <li>32 of 56 (57%) had incomplete information wherein the taking of the course outside of working hours could no be substantiated.</li> </ul>
	<ul> <li>30 of 56 (54%) of the EForms were incomplete, missing items such as school name, course title, or program name.</li> </ul>
	<ul> <li>26 of 56 (46%) requests for first-time degree of certificate programs were missing a copy of the program plan.</li> </ul>
	As such, the applicability of the degree or program to Metropolitan-related work could not be ascertained.
	<ul> <li><u>Approvals</u></li> <li>30 of 56 (54%) did not contain the appropriate management approvals per policy; thus, authorization by department management could not be ascertained</li> </ul>
	<ul> <li>20 of 56 (36%) did not contain the Human Resources (HR) Group Manager or designee signature; thus, an acknowledgment that the employee qualified under the program requirements could not be substantiated.</li> </ul>
	<ul> <li>In one instance, three employees from different departments applied for the same course. One of the submissions incorrectly indicated the class was a "one time course," requiring no group manager approval resulting in insufficient approval being obtained.</li> </ul>

5E

	<ul> <li>Submission</li> <li>10 of 56 (18%) were submitted late, ranging from 1 to 89 days after the course start date, which could resul in the enrollment in the course or class not being reimbursable.</li> </ul>
	• 3 of 56 (5%) did not include the course start date preventing the assessment of timely submission.
	Course Applicability 1 of 56 (2%) requested a course not applicable to Metropolitan-related work (home inspection). The reques has been neither approved nor denied and remains oper in the system.
OBSERVATION 2	Reimbursement Requirements
	Per the Tuition Reimbursement Policy (J-01), when requesting reimbursement for tuition, an employee must prepare and submit the Reimbursement EForm, provide transcripts showing a grade of "C" or better, and provide original receipts to Human Resources within 30 days after completion of the course.
	We statistically selected 61 paid tuition reimbursements fo testing.
	• For 6 of 61 (10%) totaling \$15,656, transcripts for the courses could not be provided.
	• For 5 of 61 (8%) totaling \$10,589, receipts for \$9,580 could not be provided.
	• For 1 of 61 (2%) totaling \$4,257, the EForm requesting reimbursement could not be located.
	For 1 of 61 (2%) totaling \$2,440, neither the grade report nor the receipt contained the name of the university or organization; thus, the reimbursement could not be substantiated.
OBSERVATION 3	Reimbursement Recovery
	The Tuition Reimbursement Policy requires a minimum one-year work commitment after receiving tuition reimbursement.
	We statistically selected 65 refund requests for testing.
	• For 1 of 65 (2%), Human Resources permitted a pro rated collection of the reimbursed amount based of the number of months an employee had worked subsequent to receiving the reimbursement.
	• For 1 of 65 (2%), reimbursement of \$14,592 was no sought, although the employee left before meeting the one-year work commitment.
FORM MANAGEMENT RESPONSE FORM	PAGE 2 OF 10

	RECO	MMENDATIONS 1 - 3 PRIORITY 2	file by the HR Group Manager. <b>Recommendation 1</b> We recommend Human Resources management formalize the review process for:
			<ul> <li>(1) Applications and reimbursements, including remediation of non-compliant submissions.</li> </ul>
			(2) Non-conforming reimbursement recovery requests.
			(3) Documenting exceptions made to the published policy including appropriate approvals.
		MANAGEMENT ACTION PLAN	(1) This is addressed in the operating policy update (Tuition Reimbursement J-01), which is under final review with the Technical Writing Team and due to be distributed via email memo, published on the MWD intramet, as well as hyperlinked to the updated Tuition Reimbursement e-form.
х	AGREE		(2) This is addressed in the updated policy (Tuition Reimbursement J-01).
			3) Approvals are to be made by Training Administrator or Specialist. Any exceptions will be documented and based on a decision made by the HR Group Manager.
		ESTIMATED IMPLEMENTATION	May 2025
	PARTIALLY AGREE	EXPLANATION	
	RECO	MMENDATIONS 1 - 3	Recommendation 2
		PRIORITY 2	We recommend Human Resources management form a working group to review application, reimbursement, and non-conforming reimbursement recovery requests, or at a minimum, ensure the review and approval process is applied consistently and occurs at an appropriate management level.
x	AGREE	MANAGEMENT ACTION PLAN	The review and approval process are now supported with an updated submission process (eForm) that collects the information required to evaluate the request. Along with the updated operating policy, this allows HR staff to accurately and consistently process requests. Any exceptions will be documented and based on a decision made by the HR Group Manager. These changes have been implemented and will continue to improve once the latest version of the eForm and operating policy are finalized.
		ESTIMATED IMPLEMENTATION	May 2025
	PARTIALLY AGREE	EXPLANATION	

	RECO	OMMENDATIONS 1 - 3 PRIORITY 2	We recommend Human Resources management establish a monitoring process to identify trends requiring furthe focus.
x	AGREE	MANAGEMENT ACTION PLAN	This is addressed in the policy update (Tuition Reimbursement J-01) and outlines the new internal audit process that will ensure employees do not exceed annual limits.
		ESTIMATED IMPLEMENTATION	May 2025
	PARTIALLY AGREE	EXPLANATION	

OBSERVATION 4	EForm Improvements
	When an employee seeks approval for enrollment in a class or course, the employee is to submit the request using the Tuition Reimbursement EForm. Upon clicking or the EForm, a sequentially numbered EForm is generated and saved, regardless of whether the EForm is submitted or abandoned. As a result, the database contains many incomplete, non-submitted forms creating tracking and reconciliation challenges.
	Further, when an employee seeks reimbursement for tuition, the employee initiates the process by modifying the same EForm used to apply for the Tuition Reimbursement program. Within this EForm, the employee provides additional details, including the exact tuition and fee amounts, a description of the expenses, and the date the tuition and fees were paid. Moreover, the employee is to change the dropdown selection in the "Reason Section" from "Enroll in a new course" to "Request for reimbursement."
	Per review of the 61 tuition reimbursements selected for testing:
	<ul> <li>58 of 61 (95%) did not have the appropriate field selected. Specifically, the "Reason Section" of the EForm showed "Enroll in a new course" rather than "Request for Reimbursement".</li> </ul>
	• EForm signature lines do not agree to the required signatures per the Tuition Reimbursement Operating Policy (Policy). The Policy states that a request for a new degree or certificate program is to be approved by the submitter's group manager and supervisor. In contrast, the EForm states signatures from a section manager and supervisor are needed.
	We also noted that the EForm date is not updated when the employee modifies the request to submit the reimbursement, making it impossible to determine if the employee submitted the request within 30 days of course completion, as required by the Policy.
	Moreover, the EForm approval process allows ar individual to e-sign for all four required approvals (i.e. requestor, supervisor, group manager, and Humar Resources).
	One such EForm was noted in our sample. The creator of the EForm indicated it was a test; however, nowhere on the EForm did it indicate it was a test document. Further, the EForm was created in the production environment, not the test environment. We did not identify any reimbursements

					NOVEMBER 2023 (Rv. N/A)

OBSERVATION 6			Policy & Procedures	
			Human Resources staff refer to the HR Training Administrators Handbook for Tuition Reimbursement Administration and Metropolitan's Operating Policy J-01: Tuition Reimbursement for administering the Program. These documents establish the policy applicable to employees not covered by a Memorandum of Understanding (MOU) that includes a negotiated tuition reimbursement provision.	
			The latest revision of Operating Policy J-01 (Policy) was in 2009 and does not incorporate the modifications implemented in the MOUs since 2009 or the current Administrative Code (Section 6524). For instance, the Policy specifies a reimbursement rate of 85% for tuition costs up to \$9,000 annually. However, per Administrative Code Section 6524 and the current MOUs with all four employee organizations, the reimbursement rate stands at 100% of tuition expenses, capped at a maximum of \$9,000 per year for undergraduate degrees. In addition, the Policy does not address current Human Resources practices such as approving "grandfathered in" non-accredited trade school classes for reimbursement such as American Water Works Association (AWWA), California Water Board, and American Water College, and does not agree to the HR Training Administrators Handbook for Tuition Reimbursement Administration.	
	RE	COMMENDATION 10 PRIORITY 3	<b>Recommendation 10</b> We recommend Human Resources management revise both Operating Policy J-01: Tuition Reimbursement and HR Training Administrators Handbook for Tuition Reimbursement Administration to ensure:	
			(1) Alignment with the Administrative Code and the current Memorandums of Understanding (MOUs).	
			(2) Address the inclusion/exclusion of trade schools.	
		MANAGEMENT ACTION PLAN	(1) Reimbursement standards have been updated in the new policy to align to MOU's and Administrative Code.	
х	AGREE		(2) AWWA and American Water College were added to the policy.

**PUBLIC INFORMATION** 

5E

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

Date:	March 26, 2025		
То:	Audit Committee		
From:	Scott Suzuki, CPA, CIA, CISA, CFE, General Auditor		
Subject:	Cybersecurity Audit: Inventory & Control of IT Assets (Project Number 23-31)		

We have completed a cybersecurity audit of inventory and control of IT assets for the Information Technology Group (ITG).

Due to the sensitive nature of the critical infrastructure information, details of our observations and recommendations were shared with select members of the Board and management in a separate confidential report not subject to public release.

Our audit objectives were to: (1) determine if an accurate, detailed, and up-to-date inventory of IT assets on the network has been established and is maintained and (2) determine if there is a process to address unauthorized assets. Our audit scope included ITG inventory records and all IT assets under the control of ITG with the potential to store or process data, including end-user devices (e.g., laptops, desktop computers), network devices (e.g., firewalls, switches), non-computer/IoT devices, and servers connected to Metropolitan's network as of March 31, 2024.

Our audit scope did not include: (1) software assets, (2) data, (3) hardware assets outside of Metropolitan's network, (4) hardware assets maintained by Integrated Operations, Planning, and Support Services, (5) cloud-based servers, nor (6) servers on virtual machines.

We have not completed any audit reports with a similar scope within the last five years.

Using our priority rating system, we reported two observations (one Priority 2 and one Priority 3) and two associated recommendations. Management agreed with our observations and recommendations. We consider management's response appropriate to the recommendations and their corrective actions should resolve the conditions identified.

We appreciate the cooperation and courtesies provided by the Information Technology Group.

The results from this audit will be summarized for inclusion in a status report to the Board. If you have any questions regarding our audit, please do not hesitate to contact me directly at 213.217.6528 or Assistant General Auditor Kathryn Andrus at 213.217.7213.

#### **PUBLIC INFORMATION**

cc: Board of Directors General Manager General Counsel Ethics Officer Office of the General Manager Distribution Assistant General Managers Information Technology Group Distribution External Auditor

# Monthly Report March 2025

# **EDUCATION Program**

Ethics Education staff presented an Ethics Office overview at new employee orientations hosted by Human Resources, held an ethics policy overview session at the General Manager's Group Manager meeting, and attended: "Getting the Message: Measuring Impact of Your Training," hosted by the Council on Governmental Ethics Laws.

Education staff also met with External Affairs and Human Resources staff for feedback and subject matter expertise related to education and outreach resources and opportunities at Metropolitan.

# **COMPLIANCE Program**

**Form 700/Filing Officer Duties** – Pursuant to state law and the Administrative Code, Compliance staff assisted directors and employees with their Annual, Assuming Office, and Leaving Office Form 700 filings. Assistance included troubleshooting the electronic filing system and issuing notices of deadlines. Staff also navigated the recent Annual Form 700 filing deadline extension for certain filers adopted by the Fair Political Practices Commission. In total, staff addressed 78 compliance-related matters for Metropolitan Directors and staff related to Form 700. **Conflict of Interest Code** – Staff evaluated which new Metropolitan positions must file Form 700 and determined the appropriate level of disclosure for each position. Staff also initiated the state-mandated biennial COI Code review process and began working with a consultant to assist with the Code amendment process.

**AB 1234 compliance** – Staff managed AB 1234 state ethics training compliance for Metropolitan. 84% of Metropolitan officials required to take ethics training have complied with the state requirement. Nine have not completed the training. Staff will continue efforts to seek 100% compliance.

# **ADVICE Program**

Advice staff addressed 44 time-sensitive advice requests for directors and employees related to the following ethics laws and policies: conflicts of interest, financial disclosure, gifts, outside employment, revolving door restrictions, and other ethics-related topics. Examples of advice requested includes:

- Whether officials must disclose a personal residence on Form 700 where the residence is also used for business purposes and a portion of the property is claimed as a tax deduction.
- Whether the revolving door and conflict of interest provisions prevent a recently retired Metropolitan employee from working for a consultant on a Metropolitan project the employee worked on while employed by Metropolitan.
- Whether a Metropolitan department may hire a former employee for a sole source contract.
- Whether an employee may accept an event ticket from a current Metropolitan contractor.
- Whether an official may accept a consulting opportunity with a Metropolitan partner organization.

Staff also helped identify and advise on potential conflicts of interest in Committee and Board agenda items.

# **INVESTIGATION Program**

**Complaints** – The Ethics Office received eight new complaints involving the following allegations:

- Retaliation by a manager against an employee for reporting potential workplace violations.
- Unprofessional behavior by an employee.
- Improper outside employment activity by an employee.
- Improper influence over a recruitment by a Metropolitan official.
- Improper acceptance of a gift from a Metropolitan vendor by a manager.
- Improper receipt of gifts, outside employment activity, misuse of authority, and conflict of interest by a Metropolitan manager.
- Two instances of misuse of authority and conflict of interest by two Metropolitan officials.

Open Complaints and Investigations – As of March 31, 2025, the Investigations Program is managing a total of 19 open complaints and one open ethics investigation.

SNAPSHOT for March 2025

# Mission

The Ethics Office promotes the highest standards of government integrity to support Metropolitan's mission through an independent and comprehensive program that enhances trust, transparency, and accountability for the benefit of the workforce and the public it serves.

### Vision

Our vision is to be a leader in governmental ethics with an unparalleled commitment to supporting an ethical organizational culture.

The following directors had comments or questions.

1. Ortega

Staff responded to directors' questions or comments.

#### 7. MANAGEMENT REPORT

a. Subject: Ethics Officer's Report

Presented by: Abel Salinas, Ethics Officer

Mr. Salinas introduced a new member to the ethics team Hiroshi Ishikawa. Mr. Salinas also reported that since January, the Ethics Office has not initiated new investigations or entered into any new contracts. Mr. Salinas reported that there is currently one Ethics investigation, opened in September and alleges misuse of authority. The Ethics Officer anticipates completing this investigation within the regular six-month timeline. Mr. Salinas reported that the Ethics Office received five complaints in January; two separate allegations of discrimination and or harassment were referred to EEO Office. One allegation of a potential ethics violation was closed after a preliminary review. Two allegations of potential ethics violation are currently under review by the office to determine any appropriate next steps. The Ethics Office has established a new alternative complaint hotline for reporting concerns against directors and senior officials.

The following Directors made comments or asked questions:

1. Pressman

Staff responded to director's comments and questions.

b.	Subject:	Equal Employment Opportunities activities
		Human Resources activities
		Safety, Security, and Protective activities

Ms. Wisdom provided an update on Equal Employment Opportunities activities and reminded Board members of an approaching deadline to take the mandatory EEO training to remain in compliance.

No reports for Human Resources, and Safety, Security, and Protection activities.

#### 8. FOLLOW-UP ITEMS

Director Pressman stated there will be follow-up reports on Human Resources and the Shaw report.

#### 6. COMMITTEE ITEMS

Subject:State of Diversity, Equity, and Inclusion and Metropolitan's<br/>ApproachPresented By:Liji Thomas, Diversity, Equity, and Inclusion Officer<br/>Juan Redin, Sr. Deputy General Counsel

Ms. Kasaine introduced the item, and Ms. Thomas provided an update on the state of Diversity, Equity, and Inclusion at Metropolitan, highlighting DEI as a critical business imperative that fosters fairness, innovation, and organizational success. Mr. Redin discussed the recent Executive Orders and their legal implications. Ms. Thomas concluded by reaffirming Metropolitan's long-standing commitment to DEI, emphasizing the importance of adapting to legal changes while maintaining a high-performing and inclusive organization.

The following Directors provided comments or asked questions:

1. Garza

Director Gray entered the meeting.

 b Subject: Quarterly Workforce Development Update
 Presented By: Brenda Martinez, Unit Mgr-Diversity, Equity & Inclusion Workforce Development

Ms. Martinez provided an update on Metropolitan's Workforce Development efforts, emphasizing partnerships, training, and outreach to bridge skill gaps and enhance career opportunities. Key initiatives include collaborations with member agencies, community engagement through MOUs and events, certification, and skills training, and expanded outreach to Native Nations. Metropolitan is also prioritizing veteran and disability outreach while strengthening career pathways and succession planning.

The following Directors provided comments or asked questions:

- 1. Dick
- 2. Ortega
- 3. Seckel
- 4. Armstrong
- 5. Fellow
- 6. Ramos
- 7. Cordero

Staff responded to the Directors' comments and questions.

#### 7. MANAGEMENT ANNOUNCEMENTS AND HIGHLIGHTS

a. Subject: Ethics Officer's report on monthly activities

Presented: Abel Salinas, Ethics Officer

Mr. Salinas updated the committee on the Ethics Office's programs, staffing, and initiatives, including expanding ethics education and lobbying outreach. Mr. Salinas reported that one misuse of authority investigation is nearing completion and that the office received five complaints. Two allegations of potential ethics violations are currently under review. Directors were reminded to submit AB 1234 training certificates at their earliest convenience and file annual Form 700s by April 1, 2025.

b.	Subject:	Diversity, Equity, and Inclusion activities Equal Employment Opportunity Activities
	Presented:	Liji Thomas, Diversity, Equity, and Inclusion Officer Jonaura Wisdom, Chief EEO Officer

Ms. Thomas highlighted the Diversity, Equity, and Inclusion Team's collaborative efforts with various organizations, including engaging with small business owners, supporting workforce development initiatives, and hosting a "Career in Water" webinar that reached over 120 students. The team also advanced outreach to Native nations and achieved 70% staff completion of Civil & Inclusive Workplace Training.

Ms. Wisdom announced that the Equal Employment Opportunity Activities update is available online.

## **MEETING OF THE**

## **BOARD OF DIRECTORS**

#### THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

#### February 11, 2025

**53951** The Board of Directors of The Metropolitan Water District of Southern California met in on Tuesday, February 11, 2025.

Chair Ortega called the teleconference meeting to order at 1:15 p.m.

Director Ackerman stated that she is using AB 2449 just cause due medical condition.

**53952** The Meeting was opened with an invocation by Director Tana McCoy, City of Compton.

**53953** The Pledge of Allegiance was given by Director Garry E. Bryant, Foothill Municipal Water District.

**53954** Board Secretary Fong-Sakai administered the roll call. Those responding present were: Directors Ackerman (AB2449-Just Cause), Alvarez, Armstrong, Bryant, Camacho, Cordero, De Jesus, Dennstedt, Dick, Douglas, Erdman, Faessel, Fellow, Fong-Sakai, Garza, Gold, Goldberg, Jung (teleconference posted location available for the public), Kassakhian, Kurtz, Lefevre (teleconference posted location available for the public), Lewitt, McCoy, McMillan, Miller (teleconference posted location available for the public), Morris, Ortega, , Pressman (teleconference posted location available for the public), Quinn, Ramos, Seckel, and Sutley.

Those not responding were: Directors Crawford, Gray, Katz, Luna, and Petersen.

Board Secretary Fong-Sakai declared a quorum present.

Those entered after roll call: Director Phan (teleconference posted location available for the public)

Chair Ortega called on Director Alvarez to introduce Member Agency Manager Guest E.J. Caldwell, General Manager of West Basin Water District. Chair Ortega, Director Alvarez, and Mr. Caldwell made remarks.

Chair Ortega welcomed and thanked Mr. Caldwell for joining the board and encouraged them to comment on matters important to West Basin Municipal Water District.

**53955** Chair Ortega invited members of the public to address the Board on matters within the Board's jurisdiction (in-person and via teleconference).

	Name	Affiliation	Comment
1.	Richard Atwater	President, Foothill Municipal Water District	Eaton Fire response from Metropolitan
2.	Nina Jazmadarian	General Manager, Foothill Municipal Water District	Eaton Fire response from Metropolitan
3.	Darcy Burke	Elsinore Valley Municipal Water District	Eaton Fire response from Metropolitan
4.	Laura Garcia	Metropolitan Employee, VP, AFSCME	Item 7-3
5.	John Mendoza	Resident of the City of Pomona	Alternate Board Members

2

**53956** Chair Ortega discussed his Second Term Priorities with Key Objectives: proposed committee structures and appointments to align oversight and policy initiatives around three critical goals: 1. Stabilizing Metropolitan internally by addressing longstanding issues that have disrupted morale and occasionally diverted us from our mission; 2. Redoubling commitment to climate action and long-term water supply sustainability through responsible stewardship of the Metropolitan workforce, resources, and infrastructure; 3. Working towards long-term financial stability to ensure operations remain sustainable. (Agenda Item 5A).

Chair Ortega addressed the following: Other Matters and Reports.

**53957** Chair Ortega asked if there were any corrections to the report of events attended by Directors at Metropolitan's expense during the month of January, as previously posted and distributed to the Board. None were made.

**53958** Chair Ortega referred to the Chair's monthly report, which was previously posted and distributed to the Board. In addition, the Black Employees' Association kicked off its Black History Month celebration with an event honoring the legacy of activism in the fight for racial equality. Lastly, we invite the Board to the dedication ceremony of the Water Quality Laboratory, which will be named in Honor of Dr. Michael J. McGuire, on February 20<sup>th</sup> at 1:30 p.m. In addition, on behalf of the board, Director Dennstedt presented a monetary gift to Directors Bryant and Quinn as they were affected by the Eaton fires. Chair Ortega asked if there are any questions. None were made.

**53959** General Manager Upadhyay reported in addition to the written report previously posted, he reported on the public comment speakers Eaton fire response from Metropolitan; at the Executive Committee, he will present the 2025 vision and priorities plan. Lastly, he highlighted the Jensen Safety Committee.

The following Director(s) asked questions or made comments:

Director(s)

- 1. Gold
- 2. Sutley
- 3. Ortega
- 4. Fellow

The General Manager responded to the Directors' comments and questions.

**53960** General Counsel Scully stated she had nothing to add to her written report.

3

**53961** General Auditor Suzuki stated he had nothing to add to his written report.

**53962** Ethics Officer Salinas stated he had nothing to add to his written report.

**53963** Presentation of 10-year service pin to Director Ramos, the City of Burbank. Director Ramos made remarks. (Agenda Item 5H)

**53964** Presentation commendatory resolution for Former Director Tim Smith representing San Diego County Water Authority. Former Director Tim Smith made remarks. (Agenda Item 5I)

**53965** Chair Ortega asked the Directors if there were any comments or discussions on the Approval of the Minutes of the Special Board of Directors meeting for January 11, 2025, and the Board of Directors meeting for January 14, 2025 (Agenda Item 6A). None were made.

**53966** Approve Chairs and Vice Chairs for the term commencing on February 11, 2025, governance changes to Committees and Committee formation including the modification of Standing Committees and the creation and elimination of Ad Hoc Committees as set in the board letter, and direct staff to bring back the required changes to the Administrative Code for Board approval. Chair Ortega asked if there are any questions. (Agenda Item 6B). None were made.

**53967** Chair asked Directors to email Jon Rubin or himself of their committee assignment preference for the current term. The Committee members will remain in place until the March Board meeting. (Agenda Item 6C)

Chair Ortega called on Directors who are requesting that any items be pulled from the Consent Calendar Action Items and to state any recusals, abstentions, and disclosures. None were made.

Consent Calendar Items- Action

**53968** Award a \$2,556,478.19 construction contract to MasTec Network Solutions LLC for upgrades to the desert microwave communication tower sites; B. awarded a \$1,531,044 procurement contract to Logicalis Inc. for communications site network equipment; C. authorized an increase of \$591,000 to the agreement with Nokia of America Corporation for a

new not-to-exceed amount of \$5,888,000 for network materials and manufacturer's field services; and D. authorized an increase of \$680,000 to the agreement with Hatfield & Dawson Consulting Engineers LLC for a new not-to-exceed amount of \$1,410,000 to provide specialized technical support during construction and commissioning, as set forth in Agenda Item 7-1 board letter.

**53969** Award a \$1,931,217 contract to Fencecorp. Inc. for perimeter fencing for housing and playground areas and shade improvements for the playground area at four CRA pumping plant villages, as set forth in Agenda Item 7-2 board letter.

**53970** Authorize an agreement with Computer Aid, Inc. in an amount not to exceed \$6 million for co-managed support services for the operation and maintenance of the Metropolitan Cybersecurity Operations Center, as set forth in Agenda Item 7-3 board letter.

**53971** Authorize the General Manager to enter into an agreement with Palo Verde Irrigation District to jointly fund community investment in Palo Verde Irrigation District's service area, as set forth in Agenda Item 7-4 board letter.

**53972** Authorize the General Manager to approve a new three-year agreement with WaterWise Consulting Inc. for the Large Landscape and Residential Survey Program, for a total agreement not to exceed \$200,000/year, as set forth in Agenda Item 7-5 board letter.

**53973** Authorize the General Manager to expand the Bard Seasonal Fallowing Program and amend the System Conservation Implementation Agreement for Bard Seasonal Fallowing Program to increase its program size from 3,000 acres to 6,000 acres for the years 2025 and 2026, as set forth in Agenda Item 7-6 board letter.

**53974** Review and consider the Lead Agency's certified Environmental Impact Report and Initial Study, took related CEQA actions, and adopted a resolution for the 117th Fringe Area Annexation concurrently to Eastern Municipal Water District and Metropolitan, as set forth in Agenda Item 7-7 board letter.

Director Morris moved, seconded by Director Camacho, that the Board approve the Consent Calendar Items 6A, 6B, 7-1 through 7-7.

The following Director(s) asked questions or made comments:

Director(s)

- 1. Kurtz
- 2. DeJesus
- 3. Garza

The General Manager and staff responded to the Directors' comments and questions.

Chair Ortega called for a vote to approve the Consent Calendar Items 6A, 6B, 7-1 through 7-7.

4

The motion to approve the Consent Calendar Items 6A, 6B, 7-1 through 7-7 (**M.I. No. 53965 through 53974**) passed by a vote of 406,315 ayes; 0 noes; 0 abstain; 0 not voting; and 0 absent.

Director Ackerman stated during the vote that she was alone.

Chair Ortega called on Directors who would request to vote on Board Items 8-1, 8-2, or 8-3 separately or discuss Board Items 8-2 or 8-3 in closed session.

6

Chair Ortega requested if there are any changes and reports from the Committee Chairs on the recommendation from the Committee.

Committee Chair Quinn announced Board Item 8-1 changes reflected below.

Committee Vice Chair Dick announced Board Item 8-2 changes reflected below.

**53975** Authorize the General Manager to execute transfers, exchanges, and other State Water Project management transactions during 2025 and 2026 and grant final decision-making authority to the General Manager subject to the terms set forth in this letter with the understanding that 1) such transactions will only be pursued under conditions when Metropolitan projects adding to or spilling stored supplies accessible by the State Water Project -dependent areas; 2) staff will monitor, evaluate, and report on the efficacy and impacts of this program as it progresses; and 3) an Ad Hoc Committee will be established to provide ongoing oversight and review of this program (Board Item 8-1).

**53976** Authorize the execution of lease amendments with existing tenants, D&L Farms, Inc., Dinelli Farms, and Sierra Cattle Company, to extend the term up to two years for Dinelli Farms, Sierra Cattle, and provide D&L Farms with up to a one-year, move-out period while adjusting the rent for all three tenants, thereby allowing the existing tenants to continue farming on Metropolitan's fee-owned property in the Sacramento-San Joaquin Delta, subject to the price and terms direction given in closed session and with temporary tenant replacement and land preservation procedures in the event of tenant default or surrender of land (Board Item 8-2).

**53977** Authorize an increase in the maximum amount payable under the contract for legal services in Ryan Tiegs v. Metropolitan Water District of Southern California with Seyfarth Shaw LLP in the amount of \$300,000 for a total amount not to exceed \$825,00 (Board Item 8-3).

Director Sutley moved, seconded by Director Dick, that the Board approve the Board Items 8-1, 8-2, and 8-3 as follows:

Chair Ortega called for a vote on to approve Board Items 8-1, 8-2, and 8-3, as stated.

The motion to approve the Board Items 8-1, 8-2, and 8-3 (**M.I. No. 53975 through 53977**) passed by a vote of 406,315 ayes; 0 noes; 0 abstain; 0 not voting; and 0 absent.

Director Ackerman stated during the vote that she was alone.

**53978** Chair Ortega asked if there were questions or need for discussion on Board Information Items 9-1, 9-2 or 9-3. No requests were made.

**53979** Chair Ortega announced we do not have any other matters.

53980 Chair Ortega asked if there were any Follow-Up Items. No requests were made.

8

**53981** Chair Ortega asked if there were any Future Agenda Items. No requests were made.

The following Director(s) asked questions or made comments:

#### Director(s)

1. Fellow

**53982** There being no objection, the meeting was adjourned in remembrance of Ralph Ramirez and San Diego Director Mel Katz's mother, Beatrice Katz. The meeting was adjourned at 2:50 p.m.

Jois Forg - Sal-

LOIS FONG-SAKAI BOARD SECRETARY

ADÁN ORTEGÃ, JR. CHAIR OF THE BOARD

#### MINUTES

## **MEETING OF THE**

## **BOARD OF DIRECTORS**

#### THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

#### March 11, 2025

**53983** The Board of Directors of The Metropolitan Water District of Southern California met in on Tuesday, March 11, 2025.

Chair Ortega called the teleconference meeting to order at 12:16 p.m.

**53984** The Meeting was opened with an invocation by Director Brenda Dennstedt, Western Municipal Water District of Riverside County.

**53985** The Pledge of Allegiance was given by Director Jacque McMillan, Calleguas Municipal Water District.

**53986** Board Secretary Fong-Sakai administered the roll call. Those responding present were: Directors Ackerman, Alvarez, Armstrong, Bryant, Camacho, Cordero (teleconference posted location available for the public), Crawford, De Jesus, Dennstedt, Dick, Douglas, Erdman (teleconference posted location available for the public), Faessel, Fellow, Fong-Sakai, Garza, Gold, Goldberg, Jung (teleconference posted location available for the public), Kassakhian, Katz, Kurtz, Lefevre (teleconference posted location available for the public), Lewitt, Luna, McCoy, McMillan, Miller, Morris, Ortega, Pressman, Ramos, and Seckel.

Those not responding were: Directors Gray, Petersen, Phan, Quinn, and Sutley.

Board Secretary Fong-Sakai declared a quorum present.

**53987** Chair Ortega invited members of the public to address the Board on matters within the Board's jurisdiction (in-person and via teleconference).

Chair Ortega addressed the following: Other Matters and Reports.

**53988** Chair Ortega asked if there were any corrections to the report of events attended by Directors at Metropolitan's expense during the month of February, as previously posted and distributed to the Board. None were made.

**53989** Chair Ortega referred to the Chair's monthly report, which was previously posted and distributed to the Board. In addition, the month of March is Women's History Month, and March 8 is International Women's Day. In partnership with Metropolitan's employee resource groups, Women at Metropolitan and the Society of Women Engineers will highlight on social media how they both helped support and foster a more inclusive workplace environment for women in water. March is also Persian Heritage Month, with Nowruz, the beginning of the New Year, on March 21<sup>st</sup>. Metropolitan plans to celebrate the Persian and Iranian communities' rich cultural and historical contributions. Lastly, on March 31<sup>st</sup> is Cesar Chavez Day; Metropolitan will highlight the Labor Leader's contributions and legacy. Chair Ortega asked if there are any questions. None were made.

**53990** General Manager Upadhyay acknowledged Women's History Month and reported on the shutdown. In addition, it highlights Metropolitan employees retiring Lori Lalla, Sue Sims, and Gary Syfers.

**53991** General Counsel Scully stated she had nothing to add to her written report.

**53992** General Auditor Suzuki, in addition to his written report, the first audit committee is on March 25<sup>th</sup>.

53993 Ethics Officer Salinas stated he had nothing to add to the written report.

**53994** Presentation of commendation to Eduardo Rosado Lux Bus Company. Eduardo Rosado made remarks. (Agenda Item 5G)

**53995** Presentation of 35-year service pin to Director John Morris, City of San Marino. Director Morris made remarks. (Agenda Item 5H)

Chair Ortega announced the agenda will be taken out of order. Item 6C will be heard first.

**53996** Nomination and Election of nonofficer members of the Executive Committee for twoyear term effective March 11, 2025: Cynthia Kurtz, Carl E. Douglas, and Karl W. Seckel. (Agenda Item 6C)

Motion by Bryant, second by Camacho to elect Director Kurtz, Director Douglas, and Director Seckel as nonofficer members.

Chair Ortega called for a vote to approve the Consent Calendar Item 6C.

The motion to approve the Consent Calendar Item 6C (**M.I. No. 53996**) passed by a vote of 399,980 ayes; 0 noes; 0 abstain; 0 not voting; and 6,335 absent.

**53997** Chair Ortega asked the Directors if there were any comments or discussions on the Approval of the Minutes of the Special Joint Executive Committee and Board of Directors meeting for January 21, 23, and 29, 2025 (Agenda Item 6A). None were made.

**53998** Approve Resolution confirming Director Jacque McMillan for Association of California Water Agencies Region 8 Board Member. (Agenda Item 6B).

**53999** Approve and appoint Committee Assignments. In addition to the committee assignment sent to the directors the following was added:

Ad Hoc Committee on Ag and Tribal Partnerships: Jeffrey D. Armstrong, as a member

Legal and Claims Committee and Legislation and Communications Committee: Michael Camacho, as a member

Organization, Personnel, and Effectiveness: Nancy Sutley, as a member

Director Katz appointed to the Subcommittee on Imported Water: Mark Gold, D. Env., Chair; Linda Ackerman, Vice Chair, Desi Alvarez, Jeffrey D. Armstrong, Michael Camacho, Gloria Cordero, David D. De Jesus, Juan Garza, Cynthia Kurtz, Jay Lewitt, Miguel Angel Luna, Jacque McMillan, and Marty Miller as members.

Director Miller appointed to the Subcommittee on Long-Term Regional Planning Processes and Business Modeling: Matt S. Petersen, Chair, Karl W. Seckel, Vice Chair, Desi Alvarez, Dennis Erdman, Stephen J. Faessel, Anthony R. Fellow, Lois Fong-Sakai, Mark Gold, D. Env., Jacque McMillan, Tracy Quinn, and Nancy Sutley as members. (Agenda Item 6D)

Chair Ortega asked if there were any questions on the committee appointments. No comments were made.

Chair Ortega called on Directors who are requesting that any items be pulled from the Consent Calendar Action Items and to state any recusals, abstentions, and disclosures.

Director McMillan disclosed on Item 7-4 that she receives per diem reimbursements and other benefits from Calleguas for service on the Board, and she will not vote on the item, which is an agreement between Metropolitan and Calleguas.

Director Faessel disclosed on Item 7-6 that he previously received salary and benefits from the City of Anaheim for his service with the city which ended on December 10, 2024. He no longer receives any salary or any other benefits, and he may participate on this item.

Director Dick disclosed that Item 7-8 involves authorizing an agreement with Verizon. He currently owns Verizon stock. Therefore, he will recuse from all participation on this item.

Director Miller disclosed that Item 7-8 involves authorizing an agreement with Verizon. He currently owns Verizon stock. Therefore, he will recuse from all participation on this item.

Consent Calendar Items- Action

Award a \$407,740.66 procurement contract to Ireland Inc. dba Core Rosion Products to furnish two 15,000-sodium hypochlorite tanks for the Copper Basin Reservoir., as set forth in Agenda Item 7-1 board letter.

Award a \$321,575 procurement contract to Integrated 8a Solutions Inc. to furnish two 24-inch diameter gate valves; and a \$2,151,947 contract to Bailey Valve to furnish two 24-inch diameter sleeve valves for the Hollywood Tunnel pressure control structure, as set forth in Agenda Item 7-2 board letter.

Authorize the General Manager to enter into an agreement with Palo Verde Irrigation District to jointly fund community investment in Palo Verde Irrigation District's service area, as set forth in Agenda Item 7-4 board letter.

Authorized the General Manager to enter into a Stormwater for Recharge Pilot Program agreement with the City of Anaheim with a maximum amount of up to \$980,000 for the State College Stormwater Tank Project, as set forth in Agenda Item 7-6 board letter.

**53404** Authorized the General Manager to forbear water conserved by two Coachella Valley Water District projects, thus allowing the conserved water to be added to Lake Mead under the U.S. Bureau of Reclamation's Lower Colorado River Basin System Conservation and Efficiency Program, as set forth in Agenda Item 7-7 board letter.

Reviewed and considered the County of Riverside negative declaration and authorized the General Manager to execute a new ground license agreement with Verizon Wireless for up to 25 years for a new telecommunication site on Metropolitan's fee-owned property in the unincorporated community of Winchester, identified as County of Riverside Assessor Parcel Number 964-030-005, as set forth in Agenda Item 7-8 board letter.

Reviewed and considered the County of Riverside Final Environmental Impact Report certified by the Lead Agency, adopted the Lead Agency's findings, and authorized the General Manager to execute a thirty-year license agreement with Intersect Power, LLC for renewable energy infrastructure purposes on Metropolitan fee-owned property in the County of Riverside and identified as Assessor Parcel Numbers 808-023-022 and 808-023-030, as set forth in Agenda Item 7-9 board letter.

Authorized the General Counsel to increase the amount payable under its contract with Hanson Bridgett LLP by \$100,000 to an amount not-to-exceed \$600,000, as set forth in Agenda Item 7-11 board letter.

Approved amendments to the Metropolitan Water District Administrative Code to modify the structure and duties of various committees and the roles of specified board and committee officers, as set forth in Agenda Item 7-12 board letter.

Director Camacho moved, seconded by Director Garza, that the Board approve the Consent Calendar Items 6A, 6B, 6D, 7-1, 7-2, 7-4, 7-6 through 7-9, 7-11, and 7-12.

The following Director(s) asked questions or made comments:

LOIS FONG-SAKAI BOARD SECRETARY

ADÁN ORTEGA, JR. CHAIR OF THE BOARD

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

# **Board** Action

# Board of Directors Engineering, Operations, and Technology Committee

#### 4/8/2025 Board Meeting

## Subject

7-1

Authorize an increase to a professional services agreement with Grid Subject Matter Experts, LLC for a new notto-exceed total amount of \$1.245 million for electric transmission planning and North American Electric Reliability Corporation-related electric reliability compliance services; the General Manager has determined the proposed action is exempt or otherwise not subject to CEQA

## **Executive Summary**

On January 3, 2024, Metropolitan entered into a sole source agreement for professional services with Grid Subject Matter Experts, LLC (GridSME) to perform work related to electric transmission planning and North American Electric Reliability Corporation (NERC) reliability compliance assessments. During the second half of 2024, Metropolitan received an unexpected influx of requests for affected system studies and a request from a generator developer to connect a project directly to the Colorado River Aqueduct transmission system (CRATS). Staff is relying on the expertise of GridSME to perform technical analysis in support of these requests, which will exhaust the current authorized amount of \$245,000. This agreement extension will ensure sufficient capacity and duration in the agreement to complete the current study request queue in a timely manner. Expenditures for services provided by GridSME for affected system studies and the direct connection to CRATS will be reimbursed by the parties that have requested affected system studies or a direct connection to the CRATS.

This action authorizes an increase to an existing agreement (Agreement No. 218061) with GridSME for electric transmission planning and NERC-related electric reliability compliance services.

#### Proposed Action(s)/Recommendation(s) and Options

#### Staff Recommendation: Option #1

#### **Option #1**

Authorize an increase of \$1.0 million to a professional services agreement with GridSME for a new not-toexceed total amount of \$1.245 million for electric transmission planning and NERC-related electric reliability compliance services.

Fiscal Impact: No immediate fiscal impact

**Business Analysis:** Approving the proposed amendment will ensure sufficient capacity and duration in the agreement to complete the current generator interconnection study request queue in a timely manner.

#### **Option #2**

Do not authorize the increase to Agreement No. 218061.

Fiscal Impact: No immediate fiscal impact

**Business Analysis:** The current authorized amount is insufficient to complete the current study queue. Not approving the extension will delay the completion of the study work.

#### **Alternatives Considered**

Staff is preparing a Request for Proposals (RFP) for supplemental transmission planning services for board review and approval in 2025; however, the timeline to complete the RFP and obtain the requisite approvals will delay the timely completion of the affected system and generation interconnection request studies.

#### **Applicable Policy**

Metropolitan Water District Administrative Code Section 8121: General Authority of the General Manager to Enter Contracts

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

#### Related Board Action(s)/Future Action(s)

Staff will present the results of the RFP for transmission planning services for consideration at a later board meeting.

#### California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

The proposed action is not defined as a project under CEQA because it will not result in a direct physical change in the environment or a reasonably foreseeable indirect physical change. (State CEQA Guidelines Section 15378(a).) In addition, the proposed action is not defined as a project under CEQA because it involves organizational, maintenance, or administrative activities; personnel-related actions; and/or general policy and procedure making that will not result in direct or indirect physical changes in the environment. (Public Resources Code Section 21065; State CEQA Guidelines Section 15378(b)(2) and (5)). Finally, the proposed action is not defined as a project under CEQA because it involves the creation of government funding mechanisms or other government fiscal activities that do not involve any commitment to any specific project that may result in a potentially significant physical impact on the environment. (State CEQA Guidelines Section 15378(b)(4).)).

#### **CEQA determination for Option #2:**

None required.

#### **Details and Background**

#### Background

Metropolitan owns a 230,000-volt transmission system that provides power to its Colorado River Aqueduct (CRA) pumps. Metropolitan also has long-term contracts for energy from the Hoover and Parker Dams, which is transmitted to the CRA pumps over Metropolitan's transmission lines. Southern California Edison (SCE) provided Metropolitan with energy and transmission operating (TOP) services under a 1987 Service and Interchange Agreement. SCE decided not to renew this agreement in 2017 due to market changes, and following a search for a new service provider, the Board authorized the successor agreements with the Arizona Electric Power Cooperative.

In 2023, due to changes in the electric market, staff was directed to determine feasible alternatives to contracting for transmission operating services, including building and staffing a dedicated control center. GridSME, a consultant specializing in electric reliability compliance and electric transmission planning headquartered in Folsom, California, was selected for this task due to their work on a similar study for Metropolitan in 2017 and previous knowledge of our unique system and operating philosophy. Metropolitan entered into a sole source agreement with GridSME for this purpose in January 2024 with a maximum value of \$120,000.

In early 2024, Metropolitan received a request for an affected system study from generation developer CDH Vidal. An affected system study is requested by a generator developer who wishes to connect their project to the grid to determine the impact of that generator on adjacent systems. These studies are highly technical in nature and assess a proposed generation project's impacts on the transmission system across several dimensions (steady-state thermal loading, steady-state, transient, and post-transient voltage stability impacts, and so forth). These

studies are critical to ensure that a generation project does not have an adverse impact on Metropolitan's transmission system or water operations and to protect Metropolitan against incurring costs to mitigate any negative impacts through operational procedures or physical system improvements. The timelines of these studies are critical to protect Metropolitan's interests and to support the broader state and national policies promoting renewable energy development and robust electrical energy markets.

These studies are also highly time sensitive from the point of view of the interconnecting generation customer. If there are significant impacts that require mitigation, the generation customers require this information to ensure the viability of their project and secure the necessary financing. Delays in the completion of the study work will impact the implementation of California's energy policy and potentially harm the viability of these generation projects.

Affected system studies are paid for by the generation developer. The developer signs a study agreement and makes a study deposit, typically on the order of \$50,000 to \$250,000, from which the actual study costs are deducted. Any residual funds are returned to the developer once the study is completed.

Due to limited staffing availability, and GridSME's expertise and immediate availability, GridSME was engaged to assist with the technical analysis. To reflect this additional demand, the GridSME agreement was increased to \$180,000 in May 2024.

During the second half of 2024, Metropolitan received an unexpected influx of seven additional affected system study requests from generators interconnecting to the California ISO (CAISO) and Western Area Power Administration systems, as well as a request to connect directly to the CRATS. Due to the complexities of the affected system study requests, ongoing resource constraints, and the time criticality of the work involved, staff elected to consolidate the affected system study requests into a single comprehensive cluster study. GridSME is currently the primary technical resource engaged with this cluster study; to reflect this additional demand, the GridSME contract was extended to the current authorized amount of \$245,000 in August 2024. However, significant additional work is required to meet the study queue in a timely manner; therefore, it is requested to extend the authorized agreement by \$1.0 million to a new authorized amount of \$1.245 million to accommodate the remaining work as well as any additional requests that are received in 2025.

Staff is currently preparing and executing an RFP for supplemental transmission planning professional services; however, this RFP will be available for board review and approval no earlier than the second or third quarter of 2025. Therefore, staff recommends increasing the current agreement with GridSME to ensure continuity in the ongoing study process and to complete this work in a timely manner.

Affected system study requests and generator interconnection requests are funded by customer deposits; therefore, the majority of the costs of these studies will be recovered and will have minimal budget impact.

#### Proposed Amendments to the GridSME Agreement

Amendment to Agreement No. 218061 will extend the agreement with Grid Subject Matter Experts, LLC (GridSME) to December 31, 2029, and increase the authorized amount by \$1.0 million to a new not-to-exceed limit of \$1.245 million.

Professional Services Agreement for Transmission Planning Services

Item 7-1 April 7, 2025

### Subject

Authorize an increase to a professional services agreement with Grid Subject Matter Experts, LLC for a new not-to-exceed total amount of \$1.245 million for electric transmission planning and North American Electric Reliability Corporation-related electric reliability compliance services

### Purpose

Provides information relevant to the Board for approval of an increase and extension to an existing agreement for transmission planning services

### **Recommendation and Fiscal Impact**

Authorize extension of agreement for transmission planning services in support of third-party affected system study requests Fiscal impact - None

### Budgeted

### Background

- Metropolitan has received multiple requests from third-party generation developers for system impact studies
  - Seven affected system study requests
  - One interconnection request
  - Additional requests are pending
- These studies identify potential impacts to Metropolitan's transmission and water operations, are highly technical in nature, and are time sensitive
- Critical to meeting regulatory obligations and protecting Metropolitan's energy and water operations

### Background

- The interconnection customer is responsible for the costs of the study, and makes a deposit to offset Metropolitan's expenses at the time of application
  - Study deposits range from \$50k to \$250k
- Metropolitan does not have sufficient staff to manage the queue of study requests and perform the necessary technical analysis
- Staff will rely heavily on industry consultants to perform the technical analysis and develop mitigations and cost estimates

### Alternatives Considered

- RFP for transmission planning consulting services
  - Current RFP timeline will result in delay of the ongoing study work with impacts to requesting development companies
- Rely on Metropolitan staff resources
  - Not supported by current staffing levels
- Selected Alternative Extend current professional services agreement
  - Allows timely completion of work

### Extend current professional services agreement

- Metropolitan has an on-call professional services agreement with GridSME for transmission planning and electric compliance services
- GridSME has performed similar studies for Metropolitan under the current agreement, and has already started work on the current study queue
- This action will allow Metropolitan to see the current work through to completion and meet customer expectations
- An RFP is in process for additional transmission planning professional services
  - Submit for board review estimated Q2-Q3 2025

### Affected System Study - Scope of Work

- Transmission Planning Consultant
  - Perform technical analysis to identify system impacts
  - Develop operational and physical improvement mitigations
  - Develop project scope and cost estimates for physical improvements
- Metropolitan Staff
  - Manage interconnection queue, study agreements, and study deposits
  - Set technical study parameters and review consultant work product
  - Track study-related costs for reimbursement
  - Develop Capital Improvement Projects (CIP) as necessary

### Board Options

Option #1  $\bullet$ 

> Authorize an increase to a professional services agreement with Grid Subject Matter Experts, LLC for a new not-to-exceed total amount of \$1.245 million for electric transmission planning and North American Electric Reliability Corporation-related electric reliability compliance services

Option #2  $\bullet$ 

Do not authorize the increase

### Staff Recommendation

• Option #1

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

### **Board** Action

### Board of Directors Engineering, Operations, and Technology Committee

#### 4/8/2025 Board Meeting

#### 7-2

#### Subject

Authorize an agreement with Red8 in an amount not to exceed \$850,000 for the implementation of the Data Storage Infrastructure Refresh project; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

#### **Executive Summary**

The digital storage system is a critical information technology component used by over 200 Metropolitan applications and systems, including all critical applications such as Supervisory Control and Data Acquisition and Oracle Financial System. Six hundred and sixty-seven terabytes out of 1,187 terabytes (TB), or 56 percent of total digital storage, will go out of manufacturer support in July 2025. The network switches supporting these systems will also need to be upgraded.

This project will eliminate the risks associated with an unsupported digital storage system, such as the lack of cybersecurity patches for emerging cyber threats and no hardware failure support. Additionally, it will provide the necessary storage for future data growth at Metropolitan.

Red8 will provide 790 terabytes of Dell's new digital storage system called PowerStore-5200. This equipment is not expected to go out of support for at least five years. Red8 will also upgrade the necessary network switches and provide installation/implementation services.

#### Proposed Action(s)/Recommendation(s) and Options

#### **Staff Recommendation: Option #1**

#### **Option #1**

Authorize an agreement with Red8 in an amount not to exceed \$850,000 for the implementation of the Data Storage Infrastructure Refresh project.

Fiscal Impact: Expenditures of \$850,000 in capital funds for FY 2024-2026

**Business Analysis:** It will replace an existing Dell storage component that is reaching end-of-life with new Dell storage. Additionally, the project will enhance the total storage capacity of Metropolitan's IT systems to accommodate future data growth.

#### **Option #2**

Do not proceed with the storage infrastructure refresh project.

Fiscal Impact: \$0

**Business Analysis:** It will leave Metropolitan with part of our storage infrastructure unsupported, significantly increasing maintenance and support issues for business-critical applications. Additionally, there will be no storage available for future data growth for all applications.

#### **Alternatives Considered**

Option #2

#### Applicable Policy

Metropolitan Water District Administrative Code Section 5108: Appropriations.

Metropolitan Water District Administrative Code Section 8121: General Authority of the General Manager to Enter Contracts.

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities.

#### Related Board Action(s)/Future Action(s)

Not applicable

#### **Summary of Outreach Completed**

Not applicable

#### California Environmental Quality Act (CEQA)

#### CEQA determination(s) for Option #1:

The proposed action is exempt from CEQA because there is no potential for the activity in question to have a significant effect on the environment. (State CEQA Guidelines Section 15061(b)(3)).

#### **CEQA determination(s) for Option #2 :**

None required

#### **Details and Background**

#### Background

At Metropolitan, a component of the digital data storage pool is reaching end-of-life in July 2025, after which the manufacturer (Dell) will no longer provide support. This component of Metropolitan's information technology system needs to be replaced. Additionally, staff recommends adding more storage to its current storage pool at this time to accommodate data growth across all applications. This project will mitigate the risks associated with unsupported hardware while also providing the necessary storage capacity for future data growth at Metropolitan.

Metropolitan initiated the procurement for the storage hardware and installation/implementation services under Metropolitan Administrative Code Section 8140(1)(l), which allows Metropolitan to "piggyback" (i.e., gain access to) contracts established by other public agencies that substantially follow Metropolitan's own competitive procurement process. As the lead agency in 2023, the State of Minnesota, acting through its Commissioner of Administration (State), signed a contract with Dell Technologies through a competitive process to provide Computer Equipment, Peripherals & Related Services. Currently, 32 states, including California, participate in this cooperative purchasing program, known as the National Association of State Procurement Officials (NASPO). Dell offers NASPO ValuePoint Computer Equipment, Peripherals & Related Services under Master Contract Number 23026. Metropolitan utilized the Dell NASPO contract to obtain discounts for storage hardware and deployment/implementation services through a quote from Dell through its preferred partner, Red8, authorized to Dell by NASPO Master Contract Number 23026.

This action authorizes \$850,000 for the implementation of the Data Storage Infrastructure Refresh project (790 terabytes). The total project budget includes funds for awarding a new contract with Red8 for \$838,000 for 790 TB of storage and network switches and \$12,000 for installation and implantation services. Other costs included are \$36,500 for internal labor costs by Metropolitan staff, including owner costs and project management, and \$98,500 in contingency funds.

This project has been evaluated and recommended by Metropolitan's Capital Investment Plan Evaluation Team, and funds are available within the fiscal year 2024/25 capital expenditure plan. See **Attachment 1** for the Financial Statement.

#### **Project Milestone(s)**

Project kickoff and planning - May 2025

Complete storage deployment and verification - End of July 2025

Complete storage configuration - End of September 2025

Storage Infrastructure Refresh Project

Item 7-2 April 7, 2025

### Item 7-2 Authorize an agreement with Red8

Subject

Authorize an agreement with Red8 in an amount not to exceed \$850,000 for the implementation of the Data Storage Infrastructure Refresh project.

Purpose

Replace end-of-life data storage equipment and switches.

Recommendation and Fiscal Impact

Authorize an agreement with Red8 in an amount not to exceed \$850,000 for the implementation of the Data Storage Infrastructure Refresh project.

**Fiscal Impact:** Expenditures of \$850,000 in capital funds for FY 24/25 and 25/26 are planned and budgeted.

The action is budgeted.

Background E Reasons for Replacement

- Digital storage is used by all Metropolitan applications, such as SCADA, Oracle EBS, PeopleSoft, and Business Intelligence Reporting, among other critical applications
- The total capacity of the digital storage system is currently 1,187 TB. Out of it, 667 TB (56%) of this digital storage is going out of manufacturer support in July 2025
  - New storage provides better processing speed which will help improve the overall performance of systems during business hours
- Accommodate future data growth across all business applications
- New storage infrastructure has additional monitoring, alerting, and up-to-date cyber security functions

Solicitation Process & Vendor Selection

- Utilizing Dell NASPO Master Agreement 23026, Red8 was selected and is a preferred partner of Dell Technologies
- Red8 has expertise in installing and configuring Dell storage solutions both in public and private organizations

Agreement Scope • Install and configure 790 Terabytes of new Dell's digital storage system (PowerStore-5200)

• Upgrade network switches that will be used by new PowerSore-5200 storage

Project Cost

Data Storage Infrastructure Refresh Project

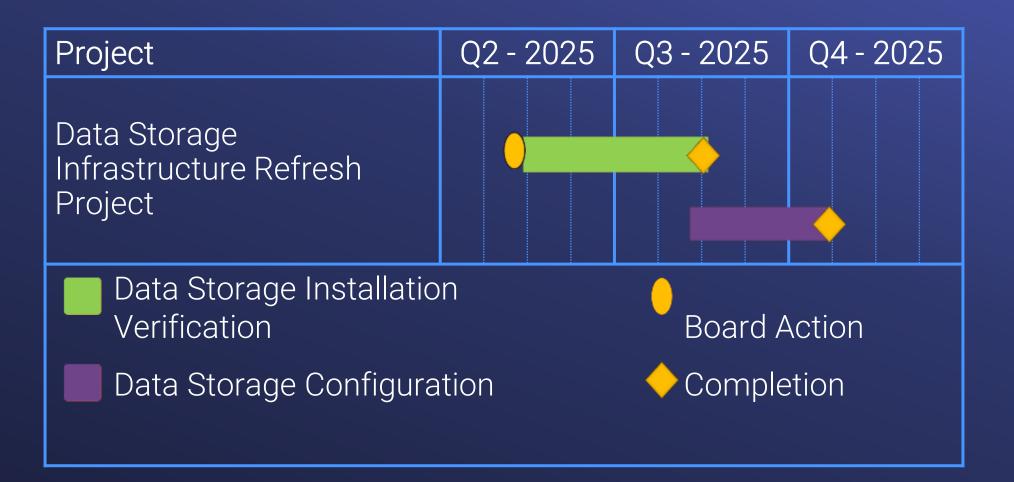

Vendor - Red8 Metropolitan Staff Contingency \$ 850,000.00 \$ 50,000.00 \$ 85,000.00

Total \$ 985,000

Engineering, Operations and Technology Committee

### **Project Schedule**

# Board Options Option #1

• Authorize an agreement with Red8 in an amount not to exceed \$850,000 for the implementation of the Data Storage Infrastructure Refresh project

### Option #2

- Do not proceed with the Storage infrastructure refresh project.
- Impact: It will leave Metropolitan with part of the storage infrastructure unsupported, which will significantly increase maintenance and support issues for business-critical applications. No storage will be available for future data growth for all applications.

### Staff Recommendation

• Option #l

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

### **Board** Action

### Board of Directors Engineering, Operations, and Technology Committee

#### 4/8/2025 Board Meeting

#### Subject

Authorize an agreement with Metal Toad Media Inc. for a new fixed cost of \$299,000 per year with a not-toexceed amount of \$996,200 for the duration of the three-year agreement to host, manage, and maintain Metropolitan's external websites; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

#### **Executive Summary**

Metropolitan's external websites have been hosted and maintained by the Managed Service Provider (MSP) that was selected for the website redesign project, which was approved in 2019. This action would authorize Metropolitan to enter into an agreement with Metal Toad Media Inc. Metal Toad Media Inc. will serve as the MSP for Metropolitan's four external websites; providing support and maintenance for three years at a not-to-exceed amount of \$996,200. Metal Toad Media Inc. was selected through a competitive Request for Proposal process due to their qualifications and staff expertise on the specific technology used for the external websites, as well as the increased breadth of support activities provided.

#### Proposed Action(s)/Recommendation(s) and Options

#### **Staff Recommendation: Option #1**

#### **Option #1**

Authorize an agreement with Metal Toad Media Inc. for a new fixed cost of \$299,000 per year with a not-toexceed amount of \$996,200 for the duration of the three-year agreement to host, manage, and maintain Metropolitan's external websites.

**Fiscal Impact:** Expenditures of \$598,000 in operations and maintenance funds for FY 2024/25 and FY 2025/26 are planned and budgeted. The remaining \$299,000 will be budgeted in the future in FY 2026/27. **Business Analysis:** Ensure continued support and functionality of Metropolitan's external websites, with improvements that optimize and further secure these sites. This will reduce hosting costs over time and improve our cybersecurity posture.

#### **Option #2**

Do not proceed with the project at this time.

**Fiscal Impact:** Pay the full \$245,000 for the current calendar year agreement with the existing provider, plus any additional costs associated with changes or upgrades. Significant exposure to additional ad hoc support costs; existing agreement covers fewer activities in its fixed scope than Option #1.

**Business Analysis:** Agreement with the current provider will continue, which will perpetuate ongoing support challenges and delay progress on optimizations and feature enhancements, as well as require an agreement renegotiation at an undetermined price later this year.

#### **Alternatives Considered**

Information Technology has considered migrating the external websites to a Microsoft Azure cloud tenant that is managed by IT staff. Limited staff availability, new technical skills required, and unknown cost implications were justifications to avoid this alternative at this time.

#### **Applicable Policy**

Metropolitan Water District Administrative Code Section 5108: Appropriations

Metropolitan Water District Administrative Code Section 8121: General Authority of the General Manager to Enter Contracts

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

#### Related Board Action(s)/Future Action(s)

By Minute Item 51557, dated April 9, 2019, the Board authorized a \$1,500,000 agreement with Sensis Inc. to redesign the mwdh20.com website and implement a Content Management System, as set forth in Agenda Item 7-2 board letter.

#### **Summary of Outreach Completed**

Not applicable

#### California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

The proposed action is exempt from CEQA because there is no potential for the activity in question to have a significant effect on the environment. (State CEQA Guidelines Section 15061(b)(3)).

#### **CEQA determination for Option #2:**

None required

#### Background

One of the most effective tools for Metropolitan to communicate with the public and provide access to information is through external-facing websites. These sites allow Metropolitan to disseminate information on water issues in its service area with member agencies, local officials, media, educators, and the general public.

For any business or public agency, a consistently available, well-optimized, and modern website is essential to inspire confidence from visitors and is often the first impression people have when interacting with the organization. The mwdh2o.com redesign project, approved in 2019, modernized the technology used by Metropolitan's websites and introduced the Umbraco Content Management System to improve the efficiency of website management.

Metropolitan's current agreement for maintenance and hosting of public-facing websites expires in December 2025. After internal discussion, it was decided that a search for a new MSP to handle the public-facing websites was necessary in order to improve support and evaluate existing technology for optimization and cost savings opportunities. The four external Metropolitan websites being managed by this service provider are: mwdh20.com, bewaterwise.com, mwdinnovates.com, and socalwaterdialogue.org.

After a competitive RFP process, the evaluation committee has selected Metal Toad Media Inc. as the preferred service provider. Metal Toad Media Inc. demonstrated the best qualifications both in the firm's completed projects and in the experience of individual staff in the technology stack. In addition to the ongoing maintenance of the existing external websites, services will include an architecture review, cloud computing optimization, an increased threshold for support tasks included in the fixed cost, and no additional cost for upgrades to the Umbraco Content Management System. The new agreement is for fixed-cost services of \$299,000 per year which includes professional services for maintenance of the websites and hosting costs. This cost is budgeted in the

Information Technology group budget for FY 2024/25 and FY 2025/26, and will be budgeted in the future for FY 2026/27.

An amount of \$97,200 has been allocated under this contract for additional services beyond what is included in the fixed costs. These services may include the development of new features, migrations to new or emerging technology, redesign efforts that go beyond basic in-scope changes, and other enhancement requests that fall outside the scope of the fixed-cost services.

### **Engineering & Operations Committee**

## Authorize Agreement with Metal Toad Media, Inc.

Item 7-3 April 7, 2025 Item 7-3 Approval of Maintenance Contract for External Websites

### Subject

Authorize an agreement with Metal Toad Media, Inc. for a new fixed cost of \$299,000 per year with a not-to-exceed amount of \$996,200 for the duration of the three-year agreement to host, manage, and maintain Metropolitan's external websites

### Purpose

Since the completion of the mwdh2o.com redesign project, Metropolitan's external websites have been managed by an external provider. After a competitive RFP search, Metropolitan staff identified Metal Toad Media, Inc. as the most qualified provider to support and maintain MWD's external websites moving forward.

### **Recommendation and Fiscal Impact**

Authorize an agreement with Metal Toad Media, Inc. for a new fixed cost of \$299,000 per year with a not-to-exceed amount of \$996,200 for the duration of the three-year agreement.

**Fiscal Impact:** Expenditures of \$598,000 in operations and maintenance funds for FY 24/25 and 25/26 are planned and budgeted. The remaining \$299,000 will be budgeted in the future in FY 26/27

External Website Support

### Background

- External affairs and IT support four public-facing websites for Metropolitan
  - mwdh2o.com, bewaterwise.com, mwdinnovates.com, socalwaterdialogue.org
- In 2019, the board approved a \$1,500,000 website redesign to modernize mwdh20.com
- This project also included back-end and cloud infrastructure upgrades for all public-facing sites

External Website Support

### Background

- Since this upgrade effort, the Metropolitan external websites have been hosted and administered by a Managed Service Provider (MSP)
- Because of uptime requirements, staff availability, specialized skillsets, and cybersecurity considerations, continuing with an MSP is recommended

External Website Support

### Vendor Selection

- RFP 1377 was issued on August 29, 2024 and four qualified firms submitted proposals that were evaluated by the committee
- Metal Toad Media, Inc. was selected as the winner of the competitive RFP process due to their staff qualifications, technical expertise, and breadth of included support activities
- This solicitation met the 25% SBE/DVBE participation goal

# Board Options Option #1

• Authorize an agreement with Metal Toad Media, Inc. for a new fixed cost of \$299,000 per year with a not-to-exceed amount of \$996,200 for the duration of the three-year agreement to host, manage, and maintain Metropolitan's external websites.

### Option #2

• Do nothing at this time.

### Impact:

- This would perpetuate ongoing support and upgrade challenges
- Face potentially significant out-of-budget expenses for support not covered in the fixed cost agreement

### Staff Recommendation

• Option #l

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

### **Board** Action

### Board of Directors Engineering, Operations, and Technology Committee

#### 4/8/2025 Board Meeting

### 7-4

#### Subject

Authorize an increase of \$3.3 million to an existing agreement with Stantec Consulting Services Inc. for a new not-to-exceed total amount of \$4.99 million for final design of a mechanical dewatering facility at the Joseph Jensen Water Treatment Plant; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

### **Executive Summary**

Metropolitan currently uses four lagoons on the grounds of the Los Angeles Department of Water and Power (LADWP) for solids processing and handling at the Joseph Jensen Treatment Plant (Jensen plant). Settled solids collected from the Jensen plant's sedimentation basins are thickened on-site and pumped through a solids-transfer system to LADWP lagoons. At the lagoons, the residual materials are dried and then transported for off-site disposal. Through an existing agreement with LADWP, Metropolitan has exclusive use of two lagoons through 2062, and the remaining two lagoons will revert back to LADWP by December 2033. A future mechanical dewatering facility is needed to meet the Jensen plant's long-term solids handling needs. Preliminary design of the new mechanical dewatering facility has been completed, and staff recommends proceeding with final design.

This action authorizes an increase to an existing agreement with Stantec Consulting Services Inc. (Stantec) for final design of the mechanical dewatering facility at the Jensen plant. See **Attachment 1** for the Allocation of Funds, **Attachment 2** for the List of Subconsultants, and **Attachment 3** for the Location Map.

### Proposed Action(s)/Recommendation(s) and Options

#### Staff Recommendation: Option #1

#### **Option #1**

Authorize an increase of \$3.3 million to an existing agreement with Stantec Consulting Services Inc. for a new not-to-exceed total amount of \$4.99 million for final design of a mechanical dewatering facility at the Jensen plant.

**Fiscal Impact:** Expenditure of \$5.4 million in capital funds. Approximately \$3.5 million in capital funds will be incurred in the current biennium and have been previously authorized. The remaining capital expenditures will be funded from the next capital investment plan budget.

**Business Analysis:** This option will improve the reliability of the Jensen plant's solids handling process, maintain treated water quality, and enhance operational flexibility.

#### **Option #2**

Do not proceed with the project at this time.

#### Fiscal Impact: None

**Business Analysis:** Staff would continue to use LADWP lagoons to process residual solids under the current use agreement. Since two of the lagoons must be returned in December 2033, staff would return to the Board with an alternative approach to address the needs of the Jensen plant's solids handling.

#### **Alternatives Considered**

Upon completion of preliminary design for the Jensen mechanical dewatering facility, staff reassessed the availability and capability of in-house Metropolitan staff to conduct final design, considering: (1) current work assignments for in-house staff to determine the potential availability of staff to conduct this work; and (2) specialized technical expertise needs.

After assessing the current workload for in-house staff, the relative priority of this project, and the specialized technical expertise required, staff recommends continuing the use of both a professional services agreement and in-house staff to perform final design of the subject project. This approach will allow for the completion of this program and other capital work within their current schedule and ensure the work is conducted in the most efficient manner possible.

### **Applicable Policy**

Metropolitan Water District Administrative Code Section 8121: General Authority of the General Manager to Enter Contracts

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

### Related Board Action(s)/Future Action(s)

By Minute Item 49271, dated December 11, 2012, the Board authorized an agreement with LADWP for Metropolitan use of solids lagoons at the Aqueduct Filtration Plant.

By Minute Item 53247, dated May 9, 2023, the Board authorized an amendment to the use agreement with LADWP to forego construction of two new lagoons on LADWP's property and to extend the date of use of two solids lagoons and an amendment to an existing professional services agreement for preliminary design of a mechanical dewatering facility at the Jensen plant.

By Minute Item 53598, dated April 9, 2024, the Board appropriated a total of \$630 million for projects identified in the Capital Investment Plan for Fiscal Years 2024/25 and 2025/26.

### California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

The proposed action is exempt from CEQA because it consists of basic data collection, research, experimental management, and resource evaluation activities that do not result in a serious or major disturbance to an environmental resource. These may be strictly for information-gathering purposes or as part of a study leading to an action that a public agency has not yet approved, adopted, or funded. (State CEQA Guidelines Section 15306.)

#### **CEQA determination for Option #2:**

None required

#### **Details and Background**

#### Background

The Jensen plant was placed into service in 1972 and has a rated capacity of 750 million gallons per day. Located in Granada Hills, the Jensen plant normally treats water from the West Branch of the State Water Project and delivers it to Metropolitan's Central Pool and to exclusive service areas on the west side of the distribution system.

In February 2013, Metropolitan and LADWP entered into a use agreement that allowed Metropolitan to use four lagoons on the site of LADWP's Aqueduct Filtration Plant for solids dewatering. The term of use was ten years for Lagoons 2 and 3 and 50 years for Lagoons 7 and 8. In conjunction with a future mechanical dewatering facility at the Jensen plant, this agreement met Metropolitan's long-term solids handling needs while allowing a local youth sports organization to maintain its current ballfield location on the grounds of the Jensen plant.

Residual chemicals and settled solids collected from the Jensen plant's sedimentation basins are currently thickened on-site and pumped through a solids-transfer system to the four LADWP lagoons. They are then transported for off-site disposal once they have dried.

In May 2023, Metropolitan's Board authorized: (1) an amendment to the agreement with LADWP to extend Metropolitan's use of Lagoons Nos. 2 and 3 until construction of a mechanical dewatering facility is complete or until December 31, 2033, whichever occurs first, and (2) an amendment to an existing agreement to provide engineering services for preliminary design of the mechanical dewatering facility at the Jensen plant. This mechanical dewatering facility would allow the plant to manage solids without reliance on Lagoons 2 and 3. Lagoons 2 and 3 would be returned to LADWP use once the dewatering facility at the Jensen plant is operational. Under the current design approach, Metropolitan's continued use of Lagoons 7 and 8 would be limited to scenarios including concurrent high plant flow and peak turbidity conditions.

Preliminary design work was conducted as a hybrid effort of Metropolitan staff and a specialized consultant. Staff completed surveys of the proposed site, assessed existing infrastructure, and provided recommendations for site selection, truck haul routes, facility layout, and site preparation work. The consultant established design criteria, including equipment sizing, polymer requirements, and operational requirements during periods of high turbidity.

Preliminary design for the mechanical dewatering facility at the Jensen plant has been completed, and staff recommends proceeding with final design at this time.

#### Jensen Solids Mechanical Dewatering Facility – Final Design

Planned improvements for Jensen's residual solids processing include site preparation and construction of a mechanical dewatering facility and associated solids conveyance piping, chemical feed, and electrical and control systems.

Final design activities include: (1) preparation of drawings and specifications; (2) development of site ground improvement criteria and methodology; (3) constructability review; (4) development of an engineer's cost estimate; and (5) advertising and receiving competitive bids. These activities are planned to be conducted by both Metropolitan staff and Stantec under an existing agreement described below. The scope of work for Stantec includes final design for civil, structural, mechanical, and electrical disciplines. Metropolitan staff will perform final design for instrumentation design, environmental support, project management, technical oversight, and review of consultant work.

A total of \$5.4 million is required for this work. Allocated funds include \$3.3 million for the final design activities by Stantec described above. Other allocated funds for professional services include \$400,000 for geotechnical investigations and value engineering, which will be performed by specialty firms under contracts planned to be executed under the General Manager's authority. Allocated funds for Metropolitan staff activities include \$700,000 for design activities described above; \$550,000 for environmental support, project controls, and project management; and \$450,000 for remaining budget. **Attachment 1** provides the allocation of the required funds.

As described above, final design will be performed by Stantec and Metropolitan staff. Engineering Services' performance metric target range for final design of projects with a construction cost of more than \$3 million is 9 to 12 percent. For this project, the performance metric goal for final design is 10.0 percent of the total construction cost. The total estimated cost for design is \$4.0 million, which includes \$3.3 million for Stantec and \$700,000 for Metropolitan design activities. The estimated cost of construction of the Jensen mechanical dewatering facility is anticipated to range from \$40 million to \$55 million.

#### Engineering Services (Stantec Consulting Services Inc.) – Amendment of Existing Agreement

In May 2023, Metropolitan's Board authorized an agreement with Stantec to complete preliminary design of the mechanical dewatering facility at the Jensen plant. Stantec was prequalified through Request for Qualification No. 1302 and was selected based on the firm's expertise in the design of large water/wastewater treatment plants with solids processing facilities. Preliminary design has been completed, and Stantec is now recommended to provide engineering services for final design as described above.

This action authorizes an increase of \$3.3 million to the existing agreement with Stantec Consulting Group Inc. for a new not-to-exceed total amount of \$4.99 million to perform the final design for the mechanical dewatering facility at the Jensen plant. For this agreement, Metropolitan has established a Small Business Enterprise participation level of 25 percent. Stantec has agreed to meet this level of participation. The subconsultants for this agreement are listed in **Attachment 2**.

#### 4/8/2025 Board Meeting

#### Subject

Authorize an amendment to a reimbursable agreement with BH Luxury Residences LLC for the relocation of the Santa Monica Feeder within the city of Beverly Hills; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

#### **Executive Summary**

This action authorizes the General Manager to amend an agreement with BH Luxury Residences LLC, substantially on the terms outlined in this letter, to relocate about 1,500 feet of the Santa Monica Feeder. In August 2023, a reimbursable agreement with BH Luxury Residences LLC was executed to relocate Metropolitan's Santa Monica Feeder pipeline. Since that time, Metropolitan's costs to support the project have increased beyond those that were originally envisioned. This agreement amendment will enable all costs incurred by Metropolitan for this relocation to be reimbursed by BH Luxury Residences LLC.

#### Proposed Action(s)/Recommendation(s) and Options

#### **Staff Recommendation: Option #1**

#### **Option #1**

Authorize an amendment to a reimbursable agreement with BH Luxury Residences LLC to provide design review and inspection-related activities for the relocation of the Santa Monica Feeder.

**Fiscal Impact:** None. All project costs will be fully reimbursable by BH Luxury Residences LLC. **Business Analysis:** This option will maintain the reliability of treated water deliveries to member agencies.

#### **Option #2**

Do not authorize an amendment to a reimbursable agreement with BH Luxury Residences LLC. **Fiscal Impact:** Unknown

**Business Analysis:** Without the amendment, Metropolitan may not be fully reimbursed for the cost of the relocation.

#### **Alternatives Considered**

None

#### **Applicable Policy**

Metropolitan Water District Administrative Code Section 8122(c): General Manager's Contracting Authority in Specified Circumstances, Relocation Agreements

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

### Related Board Action(s)/Future Action(s)

#### None

#### California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

The proposed action to provide design and inspection-related activities, including a review of the design drawings and specifications for the relocation of the Santa Monica Feeder, is not defined as a project under CEQA because it involves organizational, or administrative activities; and/or general policy and procedure making that will not result in direct or indirect physical changes in the environment. (Public Resources Code Section 21065; State CEQA Guidelines Section 15378(b)(2) and (5).) Also, the proposed action is exempt from CEQA because it consists of activities limited entirely to inspections, to check for performance of an operation, or quality, health, or safety of a project. (Section 15309 of the State CEQA Guidelines.)

#### **CEQA determination for Option #2:**

None required

#### **Details and Background**

#### Background

The Santa Monica Feeder was originally installed in 1941. The feeder distributes treated water to the cities of Glendale, Burbank, Los Angeles, Beverly Hills, and Santa Monica. The pipeline extends approximately 24 miles in a southwesterly direction, starting at the Eagle Rock Control Tower and terminates at the SMN-1 service connection in the city of Santa Monica. It varies in size from 28 inches to 84 inches in diameter.

In January 2020, BH Luxury Residences LLC notified Metropolitan of its intentions to develop a project site for mixed-use residential condominiums and retail as part of the One Beverly Hills Project. The project site is bounded by Wilshire Boulevard to the north, Merv Griffin Way to the east, Santa Monica Boulevard to the south, and the Los Angeles Country Club to the west. At that time, Metropolitan's Santa Monica Feeder traversed the property along Merv Griffin Way for 800 feet, adjacent to the existing Beverly Hilton Hotel and parking structure within the footprint of the proposed development. BH Luxury Residences LLC proposed to relocate this portion of the Santa Monica Feeder and provide Metropolitan with a new permanent easement.

In August 2023, a reimbursable agreement with BH Luxury Residences LLC was executed to relocate Metropolitan's Santa Monica Feeder pipeline. Metropolitan's scope included a technical review of the construction drawings and specifications for the relocation; preparation of easement documentation; performing submittal reviews and field inspections; conducting the pipeline shutdown; and preparation of the record drawings upon completion of construction. BH Luxury Residences LLC's scope included retaining a consultant to prepare the construction drawings and specifications for the relocation and a contractor to perform the construction activities for the relocation. The total reimbursable cost for Metropolitan's work was estimated to be \$490,000, which is within the General Manager's contracting authority.

In November 2024, a pipeline shutdown for the Santa Monica Feeder was performed to allow BH Luxury Residences LLC's contractor to complete the relocation by constructing the connections between the new pipeline and the existing pipeline. However, the work could not be completed due to an elevation discrepancy between the new and existing pipelines which was discovered during the construction process. The discrepancy was the result of the contractor laying the pipeline at a higher elevation than shown in the design drawings. New fabricated fittings were needed to bridge the distance between the new and existing pipelines. As a result, additional work by Metropolitan staff was incurred, including review of additional design drawings, submittals, and documentation for the revised construction plan; survey to verify the dimensions of the new fittings; conducting a second shutdown of the pipeline; furnishing equipment for new air release vacuum valve assemblies including two 8-inch plug valves. It also includes the installation and replacement of nuts, bolts, and gaskets at four accessways, as the contractor had installed nuts and bolts that did not meet Metropolitan specifications. The construction work has been completed, and the pipeline was placed into service on March 14, 2025.

Per Metropolitan's Admin. Code 8122(c)(3), board authorization is required to execute any agreement involving an amount that exceeds \$500,0000 "for the relocation or protection, or both, of District-owned facilities to accommodate the improvements of facilities owned by others." The total reimbursable cost for Metropolitan's work under the agreement will be increased by \$410,000 for a total of approximately \$900,000. Therefore, a board-authorized agreement amendment is required for full reimbursement of expenses.

#### Santa Monica Feeder Relocation - Reimbursable Agreement (No funds required)

Metropolitan's 29.5-inch diameter welded steel Santa Monica Feeder pipeline is located within a 10-foot easement that crosses BH Luxury Residences LLC's project site. Metropolitan and BH Luxury Residences LLC have mutually agreed to relocate a portion of the line to an alternate alignment using a 31.5-inch diameter steel pipe. The increased diameter will offset hydraulic losses associated with the extended length of 260 feet and additional horizontal bends, thereby maintaining the feeder's existing hydraulic capacity. A majority of the new alignment will be located within a fire lane along the west side of BH Luxury Residences LLC's property adjacent to the Los Angeles Country Club. Metropolitan will obtain a new 15-foot-wide permanent easement for this portion within the private property. The remaining portions of the new alignment will be located within public right-of-way along Wilshire Boulevard and Santa Monica Boulevard. BH Luxury Residences LLC requested that the relocation be expedited to prevent delays to its development project.

Following board authorization, staff plans to execute an agreement amendment with BH Luxury Residences LLC for design and inspection-related activities, including a review of the design drawings and specifications for the relocation. BH Luxury Residences LLC retained a consultant to prepare the design drawings and specifications and retained a contractor to relocate the Santa Monica Feeder using the construction documents reviewed by Metropolitan. Staff has reviewed the design, inspected pipe fabrication and installation, reviewed submittals, performed construction inspection, and conducted all shutdown-related activities. Metropolitan's costs for the relocation are estimated to range from approximately \$750,000 to \$900,000. No funds are required to be appropriated, as all costs incurred by Metropolitan will be fully reimbursed by BH Luxury Residences LLC.

This action authorizes the General Manager to execute an agreement amendment with BH Luxury Residences LLC, substantially on the terms outlined in this letter and in a form approved by the General Counsel, for relocation of a portion of the Santa Monica Feeder.

See Attachment 1 for the Location Map.

### Subject

Authorize an amendment to a reimbursable agreement with BH Luxury Residences LLC for the relocation of the Santa Monica Feeder within the City of Beverly Hills

### Purpose

Relocate approximately 1,500 feet of the Santa Monica Feeder to mitigate impacts from construction of the One Beverly Hills Project

### **Recommendation and Fiscal Impact**

Authorize an amendment to an agreement to relocate a portion of the Santa Monica Feeder

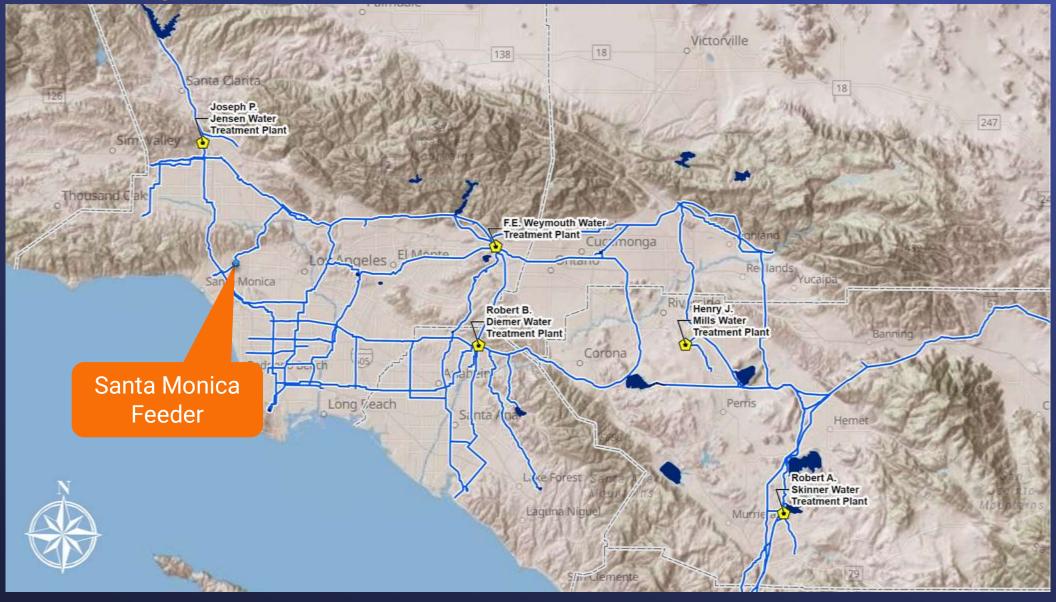

Per Admin. Code board authorization is required to execute reimbursable agreements that exceed \$500,000

No Fiscal Impact

### Non-Budgeted

### Location Map

### Santa Monica Feeder Relocation

Santa Monica Feeder Reimbursable Agreement

### Background

- Jan. 2020 BH Luxury Residences LLC discussed relocating the Santa Monica Feeder
- Sept. 2021 Metropolitan executed letter of agreement for relocation
  - Requires relocation of approx. 1,500 feet of 29.5-inch welded steel pipe
  - Installation of new air-release vacuum valve assemblies & accessways
  - Acquisition of new 15-foot-wide permanent easement
  - Reimbursable cost for Metropolitan's work
     estimated to be \$490,000
- All cost incurred by Metropolitan will be reimbursed

Santa Monica Feeder Reimbursable Agreement

### Scope of Work

- Developer
  - Retained consultant to prepare design drawings & specifications
  - Retained contractor to relocate pipeline
- Metropolitan
  - Reviewed design drawings & specifications
  - Prepared easement documentation
  - Reviewed submittals & inspect construction
  - Performed shutdown & dewatered pipeline for tie-in
- Nov. 2024 shutdown planned for tie-in

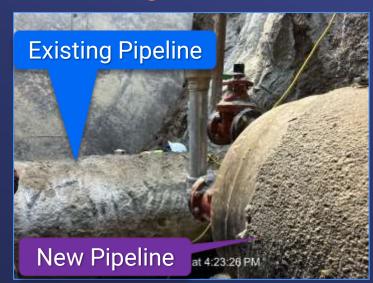

Santa Monica Feeder Reimbursable Agreement

### **Project Challenges**

- During excavation, contractor discovered that they installed the new pipeline at a higher elevation than design
  - Required new fabricated fittings for connections
- Additional work required by Metropolitan staff
  - Performed survey to verify dimensions of new fittings
  - Reviewed submittals for piping & constr. inspection
  - Furnished air release/vacuum valve assemblies
  - Replaced nuts, bolts & gaskets at four accessways
  - Performed 2<sup>nd</sup> shutdown in March 2025 & pipeline placed into service
- Total reimbursable cost increased by \$410,000 to approx. \$900,000

### **Project Challenges**

**Pipeline Elevation Discrepancy** 

Met Forces Repairs

**Pipe Fabrication** 

April 7, 2025

Engineering, Operations, & Technology Committee

### **Board Options**

• Option #1

Authorize an amendment to a reimbursable agreement with BH Luxury Residences LLC to provide design review and inspection-related activities for the relocation of the Santa Monica Feeder.

• Option #2

Do not authorize an amendment to a reimbursable agreement with BH Luxury Residences LLC.

### Staff Recommendation

• Option #1

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

### **Board** Action

7-6

### Board of Directors Finance and Asset Management Committee

### 4/8/2025 Board Meeting

### Subject

Approve Climate Adaptation Master Plan for Water Five-Year Implementation Strategy; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

### **Executive Summary**

In February 2023, the Board directed staff to integrate water resources, climate considerations, and financial planning into a Climate Adaptation Master Plan for Water (CAMP4W). In October 2023, the Board chartered a Joint Task Force of Board Members and Member Agency Managers to facilitate the development of CAMP4W in a timely and transparent process. Rooted in adaptability, Metropolitan's CAMP4W, through its implementation, will facilitate Metropolitan's continued reliability and resilience in the face of change and uncertainty while responding to real-world conditions, course correcting as needed, and achieving its core mission to provide safe, reliable water to its member agencies.

CAMP4W comprises multiple components which together form a living master planning program. This item presents the CAMP4W Five-Year Implementation Strategy, which both culminates the initial planning phase and sets forth a critical path towards implementing and institutionalizing climate adaptation at Metropolitan over the next five years. The components of the CAMP4W Implementation Strategy include the Background and Purpose, Assessed Vulnerabilities and Needs, Time-Bound Targets, Policy Framework, Climate Decision-Making Framework, and a set of Implementation Timelines. The timelines include projected board decision points for water, energy, and infrastructure projects and programs to comprehensively prepare the Board and member agencies for anticipated CAMP4W assessments and decisions. These timelines are iterative and subject to change based on evolving information and adaptation needs, and progress will be reported annually in the CAMP4W Annual Reports. The recommended action is limited to approving the above-described process. Recommendations for action on specific investments will be brought to the Board separately, when and as appropriate.

### **Proposed Action/Recommendations and Options**

### Staff Recommendation: Option #1

### **Option #1**

Approve Climate Adaptation Master Plan for Water Five-Year Implementation Strategy

### Fiscal Impact: None

**Business Analysis:** The Implementation Strategy will inform decision-making and future investments to meet Metropolitan's needs in a climate-impacted future.

### **Option #2**

Do not approve. **Fiscal Impact:** None **Business Analysis:** Metropolitan staff would not have board direction to implement the policy guidance, decision-making tools, and next steps included in the CAMP4W Implementation Strategy.

### **Alternatives Considered**

Not applicable

### **Applicable Policy**

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

By Minute Item 52776, dated April 12, 2022, the Board adopted the 2020 Integrated Water Resources Plan Needs Assessment.

By Minute Item 52946, dated August 15, 2022, the Board adopted a resolution affirming Metropolitan's call to action and commitment to regional reliability for all member agencies.

By Minute Item 53381, dated September 12, 2023, the Board approved the use of Representative Concentration Pathway (RCP) 8.5 for planning purposes in the Climate Adaptation Master Plan for Water.

By Minute Item 53630, dated May 14, 2024, the Board concurred with the CAMP4W: Draft Year One Progress Report and Next Steps, with the understanding that staff would provide the Board updated data and other information before consideration and approval of any CAMP4W projects.

### **Related Board Action/Future Action**

Not applicable

### **Summary of Outreach Completed**

Staff continues to engage member agencies, their boards and councils, as well as the public in the CAMP4W process. Engagement opportunities to date included listening sessions with environmental and community-based organizations as well as agricultural and business partners. Metropolitan held a public forum and has shared information on CAMP4W at various events throughout its service area.

### California Environmental Quality Act (CEQA)

### **CEQA determination for Option #1:**

The proposed action is not defined as a project under CEQA because it involves organizational maintenance, or administrative activities; personnel-related actions; and/or general policy and procedure making that will not result in direct or indirect physical changes in the environment. (Public Resources Code Section 21065; State CEQA Guidelines Section 15378(b)(2) and (5)).

### **CEQA determination for Option #2:**

None required

### **Details and Background**

### Background

To ensure the continued reliability of water supplies for our member agencies and their customers, Metropolitan embarked on the development of a Climate Adaptation Master Plan for Water (CAMP4W), a comprehensive set of policy directives and decision-making tools to ensure the Board of Directors is equipped to consider climate risks to water supplies, water quality, infrastructure, operations, workforce, public health, and financial sustainability in its deliberations and investment decisions. CAMP4W provides a roadmap to guide future investments and decision-making as we confront our new climate reality in the years and decades ahead.

CAMP4W comprises multiple components which together form a living master planning program. This item presents staff's recommendation for the CAMP4W Five-Year Implementation Strategy, which both culminates the initial planning phase and sets forth a critical path towards implementing and institutionalizing climate adaptation at Metropolitan over the next five years.

Approval of the Implementation Strategy would direct staff to analyze planned programs and projects based on specific criteria that ensure consideration of climate change impacts and climate vulnerabilities throughout Metropolitan activities and to systematically institutionalize climate adaptation practices and policies to:

- 1) Institute the consideration of climate change impacts and climate vulnerabilities throughout Metropolitan activities.
- 2) Enhance resource planning with the integration of climate and financial information.
- 3) Increase the frequency of updates to resource needs and the factors that drive them.
- 4) Set targets to guide the development of potential projects and programs to increase climate resilience and ensure continued reliability.
- 5) Strengthen decision-making on project and program investments through greater transparency and more holistic and uniform analyses.
- 6) Establish an adaptive management approach to better manage uncertainty and remain responsive to evolving conditions.

The CAMP4W components are depicted in Figure 1. Foundational inputs to the planning process and implementation decisions (on the left-hand side of the figure) include the Integrated Water Resources Plan Regional Needs Assessment, Climate Risk and Vulnerability Assessments, ongoing Infrastructure Studies and Assessments, as well as regular public and partner engagement. The components of the Implementation Strategy include the Time-Bound Targets and Policy Framework as the drivers, the Climate Decision-Making Framework for assessing projects and programs, an adaptive management approach to monitoring, reporting, and adjusting, as well as the Implementation Timelines, which will lay out key milestones over the next five years. The business model is currently under review in a parallel process, and any final decisions from that process will be integrated into CAMP4W assumptions and analyses when appropriate. Although these tools and foundational elements will be deployed over the long term, staff will update the Implementation Strategy more frequently to account for new information and the uncertainty associated with climate change.

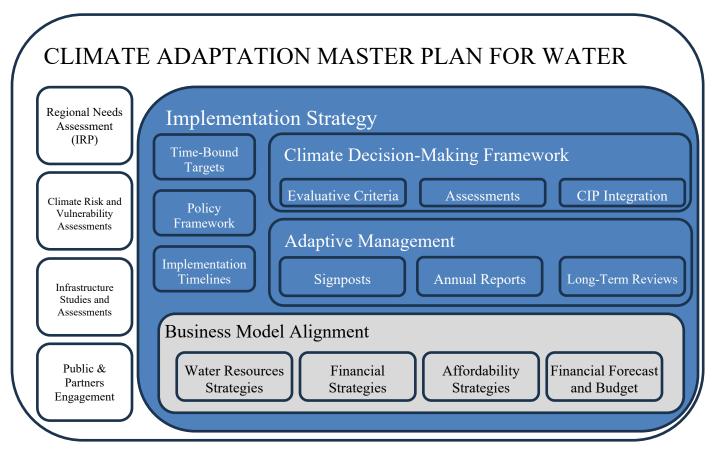

Figure 1: Climate Adaptation Master Plan for Water Components

The components of the CAMP4W Implementation Strategy (Attachment 1) include the Background and Purpose, Assessed Vulnerabilities and Needs, Time-Bound Targets, Policy Framework, Climate Decision-Making Framework and a set of Implementation Timelines, which include projected board decision points for water, energy, and infrastructure projects and programs to comprehensively prepare the Board and member agencies for anticipated CAMP4W assessments and decisions. These timelines are iterative and subject to change based on evolving information and adaptation needs, and progress will be reported annually in the CAMP4W Annual Reports. This action is limited to approving the components of the Implementation Strategy, including the Policy Framework and Climate Decision-Making Framework. Specific projects and other investments will be brought to the Board separately, when and as appropriate.

Staff revised the Implementation Strategy based on input received from the CAMP4W Task Force, board leadership and member agencies over the last several months. Specifically, a Water Quality Resilience section was added to the Risks and Vulnerabilities section as were several potential initiatives and climate-induced challenges related to water quality. The Implementation Timelines provide anticipated CAMP4W Assessments for at least four major projects in 2025, including Pure Water Southern California, Sites Reservoir, Delta Conveyance Project and Metropolitan's Water Efficiency Program. The timelines also lay out ongoing

studies and planning processes to identify new and emerging climate adaptation strategies, including efforts related to water resources, infrastructure, power supply, conservation and the business model review. Following board approval of this recommended action, staff intends to use these timelines to guide next steps and will immediately initiate CAMP4W Assessments for a suite of projects/programs, including those listed above, and will prepare for subsequent board review and consideration of the assessments.

### A Special Note from the Board Chair

### Dear Reader:

On behalf of the Board of Directors of the Metropolitan Water District of Southern California, I am proud to present our Five-Year Implementation Strategy aimed at advancing Metropolitan's climate adaptation efforts. This marks an important milestone in our journey to ensure a sustainable water future for Southern California.

Over the past two years, the Board has undertaken a robust, challenging, and collaborative process with our member agencies to reaffirm our core mission: delivering reliable and high-quality water in the face of the escalating resource, infrastructure, and financial challenges wrought by increasing climate volatility. The Climate Adaptation Master Plan for Water (CAMP4W) is not your typical master plan. Rather than being confined to static binders, it is defined by iterative, adaptive, and innovative decision-making tools and policy directives that institutionalize climate adaptation and adaptive management throughout our agency.

The planning dynamics that have shaped this strategy are critical to understand. Over the last 30 years, we have invested over a billion dollars in water efficiency and demand management, leading to significantly declining water use across Southern California. While this has been an environmental success, it has resulted in reduced water sales and revenue at a time when we face multiple challenges—most notably climate change and the necessity of maintaining our vast, century-old infrastructure that transports water from the Colorado River and Northern California.

Our ongoing transformation from an agency focused solely on importing water to one that actively enhances resilience through local supply diversification demonstrates our commitment to adapting to these challenges. We have already amassed storage of record-setting dry-year supplies made possible by our regional efficiency and conservation achievements, and recent good rain years. Yet, as Metropolitan incentivized the construction of local recycling as well as other forms of demand management, and storage, we drastically reduced the sale of imported water and thus our main source of revenue.

Fortunately, through our local resilience, we gained a head start as the reliability of our imported sources is declining. On the Colorado River, we face increased competition from states like Wyoming, Colorado, Utah, and New Mexico for severely climate-impacted water resources. Since losing half of Southern California's Colorado supplies in 2003, Metropolitan has steadily made innovative investments in farm water conservation, ensuring a more reliable water supply for the Colorado River Aqueduct. A successful resolution to ongoing negotiations among the seven basin states that also include Arizona and Nevada and Mexico, could enable us to replicate these conservation investments across state lines to bolster the overall resilience of not only California, but the entire Southwest. But this will take more innovation and investment to accomplish.

Water resources from Northern California that must pass through the deteriorating Sacramento-San Joaquin Delta and its eroding levees are subject to significant supply risks. Regulatory obstacles and litigation currently exacerbate the difficulty in moving water south, as well as the ability to adapt to climate change. The State of California's potential construction of a \$20 billion underground tunnel to protect from the risk of levee failure provides an alternative in a natural disaster and underscores the magnitude of the challenges we face. Metropolitan would bear the major portion of that cost, while continuing to contribute to the cost of maintaining and improving the current levee system benefitting our region as well as other areas of the State.

To withstand threats to our imported supplies building projects such as the \$8 billion Pure Water Southern California treatment system in Carson, California, deserve serious consideration. Over time they can enable us to reuse billions of gallons of wastewater currently being discharged into the ocean. When and how to build the types of large projects I have described in these paragraphs without overburdening ratepayers, especially those with lower incomes, is a major objective of CAMP4W.

CAMP4W addresses our need to adapt financially, policy-wise, and politically from where we are today in the state of our infrastructure. The CAMP4W effort has facilitated the development of a new decision-making framework, essential for responding effectively to the multidimensional challenges that we are encountering along with the volatile climate.

On behalf of the Board, I would like to thank General Manager Deven Upadhyay for his disciplined and determined leadership; as well as his team, especially Chief Sustainability Officer Liz Crosson who patiently spearheaded the complex effort and who will guide us through its implementation. The team includes our Finance, Water Resources Planning, External Affairs, Engineering & Operations executives and staff as well as our Board support group. Committee Chair Matt Petersen and Vice Chair Karl Seckel brings vision and understanding to this effort; and Board Vice Chair Gail Goldberg and Finance Chair Tim Smith much necessary guidance. Finally, thank you to our member agency managers whose work is not done. I imagine them bringing the pragmatism of Metropolitan's founders striving to define the common benefits of Metropolitan's mission to a region that has been transformed into the 11th largest economy of the world.

I invite you to explore the Climate Adaptation Master Plan for Water and join us in this crucial endeavor. We also urge you to review our most recent SB60 report submitted to the California legislature outlining achievements in conservation, water recycling and groundwater storage. Our most recent report shows how residents have reduced water use by over 45% since the 1990's. It demonstrates that together, we can continue safeguarding our water future and building resilient communities for generations to come.

Adán Ortega, Jr. Chair of the Board Metropolitan Water District of Southern California

3

### Acknowledgements

This progress report for the Climate Adaptation Master Plan for Water would not be possible except for the dedication of Task Force Members, Metropolitan's Staff, and consultants.

# Background and Purpose

Diemer Water Treatment Diemer Water Treatment Plant 1 - January 2025

### 1.1 Problem Statement and Purpose of Climate Adaptation Planning and the CAMP4W Process

7-6

Climate change poses a significant threat to Metropolitan's ability to fulfill its mission and to the sources of water supply upon which Southern California relies. Extreme weather conditions in recent years have presented Southern Californians with an unsettling preview of the challenges ahead – weather whiplash is abruptly swinging the state from periods of severe and extended drought to record-setting wet seasons. Hazards from wildfire, extreme heat events, high winds, and sea level rise all pose risk to Metropolitan's critical infrastructure, such as those experienced during the 2025 wildfires, as well as to the ecosystems from which Metropolitan's water supply derives. There is no question that climate change is here and putting mounting pressure on the year-to-year management of our available water resources and infrastructure.

To ensure the continued reliability of water supplies for the communities we serve, Metropolitan embarked on the development of a comprehensive Climate Adaptation Master Plan for Water (CAMP4W), a comprehensive set of policy directives and decision-making tools that ensures the Board of Directors is equipped to consider climate risks to water supplies, water quality, infrastructure, operations, workforce, public health, and financial sustainability to its deliberations and investment decisions. It provides a roadmap to guide future investments and decision-making as we confront our new climate reality in the years and decades ahead.

By adopting the CAMP4W, the Board of Directors has directed staff to analyze planned programs and projects based on specific criteria that ensure consideration of climate change impacts and climate risk vulnerabilities throughout Metropolitan activities and to systematically institutionalize climate adaptation practices and policies to:

- Institute the consideration of climate change impacts and climate risks and vulnerabilities throughout Metropolitan activities;
- Enhance resource planning with the integration of climate and financial information;
- Increase the frequency of updates to resource needs and the factors that drive them;
- Set targets to guide the development of potential projects and programs to increase climate resilience and ensure continued reliability;
- Strengthen decision-making on project and program investments through greater transparency and more holistic and uniform analyses; and
- Establish an adaptive management approach to better manage uncertainty and remain responsive to evolving conditions.

Planning for a future impacted by climate change will support Metropolitan's reliability and resilience goals in a financially sustainable, environmentally responsible, and equitable manner.

### 1.2 Role of Implementation Strategy within the CAMP4W Process

The Climate Adaptation Master Plan for Water comprises multiple components which together form a living master planning program (Figure 1-1). Rooted in adaptability, Metropolitan's CAMP4W, through its implementation, will facilitate Metropolitan's continued reliability and resilience in the face of change and uncertainty while responding to real world conditions, course correcting as needed, and reducing the risk of over or under development. CAMP4W will allow the Board to balance the risks associated with either creating stranded assets or the devastating risk of having shortages or disruption in service, which would weaken Metropolitan's ability to achieve its core mission to provide safe, reliable water to its Member Agencies.

Through this CAMP4W Implementation Strategy, the Climate Decision-Making Framework, policy directives, partnership goals, and project and program timelines are combined to support near-term climate adaptation decision-making and implementation. Included is a defined set of new and ongoing tasks with an achievable timeline, the progress of which will be reported annually through the CAMP4W Annual Report. Modifications to the strategy will be made as needed to incorporate updated information and lessons learned. This adaptive management approach is depicted in Figure 1-1, presenting the key components in the development and implementation of the CAMP4W process.

Preparing for the future and providing a reliable supply of water to its Member Agencies are not new to Metropolitan. However, the CAMP4W process places adaptation in light of climate change at the forefront of planning, to intentionally look at all aspects of Metropolitan's resources, system and processes through a holistic lens and to transparently inform decision-making.

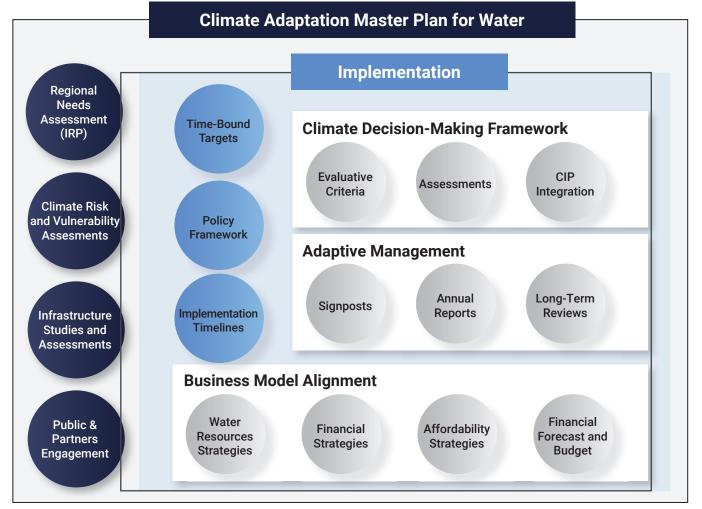

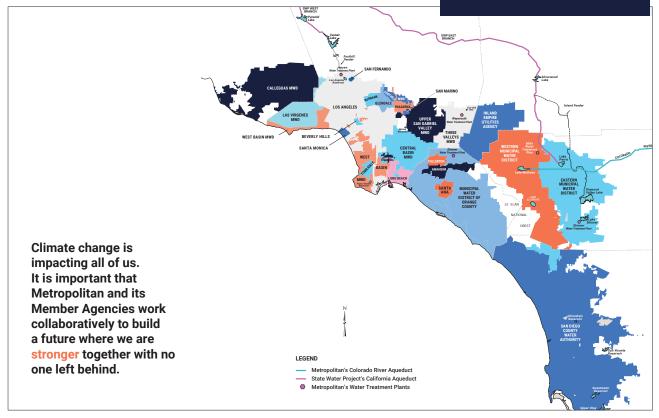

Figure 1-1. Climate Adaptation Planning Components

7

### 1.3 Metropolitan's Resources, System, Assets, and Member Agencies

Metropolitan's mission is to provide its service area with adequate and reliable supplies of high-quality water to meet present and future needs in an environmentally and economically responsible way. To do this, Metropolitan imports supplies from the California Bay-Delta and the Colorado River, leads regional water use efficiency programs, invests in local water resources, and operates and maintains the Colorado River Aqueduct, an expansive range of reservoirs, five water treatment plants, hydroelectric facilities, 830 miles of pipelines including large-diameter pipelines and tunnels and about 400 service connections.

Metropolitan delivers approximately 1.5 billion gallons of water daily to its 26 Member Agencies (Figure 1-2), who serve the 19-million person service area across 5,200 square miles. Member Agencies (Figure 1) vary widely in terms of their size, whether they are retailers or wholesalers, their percent dependence on Metropolitan, and the climate they experience. Climate zones range from the cooler coastal areas to hotter inland regions, while land use ranges from densely urban areas to heavy industrial areas to open agricultural lands, where the volume and nature of water use varies significantly. Nearly one third of the region's population is classified as disadvantaged, indicating that affordability considerations will vary across the region as well (DWR DAC Mapping tool<sup>1</sup>). Southern California's water supplies are facing major long-term threats, brought on by climate change, emerging contaminants and evolving ecological needs. For example, State Water Project dependent areas faced shortages during the recent drought due to supply shortage and infrastructure constraints, threatening the health and wellbeing of our residents. Metropolitan is committed to helping the region overcome these challenges with careful planning, vision and leadership to ensure our communities have the water they need for generations to come.

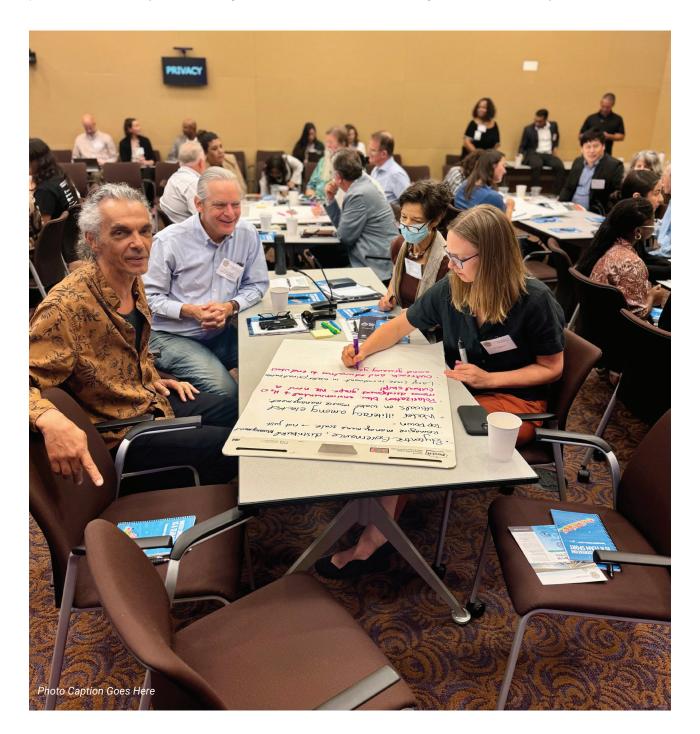

1 | https://water.ca.gov/Work-Withy-Us/Grants-And-Loans/Mapping-Tools)

#### Attachment 1, Page 10 of 66 SECTION 1: BACKGROUND AND PURPOSE

### 1.4 Public and Community Engagement

Ongoing public and community engagement in the CAMP4W process is essential to public support and acceptance for implementation, and importantly public trust. It is the means to ensure transparency and provide opportunities for diverse voices to raise their priorities, concerns, and ideas with Metropolitan and the Member Agencies. Continuing the outreach efforts practiced throughout the CAMP4W development process and advancing the engagement goals are a core element of implementation. Engagement with interested parties, such as the environmental community and community-based organizations, will continue to ensure Metropolitan is integrating local knowledge and issues deeply understood by local and regional partners. In collaboration with the Member Agencies, planned activities include workshops, listening sessions, forums, presentations, tabling at community events and work with community-based and tribal organizations.

Attachment 1, Page 11 of 66

# Assessing Metropolitan's Risk, Vulnerabilities and Needs

Diemer Water Treatment Plant 2 - January 2025

Worldwide, agencies are grappling with the reality that climate change is impacting our lives in a multitude of ways. Climate change is resulting in new and different risks and vulnerabilities for water systems and new and different needs for the people who rely on those systems. Decisions are being driven by extreme weather events such as drought, flooding, wildfires, heat waves, and windstorms, as well as sea level rise and the health of ecosystems, and the compounded impacts of climate change on other hazards such as earthquakes. Understanding risks and Metropolitan's vulnerabilities in the face of a changing climate is critical to establishing the region's needs for water supply reliability and infrastructure resilience. By considering potential risks and vulnerabilities, Metropolitan can best prepare to meet the needs of the region by making informed investment decisions and establishing a timeframe for implementation that is adaptable to changing conditions.

Developing strategies to address risks and vulnerabilities can be considered under two main categories. First, Metropolitan must consider effects on water supply reliability, which is impacted by fluctuating periods of drought and high rainfall as well as extreme heat events. Second, Metropolitan must bolster its infrastructure resilience to ensure operations and Member Agency support are maintained during and after hazard events that threaten or disrupt infrastructure.

The following sections discuss the process for evaluating risks and vulnerabilities, identifying water supply needs, and determining infrastructure resilience needs to ensure our water and power infrastructure remains resilient under anticipated future conditions.

### 2.1 Climate Risks and Vulnerabilities

Climate change poses significant risk to Metropolitan including the areas of drought, extreme precipitation, wildfires, sea level rise, extreme heat, and extreme wind events. As Metropolitan plans for the future, it must consider how these events will impact supply reliability and infrastructure resilience as well as how it will impact operations during emergencies. Understanding the risks is critical to properly assessing the best way to address them.

### Multiple Climate Risks Impact Metropolitan from Water Supply to Infrastructure

### Extended Droughts: Water Quality

Major rain and flooding events also create water quality concerns, such as the increased turbidity of inflows to Metropolitan's Jensen Water Treatment Plant from Castaic Lake in January 2023.

#### Increased Flooding: Infrastructure Damages⁵

Reduced annual snowpack threatens the long-term sustainability of Metropolitan's two major sources of imported water, the Colorado River and the Northern Sierra.

#### Extended Droughts: Water Supply<sup>1</sup>

Both of Metropolitan's major imported water sources, the Colorado River and the Northern Sierra, are threatened by extreme and extended droughts

### Sea-level Rise: Water Quality<sup>2</sup>

Increased salinity associated with sea-level rise could impact water quality in the Sacramento-San Joaquin Delta, as well as in coastal water basins situated throughout Metropolitan's service area.

Rise

### Increased Flooding: Infrastructure Damages<sup>3</sup>

Major rain and flooding events can damage Metropolitan's delivery and storage system, such as when Tropical Storm Hilary caused a suspension in deliveries to DWCV storage in 2023.

**6** Hughes Fire (10,000 acres) starts near Castaic Lake 1/22 10:53AM

Wildfires

Extreme

Drought

**Subsidence** 

#### Extreme Heat: Infrastructure Risks<sup>6</sup>

In addition to its damaging impacts on Metropolitan's existing infrastructure, extreme heat also threatens the health and safety of field staff across our service area.

Increased

Flooding

### Wildfires: Infrastructure Risks<sup>4</sup>

Wildfires can threaten Metropolitan's water treatment facilities and delivery systems, such as when the Freeway Complex Fire broke out in proximity to the Diemer Water Treatment Plant in November 2008.

238

### 2.2 IRP Needs Assessment

For decades, assessing Metropolitan's water supply needs has been accomplished through a robust integrated planning process and evaluation of projected future conditions, beginning with the 1996 Integrated Water Resources Plan (IRP). Member Agency data has been an integral part of the process, facilitated by Metropolitan's annual outreach to each Member Agency. While Metropolitan has consistently evaluated future uncertainty, the 2020 IRP Needs Assessment saw Metropolitan take its future planning process into an expanded direction with the inclusion of **scenario planning.** 

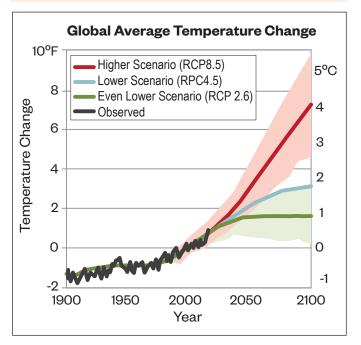

Metropolitan developed four scenarios (A, B, C and D, see Figure 1-2), which serve to represent the range of potential drivers that impact the region's supply and demand including economic conditions, population growth, regulatory requirements, and climate impacts to name a few. Based on the modeling done during the IRP Needs Assessment (Figure 2-1), the range in the water supply gap was determined, as shown in Table 1.

To support an adaptive management process, updates to the IRP Needs Assessment will occur at regular intervals, established based on trends that occur over time rather than reacting to short-term conditions which may reverse on a year-to-year basis. This has resulted in the selection of a five-year IRP Needs Assessment update cycle, as presented in Sections 5 and 6. In addition, there remains the need to keep the Board informed on an annual basis of how certain parameters are tracking over time. This will be accomplished through the Annual Reporting process which is further described in Section 5.3 and presented in the timeline in Section 6.

### **SCENARIO PLANNING**

Recognizing that a multitude of factors contribute to the demands on Metropolitan and the availability of its supplies, Scenario Planning allows us to examine the boundaries of what is reasonably likely to occur in the future since scenario planning "bookends" the range of possible future needs. By understanding what the supply gap could be under a variety of conditions, Metropolitan is able to decide what direction to plan towards. Next, using the Adaptive Management Approach, Metropolitan will be able to adjust planning targets as real-world conditions reveal where along the spectrum our needs are trending, which will inform incremental investment decisions.

### In 2024, Metropolitan's Board voted to plan toward Representative Concentration Pathway (RCP) 8.5, which acknowledges a need to prepare for a more extreme climate impacted future. RCP 8.5 is expressed in Scenarios C and D. By planning toward Scenario D and implementing based on realworld conditions, Metropolitan will balance the need to be prepared while limiting the risk of stranded assets if conditions change.

#### IRP NEEDS ASSESSMENT IDENTIFIED THREE CATEGORIES OF SUPPLY

**Core Supply:** A supply that is generally available and used every year to meet demands under normal conditions and may include savings from efficiency gains through structural conservation.

Flexible Supply: A supply that is implemented on an as-needed basis and may or may not be available for use each year and may include savings from focused, deliberate efforts to change water use behavior.

**Storage:** The capability to save water supply to meet demands at a later time. Converts core supply into flexible supply and evens out variability in supply and demand.

### Table 1: How Much Core Supply Do We Need Based on HowMuch Storage We Develop?

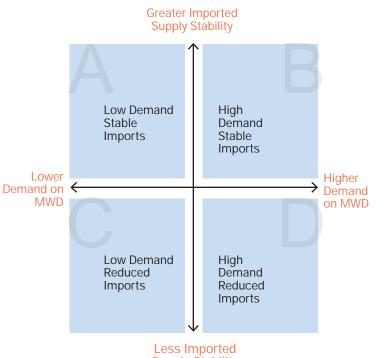

If we build this much storage	We will need this much additional core supply (conservation reduces demands and "counts" toward core supply needs)			
	IRP Scenario A	IRP Scenario B	IRP Scenario C	IRP Scenario D
0 TAF	No supply or storage requirements	100 TAF	50 TAF	650 TAF
100 TAF		70 TAF	15 TAF	600 TAF
250 TAF		30 TAF	15 TAF	550 TAF
500 TAF		30 TAF	15 TAF	500 TAF

\* TAF=thousand acre-feet; 1 acre-foot is the amount of water that would cover an acre of land at 1-foot depth

### UNCERTAINTY AND THE ESTABLISHMENT OF ASSUMPTIONS

There is **inherent uncertainty** whenever an assumption is made, and in the IRP Needs Assessment, each scenario is defined by numerous assumptions. **Scenario planning and adaptive management capture that uncertainty** in the space between each scenario – the spectrum along which real-world conditions are likely to unfold. Each scenario presents a data point along that spectrum, where any number of variables could shift the outcome in one direction or another.

By adapting and modifying investment decisions over time, **Metropolitan will align implementation with real-world conditions** to reduce the risk of over or under developing resources. Figure 2-1 Summary of IRP Scenarios A, B, C, D

Supply Stability

### 2.3 Infrastructure Resilience

To maintain a reliable water supply, Metropolitan must ensure that its existing and future infrastructure is resilient in the face of a changing climate and the compounding risk associated with natural disasters, such as earthquakes and wildfires. Infrastructure investments are also critical to advancing power reliability, continued system operation, asset management, infrastructure reliability, and energy sustainability. Infrastructure projects are comprised of both replacement and refurbishment (R&R) projects, which serve to maintain the existing system, and new projects to enhance system capabilities.

Metropolitan has a long history of evaluating risks and vulnerabilities to ensure its system is able to support its core mission. Metropolitan identifies potential projects and programs through several planning processes initiated by various groups within Metropolitan, which can be categorized into the five areas shown in Figure 2-2. The Water Supply Reliability component addresses Metropolitan's ability to supply water to meet Member Agency demands under all foreseeable hydrologic conditions. The System Capacity component addresses Metropolitan's ability to convey, treat, and distribute supplies to meet firm demands under peak conditions. The Infrastructure Reliability component addresses Metropolitan's ability to maintain facilities in readiness to ensure system deliveries. The System Flexibility component addresses Metropolitan's ability to respond to shortterm changes in water supply, water demands, and water quality and meet Member Agency water demands during planned or unplanned facility outages. The Emergency Response component addresses Metropolitan's ability to respond quickly to unplanned outages to restore service. By addressing each of the five reliability components, Metropolitan has developed a robust approach to ensure overall system reliability for its service area. While these processes have effectively identified projects and programs to meet Metropolitan's needs, changing climate conditions and increased uncertainty require additional considerations and criteria in project and program development and evaluation.

CAMP4W enhances the five categories of system reliability planning with climate adaptation considerations and addresses the compounding risks and vulnerabilities Metropolitan faces due to climate threats. Enhancements are reflected in the Policy Framework, Climate Decision-Making Framework, and Adaptation Strategies presented in Sections 4, 5 and 6.

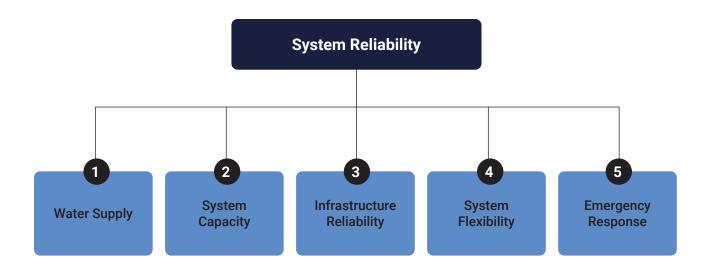

Figure 2-2. System Reliability Strategy

### 2.4 Water Quality Resilience

Maintaining Metropolitan's high water quality standard is essential to meeting Metropolitan's core mission and imperative to protecting public health. However, the compounding impacts of climate change including wildfires, drought, and extreme weather events, coupled with warming and extreme heat, are introducing new water quality challenges in Metropolitan's water supplies. Some potential climate-induced impacts on water quality include:

- Increased salinity due to saltwater intrusion and higher rates of surface water evaporation.
- Elevated turbidity and pollutant loads caused by high runoff events during extreme wet periods.
- Increased nutrient pollution and associated problems with harmful cyanobacteria blooms (cyanotoxins).
- More frequent reservoir anoxia and associated problems such as elevated manganese and sulfide concentrations.
- Increased chlorine demand and microbial activity such as nitrification in the distribution system.

Adapting to these water quality challenges may require investments in mitigation measures at source waters, more advanced water treatment processes, and improved management of the treated water distribution system. Climate change may push needed investments beyond what is required for general operations and maintenance and instigate a need for strategic infrastructure upgrades to address all water quality vulnerabilities. Additionally, water quality regulatory standards have become more stringent over time and this trend is expected to continue, making it more difficult to balance source water variability with evolving treatment and storage strategies.

For these reasons, water quality-focused adaptation strategies will be critical for long-term water quality resilience. Some actions that Metropolitan may consider through the CAMP4W process include:

- Enhancing research, mitigation, and response planning for high priority climate-induced water quality impacts.
- Expanding field monitoring, including increased use of innovative methods (e.g., automated samplers, remote sensing), to closely track source water quality and improve early detection capabilities at strategic locations.
- Optimizing operational strategies for raw water conveyances and storage reservoirs to mitigate declining water quality trends.
- Investing in infrastructure improvements (e.g., reservoir aeration, hypolimnetic oxygenation systems, chemical treatments to stabilize sediment nutrients) for higher risk parts of the source water system.
- Identifying and advocating for watershed management strategies to reduce point-source and diffuse nutrient and sediment pollution to address emerging water quality issues (e.g., more frequent and severe cyanotoxin-producing blooms, extreme turbidity events).
- Enhancing water treatment operations to address more frequent or extreme water quality challenges through process optimization and technology advancements.
- Upgrading water quality laboratory capabilities to expand sampling capacity, improve detection of new/ emerging pollutants, and accelerate sample turnaround.

Moving forward, it will be essential to identify impacts and build specific protections around the direct and cascading impacts of climate change. By prioritizing water quality resilience, Metropolitan can safeguard its ability to provide high-quality water to the region even in the face of extreme climate-driven conditions.

### Examples of Water Quality Concerns Exacerbated by Climate Change

Treatment facilities and operations have evolved over time to provide Metropolitan with significant flexibility in terms of level of treatment and ability to blend water from different sources. Climate change is likely to place additional stress on the ability of existing systems to accommodate future variability.

For example, more frequent and severe harmful algal blooms could limit access to certain reservoirs for extended periods, reducing source water availability and increasing pressure on treatment operations. Additionally, shifting demand patterns—driven by long-term reductions in treated water demand and short-term fluctuations between wet and dry years—have created operational challenges, requiring systems to adjust to greater variability in both water quantity and quality. Compounding these challenges, increasingly stringent water quality regulations are expected to drive up treatment costs and may require additional treatment processes.

Proactively planning for these and other stressors is imperative for Metropolitan to remain resilient and adapt in the face of a changing climate, while continuing to deliver high-quality water to the region.

# **3.0** Time-Bound Targets

BLDG. 28

Lake Mathews IO Tower - January 2025

Time-Bound Targets will help guide the Board in making investment decisions. The targets are based on sound data analysis and the needs of the region. They are categorized as resource-based targets and policy-based targets, both of which are critical to informing the Board decisions. Time-Bound Targets pair with the tracking of Signposts. A key aspect of the adaptive management process is to evaluate if Time-Bound Targets require updating based on changing conditions. The following sections present the Time-Bound Targets and Signposts that will support the Implementation Strategy.

### 3.1 Resource-Based Time-Bound Targets

Resource-Based Time-Bound Targets are intended to guide investment decisions by defining the water supply needs required to address the gaps identified in the IRP Needs Assessment. These targets are based on the robust modeling and evaluation process completed during the most recent IRP update but are adaptive. They will be reviewed and may be updated when the IRP Needs Assessment is updated based on current trends and other factors that may impact needs at that time.

	• <b>0</b>	CATEGOR	Y	NEAR TERM	MID TERM	LONG TERM
E N a	Resource- Based Targets Jumbers reflect Indditional Supplies unless		Core Supply <sup>1</sup>	N/A	Identify 300 TAF for potential implementation by 2035. Alternatively, 250 TAF of new storage will reduce core supply need to 200 TAF	Identify 650 TAF for potential implementation by 2045. Alternatively, 250 TAF of new storage will reduce core supply need to 550 TAF or, 500 TAF of new storage will reduce core supply need to 500 TAF
	ndicated otherwise	H <sub>2</sub> O	Storage	Identify up to	o 500 TAF for potential impler	
			Flex Supply (Dry Year Equivalent)	Acquire cap	ability for up to 100 TAFY	

#### Notes

1 Core Supply sub-targets will be considered and may include targets for groundwater remediation and stormwater capture.

To remain adaptive to climate change, the Resource-Based Time-Bound Targets are independent of the selection of a specific future scenario, as no single future scenario can be predicted. By identifying actions needed to close the gap in Scenario D, which aligns with the Board's directive to plan towards Representative Concentration Pathway (RCP) 8.5, we ensure planning coverage across all scenarios. The intentional use of the term <u>"identify"</u> in the Time-Bound Targets for core supply and storage should be noted. This target specifically addresses the need to <u>identify</u> opportunities, where as <u>implementation</u> of selected options will be done at the discretion of the Board over time, based on IRP updates, Signpost tracking, and other factors such as risk tolerance. This ensures we plan appropriately by <u>identifying</u> opportunities early enough to be well informed prior to any investment decision on <u>implementation</u>, given the long lead-time required for project development. This methodology supports Metropolitan's core mission and will facilitate the region being adequately prepared and not unprepared for a given future.

### 3.2 Policy-Based Time-Bound Targets

Policy-based Time-Bound Targets are designed to guide Metropolitan's investment decisions towards projects, programs, initiatives, and partnerships that advance the policy objectives identified through the CAMP4W process. Some policy-based Time-Bound Targets identify measures that will encourage resource-based development goals to be met through preferred alternatives (e.g., conservation measures). Others set and support goals that function in parallel to resource-based development (e.g., greenhouse gas emissions targets). As with resource-based targets, policy-based targets are adaptive and can be revised over time as deemed appropriate.

7-6

	CATEGO	DRY	NEAR TERM	MID TERM	LONG TERM	
Policy-Based Targets		Equitable Supply Reliability	Add 160 CFS capacity to the SWPDA by 2027	Implement additional 130 CFS capacity to SWPDA by 2032	Implement capacity, conveyance, supply, and programs for SWPDA by 2045	
	$\bigcirc$	Local Agency Supply <sup>1</sup>	Maintain 2.09 to 2.32 MAF (under average year conditions)	2.12 to 2.37 MAF (under average year conditions)	2.14 to 2.40 MAF (under average year conditions)	
	Demand Management <sup>2</sup>		Implement structural conservation programs to achieve 300 TAF by 2045			
		Regional Water	Assist Retail Agencies to achieve, or exceed, compliance with SWRCB Water Use Efficiency Standards <sup>3</sup>			
		Use Efficiency	GPCD target for 2030 <sup>4</sup>	GPCD target for 2035	GPCD target for 2045	
		Greenhouse Gas Reduction	N/A	40% below 1990 emission levels by 2030	Carbon Neutral by 2045	
Surplus Water Management		Develop capability to manage up to 500 TAFY of additional wet year surplus above Metropolitan's Storage Portfolio and WSDM action				
		Community Equity*				
	$\overset{\circ}{\Phi}\overset{\circ}{\overset{\circ}{\overset{\circ}{\overset{\circ}{\overset{\circ}{\overset{\circ}{\circ$	Water Quality*				
		Imported Water Source Resilience*				

\*Time-Bound Targets remain in the development phase and will be refined in 2025.

#### Notes

- 1 This initial target includes existing (and under construction) local agency supplies and can be augmented to include new local agency supply.
- **2** Used to offset the need for additional core supply and using 2024 as a baseline.
- 3 Each retail water supplier will report progress to the State Water Board annually through a Water Use Objective (WUO) equaling the sum of efficiency budgets for a subset of urban water uses: residential indoor water use, residential outdoor water use, real water loss and commercial, industrial and institutional landscapes

with dedicated irrigation meters. Each efficiency budget is calculated using a statewide efficiency standard and local service area characteristics (population, climate, etc.).

4 Specific GPCD Time-Bound Targets will be identified based on final SWRCB standards. If the Board wishes to set a higher target, it would be designed to track water use efficiency trends by sector over time and will take local conditions, including climate, into consideration.

# 4.0 Policy Framework

7-6

Workers in Action on Badlands Tunnel Project 1 - 2025

The Climate Adaptation Policy Framework comprises five high-level policy statements, which support each of the Board-identified priority areas of Reliability, Resilience, Financial Sustainability, Affordability and Equity. In general, the Policy Framework will guide the implementation strategy (Section 6) and efforts to:

- **1.**Systemically integrate climate adaptation to <u>increase climate preparedness</u>, <u>deepen internal knowledge and</u> <u>understanding of impacts</u>, and <u>improve climate hazard response</u>
- **2.**Update existing and set new policies to strengthen the role of <u>adaptive management</u> and <u>climate adaptation</u> in Metropolitan's <u>initiatives and decision making</u>
- **3.**Underscore the value of the Metropolitan Member Agency <u>cooperative</u> and other <u>partnerships</u> in achieving <u>regional climate resilience</u>

	POLICY FRAMEWORK	IMPLEMENTATION EXAMPLES
	<b>Reliability</b> Metropolitan will consider climate risks and integrate climate adaptation and risk reduction strategies into water supply programs, policies, planning, and operations.	<ul> <li>Incentives for member agencies to increase regional water resilience</li> <li>Infrastructure projects to improve access to water supplies</li> <li>Watershed resilience projects to strengthen imported supplies</li> <li>Programs to actualize benefits from wet weather year</li> <li>Expand monitoring and predictive modeling to anticipate water quality challenges at strategic and high risk locations</li> </ul>
(-	<b>Resilience</b> Metropolitan will integrate climate risk and vulnerability assessments for climate-related hazards, including drought, extreme heat and precipitation, sea level rise, flooding, and wildfire, using the best available climate science and climate change information into planning, implementation, and operations.	<ul> <li>Develop Resilient Infrastructure Guidelines</li> <li>Develop response indicators and action plans for primary climate threats to water quality</li> <li>Assess power system vulnerabilities</li> <li>Review workforce and equipment safety measures for climate risks</li> <li>Update fire management plans for critical facilities</li> </ul>
3	<b>Financial Sustainability</b> Metropolitan will reduce short-term and long- term climate-related financial risks through periodic reviews and potential refinement of its business model, active monitoring and managing of financial conditions, and by maintaining flexible financing alternatives.	<ul> <li>Track financial implications of climate-induced expenses</li> <li>Consider updates to reserve policy</li> <li>Consider adjustments to fixed and variable rate structures</li> </ul>
	<b>Affordability</b> Metropolitan will continue to support retail user affordability efforts that support our mission to provide regional wholesale water service in the most economically responsible way.	<ul> <li>✓ Identify new partnerships, grants, and revenue sources for climate adaptation</li> <li>✓ Work with Member Agencies to identify funds for statewide low-income rate assistance</li> <li>✓ Enhance water conservation incentives to reduce financial impacts</li> </ul>

- $\checkmark$  Develop community engagement standards
- ✓ Develop environmental justice and community benefits policy

### Equity

Metropolitan will engage with the diverse communities we serve to listen, communicate transparently, and co-create solutions for greater equity in climate adaptation planning and implementation. Attachment 1, Page 23 of 66

# **5.0** Climate Decision-Making Framework

Rialto Feeder - Inland Feeder Interie Project 4 (December 2024)

The desire to develop a standardized methodology to evaluate climate adaptation investments and inform decision-making was a primary driver for initiating the CAMP4W process. One of the goals from the beginning of the process was to ensure common data and analyses are applied consistently and transparently, and in consideration of a changing climate and deep uncertainty.

The Climate Decision-Making Framework therefore defines a consistent, stepwise process of making project and program investment decisions (Figure 5-1). It is based on Metropolitan priorities and the need to remain reliable and resilient into the future, while considering financial sustainability, affordability, and equity. Figure 5.1 illustrates the high-level Climate Decision-Making Framework.

The following sections provide a more detailed discussion on key components, including the evaluative criteria and the project and program assessment tools and the integration process for how these elements will be infused into Metropolitan's processes. Also presented is the framework for monitoring and reporting as part of the adaptive management process, and the process for continuing to engage the public and interested parties to ensure transparency and input.

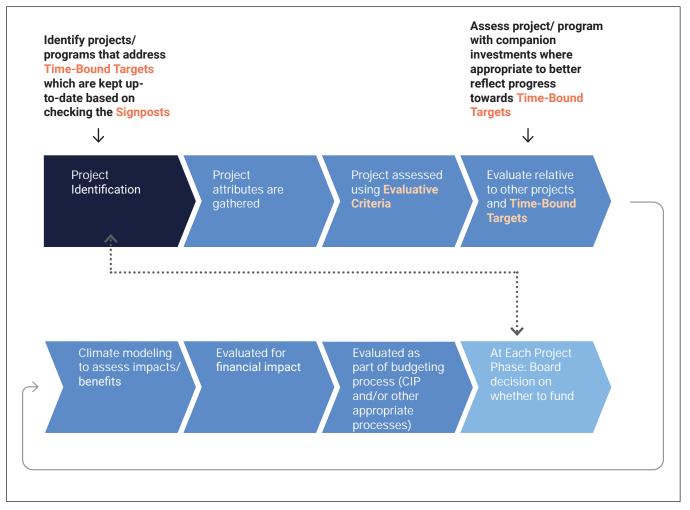

Figure 5-1. Climate Decision-Making Framework

### 5.1 Evaluative Criteria and Assessment Tools

Evaluative Criteria represents a defined set of metrics used to assess projects and programs and support the Board's decision-making process. Evaluative Criteria are used in collaboration with the Time-Bound Targets and Signposts to support decisions: Time-Bound Targets set the goals, Signposts assess real-world conditions to ensure the targets are appropriate, and Evaluative Criteria facilitates decisions for projects and programs to help Metropolitan move closer to the targets.

7-6

Figure 5-2 presents the Evaluative Criteria. Through the CAMP4W process, the Board expressed its preference to select an evaluation process that combines both quantitative and qualitative elements into the comprehensive assessment, supported by a series of questions. The Comprehensive Assessment Form is presented in Appendix A and will be used for all projects and programs evaluated under CAMP4W. This form, once completed, will be presented to the Board along with additional project and program supporting documentation to assist the Board in its deliberations.

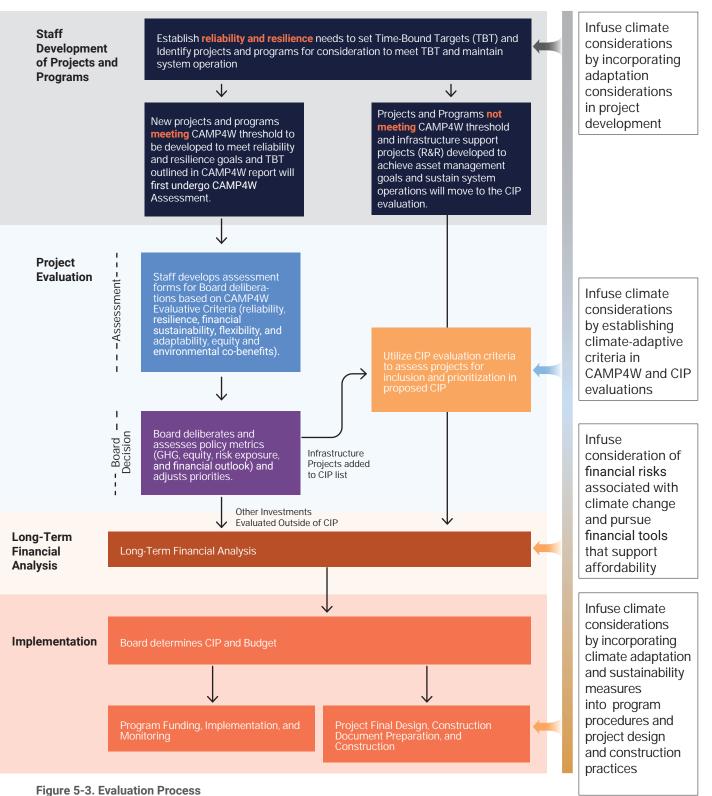

The next section illustrates how this assessment approach integrates into the Board's overall decision-making process. Ultimately, decisions will be made by the Board at its discretion, and these tools will help facilitate a uniform, methodical, and transparent assessment process.

		Ś
RELIABILITY	RESILIENCE	FINANCIAL SUSTAINABILITY & AFFORDABILITY
Supply Performance Equitable Reliability	Addresses known risks and vulnerabilities Project, Program or Portfolio's ability to perform under climate impacts	Total Cost, Unit Cost, Lifecycle Cost
Assess how a project or program performs under various hydrologic conditions, the extent to which it helps close gaps identified in the IRP Needs Assessment, and how it can address an inequity in supply reliability.	Evaluates how the project or program addresses known risks and vulnerabilities and how it performs under climate impacts.	Assess a project's financial sustainability and affordability based on its unit cost Total Cost, Unit Cost, Lifecycle Cost and other factors.

### 5.2 Integrated Implementation Processes

CAMP4W integrates climate adaptation into Metropolitan's existing processes to ensure a holistic approach and the efficient and effective delivery of projects and programs. Figure 5-3 presents the overall process. As shown, projects and programs meeting the threshold for CAMP4W evaluation receive additional analysis consistent with the rest of the existing processes.

7-6

#### 5.3 Adaptive Management, Monitoring and Reporting, and Signposts

Adaptive management is a cornerstone of the CAMP4W process. By embracing the need to be nimble and open to revision and adjustments over time, Metropolitan can manage uncertainty about the future and remain responsive to evolving conditions.

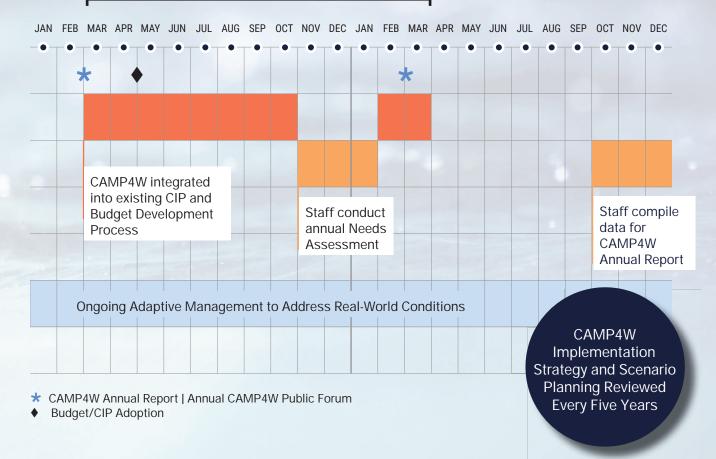

7-6

The CAMP4W Annual Report provides the structure for adaptive management by presenting key information on an annual basis to track trends and adjust Time-Bound Targets as needed. It provides a means for informing the Board on progress toward climate resilience and resource reliability.

The Annual Report will be used to support Board deliberations on investment decisions, understand if updates are required to the Time-Bound Targets, and identify any other area that requires an update. Content presented in the CAMP4W Annual Report includes the following:

- The status of each Signpost, which includes Water Supply Reliability Signposts, Infrastructure Signposts, and Financial Signposts, as presented in Section 5.3.1
- Updates on progress towards achieving the Time-Bound-Targets;
- Implementation highlights, which include projects, programs, policies, partnerships, initiatives, and public outreach.

Figure 6-1 presents a high-level overview of the schedule for CAMP4W reporting and updates.

#### **BI-ANNUAL CIP AND BUDGET DEVELOPMENT**

Figure 5-4. Schedule of CAMP4W Reports and Updates

**Tracking Signposts** will allow the Board to make investment decisions based on the most updated review of trends.

5.3.1 Signposts

potential supply gaps, tracking Signposts will facilitate regular updates to support Board deliberations by providing the most recently available data on an annual basis (see Section 5.3 for a discussion on annual reporting). Signposts serve as measurable indicators of the direction and trends of factors that can significantly impact decisions. Although Signposts do not eliminate uncertainty, they offer a datadriven understanding of patterns, helping to contextualize trends over time and enhance decision-making. The Signposts will serve as an important tool for adaptive management and to support decisions on project and program investments, strategy development, and initiatives. The CAMP4W Annual Report includes ongoing tracking of Signposts for water supply and demand as well as infrastructure and financial Signposts. The Signposts are presented below.

STS	Demographics	VPOSTS	Frequency of infrastructure R&R from climate related conditions
WATER SUPPLY RELIABILITY SIGNPOSTS	Climate change	FRASTRUCTURE AND FINANCIAL SIGNPOST	Cost of infrastructure R&R from climate related conditions
<b>RELIABILI</b>	Local agency supply	AND FINAN	Emergency response
R SUPPLY	Imported supply	RUCTURE /	frequency due to climate related impacts
WATER	Storage	INFRASTI	Emergency response costs due to climate related impacts

# 6.0 Adaptation Strategies and Five-Year Implementation Timelines

Rialto Feeder - Inland Feeder Interie Project 3 (December 2024)

#### 6.1 Overview

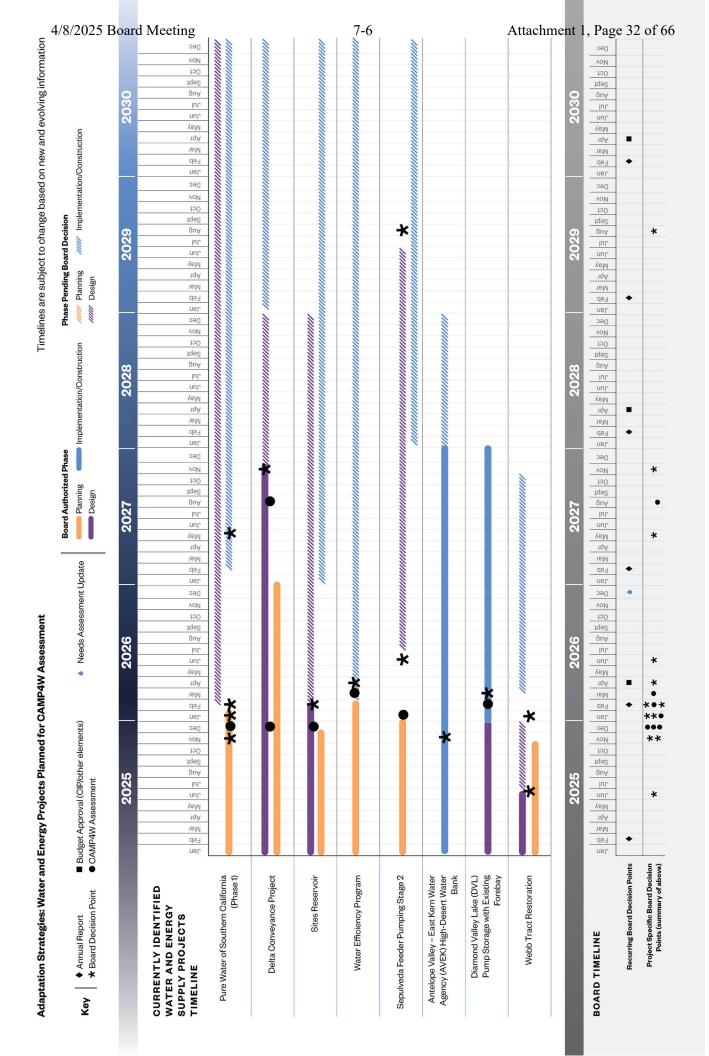

The CAMP4W Time-Bound Targets and Policy Framework drive the development of adaptation strategies (projects, programs, initiatives, etc.) to ensure Metropolitan's reliability and resilience in a climate-impacted future. The Climate Decision-Making Framework focuses the assessment of projects and programs on the Board-identified priorities of Reliability, Resilience, Financial Sustainability and Affordability, Adaptability and Flexibility, Equity and Environmental Co-Benefits. Signposts help guide investment decisions by tracking real-world trends and informing the modification of targets as needed. Those elements define the process for the Board to make decisions over time.

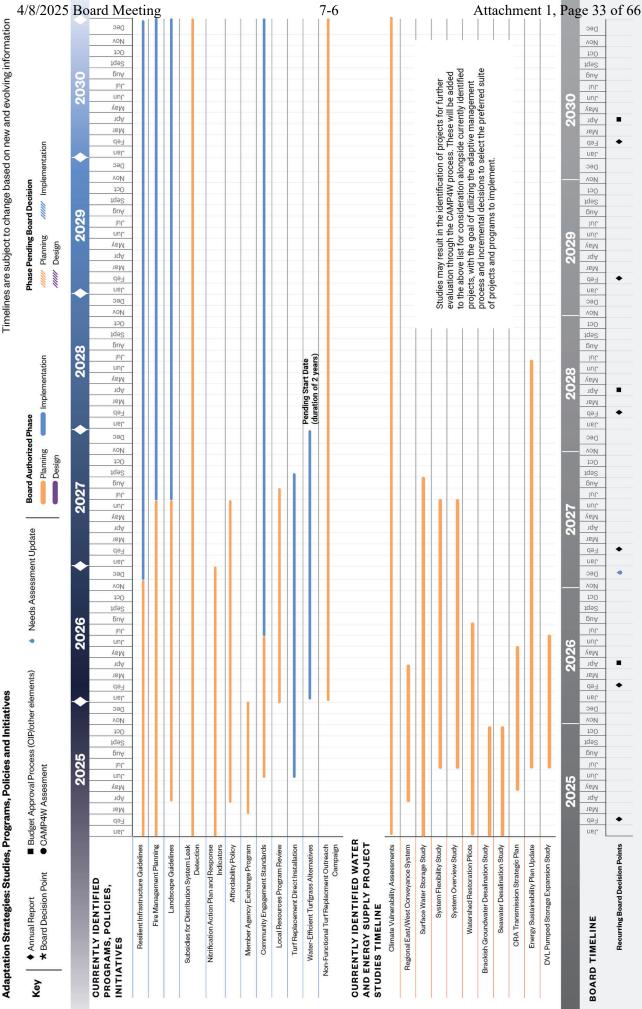

This section presents the five-year timelines for climate adaptation and risk reduction strategies identified to date in the categories of projects, studies, programs, policies, and initiatives (Figures 6-1 and 6-2). While the development of most of the projects listed predated the CAMP4W process, those projects will be assessed using the CAMP4W decision-making framework to ensure consistency with the Board's priorities. Ongoing and newly initiated studies, programs and initiatives are also included as potential sources of new climate adaptation and risk reduction strategies for future Board deliberation.

The timelines presented in Figures 6-1 and 6-2 include anticipated Board decision points as well as key milestones based on currently available information. The timelines provide the Board an overall understanding of the wide range of alternatives available to achieve the region's needs so that the most effective strategies are implemented based on a comprehensive assessment of each option. There is also a brief overview of identified climate adaptation strategies in Sections 6.3 and 6.4. Because this information is based on currently available information and data and each strategy is in a different phase of development, dates and processes are subject to change and will be updated as needed.

#### 6.2 Implementation Timelines

The following Figures 6-1 and 6-2 present the implementation timelines for projects, programs, policies, and initiatives. The sections that follow provide a brief overview of each strategy identified. As this is an adaptive plan, the dates and list of strategies will be subject to change over time.

#### 6.3 Projects

The adaptive management process will facilitate the selection and implementation of projects following CAMP4W Comprehensive Assessments and Board deliberation. This involves making investment decisions incrementally over time, at various stages (planning, design, implementation, etc).

Below is the initial list of projects that will be assessed under the Climate Decision-Making Framework that are either underway or will be underway in the next five years.

#### 6.3.1 Pure Water Southern California Phase I and II

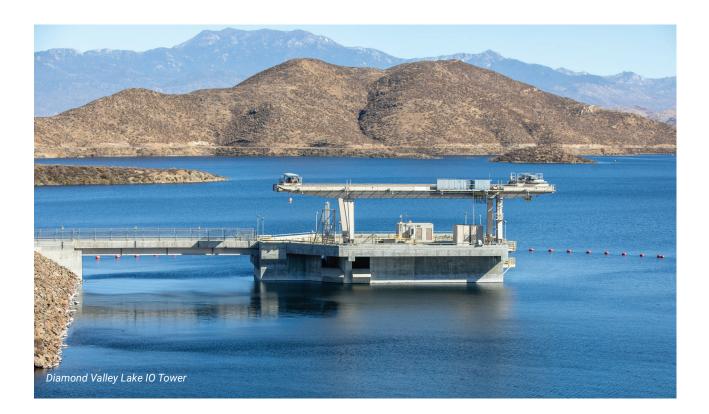

The Pure Water Southern California program is a partnership between the Metropolitan Water District of Southern California and the Los Angeles County Sanitation Districts. The program uses advanced water purification to recycle cleaned wastewater for indirect and direct potable use. It could produce up to 150 million gallons of water daily, enough for 1.5 million people.

#### 6.3.2 Delta Conveyance Project

The Delta Conveyance Project is a conveyance project proposed by the California Department of Water Resources. It includes the construction of two new intakes on the Sacramento River in the north Delta, an underground tunnel 45 miles in length and 36 feet in diameter, and a pumping plant to lift water from the terminus of the pipeline into the Bethany Reservoir at the beginning of the California Aqueduct.

#### 6.3.3 Sites Reservoir

The Sites Reservoir Project is led by the Sites Project Authority, a joint powers authority made up of irrigation agencies, water districts, cities, and counties in the Sacramento Valley. It is a proposed 1.5-million-acre foot off-stream reservoir designed to capture rainwater that would be integrated with the State Water Project and Central Valley Project.

#### 6.3.4 Water Efficiency Program

Metropolitan's Water Efficiency Team offers a suite of programs and incentives including conservation rebates for indoor and outdoor water-saving measures, investments in innovative efficiency strategies, public outreach and marketing, sponsorships for community-based organizations, and education programs.

#### 6.3.5 Sepulveda Feeder Pumping Stage 2

On the western side of the service area, Metropolitan is designing and will construct the first stage of two new pump stations (30 cfs) along its Sepulveda Feeder to allow delivery of up to 22,000 acre-feet of additional water annually from the Diemer and Weymouth Water Treatment Plants during SWP shortages. A potential second stage (160 cfs) is in the planning process and will be evaluated through the CAMP4W process.

## 6.3.6 Antelope Valley-East Kern Water Agency (AVEK) High Desert Water Bank Partnership

The High Desert Water Bank is a partnership with the Antelope Valley-East Kern Water Agency (AVEK) allowing Metropolitan to store and access State Water Project supplies in the Antelope Valley groundwater basin. The project includes recharge basins, recovery and monitoring wells, and a connection to the California Aqueduct. Additional treatment facilities are underway.

#### 6.3.7 Diamond Valley Lake (DVL) Pumped Storage with Existing Forebay

Diamond Valley Lake, completed in the 1990s, was built to store up to 810,000 acre-feet of water. The existing adjacent forebay has the potential to provide pumped storage hydropower. Pumped storage hydropower is an energy storage solution where energy is stored and generated by moving water between two reservoirs located at different elevations. At times of low electricity demand, when energy is inexpensive or renewable supplies exceed demand, the excess energy is used to pump water to an upper reservoir; during periods of high electricity demand or cost, the stored water is released through turbines from the upper reservoir into the lower one generating clean energy.

#### 6.3.8 Battery Energy Storage Systems

Metropolitan is adding battery energy storage systems (BESS) to existing solar facilities at the Jensen, Skinner, and Weymouth Water Treatment Plants to manage daily power use and costs as well as resilience during emergency events. The projects are partially funded by the California Public Utilities Commission's enhanced incentives for microgrid-capable BESS at critical facilities.

#### 6.3.9 Webb Track Restoration

Webb Tract, located in the Sacramento-San Joaquin Delta region, is one of four islands owned by Metropolitan. Funded by the Sacramento-San Joaquin Delta Conservancy's Nature Based Solutions grant program, the Webb Tract Wetland Project is a multi-benefit approach to ecosystem restoration and sustainable farming.

#### 6.4 Studies, Programs, Policies, and Initiatives

In addition to an anticipated timeline for evaluating projects (Figure 6-1), the Implementation Strategy includes proactive measures to assess and address climate risks. These strategies include programs, studies, policies, and initiatives (Figure 6-2). Below is an initial set of brief descriptions.

#### 6.4.1 Resilient Infrastructure Guidelines

To ensure climate adaptation planning and implementation is integrated across Metropolitan, inclusive of all infrastructure projects including R&R projects and new infrastructure projects, Metropolitan will develop design guidelines based on engineering standards and climate adaptation and risk-reduction considerations.

#### 6.4.2 Fire Management Planning

Metropolitan is assessing the fire-related risks and vulnerabilities at all its facilities. Critical facilities will undergo a more thorough assessment and fire management strategies will be developed and considered for implementation.

#### 6.4.3 Landscape Guidelines

Metropolitan will develop landscape guidelines for consistent implementation at all Metropolitan facilities to address water efficiency and fire risks.

#### 6.4.4 Subsidies for Distribution System Leak Detection

Reducing leaks in the distribution system directly benefits the region by reducing demands on Metropolitan. This program will evaluate alternatives to provide subsidies that will detect system leaks and establish how those subsidies will be developed, funded, and implemented.

#### 6.4.5 Nitrification Action Plan and Response Indicators

Nitrification can at times be an issue in chloraminated drinking water systems and is caused by factors such as warm water temperatures and extended water age, due to long detention times during low demand periods. Given anticipated temperature increases and reduced demands, Metropolitan will develop response indicators and an action plan for addressing this water quality related climate threat.

#### 6.4.6 Affordability Policy

Metropolitan will develop a policy for considering and integrating affordability considerations, including efforts to support retail agencies' affordability efforts. This will work towards continuing to support Metropolitan's mission to provide regional wholesale water service in the most economically responsible way.

#### 6.4.7 Member Agency Exchange Program

As Metropolitan reviews its current business model, facilitating exchanges among Member Agencies is under consideration. Establishing potential guidelines and conditions will provide options that incorporate Member Agency needs.

#### 6.4.8 Community Engagement Standards

Metropolitan will develop community engagement standards to guide engagement activities and programs and inform project and program assessments under the Climate Decision-Making Framework.

#### 6.4.9 Local Resources Program Review

Metropolitan has successfully implemented its Local Resources Program for decades, assisting Member Agencies with funding for critical projects that have increased regional reliability. Metropolitan will review the program and refine if needed.

#### 6.4.10 Turf Replacement Direct Installation

The turf replacement program may benefit from direct installation, particularly for users with limited means to self-fund the turf replacement. Metropolitan will explore options and evaluate how a program of this type may provide the most benefits, both to increase the number of users and from a cost-effectiveness standpoint.

#### 6.4.11 Water-Efficient Turfgrass Alternatives

New technologies and research studies are emerging, and Metropolitan will evaluate how those may benefit the region and how programs may be implemented.

#### 6.4.12 Non-Functional Turf Replacement Outreach Campaign

The non-functional turf program provides resources to remove and replace non-functional turf (e.g., turf that serves limited use) with climate appropriate alternatives to reduce demands on Metropolitan. An outreach campaign provides consistent messaging and information for all potential users.

#### 6.4.13 Climate Vulnerability and Risk Assessments

Metropolitan developed the initial Climate Vulnerability and Risk Assessment document to help plan towards a future impacted by climate change. To implement the findings of this and planned future efforts, Metropolitan must establish a uniform methodology for performing assessments across its service area.

#### 6.4.14 Regional East/West Conveyance System Study

The Regional East/West Conveyance System Study would look at multiple scenarios for conveying untreated Colorado River water; stored water from DVL, AVEK, or Lake Mathews; and future Pure Water Southern California (PWSC) supplies to assess all alternatives.

#### 6.4.15 Surface Water Storage Study

An initial study identifying potential locations for new surface storage has been completed. The study identified locations that are in-region and can provide a direct benefit to the western SWP-dependent area, as well as locations within the west San Joaquin Valley that can provide a benefit to the whole service area. The next phase of the analysis will refine the evaluation criteria and create a short list of sites for a more detailed evaluation.

#### 6.4.16 System Flexibility Study

The System Flexibility Study considers Metropolitan's ability to respond to short-term changes in water supply, water demands, and water quality and the ability to meet Member Agency needs during planned or unplanned outages. Metropolitan frequently meets with Member Agencies to discuss the findings and evaluate potential solutions in the event that the modeled conditions were to occur.

#### 6.4.17 System Overview Study

The System Overview Study is used to understand how the system can address supply gaps, evaluate facilities required to deliver imported water supply and evaluate policies and guidelines for infrastructure improvements.

#### 6.4.18 Watershed Restoration Pilots

Watershed Restoration Pilots support Metropolitan's One Water approach and Bay-Delta Policies to improve water supply resilience in the face of climate change. Investigations will create opportunities for additional science, foster collaborative relationships in the upper watersheds, and establish a methodology for valuing ecosystem services.

#### 6.4.19 Brackish Groundwater Desalination Study

The Brackish Groundwater Desalination Study will identify the potential for the development of additional potable water supplies through brackish groundwater desalination. The study will also assess the opportunity for integration in adjacent water distribution systems and regional water systems.

#### 6.4.20 Seawater Desalination Study

The Seawater Desalination Study will identify the potential for the development of additional potable water supplies through seawater desalination. The study will also assess the opportunity for integration in adjacent water distribution systems and regional water systems.

#### 6.4.21 Colorado River Aqueduct (CRA) Transmission Strategic Plan

Metropolitan's ownership and operation of the CRA and its power transmission system, including five pumping plant facilities along the CRA, is vital to Metropolitan's mission. The CRA Transmission Strategic Plan will provide recommendations for sustainably managing and improving the system for long-term reliability, affordability and resilience.

#### 6.4.22 Energy Sustainability Plan Update

Metropolitan will update its 2020 Energy Sustainability Plan (ESP). The ESP's purpose is to facilitate informed energy management and investment decisions through consideration of energy cost containment, system reliability, affordability, environmental co-benefits and climate adaptation.

#### 6.4.23 Diamond Valley Lake (DVL) Pumped Storage Expansion Study

Metropolitan will evaluate the potential expansion of the pumped storage program at Diamond Valley Lake to provide additional carbon-free energy to the system.

### Metropolitan Water District of Southern California CAMP4W Comprehensive Assessment

Metropolitan is committed to meeting its mission in the face of a changing climate by developing projects and programs that advance Time-Bound Targets, consistent with the Board's priorities. This comprehensive assessment is a key part of the Climate Decision-Making Framework and will be used to support Board deliberations on which projects and programs Metropolitan should pursue.

1/8/2025 Board Meeting

Description

#### **CAMP4W COMPREHENSIVE ASSESSMENT GUIDANCE DOCUMENT**

#### 1. Objective and Use

The objective of this Guidance Document is to provide instructional support to Metropolitan staff completing CAMP4W Comprehensive Assessments for projects, programs, and portfolios that meet the threshold for evaluation within the CAMP4W Climate Decision-Making Framework. The assessments are based on the Evaluative Criteria developed by the CAMP4W Task Force and reflect the themes and priorities for Metropolitan moving forward to integrate climate adaptation priorities into investment decisions.

7-6

The **Evaluative Criteria** represent a defined set of criteria used to establish a value assessed for projects, programs, or portfolios to support the Board's decision-making process. The Evaluative Criteria are broken out into six components: reliability, resilience, financial sustainability and affordability, adaptability and flexibility, equity, and environmental co-benefits.

Each of the Evaluative Criteria include a series of questions to generate both quantitative and qualitative information from which the project, program, or portfolio can be assessed. Each question will receive a value (Section 2), which will assist the Board in deliberations. This process will facilitate understanding to which level a project, program, or portfolio advances Metropolitan's long-term reliability, measured by both the Evaluative Criteria and Time-Bound Targets.

An Evaluation Committee comprised of subject matter experts from various groups within Metropolitan will conduct the Comprehensive Assessments and provide the Board with the information described below to inform decision-making. Each Criteria has an assigned subject matter lead who is responsible for gathering relevant information to make their recommendations. Assignments may be adjusted on a case-by-case basis per the discretion of the Evaluation Committee. The Committee works together to complete the Summary Page, produce supporting materials, and refine the final Assessment. Additional staff subject matter experts can be included in deliberations when necessary, and staff will engage Member Agencies during the assessment process. Staff group leads are defined below:

- ➤ Reliability: Water Resources Management
- Resilience: Engineering Services
- Financial Sustainability & Affordability: Finance
- > Adaptability & Flexibility: Water Supply Operations
- > Equity: Diversity, Equity, and Inclusion & External Affairs
- > Environmental Co-Benefits: Sustainability, Resilience, and Innovation

The Comprehensive Assessment is broken into seven sections. The first section, Project/ Program/ Portfolio at a Glance provides an overall assessment and staff recommendations. The following sections discuss how it directly relates to Metropolitan's Evaluative Criteria. **Table 8** presents the glossary of terms used in the assessment.

1

#### 2. Ranking Guide

Key attributes of each of the evaluative criteria are given a value based on the criteria shown in Figures 1 and 2. The rankings define to which level a project, program or portfolio will deliver CAMP4W objectives. A score of **Exceptional** is attributed to a project, program, or portfolio that directly and completely addresses the benefits being assessed by the question or statement. Meanwhile, a score of **Very Limited** is attributed to a project, program, or portfolio that does not provide any or has very limited benefits to those being assessed by the question or statement. Where **Not Yet Determined/Not Applicable** is selected, this indicates that the project, program, or portfolio is still in development and the questions cannot be adequately addressed, or the criteria or attribute is not applicable.

7-6

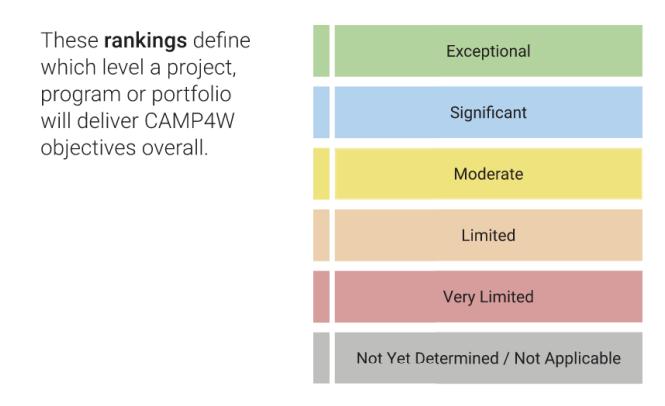

Figure 1: Ranking Guidelines at the Overall Level

	Exceptional	Significant	Moderate	Limited	Very Limited	Undetermined o Not Applicable
F	Ranking G	uidelines at	the Attribut	e Level

#### 3. Project, Program, or Portfolio Location Map

A map of the project, program, or portfolio location should be included showing enough detail to illustrate the extent of the project, program, or portfolio, and show all relevant components to support Board discussions.

#### 4. Guidance for each Evaluative Criteria

The following tables provide guidance for staff on how to complete the CAMP4W Comprehensive Assessment by providing further explanation of the intent of each question and recommendations on where to access supportive data and information.

#### 4.1 Project/ Program/ Portfolio at a Glance

#### Table 1. At a Glance

Question or Title of Data Entry	Guidance
Title of Project/Program/Portfolio	Enter project/program/portfolio title.
Status and Date (planning/design/implementation)	Enter planning, design, or implementation based on status at the time the form is being prepared and provide date of assessment completion.
Capacity (if applicable)	Enter values such as acre-feet per year of core supply, acre-feet of storage, additional flex supply, cubic feet per second of conveyance capacity, megawatts and/or kilowatt hours provided.

Capital Cost	Enter the capital cost in current year dollars.
Operation/Maintenance or Ongoing Cost	Enter the operation and maintenance cost in current year dollars.
Description and how the project/program/portfolio supports water supplies, reliability and/or delivery	Explain the benefits of the project/program/portfolio as it relates to providing additional core/flex supply or storage, how it improves reliability within the system, or how it improves delivery. Include information on how it performs during wet and dry years and any restrictions (e.g., requires a new core supply to be effective in dry years, etc.). This description should be written for a general audience and without acronyms or terminology not widely understood. (i.e. instead of referencing specific IRP scenarios, describe as more severe climate conditions or stable or increased demands).
Portfolio view and additional potential companion projects/programs/portfolios	Explain how it functions when combined with other projects/programs/portfolios. May require modeling to assess how projects work together to provide benefits, or how benefits are lessened if other projects were to be implemented.
Summary of Assessment and Staff Recommendation	Summarize the comprehensive evaluation of the project/program/portfolio as it relates to the Evaluative Criteria and Time-Bound Targets. This description should focus on the most important benefits of the proposal, as well as significant limitations that need to be communicated. Avoid acronyms or terminology not widely understood and focus on how this proposal ensures the delivery of Metropolitan's core mission.

In addition to the questions posed above, the CAMP4W Comprehensive Assessment includes selection of which Time-Bound Targets the project, program, or portfolio addresses. The user will select all that apply.

The user will also select the assessment value assigned to each Evaluative Criteria. The assessment value presented as part of the summary will align with the value provided on each individual Evaluative Criteria page, as discussed in the following sections.

#### 4.2 Reliability Attributes

**Table 2** provides an overall summary of the project, program, or portfolio information and staff assessment results related to the Reliability Evaluative Criteria. This section is only relevant to water supply reliability projects, programs and/or portfolios. Energy projects, for example, will only be evaluated using the other five criteria.

7-6

It is important that assessment information is consistent to the extent possible across the various projects/programs/portfolios being assessed as part of the CAMP4W Climate Decision-Making Framework. The following sources of information should be used to support this Evaluative Criteria to ensure the assessment is comprehensive.

- Integrated Resources Plan Simulation Model (IRPSIM)
- Historical drought sequence data
- Qualitative description of reliability attributes and/or limitations

In addition to responding to each question, the user will select a value to assign to each question as well as an overall value for this Evaluative Criteria based on the key provided in **Section 2**.

Table 2. Kellability Attributes			
Question or Title of Data Entry	Guidance		
1. To what extent does it help meet regional supply reliability objectives under changing climate conditions?	If applicable, summarize how it performs using IRPSIM and historical drought sequencing data. Indicate how it performs under multiple scenarios, including Scenarios C and D; include A and B analysis if relevant. This should be described quantitatively based on the projected reduction in future water supply shortages.		
2. To what extent does it advance equitable supply reliability?	Indicate how it supports areas within the service area experiencing supply inequity, namely the State Water Project Dependent Areas. Utilize IRPSIM and historical drought sequencing to support the analysis and indicate how it performs under multiple scenarios, including Scenarios C and D; include A and B analysis if relevant.		
3. When will it be operational? What is the useful life of the project/program? How will benefits continue beyond the 2045 planning horizon under changing climate conditions?	Based on the most recent estimate at the time, indicate when it will be online and how that relates to the current planning horizon. Indicate how it will continue to perform beyond the current planning horizon (e.g., benefits beyond 2045).		
4. Are there additional projects/programs/portfolios that could be	Where companion projects or programs will improve its performance and benefits, list either		

#### Table 2. Reliability Attributes

added to improve this project/program/portfolio's effectiveness for water supply reliability?	specific projects, programs, or portfolios or categories of projects, programs, or portfolios that would be beneficial. Indicate if a companion project or program would be required or optional.
5. How does this project/program/portfolio improve the water supply reliability of existing projects/programs/systems?	Indicate how existing supply sources and facilities integrate with the project, program, or portfolio and how it will improve their utilization (e.g., perhaps a reservoir will utilize an existing pipeline that would otherwise be underutilized, or perhaps a new conveyance line would better distribute an existing supply).
Additional Information	Utilize this space to further expand on the analysis with any important considerations not covered above and to discuss how it advances the CAMP4W Time-Bound Targets, develops new or improves existing partnerships or collaborations, and builds on existing plans, policies, and initiatives at Metropolitan.
Overall Assessment	Provide a summary of the overall assessment for this Evaluative Criteria based on the previous questions. Explain if certain attributes were considered more significant than others in the recommended overall value determination.

#### **4.3 Resilience Attributes**

**Table 3** provides an overall summary of the project, program, or portfolio information and staffassessment results related to the Resilience Evaluative Criteria.

It is important that assessment information is consistent to the extent possible across the various projects/programs/portfolios being assessed as part of the CAMP4W Climate Decision-Making Framework. The following sources of information should be used to support this Evaluative Criteria to ensure the assessment is comprehensive.

- Consider link to existing planning processes including system reliability, vulnerability, and flexibility assessments
- Consider industry infrastructure standards for climate resilience and water quality
- Consider Federal and State drinking water standards and total dissolved solids reductions
- Qualitative description of resilience attributes and/or limitations

In addition to responding to each question, the user will select a value to assign to each question as well as an overall value for this Evaluative Criteria based on the key provided in **Section 2**.

#### Table 3. Resilience Attributes

Tuble 5: Resilience Attributes				
Question or Title of Data Entry	Guidance			
<ol> <li>How does it perform under identified climate vulnerabilities and hazards (e.g., extreme heat, wildfire, sea level rise, flooding)?</li> <li>*Drought is addressed in Reliability</li> </ol>	This question is focused on the individual project, program, or portfolio level. Discuss how the project, program, or portfolio itself can withstand climate impacts (e.g., how resilient it is in the face of climate extremes). Reference here any existing vulnerability assessment that may be relevant. This should focus on climate impacts beyond drought to understand how durable the project, program, or portfolio is and what threats it may face.			
<ul> <li>2. How does it maintain system reliability, including delivery and water quality, under identified climate vulnerabilities and hazards (e.g., extreme heat, wildfire, sea level rise, flooding)?</li> <li>*Drought is addressed in Reliability</li> </ul>	This question is focused on the system level. Discuss how the project, program, or portfolio will help Metropolitan's system as a whole to be more resilient to climate impacts beyond drought (e.g., how will it help Metropolitan face climate extremes).			
3. Describe any resilience co-benefits (e.g., seismic) achieved through this project, program, or portfolio.	Explain how it can also strengthen Metropolitan's system in the face of other risks such as seismic risks. Also indicate if the project, program, or portfolio is itself resilient to those risks.			
Additional Information	Utilize this space to further expand on the analysis with any important considerations not covered above and to discuss how it advances the CAMP4W Time-Bound Targets, develops new or improves existing partnerships or collaborations, and builds on existing plans, policies, and initiatives at Metropolitan.			
Overall Assessment	Provide a summary of the overall assessment for this Evaluative Criteria based on the previous questions. Explain if certain attributes were considered more significant than others in the recommended overall value determination.			

#### 4.4 Financial Sustainability and Affordability Attributes

**Table 4** provides an overall summary of the project, program, or portfolio information and staff assessment results related to the Financial Sustainability and Affordability Evaluative Criteria.

It is important that assessment information is consistent to the extent possible across the various projects/programs/portfolios being assessed as part of the CAMP4W Climate Decision-Making Framework. The following sources of information should be used to support this Evaluative Criteria to ensure the assessment is comprehensive.

- Project Costs (capital, O&M, life cycle, net present value)
- Qualitative description of potential funding opportunities and/or project partners

In addition to responding to each question, the user will select a value to assign to each question as well as an overall value for this Evaluative Criteria based on the key provided in **Section 2**.

Question or Title of Data Entry	Guidance
1. What is the cost impact?	Provide overall cost in current year dollars and anticipated financing plan, if applicable.
2. What are the projected impacts to rate and budget?	Provide the overall cost impact (%) and the average annual cost increase (% over X years).
3. If applicable, what is the unit cost/acre foot in current year dollars? For storage projects,	For supply projects, provide the cost/acre foot to bring water to Metropolitan's service area.
what is the cost/capacity?	Point-in-time unit cost: Assumes all debt issued in year one and full operation in year one.
	Lifecycle unit cost: Average unit cost over project life. Includes replacements and refurbishments costs.
	For storage projects, provide the cost/capacity. For other projects, programs, or portfolios, provide any relevant unit costs.
4. Does considering life cycle cost change the Financial Sustainability and Affordability?	Explain potential life cycle costs of the project, program, or portfolio and how its value changes over time and what impact that may have to rates or other metrics.
4. Is it eligible for federal and/or state grants or other funding sources? If so, what are the estimated target amount(s)? Is there a local match requirement? If so, how much?	Provide an explanation of any federal and/or state grants to Metropolitan including details about any matching requirements. Be clear about which are certain/expected, and which are potential/speculative.
5. Does it have a revenue generation component that helps offset costs?	Provide details of any opportunities for the project, program, or portfolio to have a revenue generation component. Be clear about which are certain/expected, and which are potential/speculative.

#### Table 4. Financial Sustainability and Affordability Attributes

Additional Information	Utilize this space to further expand on the analysis with any important considerations not covered above and to discuss how it advances the CAMP4W Time-Bound Targets, develops new or improves existing partnerships or collaborations, and builds on existing plans, policies, and initiatives at Metropolitan.
Overall Assessment	Provide a summary of the overall assessment for this Evaluative Criteria based on the previous questions. Explain if certain attributes were considered more significant than others in the recommended overall value determination.

#### 4.5 Adaptability and Flexibility Attributes

**Table 5** provides an overall summary of the project, program, or portfolio information and staff assessment results related to the Adaptability and Flexibility Evaluative Criteria.

It is important that assessment information is consistent to the extent possible across the various projects/programs/portfolios being assessed as part of the CAMP4W Climate Decision-Making Framework. The following sources of information should be used to support this Evaluative Criteria to ensure the assessment is comprehensive.

- Quantitative and qualitative description of potential added system operational flexibility (redundancy, water quality, etc.) and implementation complexity and risks (ROW, timing, partners, etc.)
- Quantitative and qualitative description of scalability (cost, benefits, impacts)
- Qualitative description of impact on day-to-day operations
- Ability to adapt to uncertainties and sustain a specified performance across changing conditions (e.g., demand, legislation, energy costs)

In addition to responding to each question, the user will select a value to assign to each question as well as an overall value for this Evaluative Criteria based on the key provided in **Section 2**.

#### Table 5. Adaptability and Flexibility Attributes

Question or Title of Data Entry	Guidance
1. Describe how it works with and/or improves the flexibility of existing assets, plans, policies or programs and how it improves the ability to adjust to systemwide changes (water quality, source water, distribution interruption).	Describe how it works with and/or improves the flexibility of existing assets, plans, policies or programs and how it improves the ability to adjust to systemwide changes (water quality, source water, distribution interruption). Include any areas where it reduces the flexibility of existing assets, plans, policies, or programs.

	This should be focused on operational considerations.
2. Explain how complex the day-to-day operations might be (example: staffing, maintenance, preparation).	Describe how it works and how it will be staffed by Metropolitan. Will there be a need for additional staff or training of existing staff? What is the long-term maintenance need of the project or program/?
3. How can it be phased (i.e., near-term value of an initial phase; using phasing to manage existing uncertainty; using phasing to allow for adjustments in the project/program/portfolio as new information is developed)?	Describe if it can be phased to either reduce the initial cost or to allow for flexibility in timing? Is there a benefit of implementing it all at once, or does approaching it in a modular way allow for future adjustments based on changing conditions and/or needs?
4. What is the implementation risk and/or complexity of implementation?	Describe any risks or challenges associated with implementing the project, program, or portfolio, specifically those that could prevent or significantly delay implementation. Are there permits required, if so, are they complicated or difficult to obtain? Are there risks/complications associated with construction? Are there risks if the project, program, or portfolio is delayed?
Additional Information	Utilize this space to further expand on the analysis with any important considerations not covered above and to discuss how it advances the CAMP4W Time-Bound Targets, develops new or improves existing partnerships or collaborations, and builds on existing plans, policies and initiatives at Metropolitan.
Overall Assessment	Provide a summary of the overall assessment for this Evaluative Criteria based on the previous questions. Explain if certain attributes were considered more significant than others in the recommended overall value determination.

#### 4.6 Equity Attributes

**Table 6** provides an overall summary of the project, program, or portfolio information and staff assessment results related to the Equity Evaluative Criteria.

It is important that assessment information is consistent to the extent possible across the various projects/programs/portfolios being assessed as part of the CAMP4W Climate Decision-Making Framework. The following sources of information should be used to support this Evaluative Criteria to ensure the assessment is comprehensive.

- The latest CalEnviroScreen scores and percentiles in project area
- Percent of project, program, or portfolio area considered a Disadvantaged Community (CA Water Code 79505.5)

- Qualitative description of level of community, tribal and partner engagement
- Qualitative description of direct community benefits associated with project/program
- Consider using tool to measure/monetize co-benefits, where appropriate
- Scope of Community Benefits Program proposed

In addition to responding to each question, the user will select a value to assign to each question as well as an overall value for this Evaluative Criteria based on the key provided in **Section 2**. Projects in underserved communities are not inherently positive or negative but depend on how they are executed. Moderate values indicate that the project, program, or portfolio does not exacerbate existing community inequities. Projects addressing the needs of underserved communities score higher under these metrics.

Question or Title of Data Entry	Guidance
1. What percentage of the area served by the project, program or portfolio includes underserved communities and what percentage of the project/program/portfolio area is in underserved communities?	This is a quantitative assessment. Provide specific CalEnviroScreen and Water Code §79505.5 references. Include information related to area served by the project, program, or portfolio. Assigned values for this attribute should be measured relative and proportional to the total percentage of underserved communities in Metropolitan's service area (~40% in 2024).
2. What specific community benefits are included in the project, program, or portfolio?	Explain the benefits of the project/program/portfolio as it relates to local communities that are impacted by it. Benefits may include workforce opportunities, water quality improvements, urban greening, localized resilience, public health, opportunities for small businesses/disadvantaged business enterprises (DBEs), etc. Provide details of the Community Benefits Program proposed, where applicable. Discuss benefits other than water supply; water supply benefits should be covered in the Reliability section. Also describe any anticipated disruption or harm to underserved communities.

#### **Table 6. Equity Attributes**

3. What level of community, tribal, and partner engagement is included in the project, program, or portfolio?	Explain the level of community, tribal, and partner engagement that is included in the project, program, or portfolio. Be clear about the difference between past or ongoing engagement and planned or intended engagement.
4. Describe the extent and reasons why there is broad community support/opposition or potential for support/opposition.	Provide additional information on the extent of support or opposition and any reasons why those factors exist, and if there are any ways to mitigate opposition and/or increase support.
Additional Information	Utilize this space to further expand on the analysis with any important considerations not covered above and to discuss how it advances the CAMP4W Time-Bound Targets, develops new or improves existing partnerships or collaborations, and builds on existing plans, policies, and initiatives at Metropolitan.
Overall Assessment	Provide a summary of the overall assessment for this Evaluative Criteria based on the previous questions. Explain if certain attributes were considered more significant than others in the recommended overall value determination.

#### 4.7 Environmental Co-Benefits Attributes

**Table 7** provides an overall summary of the project, program, or portfolio information and staff assessment results related to the Environmental Co-Benefits Evaluative Criteria.

It is important that assessment information is consistent to the extent possible across the various projects/programs/portfolios being assessed as part of the CAMP4W Climate Decision-Making Framework. The following sources of information should be used to support this Evaluative Criteria to ensure the assessment is comprehensive.

- GHG and pollutant load estimates
- Qualitative description of ecosystem services and functions provided
- Consider using tool to measure/monetize co-benefits, where appropriate
- Acreage of land impacted; Acre-feet of water provided to ecosystem benefits; or other such metrics

In addition to responding to each question, the user will select a value to assign to each question as well as an overall value for this Evaluative Criteria based on the key provided in Section 2.

#### **Table 7. Environmental Co-Benefits Attributes**

Question or Title of Data Entry <ol> <li>What are the estimated greenhouse gas emissions or enhanced carbon sequestration, and how does it impact the carbon budget, as defined by the Climate Action Plan?</li> </ol>	<b>Guidance</b> Provide quantitative information related to the estimated greenhouse gas emissions for the project, program, or portfolio. If applicable, compare to existing project/program/portfolio emissions and describe how it is or is not consistent with assumptions in the 2045 carbon budget. Include any proposed mitigation to reduce or offset estimated emissions, including the potential for carbon sequestration.	
2. In what way and to what degree does it provide additional ecosystem services?	Detail any way and to what degree it provides additional ecosystem services, such as benefits to watershed health, forest or natural land management, pollution reduction, or agricultural sustainability (species and habitat benefits are discussed in question #3 below). Where appropriate, describe how those improvements may support water supply, water quality or other functions important to the Metropolitan mission. Are there negative impacts that may be challenging to mitigate?	
3. To what extent does it protect, improve, or expand wildlife and fish habitat and/or affect flows in ways that improve ecological functions for native species?	Provide information related to potential benefits to species, habitat, or ecological functions. Does the project, program, or portfolio contain any elements that improve ecological functions for native species? Where appropriate, describe how those improvements may support water supply, water quality or other functions important to the Metropolitan mission. Are there negative impacts that may be challenging to mitigate?	
Additional Information	Utilize this space to further expand on the analysis with any important considerations not covered above and to discuss how it advances the CAMP4W Time-Bound Targets, develops new or improves existing partnerships or collaborations, and builds on existing plans, policies and initiatives at Metropolitan.	
Overall Assessment	Provide a summary of the overall assessment for this Evaluative Criteria based on the previous questions. Explain if certain attributes were considered more significant than others in the recommended overall value determination.	

#### Table 8. CAMP4W Glossary of Terms

Term	Definition
Adaptability and Flexibility	Considers how a project, program, or portfolio improves operational flexibility, the difficulty of implementation, and if a program is able to be phased. Flexibility addresses the capability of Metropolitan's system to respond to changes in water supply, water quality, treatment requirements, or demands during planned and unplanned facility outages.
Adaptive Management	A process that encourages the use of new information to respond to changing conditions. Allows Metropolitan to plan for rapid change and adjust based on current real-world conditions
Affordability	Relative cost burden and elastic ability to access (pay for) service and support member agency efforts to provide affordable supply to their customers
AFY	Acre-Feet per Year
CalEnviro Screen	CalEnviroScreen 4.0 is a methodology to identify communities disproportionately burdened by pollution provided by the California Office of Environmental Health Hazard Assessment (OEHHA)
CAMP4W	Climate Adaptation Master Plan for Water
CAP	Climate Action Plan
Capacity	Refers to the project/program/portfolio design parameters, which may include the acre-feet per year, cubic feet per second, megawatts, or other metric depending on the type of project.
CFS	Cubic Feet per Second
Climate Decision- Making Framework	The process by which Metropolitan assesses investment decisions through a methodical, data driven manner while accounting for climate risks and vulnerabilities, Board preferences and financial implications. Builds in the process for adaptively making decisions over time based on evolving conditions
Climate Vulnerability Assessments	Assessments developed to identify infrastructure that is most vulnerable to climate change
<b>Co-Benefits</b>	Benefits the extend beyond the primary purpose of the project/program/portfolio.
Community Benefits Program	Program to identify, fund, and implement local projects that can provide tangible, lasting, and valuable economic and social benefits to the residents, businesses, and organizations impacted by construction and operation of the project.

Companion Projects	Projects that support the project/program/portfolio being assessed, which without the companion project would not be able to function within Metropolitan's system due to connectivity, supply source, power supply, or other, but which have not been combined to form a portfolio for assessment purposes (for example, if a project has multiple potential companion projects to consider).
Core Supply	Supply that is generally available and used every year to meet demands under normal conditions and may include savings from efficiency gains through structural conservation.
CRA	Colorado River Aqueduct
Demand Management	Managing long-term demands through the efficient use of water
Disadvantaged Community	Defined in California in Water Code 79505.5 as a community with an annual mean household income (MHI) that is less than 80 percent of the statewide MHI, and a severely disadvantaged community is defined by an MHI below 60 percent of the statewide MHI.
Drought Mitigation Projects	Projects identified to improve Metropolitan's response to drought in response to the vulnerability experienced in the State Water Project Dependent Areas during the 2020-2022 drought.
Ecosystem Services	Direct and indirect benefits that ecosystems provide humans including, but limited to, drinking water, air quality, flood protection, food, recreation, tourism, and carbon sequestration.
Ecological Functions	Natural processes and interactions within an ecosystem, supporting life and maintaining environmental balance. This includes processes like nutrient cycling, pollination, and habitat formation, which are critical for sustaining biodiversity and ecosystem health.
Environmental Co- Benefits	Measures greenhouse gas emissions, ecosystem services, and benefits to habitat and wildlife
Equitable Supply Reliability	All member agencies receive equivalent water supply reliability through an interconnected and robust system of supplies, storage, and programs.
Equity	Fair, just, and inclusive
Evaluative Criteria	Metrics used to assess and rank projects/programs/portfolios; a defined set of criteria used to establish a value for projects, programs, and portfolios which support the Board's decision-making process. Evaluative Criteria are used in collaboration with the Time-Bound Targets and Signposts to support investment decisions.
Financial Plan	Metropolitan's current financial circumstances and its long-term and short-term goals

Flex Supply	A supply that is implemented on an as-needed basis and may or may not be available for use each year and may include savings from focused, deliberate efforts to change water use behavior.
Financial Sustainability	Revenues sufficient to cover expenses over the short- and long-term.
GHG	Greenhouse Gas Emissions
IRP	Integrated Water Resources Plan
IRPSIM	IRPSIM is a water supply and demand mass balance simulation model, which analyzes the supply-demand gaps.
Life cycle cost	Cost over the expected life of the project/program/portfolio inclusive of capital and operations and maintenance costs and escalation factors.
Local Agency Supply	Member Agency supplies
LRFP	Long-Range Financial Plan
Member Agency Projects	Projects led by Member Agencies that are brought to the Metropolitan Board for funding consideration
MW	Megawatt
O&M	Operation and Maintenance
Operational	Refers to the time period when the project/program/portfolio will be online and fully functioning as intended.
Phased	Refers to a project/program/portfolio's ability to be implemented in phases, which may indicate increased flexibility during the adaptive management process.
Planning Horizon	Refers to the year in which Metropolitan is currently planning towards (e.g., 2045 based on the 2020 IRP Needs Assessment).
Portfolio	A subset of projects/programs that would be implemented together.
Project Lists	A compilation of projects that will be analyzed through the CAMP4W process
R & R	Refurbishment and replacement. Refers to projects that are required to maintain Metropolitan's existing infrastructure but does not refer to additional capital projects needed to address a specific vulnerability (climate or earthquake) beyond typical system maintenance
Regional Water Use Efficiency	Refers to Metropolitan's efforts to assist Retail Agencies with achieving, or exceeding, compliance with the State Water Resources Control Board Water Use Efficiency Standards
Reliability	Ability to always meet water demands.

<b>Resilience projects</b>	Capital projects that increase resilience of existing infrastructure beyond what would be included in a typical R&R project
Resilience	Ability to withstand and recover from disruptions
Signposts	Real-world metrics that allow Metropolitan to monitor how projections align with the real world. Signposts will guide the revision of Time-Bound Targets over time, shaping project and program development and helping inform the Board's investment decisions at different project stages.
Source Information	Refers to the source of data or analysis process that should be used to support the assessment to provide a uniform evaluation process across projects and programs.
Storage	The capability to save water supply to meet demands at a later time. Converts core supply into flexible supply and evens out variability in supply and demand.
Surplus Water Management	Management of excess water available beyond current demands that is stored for future and anticipated periods of need.
SWP	State Water Project
SWPDA	State Water Project Dependent Area
System Assessment	Documentation of Metropolitan's current system and policies
TAF	Thousand-Acre-Feet
Task Force for CAMP4W	A group made up of a select list of Metropolitan Board Members, Member Agency Managers, and Metropolitan staff tasked with guiding the CAMP4W process
Themes	A series of Board identified priorities developed during the early phases to represent the values of the CAMP4W planning process. The Themes inform the development of the Evaluative Criteria so that the assessment of projects/programs/portfolios reflects these Themes and therefore the Board preferences.
Time-Bound Targets	A series of resource development targets and policy-based targets that establish goals to be achieved in the near-, mid-, and long-term. Time-Bound Targets are set based on current planning targets (current real-world conditions) and are updated based on Signposts.
Vulnerability Assessment Recommendations	Recommendations for infrastructure needed to harden the existing system in the face of climate change and other hazards the region face
Working Memoranda	Documentation of the CAMP4W process that will form the basis for the Master Plan.

Finance, Affordability, Asset Management and Efficiency Committee

Approve Climate Adaptation Master Plan Implementation Strategy

Item 7-6 April 8, 2025 Item 7-6 CAMP4W Implementation Strategy Subject Approve the Climate Adaptation Master Plan for Water Implementation Strategy to guide decision-making and the adaptive management process.

### Purpose

Seek Committee and Board approval of the Climate Adaptation Master Plan for Water Implementation Strategy to culminate this current planning phase and lay out implementation timelines for the next five years.

### Next Steps

The CAMP4W Implementation Strategy tools and policy guidance will be implemented with regular updates, reviews, and decision-making by the Board.

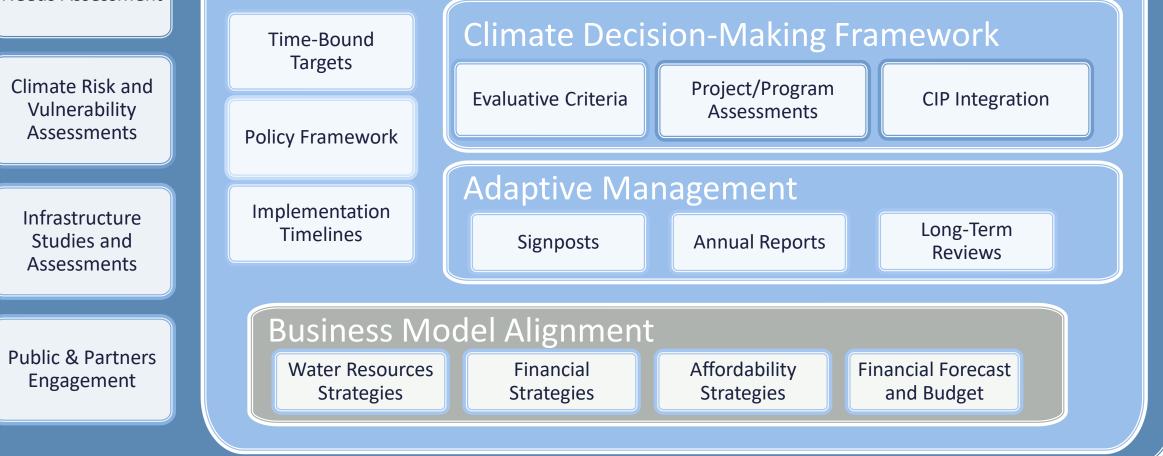

# CAMP4W Task Force Reviewed the Updated Implementation Strategy

- ✓ Five-Year Implementation Timelines
- ✓ Forward from the Chair providing context and past accomplishments
- New water quality section and updates throughout
- Elevated Water Efficiency Program to show CAMP4W assessment in timeline
- Discussed Adaptative Management Framework and Board decisionmaking moving forward

## Climate Adaptation Master Plan for Water

IRP Regional Needs Assessment

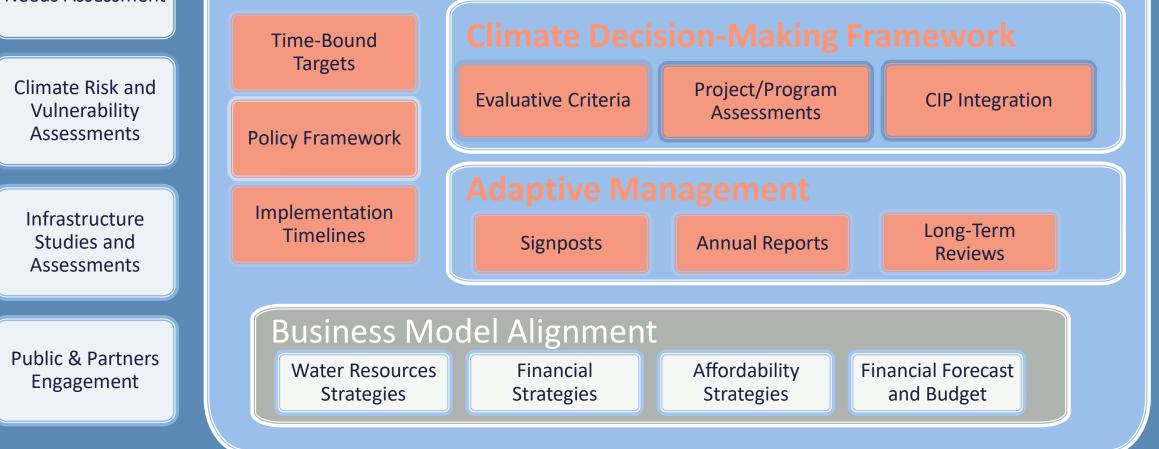

## **Implementation Strategy**

## Climate Adaptation Master Plan for Water

IRP Regional Needs Assessment

## **Implementation Strategy**

# CAMP4W Provides an Iterative and Adaptive Process

Finance, Affordability, Asset Management and Efficiency Committee

# Key Takeaways for CAMP4W Implementation Phase

- Scenario planning allows us to consider a variety of futures given the uncertainties of climate change
- Time-Bound Targets represent the range of possible futures and are used for planning purposes
- Adaptive management approach includes tracking signposts and current trends to inform Board decision-making
- Climate Decision-Making Framework provides a comprehensive and standardized approach to evaluating potential adaptation investments
- Climate Adaptation Policy Framework guides initiatives and the institutionalization of climate adaptation across Metropolitan

# Staff Recommendation

Option #1

# Approve Climate Adaptation Master Plan Implementation Strategy

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

## **Board** Action

#### • Board of Directors Finance, Affordability, Asset Management, and Efficiency Committee

#### 4/8/2025 Board Meeting

7-7

#### Subject

Adopt resolutions fixing and adopting a Readiness-to-Serve Charge and a Capacity Charge for calendar year 2026; the General Manager has determined the proposed action is exempt or otherwise not subject to CEQA

#### **Executive Summary**

This letter recommends adoption of the resolutions to fix and adopt a Readiness-to-Serve (RTS) Charge and a Capacity Charge effective January 1, 2026, based on the budget, rates and charges adopted by the Board on April 9, 2024.

#### Proposed Action(s)/Recommendation(s) and Options

#### Staff Recommendation: Option #1

#### **Option #1**

Adopt resolutions fixing and adopting a Readiness-to-Serve Charge and a Capacity Charge for calendar year (CY) 2026.

Fiscal Impact: Revenues from fixed charges of \$234.3 million in CY 2026

**Business Analysis:** Collection of fixed revenues of \$234.3 million from the RTS Charge and the Capacity Charge in CY 2026 would support fiscal integrity for Metropolitan, as all other revenue collected from member agencies is volumetric-based. Foregoing collection of the approximate \$234.3 million from the proposed charges would create a deficit in the budget.

#### **Option #2**

Do not adopt resolutions fixing and adopting a Readiness-to-Serve Charge and a Capacity Charge for CY 2026. Direct staff to set a process to revisit fiscal year (FY) 2025/26 of the biennial budget and the water rates for CY 2026 to address the resulting deficit, and report back on the proposed process to the Board at its regular May 2025 meeting.

Fiscal Impact: Net revenue deficit will depend on any revised budget and water charges.

**Business Analysis:** This option would result in the loss of fixed revenues which were reflected in the adopted budget for FY 2025/26 and the water rates for CY 2026. Loss of the budgeted fixed revenue would require staff to revisit the current budget and water rates to ensure such rates will result in revenue which will pay the expenses of Metropolitan.

#### **Alternatives Considered**

Not applicable

#### **Applicable Policy**

Metropolitan Water District Act Section 61: Ordinances, Resolutions and Orders

Metropolitan Water District Act Section 133: Fixing of Water Rates

Metropolitan Water District Act Section 134: Adequacy of Water Rates; Uniformity of Rates

Metropolitan Water District Act Section 134.5: Water Standby or Availability of Service Charge

Metropolitan Water District Administrative Code Section 4301(a): Cost of Service and Revenue Requirement

Metropolitan Water District Administrative Code Section 4304: Apportionment of Revenues and Setting of Water Rates

By Minute Item 53596, dated April 9, 2024, the Board approved the biennial budget for fiscal years 2024/25 and 2025/26.

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

#### Related Board Action(s)/Future Action(s)

Not applicable

#### **Summary of Outreach Completed**

Not applicable

#### California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

The proposed action is not defined as a project under CEQA because it involves the creation of government funding mechanisms or other government fiscal activities which do not involve any commitment to any specific project which may result in a potentially significant physical impact on the environment. (State CEQA Guidelines Section 15378(b)(4)).

#### **CEQA determination for Option #2:**

None required

#### **Details and Background**

#### Background

On April 9, 2024, Metropolitan's Board adopted its biennial budget for fiscal years 2024/25 and 2025/26, rates for calendar years (CYs) 2025 and 2026, and charges for CY 2025. However, since the RTS and Capacity Charge are applied to the member agencies based on historic data with a one-year lag, the charges can only be calculated one year ahead. In April 2024, the volumetric rates were approved for two years, but the RTS and Capacity Charge have only been approved for one year (CY 2025), effective on January 1, 2025.

In meetings and workshops held from February through April 2024, Metropolitan's Board, the Finance and Asset Management Committee of the Board, and Metropolitan's member agencies reviewed and evaluated the biennial budget and revenue requirements and the rates and charges necessary to support the revenue requirements. A public hearing was held on March 12, 2024. All documents provided to the Board in connection with its April 2024 Board action were posted online, along with other supporting and background material, at: <a href="https://www.mwdh2o.com/budget-finance/#proposed-section">https://www.mwdh2o.com/budget-finance/#proposed-section</a>. The documents remain available in support of the charges proposed in this letter.

The RTS Charge is set to recover capital costs of the portion of Metropolitan's system that is available to provide emergency storage and available capacity during outages and hydrologic variability. The Capacity Charge is set to recover peaking capacity costs on Metropolitan's distribution system. In adopting the biennial budget on April 9, 2024, the Board determined the amount of revenue to be raised by the RTS Charge and the Capacity Charge,

Page 3

collectively, would be \$224.4 million in CY 2025 and \$236.4 million in CY 2026. At that meeting, the Board approved the resolutions to adopt the RTS and Capacity Charges for CY 2025. Staff now proposes to the Board resolutions to adopt the RTS Charge (**Attachment 1**) and the Capacity Charge (**Attachment 2**) for CY 2026, at the amounts previously determined by the Board through its approval of the biennial budget, rates, and charges on April 9, 2024. The revenue to be collected from the Capacity Charges for CY 2026 is estimated to be approximately \$2.1 million lower than the budgeted estimate due to lower-than-projected peaks by member agencies during the applicable months. The proposed resolutions provide an estimate of each member agency's share of the RTS and Capacity Charge in 2026, and include an Engineer's Report that also supports the continuation of the Standby Charge that some agencies have elected to use to pay their RTS Charge obligations.

7-7

The continuation of the Standby Charge will be presented to the Board for consideration at its regular May meeting. The notice to member agencies of the proposed adoption of the RTS and Capacity Charges for 2026 and continuation of the Standby Charge for FY 2025/26 (Attachment 3) was provided to member agencies via email on March 17, 2025.

#### THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

#### RESOLUTION \_\_\_\_\_

#### RESOLUTION OF THE BOARD OF DIRECTORS OF THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA FIXING AND ADOPTING A READINESS-TO-SERVE CHARGE EFFECTIVE JANUARY 1, 2026

The Board of Directors of The Metropolitan Water District of Southern California (the "Board") hereby finds that:

1. Pursuant to Resolution 8774, the Board of The Metropolitan Water District of Southern California ("Metropolitan") approved a rate structure proposal at its meeting on October 16, 2001, described in Board Letter 9-6, including a Readiness-To-Serve ("RTS") Charge; and

2. Providing firm revenue sources is a goal of such rate structure; and

3. The amount of revenue to be raised by the RTS Charge shall be as determined by the Board and allocation of the RTS Charge among member public agencies ("member agencies") shall be in accordance with the method established by the Board; and

4. The RTS Charge is a charge fixed and adopted by Metropolitan and charged to its member agencies, and is not a fee or charge imposed upon real property or upon persons as an incident of property ownership; and

5. Metropolitan has legal authority to fix and adopt such RTS Charge as a water rate pursuant to Sections 133 and 134 of the Metropolitan Water District Act (the "Act"), and to fix it as an availability of service charge pursuant to Section 134.5 of the Act; and

6. Under authority of Sections 133 and 134 of the Act, the Board has the authority to fix the rate or rates for water as will result in revenue which, together with other revenues, will pay Metropolitan's operating expenditures and provide for payment of other costs, including payment of the interest and principal of Metropolitan's non-tax funded bonded debt; and

7. The RTS Charge recovers the capital expenditures for infrastructure projects needed to provide emergency storage capacity and available capacity needed to maintain reliable deliveries during outages and service interruptions and during periods of hydrologic variability; and

8. Pursuant to Resolution 8322, adopted by the Board on May 14, 1991, Resolution 8329, adopted by the Board on July 9, 1991, Resolution 9199, adopted by the Board on March 8, 2016, and Resolution 9201, adopted by the Board on March 8, 2016, and as each is thereafter amended and supplemented, proceeds of the RTS Charge and other revenues from the sale or availability of water are pledged to the payment of Metropolitan's revenue bonds, subordinate revenue bonds, short-term certificates and commercial paper; and

9. Under authority of Section 134.5 of the Act, an RTS Charge levied as an availability of service charge may be collected from the member agencies within Metropolitan, or may continue to be collected as a standby charge against individual parcels within Metropolitan's service area; and

7-7

10. Certain member agencies of Metropolitan have opted in prior fiscal years to provide collection of all or a portion of their RTS Charge obligation through a Metropolitan water standby charge ("Standby Charge") levied on parcels within those member agencies; and

11. Under authority of Section 134.5 of the Act, the Standby Charge may continue to be levied on each acre of land or each parcel of land less than an acre within Metropolitan to which water is made available for any purpose by Metropolitan, whether the water is actually used or not; and

12. Metropolitan is willing to comply with the requests of member agencies opting to have Metropolitan continue to levy the Standby Charge within their respective territories, on the terms and subject to the conditions contained herein; and

13. On April 9, 2024, the Board considered the rates and charges presented by the General Manager, approved the biennial budget for fiscal years 2024/25 and 2025/26, adopted recommended water rates for calendar years 2025 and 2026 and charges for calendar year 2025, and received information and documents that have been made available at <a href="https://www.mwdh2o.com/who-we-are/budget-finance/">https://www.mwdh2o.com/who-we-are/budget-finance/</a>; and

14. In approving the Proposed Biennial Budget and adopting the rates and charges on April 9, 2024, the Board determined the amount of revenue to be raised by the RTS Charge in calendar year 2026 to be \$188,000,000, based on information and documents available at <a href="https://www.mwdh2o.com/who-we-are/budget-finance/">https://www.mwdh2o.com/who-we-are/budget-finance/</a>; and

15. Written notice of intention of Metropolitan's Board to consider and take action at its regular meeting of April 8, 2025, to adopt Metropolitan's RTS Charge for calendar year 2026 was given to each of Metropolitan's member agencies; and

16. The RTS Charge for calendar year 2026 applicable to each member agency is reflected in the Engineer's Report dated April 2025 and its method of its calculation and the specific data used in its determination are as specified in the cost of service report; and

17. Each of the meetings of the Board were conducted in accordance with the Brown Act (commencing at Section 54950 of the Government Code), for which due notice was provided and at which quorums were present and acting throughout;

NOW, THEREFORE, the Board does hereby resolve, determine and order as follows:

**Section 1.** That the Board hereby fixes and adopts an RTS Charge for the period from January 1, 2026 through December 31, 2026.

**Section 2.** That said RTS Charge shall be in an amount sufficient to provide for payment of debt service not paid from *ad valorem* property taxes, and other appropriately allocated costs, for capital expenditures for infrastructure projects needed to provide emergency storage capacity and available capacity needed to maintain reliable deliveries during outages and service interruptions and during periods of hydrologic variability.

**Section 3.** That such RTS Charge for January 1, 2026 through and including December 31, 2026 shall be in the amounts specified in Section 4, which shall be determined on a historic basis for each acre-foot of water,

included in Metropolitan's average water deliveries to its member agencies for the applicable ten-year period identified in Section 4. The aggregate RTS Charge for the period from January 1, 2026 through and including December 31, 2026 shall also be as specified in Section 4.

**Section 4.** That the RTS Charge for January 1, 2026 through and including December 31, 2026 shall be allocated among the member agencies in proportion to the average of applicable deliveries (including exchanges and transfers) through Metropolitan's system (in acre-feet) to each member agency during the ten-year period ending June 30, 2024, unless otherwise agreed and approved by Metropolitan's Board. The allocation of the RTS Charge among member agencies is based on deliveries data recorded by Metropolitan and shall be conclusive in the absence of manifest error but may be corrected by Metropolitan to reflect any errors discovered by Metropolitan.

The amount of the RTS Charge to be charged to each member agency effective January 1, 2026, is as set forth in Schedule 1, which is based on deliveries data prepared by Metropolitan and may be corrected as agreed to by the impacted member agencies:

Schedule 1

Calendar Year 2026 RTS Charge					
Member Agency	Rolling Ten-Year Average Firm Deliveries (Acre-Feet) FY2014/15 - FY2023/24	RTS Share	12 months @ \$188 million per year (1/26-12/26)		
Anaheim	23,328.3	1.84%	\$ 3,457,223

West Basin MWD	108,841.6	8.58%	16,130,180		
Western MWD	66,759.6	5.26%	9,893,684		
MWD Total	1,268,567.4	100.00%	\$ 188,000,000		

Totals may not foot due to rounding

The General Manager shall establish and make available to member public agencies procedures for administration of the RTS Charge, including filing and consideration of applications for reconsideration of their respective RTS Charge. The General Manager shall review any applications for reconsideration submitted in a timely manner. The General Manager shall also establish reasonable procedures for the filing of appeals from his determination.

**Section 5.** That the RTS Charge specified in Schedule 1, together with other revenues from Metropolitan's water rates, other charges, ad valorem property taxes, and other miscellaneous revenue, does not exceed the reasonable and necessary cost of providing Metropolitan's water services for which the rates and

charges are made, or of conferring the benefit provided, and is fairly apportioned to each member agency as specified in Section 6 below.

7-7

Section 6. That water conveyed through Metropolitan's system for the purposes of water transfers, exchanges or other similar arrangements shall be included in the calculation of a member agency's rolling tenyear average firm demands used to allocate the RTS Charge.

**Section 7.** That the RTS Charge and the amount applicable to each member agency, the method of its calculation, and the specific data used in its determination are as specified in the adopted rates and charges to be effective January 1, 2026, which forms the basis of the RTS Charge, and the corresponding 2024 Cost of Service Report. The adopted rates and charges and cost of service reports are on file and available for review by interested parties at Metropolitan's headquarters.

**Section 8.** That except as provided in Section 10 below with respect to any RTS Charge collected by means of the Standby Charge, the RTS Charge shall be due monthly, quarterly or semiannually as agreed upon by Metropolitan and the member agency.

**Section 9.** That such RTS Charge may, at the request of any member agency which elected to utilize the Standby Charge as a mechanism for collecting the RTS Charge obligation in fiscal year 1993/94, be collected by continuing the Standby Charge at rates not to exceed rates levied in fiscal year 1996/97 upon land within Metropolitan's (and such member agency's) service area to which water is made available by Metropolitan for any purpose, whether such water is used or not.

**Section 10.** That the Standby Charge shall be collected on the tax rolls, together with the *ad valorem* property taxes which are levied by Metropolitan for the payment of pre-1978 voter-approved indebtedness. Any amounts so collected shall be applied as a credit against the applicable member agency's RTS Charge obligation. After such member agency's RTS Charge allocation is fully satisfied, any additional collections shall be credited to other outstanding obligations of such member agency to Metropolitan that funds the capital costs or maintenance and operation expenses for Metropolitan's water system, or future RTS Charge obligations of such agency. Notwithstanding the provisions of Sections 8 and 9 above, any member agency requesting to have all or a portion of its RTS Charge obligation collected through Standby Charge levies within its territory as provided herein shall pay any portion not collected through net Standby Charge collections to Metropolitan, as provided in Administrative Code Section 4507.

**Section 11.** That notice is hereby given to the public and to each member agency of The Metropolitan Water District of Southern California of the intention of Metropolitan's Board to consider and take action at its regular meeting to be held May 14, 2024 (or such other date as the Board shall hold its regular meeting in such month), on the General Manager's recommendation to continue the Standby Charge for fiscal year 2025/26 under authority of Section 134.5 of the Act on land within Metropolitan at rates not to exceed rates, per acre of land, or per parcel of land less than an acre, levied in fiscal year 1996/97 upon land within Metropolitan's (and such member agency's) service area. Such Standby Charge will be continued as a means of collecting the RTS Charge.

Section 12. That no failure to collect, and no delay in collecting, any Standby Charge shall excuse or delay payment of any portion of the RTS Charge when due.

**Section 13.** That the RTS Charge is fixed and adopted by Metropolitan as a rate or charge on its member agencies, and is not a fee or charge imposed upon real property or upon persons as incidents of property ownership, and the Standby Charge is collected within the respective territories of electing member agencies as a mechanism for payment of the RTS Charge. In the event that the Standby Charge, or any portion thereof, is determined to be an unauthorized or invalid fee, charge or assessment by a final judgment in any proceeding at

law or in equity, which judgment is not subject to appeal, or if the collection of the Standby Charge shall be permanently enjoined and appeals of such injunction have been declined or exhausted, or if Metropolitan shall determine to rescind or revoke the Standby Charge, then no further Standby Charge shall be collected within any member agency and each member agency which has requested continuation of the Standby Charge as a means of collecting its RTS Charge obligation shall pay such RTS Charge obligation in full, as if continuation of such Standby Charge had never been sought.

7-7

Section 14. That the General Manager and the General Counsel are hereby authorized to do all things necessary and desirable to accomplish the purposes of this Resolution, including, without limitation, the commencement or defense of litigation.

**Section 15.** That if any provision of this Resolution or the application to any member agency, property or person whatsoever is held invalid, that invalidity shall not affect other provisions or applications of this Resolution which can be given effect without the invalid portion or application, and to that end the provisions of this Resolution are severable.

**Section 16.** That the General Manager is hereby authorized and directed to take all necessary action to satisfy relevant statutes requiring notice by mailing or by publication.

**Section 17.** That the Board Executive Secretary is hereby directed to transmit a certified copy of this Resolution to the presiding officer of the governing body of each member agency.

I HEREBY CERTIFY that the foregoing is a full, true and correct copy of a Resolution adopted by the Board of Directors of The Metropolitan Water District of Southern California, at its meeting held on April 8, 2025.

Secretary of the Board of Directors of The Metropolitan Water District of Southern California

#### THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA ENGINEER'S REPORT

7-7

#### PROGRAM TO SET A READINESS-TO-SERVE CHARGE EFFECTIVE JANUARY 1, 2026,

#### INCLUDING LOCAL OPTION TO CONTINUE COLLECTING A STANDBY CHARGE, DURING FISCAL YEAR 2025/26

#### April 2025

#### BACKGROUND

The Metropolitan Water District of Southern California is a public agency with a primary purpose to provide wholesale water service for domestic and municipal uses to its 26 member public agencies. Approximately 19 million people reside within Metropolitan's service area, which covers approximately 5,200 square miles and includes portions of the six counties of Los Angeles, Orange, Riverside, San Bernardino, San Diego and Ventura. Metropolitan historically provided between 40 and 60 percent of the water used within its service area. To supply Southern California with reliable and safe water, Metropolitan imports water from the Colorado River and Northern California to supplement its member agencies' local supplies, and helps its member agencies develop increased water conservation, recycling, storage and other local resource programs.

#### **REPORT PURPOSES**

As part of its role as a regional imported water supplier, Metropolitan builds, maintains, and operates capital facilities and implements water management programs that ensure the delivery of reliable high-quality water supplies throughout its service area. The purpose of this report is to: (1) identify and describe those facilities and programs that will be financed in part by Metropolitan's Readiness-to-Serve (RTS) Charge, and (2) describe the method and basis for levying Metropolitan's Standby Charge for those agencies electing to continue to collect a portion of their RTS obligation through Metropolitan's Standby Charge in fiscal year 2025/26. Because the Standby Charge is levied and collected on a fiscal year basis the calculations in this report also are for the fiscal year, even though the RTS Charge is levied on a calendar year basis. The RTS Charge for calendar year 2025 was adopted by Metropolitan's Board on April 9, 2024 and the RTS Charge for 2026 will be considered by the Board on April 8, 2025. The Board will consider the continuation of the Standby Charge for fiscal year 2025/26 on May 13, 2025.

Metropolitan collects the RTS Charge from its member agencies to recover a portion of the capital costs including debt service on bonds issued to finance capital facilities needed to meet demands on Metropolitan's system for emergency storage and available capacity to meet outages and hydrologic variability. The Standby Charge is collected from parcels of land within Metropolitan's member agencies that have elected to collect all or a portion of their RTS obligation through the Standby Charge, as a method of recovering the costs of special benefits conferred on parcels within their service area. The RTS Charge will partially pay for the facilities and programs described in this report, namely, the amount attributable to the portions providing emergency storage and available capacity to meet outages and hydrologic variability. The Standby Charge, as a identified in this report.

The budgeted total RTS revenue for fiscal year 2025/26 is \$184.5 million, of which \$43.9 million is estimated to be collected via the Standby Charge based on fiscal year 2024/25 collections of the Charge as set forth in Table 5. The Standby Charge is collected on property tax bill.

#### METROPOLITAN'S RESPONSE TO FLUCTUATING WATER DEMANDS AND AVAILABILITY OF WATER SOURCES

Metropolitan's member agencies have widely differing imported water supply needs and the availability of imported water supply from various sources also varies widely. Some agencies have no local water resources and rely on Metropolitan for 100 percent of their annual water needs. Other agencies have adequate local surface supplies and storage and/or groundwater basins that provide them with the majority of their water supplies during wet and average years. However, during dry periods and/or based on a variety of other factors, these agencies rely on Metropolitan to make up any shortfalls in local water supplies. Similar coordination challenges arise in managing water available from Metropolitan's various water supply sources.

To respond to fluctuating demands for water, Metropolitan and its member agencies collectively examined the available local and imported resource options in order to develop a cost-effective plan that meets the reliability and quality needs of the region. The product of this intensive effort was an Integrated Resources Plan (IRP) for achieving a reliable and affordable water supply for Southern California. The major objective of the IRP was to develop a comprehensive water resources plan that ensures (1) reliability, (2) affordability, (3) water quality, (4) diversity of supply, and (5) adaptability for the region, while recognizing the environmental, institutional, and political constraints to resource development. As these constraints change over time, the IRP is periodically revisited and updated by Metropolitan and the member agencies to reflect current conditions. The most recent update was adopted in 2016. In 2022, Metropolitan's Board adopted the 2020 IRP Regional Needs Assessment that incorporated scenario planning to address wide-ranging uncertainties rather than focusing on a single set of assumptions as in the past. To meet the water supply needs of the region, Metropolitan continues to identify and develop additional water supplies to maintain the reliability of the imported water supply and delivery system to its member agencies.

#### CAPITAL FACILITIES - CONVEYANCE AND DISTRIBUTION

Metropolitan's water system has been built over time to meet the widely differing needs of its member agencies and the various sources of water available to Metropolitan. To meet those needs, Metropolitan's water delivery system is comprised of three basic conveyance and delivery components that form one integrated water system:

- State Water Project (SWP);
- Colorado River Aqueduct (CRA); and
- Distribution System

The system draws on diverse supply sources, transports water across a large part of the State and distributes water in six counties, where member agencies or their retail sub-agencies serve an estimated 19 million people. The CRA and the California Aqueduct of the SWP convey imported water into the Metropolitan service area. This water is then delivered to Metropolitan's member agencies via a regional network of canals, pipelines, and appurtenant facilities, which constitute the Distribution System. Supply, treatment, and storage facilities augment the Distribution System. The system is an interconnected regional conveyance and distribution system with the ability to deliver supplies from each of the SWP, the CRA, and its storage portfolio to most areas of its vast and diverse service area to almost every member agency. This flexibility derives from the capital facilities and provides local and system-wide benefits to all member agencies, as the facilities directly contribute to the reliable delivery of water supplies throughout Metropolitan's service area. The 2020 IRP Needs Assessment, however, identified reliability risks faced by member agencies that depend predominantly on SWP supplies served by Metropolitan. As the 2007 Integrated Area Study (IAS) emphasized, regional system flexibility is a key component of overall reliability.<sup>1</sup> Today, system flexibility continues to be essential to the availability of Metropolitan's services.<sup>2</sup> Metropolitan must maintain operational flexibility—the ability to respond to short-term changes in regional water supply, water quality, treatment requirements, and member agency demands. Metropolitan must maintain delivery flexibility—the ability to full water supply deliveries during planned and unplanned facility outages. Metropolitan is also required by state statute to serve as large an area as is determined to be reasonable and practical with SWP water; and where a blend of water sources is served, to have the objective to the extent determined to be reasonable and practical. (MWD Act, Sec. 136.)

Metropolitan's intent in the 2007 Integrated Area Study was to provide equitable reliability across its service area through a balanced combination of infrastructure, storage, demand management, and water supply programs. In the context of climate change, historical hydrology proved an inadequate guide to supplies available from the State Water Project and the Colorado River. From 2020 through 2022, imported supply losses outstripped the ability of Metropolitan's portfolio to compensate. Further, Metropolitan could not provide equitable service to all member agencies. As such, Metropolitan's board in August 2022 adopted a resolution that committed to three new policy statements:

- 1. All member agencies must receive equivalent water supply reliability through an interconnected and robust system of supplies, storage, and programs.
- 2. Metropolitan will reconfigure and expand its existing portfolio and infrastructure to provide sufficient access to the integrated system of water sources, conveyance and distribution, storage, and programs to achieve equivalent levels of reliability to all member agencies.
- 3. Metropolitan will eliminate disparate water supply reliability through a One Water integrated planning and implementation approach to manage finite water resources for long-term resilience and reliability, meeting both community and ecosystem needs

In 2023, a series of winter storms brought much needed precipitation in both the northern Sierra and the Upper Colorado River Basins, improving available supplies for Metropolitan. Water supply conditions greatly improved, but also presented challenges to store and distribute all available supplies.

Operational flexibility is being increased by creating an interconnected regional delivery network integrating the SWP and the CRA conveyance systems with the Distribution System. This integrated network will fully allow Metropolitan to incorporate supply from the SWP and the CRA with a diverse portfolio of geographically dispersed storage programs, including the Central Valley groundwater storage programs, carryover storage in San Luis Reservoir, flexible storage capacity in Castaic Lake and Lake Perris, Lake Mead storage, the Desert Water Agency/Coachella Valley Water District Advanced Delivery account, in-basin surface storage in Diamond Valley Lake and Lake Mathews, and in-basin groundwater Conjunctive Use Programs. This integrated, regional network also allows Metropolitan to move supplies throughout the system in response to service demands, supply availability and operational needs.

Metropolitan's integrated conveyance, distribution and storage assets contributes to regional system reliability, with a structural limitation that became starkly evident in the 2020-2022 drought. It is fair and reasonable for member agencies and all property owners within the service area to share the cost of developing and maintaining these assets and newly identified system flexibility projects because they all benefit from regional system flexibility and reliability.

#### Attachment 1, Page 10 of 77

#### State Water Project Description and Benefits

One of Metropolitan's two major sources of water is the SWP.<sup>3</sup> The SWP is the largest state-built, multipurpose, user-financed water project in the country. It was designed and built primarily to deliver water, but also provides flood control, generates power for pumping, is used for recreation, and enhances habitat for fish and wildlife.

7-7

The SWP consists of a complex system of dams, reservoirs, power plants, pumping plants, canals and aqueducts to deliver water. See Figure 1. SWP water consists of water from rainfall and snowmelt runoff that is captured and stored in SWP conservation facilities and then delivered through SWP transportation facilities to water agencies and districts located throughout the Upper Feather River, Bay Area, Central Valley, Central Coast, and Southern California. In addition to the delivery of SWP water, the SWP is also used to convey transfers of SWP water and non-SWP water. Metropolitan receives water from the SWP through the California Aqueduct, which is 444 miles long, and at four delivery points near the northern and eastern boundaries of Metropolitan's service area.

Figure 1. Facilities of the State Water Project

<sup>&</sup>lt;sup>3</sup> For historical and current information regarding the SWP, refer to Bulletin 132, published periodically by DWR since 1963. The most recently published Bulletin is Bulletin 132-21 dated July 2024 and titled "Management of the California State Water Project". Appendices to the Bulletin are also updated separately. Both are available at: https://water.ca.gov/Programs/State-Water-Project/Management/Bulletin-132.

The SWP is managed and operated by the Department of Water Resources (DWR). All water supply-related capital expenditures and operations, maintenance, power and replacement (OMP&R) costs associated with the SWP conservation and transportation facilities are paid for by 29 agencies and districts, known collectively as the State Water Contractors (Contractors). The Contractors are participants in the SWP through long-term contracts for the delivery of SWP water and use of the SWP transportation facilities.

7-7

In 1960, Metropolitan signed the first water supply contract (as amended, the State Water Contract) with DWR. The original term of the water supply contract was 75 years. In 2022, a contract extension was authorized which extended the original term by another 50 years to 2085. In addition to SWP water, Metropolitan also obtains water from water transfers, groundwater banking and exchange programs delivered through the California Aqueduct.

Since 1960, the SWP system has been extended, improved, and refurbished. All such costs are payable by the Contractors. California WaterFix was a comprehensive science-based solution proposed by the state to modernize critical water delivery infrastructure of the SWP. On October 10, 2017, Metropolitan's Board voted to support financing for the California WaterFix project. However, the state terminated the project in April 2019. Consistent with the Governor's Executive Order N-10-19, the state then announced a new single tunnel Delta conveyance project, which was notably included as part of the Governor's 2020 Water Resilience Portfolio. In 2019, DWR initiated planning and environmental review for a single tunnel Delta Conveyance Project (DCP) to protect the future reliability of access to SWP supplies. In December 2020, the Metropolitan Board authorized the General Manager to execute agreements for (a) funding a share of up to 60.2 percent for planning and pre-construction costs for the DCP, and (b) an amendment to the Joint Powers Agreement for the Delta Conveyance Design and Construction Joint Powers Authority. A Delta conveyance project will contribute to the improvement of capital facilities needed to meet demands on Metropolitan's system for emergency storage and available capacity to meet outages and hydrologic variability. Metropolitan's biennial budget for fiscal years 2024/25 and 2025/26 includes Metropolitan's planned contribution of \$11.6 million for DWR's planning costs of a new Delta conveyance project.

In December 2024, Metropolitan's Board authorized the General Manager to enter into an amended funding agreement for an amount not to exceed \$141.6 million for preconstruction work on the Delta conveyance project planned during 2026-2027. The projection includes approximately \$25.7 million in FY 2025/26 that were not included in the second year of the adopted 2024/25 and 2025/26 Budget, or the adopted calendar year 2026 rates. Metropolitan recently secured a commitment form DWR for a refund of \$75 million in past SWP payments that will cover the \$25.7 million anticipated to be spent in FY 2025/26.

All Metropolitan member agencies benefit from the SWP system and its supplies, which—when available—can be distributed to all member agencies. As described above, the 2020-2022 drought led Metropolitan's board to recommit itself to equitable water supply reliability and to direct staff to identify and pursue solutions to prevent a reoccurrence. Metropolitan's member agencies distribute that water to parcels as retail water providers or as wholesale water providers to retail agencies. In this way, the SWP water that Metropolitan delivers to its member agencies contributes to water available to existing and future end users throughout Metropolitan's service area. The cost of the net capital payments for the SWP less the portion covered by property taxes in fiscal year 2025/26 is \$0 million, as shown in Table 1. Real property throughout Metropolitan's service area benefits from the availability of the SWP facilities and its integration into Metropolitan's system and therefore all such costs may be attributed to such parcels. However, Metropolitan's Standby Charge collects only \$43.9 million of the total \$319.0 million system costs, representing 14% of the total system costs.

#### Colorado River Aqueduct Description and Benefits

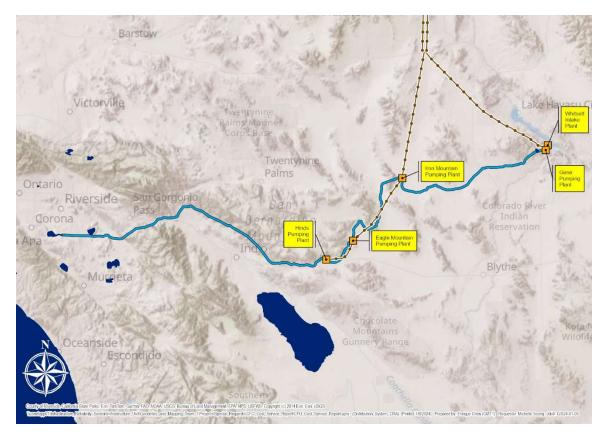

Metropolitan's other major source of water is the CRA. Metropolitan was established to obtain an allotment of Colorado River water, and its first mission was to construct and operate the CRA. The CRA consists of five pumping plants, 450 miles of high voltage power lines, one electric substation, four regulating reservoirs, and 242

miles of aqueducts, siphons, canals, conduits and pipelines terminating at Lake Mathews in Riverside County. See Figure 2. Metropolitan owns, operates, and manages the Colorado River Aqueduct. Metropolitan is responsible for operating, maintaining, rehabilitating, and repairing the CRA, and is responsible for obtaining and scheduling energy resources adequate to power pumps at the CRA's five pumping stations.

7-7

Metropolitan incurs capital and operations and maintenance expenditures to support the CRA activities. The direct costs of the CRA activities include labor, materials and supplies, as well as outside services to provide repair and maintenance, and professional services. The CRA activities benefit from Water System Operations support services and management supervision, as well as Administrative and General activities of Metropolitan. Metropolitan finances past, current, and future capital improvements on the CRA, and capitalizes those improvements as assets. The costs of Metropolitan's capital financing activities are apportioned to cost functions, such as the CRA Conveyance and Aqueduct function. The capital cost of the Colorado River Aqueduct and Inland Feeder in fiscal year 2025/26 is \$90.9 million, and is included in the Non-SWP Conveyance System line item in Table 1. Real property throughout Metropolitan's service area benefits from the availability of the CRA facilities and its integration into Metropolitan's system and therefore all such costs may be attributed to such parcels. However, Metropolitan's Standby Charge collects only \$43.9 million of the total \$319.0 million system costs, representing 14% of the total system costs.

#### Figure 2. Colorado River Aqueduct

#### Metropolitan's Conveyance and Distribution System Benefits

For purposes of this report, components of the conveyance system are considered to include only those major trunk facilities that transport water from primary supply sources to either regional storage facilities or feeder lines linked to the primary conveyance facilities. See Figure 3. For a list of Metropolitan's conveyance facilities within its service area, see Table 3. All other water transport facilities, including pipelines, feeders, laterals, canals and

aqueducts, are considered to be distribution facilities. Distribution facilities can be further identified in that they generally have at least one connection to a member agency's local distribution system. For a list of Metropolitan's distribution facilities, see Table 3.

7-7

All water transport facilities not specifically identified as part of the regional conveyance system are considered to be distribution facilities (Distribution System). While conveyance and aqueduct system components are regional in nature and generally do not link directly to local agency distribution systems, Distribution System facilities do ultimately connect to local agency systems. As a result, these facilities rely on conveyance and aqueduct facilities to import water from regional supply sources. The Distribution System is a complex network of facilities which routes water from the CRA and SWP to the member agencies. Beginning at the terminal delivery points of the CRA and SWP, Metropolitan's Distribution System includes approximately 775 miles of pipelines, feeders, and canals. Distribution System operations are coordinated from the Operations Control Center in Eagle Rock. The control center plans, schedules, and balances daily water operations in response to member agency demands and the operational limits of the system as a whole. Metropolitan's storage and treatment facilities augment the Distribution System. Metropolitan operates and maintains separate untreated and treated distribution facilities.

Metropolitan has an ongoing commitment, through physical system improvements and the maintenance and rehabilitation of existing facilities, to maintain the reliable delivery of water throughout the entire service area. System flexibility improvement projects include additional conveyance and distribution facilities to maintain the dependable delivery of water supplies, provide alternative system delivery capacity, and enhance system operations. Conveyance and distribution system improvement benefits also include projects to upgrade obsolete facilities or equipment, or to rehabilitate or replace facilities or equipment. These projects are needed to enhance system operations, comply with new regulations, and maintain a reliable distribution system. A list of

conveyance and distribution system facilities is provided in Table 3 along with the fiscal year 2025/26 estimated conveyance and distribution system benefits. The capital cost of the Distribution System in fiscal year 2025/26 is \$102.0 million, and is included in the Distribution System line item in Table 1. Real property throughout Metropolitan's service area benefits from the availability of the Distribution System and its integration into Metropolitan's system and therefore all such costs may be attributed to such parcels. However, Metropolitan's Standby Charge collects only \$43.9 million of the total \$319.0 million system costs, representing 14% of the total system costs.

7-7

#### **CAPITAL FACILITIES – WATER STORAGE**

#### System Storage Benefits

The Metropolitan system, for purposes of meeting demands during times of shortage, regulating system flows, and ensuring system reliability in the event of a system outage, provides over 1,000,000 acre-feet of system storage capacity. Diamond Valley Lake provides 810,000 acre-feet of that storage capacity, effectively doubling Southern California's previous surface water storage capacity. Other existing imported water storage available to the region consists of Metropolitan's raw water reservoirs, a share of the SWP's raw water reservoirs in and near the service area, and the portion of the groundwater basins used for conjunctive-use storage.

Water stored in system storage during above average supply conditions (surplus) provides a reserve against shortages when supply sources are limited or disrupted. Water storage also preserves Metropolitan's capability to deliver water during scheduled maintenance periods, when conveyance facilities must be removed from service for rehabilitation, repair, or maintenance. The benefits of these capital facilities are both local and system-wide, as the facilities directly contribute to the reliable delivery of water supplies throughout Metropolitan's service area. The capital costs of water storage in fiscal year 2025/26 is \$126.1 and, as shown in Table 1. Real property throughout Metropolitan's service area benefits from the availability of the storage capacity throughout the service area and its integration into Metropolitan's system and therefore all such costs may be attributed to such parcels. However, Metropolitan's Standby Charge collects only \$43.9 million of the total \$319.0 million system costs, representing 14% of the total system costs.

#### **METROPOLITAN'S REVENUE**

Metropolitan's major capital facilities are financed largely from the proceeds of revenue bond issues, which are repaid over future years. The principal source of revenue for repayment of these bonds is water sales to its member agencies, which is currently Metropolitan's largest source of revenue. In addition, *ad valorem* property taxes provide an additional limited revenue source, which is used to pay pre-1978 voter-approved indebtedness. However, the use of water rates as a primary source of revenue has placed an increasing burden on member agencies and their ratepayers, which would more equitably continue to be paid in part by assessments on land that in part derives its value from the availability of water through an integrated and reliable water system.

#### **Readiness-To-Serve**

In December 1993, Metropolitan's Board approved a revenue structure that included additional charges to establish a commitment to Metropolitan's capital improvement program and provide revenue stability. This revenue structure included the RTS Charge, which in 1995 certain member agencies opted to pay in part pursuant to the collection of a standby charge. In October 2001, the Board adopted the current unbundled rate structure, and maintained the RTS Charge.

As noted above, Metropolitan levies the RTS Charge on its member agencies to recover capital costs, including a portion of the debt service on bonds issued to finance capital facilities needed to meet existing demands on Metropolitan's system for emergency storage and available capacity.

The estimated fiscal year 2025/26 RTS Charge for each member agency is shown in Table 4.

#### **Standby Charge Option**

Metropolitan's Standby Charge is authorized by the State Legislature and has been levied by Metropolitan since fiscal year 1992/93. The Standby Charge recognizes that there are economic benefits to lands that have access to a water supply, whether or not such lands are using it, which excludes lands permanently committed to open space and maintained in their natural state that are not now and will not in the future be supplied water and lands that the General Manager, in his discretion, finds do not now and cannot reasonably be expected to derive a benefit from the projects to which the proceeds of the Standby Charge will be applied. Utilization of the Standby Charge transfers some of the burden of maintaining Metropolitan's capital infrastructure from water rates and *ad valorem* taxes to all the benefiting properties within the service area. A fraction of the value of this benefit and of the cost of providing it can be effectively recovered, in part, through the levying of a standby charge. The projects to be supported in part by the Standby Charge are capital projects that provide both local and Metropolitan-wide benefit to current landowners as well as existing water users.

Although a standby charge could have been set to recover all Conveyance, Distribution, and Storage costs as detailed in Table 1, Metropolitan's continued Standby Charge only collects about 14% of those costs. For fiscal year 2025/26, the amount to be recovered by the RTS Charge is estimated to be \$184.5 million and of that only \$43.9 million is estimated to be recovered by the Standby Charge.

The Standby Charge for each acre or parcel of less than an acre varies from member agency to member agency, as permitted under the legislation establishing Metropolitan's Standby Charge. The water Standby Charge for each member agency is continued at amounts not to exceed the rates in place since fiscal year 1996/97 and is shown in Table 5, which consists of composite rates by member agencies, not to exceed \$15.00. Originally, the composite rates consisted in part of a uniform component of \$5 applicable throughout Metropolitan, and in part of a variable component, not exceeding \$10 in any member public agency, reflecting the allocation of historical water deliveries by the member agencies as of fiscal year 1993/94 when the composite rates were initially established. Metropolitan will continue Standby Charges only within the service areas of the member agencies that have requested that the Standby Charge be utilized for purposes of meeting their outstanding RTS obligation. Although rates may not exceed the amounts in place in fiscal year 1996/97, some rates may be lower.

The Standby Charge is proposed to be collected from: (1) parcels on which water standby charges have been levied in fiscal year 1993/94 and annually thereafter and (2) parcels annexed to Metropolitan and to an electing member agency after January 1997. Table 6 lists parcels annexed, or to be annexed, to Metropolitan and to electing member agencies during fiscal year 2024/25, such parcels being subject to the Standby Charge upon annexation, which is used to estimate the Standby Charge collections for the following fiscal year. Fiscal Year 2025/26 Table 6 also shows parcels known by Metropolitan as annexed, or to be annexed, by the time collections are made for fiscal year 2025/26.

The estimated costs of Metropolitan's wholesale water system, which could be paid by a Standby Charge, are approximately \$319.0 million for fiscal year 2025/26, as shown in Table 1. An average total Standby Charge of about \$73.28 per acre of land or per parcel of land less than one acre would be necessary to pay for the total potential program benefits. Benefits in this amount will accrue to each acre of property and parcel within Metropolitan's service area, as Metropolitan delivers water to member agencies that contributes to water available to these properties, via that member agency or a retail sub-agency. Because Metropolitan's water deliveries to member agencies contributes to water available only to properties located within Metropolitan's service area boundaries (except for certain contractual deliveries as permitted under Section 131 of the Metropolitan Water District Act), any benefit received by the public at large or by properties outside of the area is merely incidental.

Table 5 shows that the distribution of Standby Charge revenues from the various member agency service areas would provide net revenue flow of approximately \$43.9 million for fiscal year 2025/26. Metropolitan will use other revenue sources, such as water sales revenues, RTS Charge revenues (except to the extent collected through standby charges, as described above), interest income, and revenue from sales of hydroelectric power, to pay for the remaining program costs. Additionally, the actual Standby Charge proposed to be continued ranges from \$0.10 to \$14.20 per acre of land or per parcel of land less than one acre. Thus, the benefits of Metropolitan's investments in water conveyance, storage, and distribution far exceed the recommended Standby Charge.

7-7

#### Equity

The RTS Charge is a firm revenue source. The revenues to be collected through this charge will not vary with sales in the current year. This charge is levied on Metropolitan's member agencies and is not a fee or charge upon real property or upon persons as an incident of property ownership. It ensures that agencies that only occasionally purchase water from Metropolitan but receive the reliability benefits of Metropolitan's system pay an equitable share of the costs to provide that reliability. Within member agencies that elect to pay the RTS Charge through Metropolitan's standby charges, the Standby Charge results in a lower RTS Charge than would otherwise be necessary due to the amount of revenue collected from lands which benefit from the availability of Metropolitan's water system. With the Standby Charge, these properties are now contributing a more appropriate share of the cost of importing water to Southern California.

Metropolitan's water system increases the availability and reliable delivery of water throughout Metropolitan's service area. A reliable system benefits existing end users and land uses through retail water service provided by Metropolitan member agencies or by water retailers that purchase water from a Metropolitan member agency, and through the replenishment of groundwater basins and reservoir storage as reserves against shortages due to droughts, natural emergencies, or scheduled facility shutdowns for maintenance. The benefits of reliable water resources from the SWP, CRA, Storage, and system improvements accrue to more than 250 cities and communities within Metropolitan's six-county service area. Metropolitan's regional water system is interconnected, so water supplies from the SWP and CRA can be used throughout most of the service area and therefore benefit water users and properties system-wide.

A major advantage of a firm revenue source, such as an RTS charge, is that it contributes to revenue stability during times of drought or low water sales. It affords Metropolitan additional security, when borrowing funds, that a portion of the revenue stream will be unaffected by drought or by rainfall. This security will help maintain Metropolitan's historically high credit rating, which results in lower interest expense to Metropolitan, and therefore, lower overall cost to its member agencies.

#### SUMMARY

The foregoing and the attached tables describe the current costs of Metropolitan's system and benefits provided by the projects listed as mainstays to the water system for Metropolitan's service area. Benefits are provided to member agencies, their retail sub-agencies, water users and property owners. The projects represented by this report provide both local benefits as well as benefits throughout the entire service area. It is recommended, for calendar year 2026, that the Metropolitan Board of Directors adopt the RTS Charge as set forth in Table 4 with an option for local agencies to request that a Standby Charge be collected for fiscal year 2025/26 from lands within Metropolitan's service area as a credit against such member agency's RTS Charge, up to the Standby Charge amounts collected by Metropolitan within the applicable member agency for fiscal year 1996/97. The maximum Standby Charge would not exceed \$15 per acre of land or per parcel of less than one acre. The costs of the system described in this Engineer's Report exceeds the recommended Standby Charge by at least \$275 million. A preliminary listing of all parcels subject to the proposed 2025/26 Standby Charge and the amounts proposed to be continued for each is available in the office of the Chief Financial Officer. A final listing is available upon receipt of final information from each county.

#### TABLE 1

#### ESTIMATED COSTS OF WATER SYSTEM INFRASTRUCTURE BENEFITING REAL PROPERTY WITHIN METROPOLITAN'S SERVICE AREA

	Estimated Program Costs for FY2025/26		Dollars Per Parce of 1 Acre or Less
Capital Payments for Water System Infrastructure			
Net Capital Payments to State Water Project (SWP) (less portion paid by property taxes)	\$	_	\$0.00
Non Tax Supported Capital Costs for Non-SWP Conveyance System <sup>1</sup>	\$	90,887,289	\$20.88
Non Tax Supported Capital Costs for Distribution System <sup>2</sup>	\$	101,998,076	\$23.43
Non Tax Supported Capital Costs for Water Storage <sup>3</sup>	\$	126,115,329	\$28.97
Total Capital Payments	\$	319,000,695	\$73.28
Estimated Standby Charge Revenues Percent Collected by Standby Charge	\$	43,887,274 14%	\$10.08
Total Remaining Costs Not Paid by Standby Charge	\$	275,113,421	\$63.20

#### Notes:

[1] Non-SWP Conveyance include the Colorado River Aqueduct and Inland Feeder.

[2] Distribution facilities include the pipelines, laterals, feeders and canals that distribute water throughout the service area.

[3] System storage includes Diamond Valley Lake, Lake Mathews, Lake Skinner and several other smaller surface reservoirs which provide storage for operational purposes.

Totals may not foot due to rounding

## THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

# RESOLUTION \_\_\_\_\_

## RESOLUTION OF THE BOARD OF DIRECTORS OF THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA FIXING AND ADOPTING A CAPACITY CHARGE EFFECTIVE JANUARY 1, 2026

The Board of Directors of The Metropolitan Water District of Southern California (the "Board") hereby finds that:

1. The Board of The Metropolitan Water District of Southern California ("Metropolitan"), pursuant to Sections 133, 134 and 134.5 of the Metropolitan Water District Act (the "Act"), is authorized to fix such rate or rates for water as will result in revenue which, together with revenue from any water standby or availability of service charge or assessment, will pay the operating expenses of Metropolitan, provide for repairs and maintenance, provide for payment of the purchase price or other charges for property or services or other rights acquired by Metropolitan, and provide for the payment of the interest and principal of its bonded debt; and

2. The amount of revenue to be raised by the Capacity Charge shall be as determined by the Board and allocation of such charges among member agencies shall be in accordance with the method established by the Board; and

3. The Capacity Charge is a charge fixed and adopted by Metropolitan and charged to its member agencies, and is not a fee or charge imposed upon real property or upon persons as an incident of property ownership; and

4. The Capacity Charge is intended to recover the debt service and other appropriately allocated costs to construct, operate and maintain projects needed to meet peak demands on Metropolitan's distribution system, as shown in the FYs 2024/25 and 2025/26 Cost of Service Report for Proposed Water Rates and Charges (the "2024 Cost of Service Report"); and

5. Pursuant to Resolution 8322, adopted by the Board on May 14, 1991, Resolution 8329, adopted by the Board on July 9, 1991, Resolution 9199, adopted by the Board on March 8, 2016, and Resolution 9201, adopted by the Board on March 8, 2016, and as each is thereafter amended and supplemented, proceeds of the Capacity Charge and other revenues from the sale or availability of water are pledged to the payment of Metropolitan's revenue bonds, subordinate revenue bonds and short-term certificates, and commercial paper; and

6. The Capacity Charge is charged (on a dollar per cubic-foot-per-second basis) to member public agencies ("member agencies"), based upon the amount of capacity used by such member agency that is designed to recover the cost of providing peaking capacity within the distribution system; and

7. On April 9, 2024, the Board considered the rates and charges presented by the General Manager and approved the biennial budget for fiscal years 2024/25 and 2025/26 and adopted recommended water rates for

calendar years 2025 and 2026 and charges for calendar year 2025, and received information and documents available at <a href="https://www.mwdh2o.com/who-we-are/budget-finance/">https://www.mwdh2o.com/who-we-are/budget-finance/</a>; and

8. In approving the biennial budget and adopting the rates and charges on April 9, 2024, the Board determined the amount of revenue to be raised by the Capacity Charge in calendar year 2026 to be based on a Capacity Charge in such year of \$14,500 per cubic-feet-per-second, based on information and documents available at <a href="https://www.mwdh2o.com/who-we-are/budget-finance/">https://www.mwdh2o.com/who-we-are/budget-finance/</a>; and

7-7

9. Each of the meetings of the Board were conducted in accordance with the Brown Act (commencing at Section 54950 of the Government Code), for which due notice was provided and at which quorums were present and acting throughout;

NOW, THEREFORE, the Board does hereby resolve, determine and order as follows:

**Section 1.** That the Board hereby fixes and adopts a Capacity Charge, as described below, to be effective January 1, 2026.

Section 2. That said Capacity Charge shall be in an amount sufficient to provide for payment of the capital financing costs not paid from *ad valorem* property taxes, as well as other appropriately allocated costs, incurred to provide peaking capacity within Metropolitan's distribution system.

**Section 3.** That such Capacity Charge effective January 1, 2026 shall be a charge as specified in Section 5 (set in dollars per cubic-feet-per-second of the peak day capacity) for capacity provided to a member agency, based on the maximum summer day demand placed on the system between May 1 and September 30 for the three-calendar year period ending December 31, 2004, and thereafter for a rolling three-calendar year period.

**Section 4.** The allocation of the Capacity Charge among member agencies is based on data recorded by Metropolitan and shall be conclusive in the absence of manifest error. Corrections may be made by staff for any incorrect recording or calculation, upon verification by the member agency.

**Section 5.** That the Capacity Charge shall be a fixed charge as shown in the following table and collected from each member agency monthly, quarterly or semiannually as agreed to by Metropolitan and the member agency.

# Table 1. Calendar Year 2026 Capacity Charge

**Section 6.** That the Capacity Charge for each member agency, the method of its calculation, cost allocations and other data used in its determination are as specified in the adopted rates and charges to be effective January 1, 2026, which forms the basis of the Capacity Charge, and the corresponding 2024 Cost of Service Report. The adopted rates and charges and cost of service reports are on file and available for review by interested parties at Metropolitan's headquarters.

7-7

**Section 7.** That the Capacity Charge specified in Section 5, together with other revenues from Metropolitan's water rates, other charges, ad valorem property taxes, and other miscellaneous revenue, does not exceed the reasonable and necessary cost of providing Metropolitan's water service for which the rates and charges are made, or conferring the benefit provided, and is fairly apportioned to each member agency in proportion to the peak day capacity utilized by each member agency.

**Section 8.** That if any provision of this Resolution or the application to any member agency, property or person whatsoever is held invalid, that invalidity shall not affect other provisions or applications of this Resolution which can be given effect without the invalid portion or application, and to that end the provisions of this Resolution are severable.

Section 9. That the General Manager and the General Counsel are hereby authorized to do all things necessary and desirable to accomplish the purposes of this Resolution, including, without limitation, the commencement or defense of litigation and taking all necessary action to satisfy relevant statutes requiring notice by publication.

**Section 10.** That the Board Executive Secretary is hereby directed to transmit a certified copy of this Resolution to the presiding officer of the governing body of each member agency.

I HEREBY CERTIFY that the foregoing is a full, true and correct copy of a Resolution adopted by the Board of Directors of The Metropolitan Water District of Southern California, at its meeting held on April 8, 2025.

Secretary of the Board of Directors of The Metropolitan Water District of Southern California

# NOTICE TO MEMBER AGENCIES OF PROPOSED ADOPTION OF READINESS-TO-SERVE CHARGE AND CAPACITY CHARGE FOR CALENDAR YEAR 2026 AND CONTINUATION OF STANDBY CHARGE FOR FISCAL YEAR 2025/26

The Board of the Metropolitan Water District of Southern California (Metropolitan) adopted a biennial budget for fiscal years 2024/25 and 2025/26 on April 9, 2024. On the same date, the Board also adopted rates for calendar years 2025 and 2026 and charges for calendar year 2025 to meet revenue requirements for fiscal years 2024/25 and 2025/26. The Board's determinations were based on the assumption of Readiness-To-Serve charge collections for calendar year 2026 of \$188 million and a Capacity Charge set at \$14,500 per cubic-foot-second. Accordingly, notice is hereby given to each member public agency of Metropolitan that at its regular meeting to be held April 15, 2025 (or such other date as the Board shall hold its regular meeting in such month), Metropolitan's Board of Directors will consider the adoption of the Readiness-To-Serve Charge and Capacity Charge for calendar year 2026.

The Board's determinations on April 9, 2024 were also based on the continuation of Metropolitan's water standby charge for fiscal year 2025/26. Accordingly, at its regular meeting to be held May 13, 2025, (or such other date as the Board shall hold its regular meeting in such month), the Board will consider the General Manager's recommendation to continue Metropolitan's water standby charge for fiscal year 2025/26 under authority of Section 134.5 of the Act on land within Metropolitan at rates not to exceed, per acre of land, or per parcel of land less than an acre, as presently in effect. Any such water standby charge will be continued for the purpose of applying the collected revenues to the corresponding agencies' Readiness-To-Serve charge obligation.

Board letters with information about the proposed charges will be provided to the Board prior to the board meetings.

Dated: March 17, 2025

Katano Kermin'

Katano Kasaine Assistant General Manager/ Chief Financial Officer

 Approve the Resolutions fixing and adopting the RTS charge and Capacity charge for CY 2026 at levels previously determined by the Board

# Background April 9, 2024:

- Board adopted charges for Calendar Year (CY) 2025
  - Readiness-to-Serve (RTS) charge set at \$181M
  - Capacity charge set at \$13,000 per cubic foot per second (CFS)
- Board approved biennial budget for Fiscal Years (FYs) 2024/25 and 2025/26, with revenue assumptions from charges for CY 2026, as follows:
  - RTS charge set at \$188M
  - Capacity charge set at \$14,500 per CFS
- FYs 2024/25 & 2025/26 Cost of Service Report Published April 2024 to support 2025 & 2026 RTS & Capacity Charge

# Fixed Charges Determinations

- RTS charge recovers capital costs of the portion of Metropolitan's system available for emergency service and available capacity during outages and hydrologic variability
  - RTS charge for CY 2026 allocated to member agencies based on their tenyear rolling average firm demands for Fiscal Year (FY) 2014/15 to FY 2023/24
- Capacity charge recovers capital costs of the portion of Metropolitan's system for peaking capacity
  - Capacity charge for CY 2026 charged on the member agencies' peak day demand between May and September for 2022 to 2024

# Requested Action

 Approve the Resolutions fixing and adopting the RTS charge and Capacity charge for CY 2026 at levels previously determined by the Board

# **Board Options**

- Option # 1
  - Adopt CEQA determination
  - Approve resolutions fixing and adopting the RTS charge and Capacity charge, effective January 1, 2026

- Option # 2
  - Direct staff to revisit FY 2025/26 of the biennial budget and water rates and charges for CY 2026

# Staff Recommendation

- Option # 1
  - Adopt CEQA determination
  - Approve resolutions fixing and adopting the RTS charge and Capacity charge, effective January 1, 2026

## THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

## **RESOLUTION 9372**

## RESOLUTION OF THE BOARD OF DIRECTORS OF THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA FIXING AND ADOPTING A READINESS-TO-SERVE CHARGE EFFECTIVE JANUARY 1, 2026

The Board of Directors of The Metropolitan Water District of Southern California (the "Board") hereby finds that:

1. Pursuant to Resolution 8774, the Board of The Metropolitan Water District of Southern California ("Metropolitan") approved a rate structure proposal at its meeting on October 16, 2001, described in Board Letter 9-6, including a Readiness-To-Serve ("RTS") Charge; and

2. Providing firm revenue sources is a goal of such rate structure; and

3. The amount of revenue to be raised by the RTS Charge shall be as determined by the Board and allocation of the RTS Charge among member public agencies ("member agencies") shall be in accordance with the method established by the Board; and

4. The RTS Charge is a charge fixed and adopted by Metropolitan and charged to its member agencies, and is not a fee or charge imposed upon real property or upon persons as an incident of property ownership; and

5. Metropolitan has legal authority to fix and adopt such RTS Charge as a water rate pursuant to Sections 133 and 134 of the Metropolitan Water District Act (the "Act"), and to fix it as an availability of service charge pursuant to Section 134.5 of the Act; and

6. Under authority of Sections 133 and 134 of the Act, the Board has the authority to fix the rate or rates for water as will result in revenue which, together with other revenues, will pay Metropolitan's operating expenditures and provide for payment of other costs, including payment of the interest and principal of Metropolitan's non-tax funded bonded debt; and

7. The RTS Charge recovers the capital expenditures for infrastructure projects needed to provide emergency storage capacity and available capacity needed to maintain reliable deliveries during outages and service interruptions and during periods of hydrologic variability; and

8. Pursuant to Resolution 8322, adopted by the Board on May 14, 1991, Resolution 8329, adopted by the Board on July 9, 1991, Resolution 9199, adopted by the Board on March 8, 2016, and Resolution 9201, adopted by the Board on March 8, 2016, and as each is thereafter amended and supplemented, proceeds of the RTS Charge and other revenues from the sale or availability of water are pledged to the payment of Metropolitan's revenue bonds, subordinate revenue bonds, short-term certificates and commercial paper; and

9. Under authority of Section 134.5 of the Act, an RTS Charge levied as an availability of service charge may be collected from the member agencies within Metropolitan, or may continue to be collected as a standby charge against individual parcels within Metropolitan's service area; and

10. Certain member agencies of Metropolitan have opted in prior fiscal years to provide collection of all or a portion of their RTS Charge obligation through a Metropolitan water standby charge ("Standby Charge") levied on parcels within those member agencies; and

11. Under authority of Section 134.5 of the Act, the Standby Charge may continue to be levied on each acre of land or each parcel of land less than an acre within Metropolitan to which water is made available for any purpose by Metropolitan, whether the water is actually used or not; and

12. Metropolitan is willing to comply with the requests of member agencies opting to have Metropolitan continue to levy the Standby Charge within their respective territories, on the terms and subject to the conditions contained herein; and

13. On April 9, 2024, the Board considered the rates and charges presented by the General Manager, approved the biennial budget for fiscal years 2024/25 and 2025/26, adopted recommended water rates for calendar years 2025 and 2026 and charges for calendar year 2025, and received information and documents that have been made available at <a href="https://www.mwdh2o.com/who-we-are/budget-finance/">https://www.mwdh2o.com/who-we-are/budget-finance/</a>; and

14. In approving the Proposed Biennial Budget and adopting the rates and charges on April 9, 2024, the Board determined the amount of revenue to be raised by the RTS Charge in calendar year 2026 to be \$188,000,000, based on information and documents available at <a href="https://www.mwdh2o.com/who-we-are/budget-finance/">https://www.mwdh2o.com/who-we-are/budget-finance/</a>; and

15. Written notice of intention of Metropolitan's Board to consider and take action at its regular meeting of April 8, 2025, to adopt Metropolitan's RTS Charge for calendar year 2026 was given to each of Metropolitan's member agencies; and

16. The RTS Charge for calendar year 2026 applicable to each member agency is reflected in the Engineer's Report dated April 2025 and its method of its calculation and the specific data used in its determination are as specified in the cost of service report; and

17. Each of the meetings of the Board were conducted in accordance with the Brown Act (commencing at Section 54950 of the Government Code), for which due notice was provided and at which quorums were present and acting throughout;

NOW, THEREFORE, the Board does hereby resolve, determine and order as follows:

Section 1. That the Board hereby fixes and adopts an RTS Charge for the period from January 1, 2026 through December 31, 2026.

**Section 2.** That said RTS Charge shall be in an amount sufficient to provide for payment of debt service not paid from *ad valorem* property taxes, and other appropriately allocated costs, for capital expenditures for infrastructure projects needed to provide emergency storage capacity and available capacity needed to maintain reliable deliveries during outages and service interruptions and during periods of hydrologic variability.

**Section 3.** That such RTS Charge for January 1, 2026 through and including December 31, 2026 shall be in the amounts specified in Section 4, which shall be determined on a historic basis for each acre-foot of water,

included in Metropolitan's average water deliveries to its member agencies for the applicable ten-year period identified in Section 4. The aggregate RTS Charge for the period from January 1, 2026 through and including December 31, 2026 shall also be as specified in Section 4.

**Section 4.** That the RTS Charge for January 1, 2026 through and including December 31, 2026 shall be allocated among the member agencies in proportion to the average of applicable deliveries (including exchanges and transfers) through Metropolitan's system (in acre-feet) to each member agency during the ten-year period ending June 30, 2024, unless otherwise agreed and approved by Metropolitan's Board. The allocation of the RTS Charge among member agencies is based on deliveries data recorded by Metropolitan and shall be conclusive in the absence of manifest error but may be corrected by Metropolitan to reflect any errors discovered by Metropolitan.

The amount of the RTS Charge to be charged to each member agency effective January 1, 2026, is as set forth in Schedule 1, which is based on deliveries data prepared by Metropolitan and may be corrected as agreed to by the impacted member agencies:

## Schedule 1

Calendar Y	ear 2026 RTS Ch	arge	
Member Agency	Rolling Ten-Year Average Firm Deliveries (Acre-Feet) FY2014/15 - FY2023/24	RTS Share	12 months @ \$188 million per year (1/26-12/26)
Anaheim	23,328.3	1.84%	\$ 3,457,223
Beverly Hills	9,458.6	0.75%	1,401,752
Burbank	10,532.3	0.83%	1,560,873
Calleguas MWD	85,497.7	6.74%	12,670,645
Central Basin MWD	30,647.0	2.42%	4,541,845
Compton	8.3	0.00%	1,230
Eastern MWD	96,954.0	7.64%	14,368,454
Foothill MWD	8,062.2	0.64%	1,194,807
Fullerton	6,128.6	0.48%	908,250
Glendale	14,676.3	1.16%	2,175,008
Inland Empire Utilities Agency	54,727.4	4.31%	8,110,528
Las Virgenes MWD	18,431.7	1.45%	2,731,553
Long Beach	26,463.1	2.09%	3,921,796
Los Angeles	242,114.6	19.09%	35,881,061
Municipal Water District of Orange County	172,537.1	13.60%	25,569,769
Pasadena	18,267.3	1.44%	2,707,190
San Diego County Water Authority	145,667.0	11.48%	21,587,655
San Fernando	470.7	0.04%	69,757
San Marino	990.4	0.08%	146,776
Santa Ana	7,865.5	0.62%	1,165,657
Santa Monica	5,039.7	0.40%	746,877
Three Valleys MWD	60,225.0	4.75%	8,925,265
Torrance	14,683.8	1.16%	2,176,120
Upper San Gabriel Valley MWD	40,189.6	3.17%	5,956,045
West Basin MWD	108,841.6	8.58%	16,130,180
Western MWD	66,759.6	5.26%	9,893,684
MWD Total	1,268,567.4	100.00%	\$ 188,000,000

Totals may not foot due to rounding

The General Manager shall establish and make available to member public agencies procedures for administration of the RTS Charge, including filing and consideration of applications for reconsideration of their respective RTS Charge. The General Manager shall review any applications for reconsideration submitted in a timely manner. The General Manager shall also establish reasonable procedures for the filing of appeals from his determination.

**Section 5.** That the RTS Charge specified in Schedule 1, together with other revenues from Metropolitan's water rates, other charges, ad valorem property taxes, and other miscellaneous revenue, does not exceed the reasonable and necessary cost of providing Metropolitan's water services for which the rates and

charges are made, or of conferring the benefit provided, and is fairly apportioned to each member agency as specified in Section 6 below.

Section 6. That water conveyed through Metropolitan's system for the purposes of water transfers, exchanges or other similar arrangements shall be included in the calculation of a member agency's rolling tenyear average firm demands used to allocate the RTS Charge.

**Section 7.** That the RTS Charge and the amount applicable to each member agency, the method of its calculation, and the specific data used in its determination are as specified in the adopted rates and charges to be effective January 1, 2026, which forms the basis of the RTS Charge, and the corresponding 2024 Cost of Service Report. The adopted rates and charges and cost of service reports are on file and available for review by interested parties at Metropolitan's headquarters.

**Section 8.** That except as provided in Section 10 below with respect to any RTS Charge collected by means of the Standby Charge, the RTS Charge shall be due monthly, quarterly or semiannually as agreed upon by Metropolitan and the member agency.

**Section 9.** That such RTS Charge may, at the request of any member agency which elected to utilize the Standby Charge as a mechanism for collecting the RTS Charge obligation in fiscal year 1993/94, be collected by continuing the Standby Charge at rates not to exceed rates levied in fiscal year 1996/97 upon land within Metropolitan's (and such member agency's) service area to which water is made available by Metropolitan for any purpose, whether such water is used or not.

**Section 10.** That the Standby Charge shall be collected on the tax rolls, together with the *ad valorem* property taxes which are levied by Metropolitan for the payment of pre-1978 voter-approved indebtedness. Any amounts so collected shall be applied as a credit against the applicable member agency's RTS Charge obligation. After such member agency's RTS Charge allocation is fully satisfied, any additional collections shall be credited to other outstanding obligations of such member agency to Metropolitan that funds the capital costs or maintenance and operation expenses for Metropolitan's water system, or future RTS Charge obligations of such agency. Notwithstanding the provisions of Sections 8 and 9 above, any member agency requesting to have all or a portion of its RTS Charge obligation collected through Standby Charge levies within its territory as provided herein shall pay any portion not collected through net Standby Charge collections to Metropolitan, as provided in Administrative Code Section 4507.

**Section 11.** That notice is hereby given to the public and to each member agency of The Metropolitan Water District of Southern California of the intention of Metropolitan's Board to consider and take action at its regular meeting to be held May 14, 2024 (or such other date as the Board shall hold its regular meeting in such month), on the General Manager's recommendation to continue the Standby Charge for fiscal year 2025/26 under authority of Section 134.5 of the Act on land within Metropolitan at rates not to exceed rates, per acre of land, or per parcel of land less than an acre, levied in fiscal year 1996/97 upon land within Metropolitan's (and such member agency's) service area. Such Standby Charge will be continued as a means of collecting the RTS Charge.

Section 12. That no failure to collect, and no delay in collecting, any Standby Charge shall excuse or delay payment of any portion of the RTS Charge when due.

**Section 13.** That the RTS Charge is fixed and adopted by Metropolitan as a rate or charge on its member agencies, and is not a fee or charge imposed upon real property or upon persons as incidents of property ownership, and the Standby Charge is collected within the respective territories of electing member agencies as a mechanism for payment of the RTS Charge. In the event that the Standby Charge, or any portion thereof, is determined to be an unauthorized or invalid fee, charge or assessment by a final judgment in any proceeding at

law or in equity, which judgment is not subject to appeal, or if the collection of the Standby Charge shall be permanently enjoined and appeals of such injunction have been declined or exhausted, or if Metropolitan shall determine to rescind or revoke the Standby Charge, then no further Standby Charge shall be collected within any member agency and each member agency which has requested continuation of the Standby Charge as a means of collecting its RTS Charge obligation shall pay such RTS Charge obligation in full, as if continuation of such Standby Charge had never been sought.

Section 14. That the General Manager and the General Counsel are hereby authorized to do all things necessary and desirable to accomplish the purposes of this Resolution, including, without limitation, the commencement or defense of litigation.

**Section 15.** That if any provision of this Resolution or the application to any member agency, property or person whatsoever is held invalid, that invalidity shall not affect other provisions or applications of this Resolution which can be given effect without the invalid portion or application, and to that end the provisions of this Resolution are severable.

**Section 16.** That the General Manager is hereby authorized and directed to take all necessary action to satisfy relevant statutes requiring notice by mailing or by publication.

**Section 17.** That the Board Executive Secretary is hereby directed to transmit a certified copy of this Resolution to the presiding officer of the governing body of each member agency.

I HEREBY CERTIFY that the foregoing is a full, true and correct copy of a Resolution adopted by the Board of Directors of The Metropolitan Water District of Southern California, at its meeting held on April 8, 2025.

Jois Forg - Sal-

Secretary of the Board of Directors of The Metropolitan Water District of Southern California

# THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA ENGINEER'S REPORT

## PROGRAM TO SET A READINESS-TO-SERVE CHARGE EFFECTIVE JANUARY 1, 2026,

## INCLUDING LOCAL OPTION TO CONTINUE COLLECTING A STANDBY CHARGE, DURING FISCAL YEAR 2025/26

## April 2025

### BACKGROUND

The Metropolitan Water District of Southern California is a public agency with a primary purpose to provide wholesale water service for domestic and municipal uses to its 26 member public agencies. Approximately 19 million people reside within Metropolitan's service area, which covers approximately 5,200 square miles and includes portions of the six counties of Los Angeles, Orange, Riverside, San Bernardino, San Diego and Ventura. Metropolitan historically provided between 40 and 60 percent of the water used within its service area. To supply Southern California with reliable and safe water, Metropolitan imports water from the Colorado River and Northern California to supplement its member agencies' local supplies, and helps its member agencies develop increased water conservation, recycling, storage and other local resource programs.

## **REPORT PURPOSES**

As part of its role as a regional imported water supplier, Metropolitan builds, maintains, and operates capital facilities and implements water management programs that ensure the delivery of reliable high-quality water supplies throughout its service area. The purpose of this report is to: (1) identify and describe those facilities and programs that will be financed in part by Metropolitan's Readiness-to-Serve (RTS) Charge, and (2) describe the method and basis for levying Metropolitan's Standby Charge for those agencies electing to continue to collect a portion of their RTS obligation through Metropolitan's Standby Charge in fiscal year 2025/26. Because the Standby Charge is levied and collected on a fiscal year basis the calculations in this report also are for the fiscal year, even though the RTS Charge is levied on a calendar year basis. The RTS Charge for calendar year 2025 was adopted by Metropolitan's Board on April 9, 2024 and the RTS Charge for 2026 will be considered by the Board on April 8, 2025. The Board will consider the continuation of the Standby Charge for fiscal year 2025/26 on May 13, 2025.

Metropolitan collects the RTS Charge from its member agencies to recover a portion of the capital costs including debt service on bonds issued to finance capital facilities needed to meet demands on Metropolitan's system for emergency storage and available capacity to meet outages and hydrologic variability. The Standby Charge is collected from parcels of land within Metropolitan's member agencies that have elected to collect all or a portion of their RTS obligation through the Standby Charge, as a method of recovering the costs of special benefits conferred on parcels within their service area. The RTS Charge will partially pay for the facilities and programs described in this report, namely, the amount attributable to the portions providing emergency storage and available capacity to meet outages and hydrologic variability. The Standby Charge, when collected, will be utilized solely for capital payments and debt service on the capital facilities funded by the RTS Charge, as identified in this report.

The budgeted total RTS revenue for fiscal year 2025/26 is \$184.5 million, of which \$43.9 million is estimated to be collected via the Standby Charge based on fiscal year 2024/25 collections of the Charge as set forth in Table 5. The Standby Charge is collected on property tax bill.

## METROPOLITAN'S RESPONSE TO FLUCTUATING WATER DEMANDS AND AVAILABILITY OF WATER SOURCES

Metropolitan's member agencies have widely differing imported water supply needs and the availability of imported water supply from various sources also varies widely. Some agencies have no local water resources and rely on Metropolitan for 100 percent of their annual water needs. Other agencies have adequate local surface supplies and storage and/or groundwater basins that provide them with the majority of their water supplies during wet and average years. However, during dry periods and/or based on a variety of other factors, these agencies rely on Metropolitan to make up any shortfalls in local water supplies. Similar coordination challenges arise in managing water available from Metropolitan's various water supply sources.

To respond to fluctuating demands for water, Metropolitan and its member agencies collectively examined the available local and imported resource options in order to develop a cost-effective plan that meets the reliability and quality needs of the region. The product of this intensive effort was an Integrated Resources Plan (IRP) for achieving a reliable and affordable water supply for Southern California. The major objective of the IRP was to develop a comprehensive water resources plan that ensures (1) reliability, (2) affordability, (3) water quality, (4) diversity of supply, and (5) adaptability for the region, while recognizing the environmental, institutional, and political constraints to resource development. As these constraints change over time, the IRP is periodically revisited and updated by Metropolitan and the member agencies to reflect current conditions. The most recent update was adopted in 2016. In 2022, Metropolitan's Board adopted the 2020 IRP Regional Needs Assessment that incorporated scenario planning to address wide-ranging uncertainties rather than focusing on a single set of assumptions as in the past. To meet the water supply needs of the region, Metropolitan continues to identify and develop additional water supplies to maintain the reliability of the imported water supply and delivery system to its member agencies.

# CAPITAL FACILITIES - CONVEYANCE AND DISTRIBUTION

Metropolitan's water system has been built over time to meet the widely differing needs of its member agencies and the various sources of water available to Metropolitan. To meet those needs, Metropolitan's water delivery system is comprised of three basic conveyance and delivery components that form one integrated water system:

- State Water Project (SWP);
- Colorado River Aqueduct (CRA); and
- Distribution System

The system draws on diverse supply sources, transports water across a large part of the State and distributes water in six counties, where member agencies or their retail sub-agencies serve an estimated 19 million people. The CRA and the California Aqueduct of the SWP convey imported water into the Metropolitan service area. This water is then delivered to Metropolitan's member agencies via a regional network of canals, pipelines, and appurtenant facilities, which constitute the Distribution System. Supply, treatment, and storage facilities augment the Distribution System. The system is an interconnected regional conveyance and distribution system with the ability to deliver supplies from each of the SWP, the CRA, and its storage portfolio to most areas of its vast and diverse service area to almost every member agency. This flexibility derives from the capital facilities and provides local and system-wide benefits to all member agencies, as the facilities directly contribute to the reliable delivery of water supplies throughout Metropolitan's service area. The 2020 IRP Needs Assessment, however, identified reliability risks faced by member agencies that depend predominantly on SWP supplies served by Metropolitan. As the 2007 Integrated Area Study (IAS) emphasized, regional system flexibility is a key component of overall reliability.<sup>1</sup> Today, system flexibility continues to be essential to the availability of Metropolitan's services.<sup>2</sup> Metropolitan must maintain operational flexibility—the ability to respond to short-term changes in regional water supply, water quality, treatment requirements, and member agency demands. Metropolitan must maintain delivery flexibility—the ability to full water supply deliveries during planned and unplanned facility outages. Metropolitan is also required by state statute to serve as large an area as is determined to be reasonable and practical with SWP water; and where a blend of water sources is served, to have the objective to the extent determined to be reasonable and practical. (MWD Act, Sec. 136.)

Metropolitan's intent in the 2007 Integrated Area Study was to provide equitable reliability across its service area through a balanced combination of infrastructure, storage, demand management, and water supply programs. In the context of climate change, historical hydrology proved an inadequate guide to supplies available from the State Water Project and the Colorado River. From 2020 through 2022, imported supply losses outstripped the ability of Metropolitan's portfolio to compensate. Further, Metropolitan could not provide equitable service to all member agencies. As such, Metropolitan's board in August 2022 adopted a resolution that committed to three new policy statements:

- 1. All member agencies must receive equivalent water supply reliability through an interconnected and robust system of supplies, storage, and programs.
- 2. Metropolitan will reconfigure and expand its existing portfolio and infrastructure to provide sufficient access to the integrated system of water sources, conveyance and distribution, storage, and programs to achieve equivalent levels of reliability to all member agencies.
- 3. Metropolitan will eliminate disparate water supply reliability through a One Water integrated planning and implementation approach to manage finite water resources for long-term resilience and reliability, meeting both community and ecosystem needs

In 2023, a series of winter storms brought much needed precipitation in both the northern Sierra and the Upper Colorado River Basins, improving available supplies for Metropolitan. Water supply conditions greatly improved, but also presented challenges to store and distribute all available supplies.

Operational flexibility is being increased by creating an interconnected regional delivery network integrating the SWP and the CRA conveyance systems with the Distribution System. This integrated network will fully allow Metropolitan to incorporate supply from the SWP and the CRA with a diverse portfolio of geographically dispersed storage programs, including the Central Valley groundwater storage programs, carryover storage in San Luis Reservoir, flexible storage capacity in Castaic Lake and Lake Perris, Lake Mead storage, the Desert Water Agency/Coachella Valley Water District Advanced Delivery account, in-basin surface storage in Diamond Valley Lake and Lake Mathews, and in-basin groundwater Conjunctive Use Programs. This integrated, regional network also allows Metropolitan to move supplies throughout the system in response to service demands, supply availability and operational needs.

Metropolitan's integrated conveyance, distribution and storage assets contributes to regional system reliability, with a structural limitation that became starkly evident in the 2020-2022 drought. It is fair and reasonable for member agencies and all property owners within the service area to share the cost of developing and maintaining these assets and newly identified system flexibility projects because they all benefit from regional system flexibility and reliability.

<sup>&</sup>lt;sup>1</sup> 2007 Integrated Area Study, Report No. 1317, pg. 2-10.

<sup>&</sup>lt;sup>2</sup> 2024 Annual Operating Plan, pg. 8-14

## State Water Project Description and Benefits

One of Metropolitan's two major sources of water is the SWP.<sup>3</sup> The SWP is the largest state-built, multipurpose, user-financed water project in the country. It was designed and built primarily to deliver water, but also provides flood control, generates power for pumping, is used for recreation, and enhances habitat for fish and wildlife.

The SWP consists of a complex system of dams, reservoirs, power plants, pumping plants, canals and aqueducts to deliver water. See Figure 1. SWP water consists of water from rainfall and snowmelt runoff that is captured and stored in SWP conservation facilities and then delivered through SWP transportation facilities to water agencies and districts located throughout the Upper Feather River, Bay Area, Central Valley, Central Coast, and Southern California. In addition to the delivery of SWP water, the SWP is also used to convey transfers of SWP water and non-SWP water. Metropolitan receives water from the SWP through the California Aqueduct, which is 444 miles long, and at four delivery points near the northern and eastern boundaries of Metropolitan's service area.

## Figure 1. Facilities of the State Water Project

<sup>&</sup>lt;sup>3</sup> For historical and current information regarding the SWP, refer to Bulletin 132, published periodically by DWR since 1963. The most recently published Bulletin is Bulletin 132-21 dated July 2024 and titled "Management of the California State Water Project". Appendices to the Bulletin are also updated separately. Both are available at: https://water.ca.gov/Programs/State-Water-Project/Management/Bulletin-132.

The SWP is managed and operated by the Department of Water Resources (DWR). All water supply-related capital expenditures and operations, maintenance, power and replacement (OMP&R) costs associated with the SWP conservation and transportation facilities are paid for by 29 agencies and districts, known collectively as the State Water Contractors (Contractors). The Contractors are participants in the SWP through long-term contracts for the delivery of SWP water and use of the SWP transportation facilities.

In 1960, Metropolitan signed the first water supply contract (as amended, the State Water Contract) with DWR. The original term of the water supply contract was 75 years. In 2022, a contract extension was authorized which extended the original term by another 50 years to 2085. In addition to SWP water, Metropolitan also obtains water from water transfers, groundwater banking and exchange programs delivered through the California Aqueduct.

Since 1960, the SWP system has been extended, improved, and refurbished. All such costs are payable by the Contractors. California WaterFix was a comprehensive science-based solution proposed by the state to modernize critical water delivery infrastructure of the SWP. On October 10, 2017, Metropolitan's Board voted to support financing for the California WaterFix project. However, the state terminated the project in April 2019. Consistent with the Governor's Executive Order N-10-19, the state then announced a new single tunnel Delta conveyance project, which was notably included as part of the Governor's 2020 Water Resilience Portfolio. In 2019, DWR initiated planning and environmental review for a single tunnel Delta Conveyance Project (DCP) to protect the future reliability of access to SWP supplies. In December 2020, the Metropolitan Board authorized the General Manager to execute agreements for (a) funding a share of up to 60.2 percent for planning and pre-construction costs for the DCP, and (b) an amendment to the Joint Powers Agreement for the Delta Conveyance Design and Construction Joint Powers Authority. A Delta conveyance project will contribute to the improvement of capital facilities needed to meet demands on Metropolitan's system for emergency storage and available capacity to meet outages and hydrologic variability. Metropolitan's biennial budget for fiscal years 2024/25 and 2025/26 includes Metropolitan's planned contribution of \$11.6 million for DWR's planning costs of a new Delta conveyance project.

In December 2024, Metropolitan's Board authorized the General Manager to enter into an amended funding agreement for an amount not to exceed \$141.6 million for preconstruction work on the Delta conveyance project planned during 2026-2027. The projection includes approximately \$25.7 million in FY 2025/26 that were not included in the second year of the adopted 2024/25 and 2025/26 Budget, or the adopted calendar year 2026 rates. Metropolitan recently secured a commitment form DWR for a refund of \$75 million in past SWP payments that will cover the \$25.7 million anticipated to be spent in FY 2025/26.

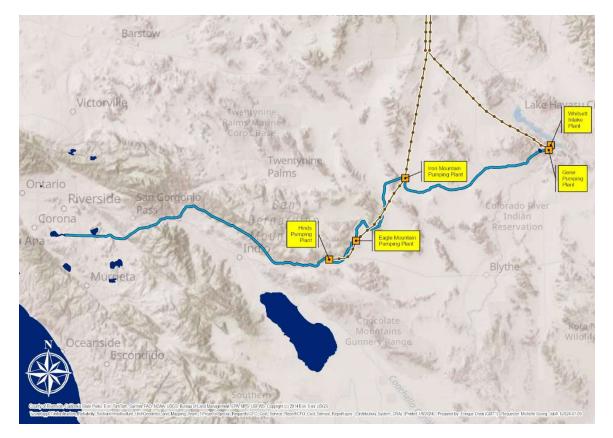

All Metropolitan member agencies benefit from the SWP system and its supplies, which—when available—can be distributed to all member agencies. As described above, the 2020-2022 drought led Metropolitan's board to recommit itself to equitable water supply reliability and to direct staff to identify and pursue solutions to prevent a reoccurrence. Metropolitan's member agencies distribute that water to parcels as retail water providers or as wholesale water providers to retail agencies. In this way, the SWP water that Metropolitan delivers to its member agencies contributes to water available to existing and future end users throughout Metropolitan's service area. The cost of the net capital payments for the SWP less the portion covered by property taxes in fiscal year 2025/26 is \$0 million, as shown in Table 1. Real property throughout Metropolitan's service area benefits from the availability of the SWP facilities and its integration into Metropolitan's system and therefore all such costs may be attributed to such parcels. However, Metropolitan's Standby Charge collects only \$43.9 million of the total \$319.0 million system costs, representing 14% of the total system costs.

## Colorado River Aqueduct Description and Benefits

Metropolitan's other major source of water is the CRA. Metropolitan was established to obtain an allotment of Colorado River water, and its first mission was to construct and operate the CRA. The CRA consists of five pumping plants, 450 miles of high voltage power lines, one electric substation, four regulating reservoirs, and 242

miles of aqueducts, siphons, canals, conduits and pipelines terminating at Lake Mathews in Riverside County. See Figure 2. Metropolitan owns, operates, and manages the Colorado River Aqueduct. Metropolitan is responsible for operating, maintaining, rehabilitating, and repairing the CRA, and is responsible for obtaining and scheduling energy resources adequate to power pumps at the CRA's five pumping stations.

Metropolitan incurs capital and operations and maintenance expenditures to support the CRA activities. The direct costs of the CRA activities include labor, materials and supplies, as well as outside services to provide repair and maintenance, and professional services. The CRA activities benefit from Water System Operations support services and management supervision, as well as Administrative and General activities of Metropolitan. Metropolitan finances past, current, and future capital improvements on the CRA, and capitalizes those improvements as assets. The costs of Metropolitan's capital financing activities are apportioned to cost functions, such as the CRA Conveyance and Aqueduct function. The capital cost of the Colorado River Aqueduct and Inland Feeder in fiscal year 2025/26 is \$90.9 million, and is included in the Non-SWP Conveyance System line item in Table 1. Real property throughout Metropolitan's service area benefits from the availability of the CRA facilities and its integration into Metropolitan's system and therefore all such costs may be attributed to such parcels. However, Metropolitan's Standby Charge collects only \$43.9 million of the total \$319.0 million system costs, representing 14% of the total system costs.

# Figure 2. Colorado River Aqueduct

Metropolitan's Conveyance and Distribution System Benefits

For purposes of this report, components of the conveyance system are considered to include only those major trunk facilities that transport water from primary supply sources to either regional storage facilities or feeder lines linked to the primary conveyance facilities. See Figure 3. For a list of Metropolitan's conveyance facilities within its service area, see Table 3. All other water transport facilities, including pipelines, feeders, laterals, canals and

aqueducts, are considered to be distribution facilities. Distribution facilities can be further identified in that they generally have at least one connection to a member agency's local distribution system. For a list of Metropolitan's distribution facilities, see Table 3.

All water transport facilities not specifically identified as part of the regional conveyance system are considered to be distribution facilities (Distribution System). While conveyance and aqueduct system components are regional in nature and generally do not link directly to local agency distribution systems, Distribution System facilities do ultimately connect to local agency systems. As a result, these facilities rely on conveyance and aqueduct facilities to import water from regional supply sources. The Distribution System is a complex network of facilities which routes water from the CRA and SWP to the member agencies. Beginning at the terminal delivery points of the CRA and SWP, Metropolitan's Distribution System includes approximately 775 miles of pipelines, feeders, and canals. Distribution System operations are coordinated from the Operations Control Center in Eagle Rock. The control center plans, schedules, and balances daily water operations in response to member agency demands and the operational limits of the system as a whole. Metropolitan's storage and treatment facilities augment the Distribution System. Metropolitan operates and maintains separate untreated and treated distribution facilities.

## Figure 3. Metropolitan's Distribution and Storage Facilities

Metropolitan has an ongoing commitment, through physical system improvements and the maintenance and rehabilitation of existing facilities, to maintain the reliable delivery of water throughout the entire service area. System flexibility improvement projects include additional conveyance and distribution facilities to maintain the dependable delivery of water supplies, provide alternative system delivery capacity, and enhance system operations. Conveyance and distribution system improvement benefits also include projects to upgrade obsolete facilities or equipment, or to rehabilitate or replace facilities or equipment. These projects are needed to enhance system operations, comply with new regulations, and maintain a reliable distribution system. A list of

conveyance and distribution system facilities is provided in Table 3 along with the fiscal year 2025/26 estimated conveyance and distribution system benefits. The capital cost of the Distribution System in fiscal year 2025/26 is \$102.0 million, and is included in the Distribution System line item in Table 1. Real property throughout Metropolitan's service area benefits from the availability of the Distribution System and its integration into Metropolitan's system and therefore all such costs may be attributed to such parcels. However, Metropolitan's Standby Charge collects only \$43.9 million of the total \$319.0 million system costs, representing 14% of the total system costs.

# **CAPITAL FACILITIES – WATER STORAGE**

## System Storage Benefits

The Metropolitan system, for purposes of meeting demands during times of shortage, regulating system flows, and ensuring system reliability in the event of a system outage, provides over 1,000,000 acre-feet of system storage capacity. Diamond Valley Lake provides 810,000 acre-feet of that storage capacity, effectively doubling Southern California's previous surface water storage capacity. Other existing imported water storage available to the region consists of Metropolitan's raw water reservoirs, a share of the SWP's raw water reservoirs in and near the service area, and the portion of the groundwater basins used for conjunctive-use storage.

Water stored in system storage during above average supply conditions (surplus) provides a reserve against shortages when supply sources are limited or disrupted. Water storage also preserves Metropolitan's capability to deliver water during scheduled maintenance periods, when conveyance facilities must be removed from service for rehabilitation, repair, or maintenance. The benefits of these capital facilities are both local and system-wide, as the facilities directly contribute to the reliable delivery of water supplies throughout Metropolitan's service area. The capital costs of water storage in fiscal year 2025/26 is \$126.1 and, as shown in Table 1. Real property throughout Metropolitan's service area benefits from the availability of the storage capacity throughout the service area and its integration into Metropolitan's system and therefore all such costs may be attributed to such parcels. However, Metropolitan's Standby Charge collects only \$43.9 million of the total \$319.0 million system costs, representing 14% of the total system costs.

## **METROPOLITAN'S REVENUE**

Metropolitan's major capital facilities are financed largely from the proceeds of revenue bond issues, which are repaid over future years. The principal source of revenue for repayment of these bonds is water sales to its member agencies, which is currently Metropolitan's largest source of revenue. In addition, *ad valorem* property taxes provide an additional limited revenue source, which is used to pay pre-1978 voter-approved indebtedness. However, the use of water rates as a primary source of revenue has placed an increasing burden on member agencies and their ratepayers, which would more equitably continue to be paid in part by assessments on land that in part derives its value from the availability of water through an integrated and reliable water system.

## **Readiness-To-Serve**

In December 1993, Metropolitan's Board approved a revenue structure that included additional charges to establish a commitment to Metropolitan's capital improvement program and provide revenue stability. This revenue structure included the RTS Charge, which in 1995 certain member agencies opted to pay in part pursuant to the collection of a standby charge. In October 2001, the Board adopted the current unbundled rate structure, and maintained the RTS Charge.

As noted above, Metropolitan levies the RTS Charge on its member agencies to recover capital costs, including a portion of the debt service on bonds issued to finance capital facilities needed to meet existing demands on Metropolitan's system for emergency storage and available capacity.

The estimated fiscal year 2025/26 RTS Charge for each member agency is shown in Table 4.

## **Standby Charge Option**

Metropolitan's Standby Charge is authorized by the State Legislature and has been levied by Metropolitan since fiscal year 1992/93. The Standby Charge recognizes that there are economic benefits to lands that have access to a water supply, whether or not such lands are using it, which excludes lands permanently committed to open space and maintained in their natural state that are not now and will not in the future be supplied water and lands that the General Manager, in his discretion, finds do not now and cannot reasonably be expected to derive a benefit from the projects to which the proceeds of the Standby Charge will be applied. Utilization of the Standby Charge transfers some of the burden of maintaining Metropolitan's capital infrastructure from water rates and *ad valorem* taxes to all the benefiting properties within the service area. A fraction of the value of this benefit and of the cost of providing it can be effectively recovered, in part, through the levying of a standby charge. The projects to be supported in part by the Standby Charge are capital projects that provide both local and Metropolitan-wide benefit to current landowners as well as existing water users.

Although a standby charge could have been set to recover all Conveyance, Distribution, and Storage costs as detailed in Table 1, Metropolitan's continued Standby Charge only collects about 14% of those costs. For fiscal year 2025/26, the amount to be recovered by the RTS Charge is estimated to be \$184.5 million and of that only \$43.9 million is estimated to be recovered by the Standby Charge.

The Standby Charge for each acre or parcel of less than an acre varies from member agency to member agency, as permitted under the legislation establishing Metropolitan's Standby Charge. The water Standby Charge for each member agency is continued at amounts not to exceed the rates in place since fiscal year 1996/97 and is shown in Table 5, which consists of composite rates by member agencies, not to exceed \$15.00. Originally, the composite rates consisted in part of a uniform component of \$5 applicable throughout Metropolitan, and in part of a variable component, not exceeding \$10 in any member public agency, reflecting the allocation of historical water deliveries by the member agencies as of fiscal year 1993/94 when the composite rates were initially established. Metropolitan will continue Standby Charges only within the service areas of the member agencies that have requested that the Standby Charge be utilized for purposes of meeting their outstanding RTS obligation. Although rates may not exceed the amounts in place in fiscal year 1996/97, some rates may be lower.

The Standby Charge is proposed to be collected from: (1) parcels on which water standby charges have been levied in fiscal year 1993/94 and annually thereafter and (2) parcels annexed to Metropolitan and to an electing member agency after January 1997. Table 6 lists parcels annexed, or to be annexed, to Metropolitan and to electing member agencies during fiscal year 2024/25, such parcels being subject to the Standby Charge upon annexation, which is used to estimate the Standby Charge collections for the following fiscal year. Fiscal Year 2025/26 Table 6 also shows parcels known by Metropolitan as annexed, or to be annexed, by the time collections are made for fiscal year 2025/26.

The estimated costs of Metropolitan's wholesale water system, which could be paid by a Standby Charge, are approximately \$319.0 million for fiscal year 2025/26, as shown in Table 1. An average total Standby Charge of about \$73.28 per acre of land or per parcel of land less than one acre would be necessary to pay for the total potential program benefits. Benefits in this amount will accrue to each acre of property and parcel within Metropolitan's service area, as Metropolitan delivers water to member agencies that contributes to water available to these properties, via that member agency or a retail sub-agency. Because Metropolitan's water deliveries to member agencies contributes to water available only to properties located within Metropolitan's service area boundaries (except for certain contractual deliveries as permitted under Section 131 of the Metropolitan Water District Act), any benefit received by the public at large or by properties outside of the area is merely incidental.

Table 5 shows that the distribution of Standby Charge revenues from the various member agency service areas would provide net revenue flow of approximately \$43.9 million for fiscal year 2025/26. Metropolitan will use other revenue sources, such as water sales revenues, RTS Charge revenues (except to the extent collected through standby charges, as described above), interest income, and revenue from sales of hydroelectric power, to pay for the remaining program costs. Additionally, the actual Standby Charge proposed to be continued ranges from \$0.10 to \$14.20 per acre of land or per parcel of land less than one acre. Thus, the benefits of Metropolitan's investments in water conveyance, storage, and distribution far exceed the recommended Standby Charge.

# Equity

The RTS Charge is a firm revenue source. The revenues to be collected through this charge will not vary with sales in the current year. This charge is levied on Metropolitan's member agencies and is not a fee or charge upon real property or upon persons as an incident of property ownership. It ensures that agencies that only occasionally purchase water from Metropolitan but receive the reliability benefits of Metropolitan's system pay an equitable share of the costs to provide that reliability. Within member agencies that elect to pay the RTS Charge through Metropolitan's standby charges, the Standby Charge results in a lower RTS Charge than would otherwise be necessary due to the amount of revenue collected from lands which benefit from the availability of Metropolitan's water system. With the Standby Charge, these properties are now contributing a more appropriate share of the cost of importing water to Southern California.

Metropolitan's water system increases the availability and reliable delivery of water throughout Metropolitan's service area. A reliable system benefits existing end users and land uses through retail water service provided by Metropolitan member agencies or by water retailers that purchase water from a Metropolitan member agency, and through the replenishment of groundwater basins and reservoir storage as reserves against shortages due to droughts, natural emergencies, or scheduled facility shutdowns for maintenance. The benefits of reliable water resources from the SWP, CRA, Storage, and system improvements accrue to more than 250 cities and communities within Metropolitan's six-county service area. Metropolitan's regional water system is interconnected, so water supplies from the SWP and CRA can be used throughout most of the service area and therefore benefit water users and properties system-wide.

A major advantage of a firm revenue source, such as an RTS charge, is that it contributes to revenue stability during times of drought or low water sales. It affords Metropolitan additional security, when borrowing funds, that a portion of the revenue stream will be unaffected by drought or by rainfall. This security will help maintain Metropolitan's historically high credit rating, which results in lower interest expense to Metropolitan, and therefore, lower overall cost to its member agencies.

#### SUMMARY

The foregoing and the attached tables describe the current costs of Metropolitan's system and benefits provided by the projects listed as mainstays to the water system for Metropolitan's service area. Benefits are provided to member agencies, their retail sub-agencies, water users and property owners. The projects represented by this report provide both local benefits as well as benefits throughout the entire service area. It is recommended, for calendar year 2026, that the Metropolitan Board of Directors adopt the RTS Charge as set forth in Table 4 with an option for local agencies to request that a Standby Charge be collected for fiscal year 2025/26 from lands within Metropolitan's service area as a credit against such member agency's RTS Charge, up to the Standby Charge amounts collected by Metropolitan within the applicable member agency for fiscal year 1996/97. The maximum Standby Charge would not exceed \$15 per acre of land or per parcel of less than one acre. The costs of the system described in this Engineer's Report exceeds the recommended Standby Charge by at least \$275 million. A preliminary listing of all parcels subject to the proposed 2025/26 Standby Charge and the amounts proposed to be continued for each is available in the office of the Chief Financial Officer. A final listing is available upon receipt of final information from each county.

#### THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

#### **RESOLUTION 9373**

#### RESOLUTION OF THE BOARD OF DIRECTORS OF THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA FIXING AND ADOPTING A CAPACITY CHARGE EFFECTIVE JANUARY 1, 2026

The Board of Directors of The Metropolitan Water District of Southern California (the "Board") hereby finds that:

1. The Board of The Metropolitan Water District of Southern California ("Metropolitan"), pursuant to Sections 133, 134 and 134.5 of the Metropolitan Water District Act (the "Act"), is authorized to fix such rate or rates for water as will result in revenue which, together with revenue from any water standby or availability of service charge or assessment, will pay the operating expenses of Metropolitan, provide for repairs and maintenance, provide for payment of the purchase price or other charges for property or services or other rights acquired by Metropolitan, and provide for the payment of the interest and principal of its bonded debt; and

2. The amount of revenue to be raised by the Capacity Charge shall be as determined by the Board and allocation of such charges among member agencies shall be in accordance with the method established by the Board; and

3. The Capacity Charge is a charge fixed and adopted by Metropolitan and charged to its member agencies, and is not a fee or charge imposed upon real property or upon persons as an incident of property ownership; and

4. The Capacity Charge is intended to recover the debt service and other appropriately allocated costs to construct, operate and maintain projects needed to meet peak demands on Metropolitan's distribution system, as shown in the FYs 2024/25 and 2025/26 Cost of Service Report for Proposed Water Rates and Charges (the "2024 Cost of Service Report"); and

5. Pursuant to Resolution 8322, adopted by the Board on May 14, 1991, Resolution 8329, adopted by the Board on July 9, 1991, Resolution 9199, adopted by the Board on March 8, 2016, and Resolution 9201, adopted by the Board on March 8, 2016, and as each is thereafter amended and supplemented, proceeds of the Capacity Charge and other revenues from the sale or availability of water are pledged to the payment of Metropolitan's revenue bonds, subordinate revenue bonds and short-term certificates, and commercial paper; and

6. The Capacity Charge is charged (on a dollar per cubic-foot-per-second basis) to member public agencies ("member agencies"), based upon the amount of capacity used by such member agency that is designed to recover the cost of providing peaking capacity within the distribution system; and

7. On April 9, 2024, the Board considered the rates and charges presented by the General Manager and approved the biennial budget for fiscal years 2024/25 and 2025/26 and adopted recommended water rates for

calendar years 2025 and 2026 and charges for calendar year 2025, and received information and documents available at <a href="https://www.mwdh2o.com/who-we-are/budget-finance/">https://www.mwdh2o.com/who-we-are/budget-finance/</a>; and

8. In approving the biennial budget and adopting the rates and charges on April 9, 2024, the Board determined the amount of revenue to be raised by the Capacity Charge in calendar year 2026 to be based on a Capacity Charge in such year of \$14,500 per cubic-feet-per-second, based on information and documents available at <a href="https://www.mwdh2o.com/who-we-are/budget-finance/">https://www.mwdh2o.com/who-we-are/budget-finance/</a>; and

9. Each of the meetings of the Board were conducted in accordance with the Brown Act (commencing at Section 54950 of the Government Code), for which due notice was provided and at which quorums were present and acting throughout;

NOW, THEREFORE, the Board does hereby resolve, determine and order as follows:

**Section 1.** That the Board hereby fixes and adopts a Capacity Charge, as described below, to be effective January 1, 2026.

Section 2. That said Capacity Charge shall be in an amount sufficient to provide for payment of the capital financing costs not paid from *ad valorem* property taxes, as well as other appropriately allocated costs, incurred to provide peaking capacity within Metropolitan's distribution system.

**Section 3.** That such Capacity Charge effective January 1, 2026 shall be a charge as specified in Section 5 (set in dollars per cubic-feet-per-second of the peak day capacity) for capacity provided to a member agency, based on the maximum summer day demand placed on the system between May 1 and September 30 for the three-calendar year period ending December 31, 2004, and thereafter for a rolling three-calendar year period.

**Section 4.** The allocation of the Capacity Charge among member agencies is based on data recorded by Metropolitan and shall be conclusive in the absence of manifest error. Corrections may be made by staff for any incorrect recording or calculation, upon verification by the member agency.

**Section 5.** That the Capacity Charge shall be a fixed charge as shown in the following table and collected from each member agency monthly, quarterly or semiannually as agreed to by Metropolitan and the member agency.

## Table 1. Calendar Year 2026 Capacity Charge

**Section 6.** That the Capacity Charge for each member agency, the method of its calculation, cost allocations and other data used in its determination are as specified in the adopted rates and charges to be effective January 1, 2026, which forms the basis of the Capacity Charge, and the corresponding 2024 Cost of Service Report. The adopted rates and charges and cost of service reports are on file and available for review by interested parties at Metropolitan's headquarters.

**Section 7.** That the Capacity Charge specified in Section 5, together with other revenues from Metropolitan's water rates, other charges, ad valorem property taxes, and other miscellaneous revenue, does not exceed the reasonable and necessary cost of providing Metropolitan's water service for which the rates and charges are made, or conferring the benefit provided, and is fairly apportioned to each member agency in proportion to the peak day capacity utilized by each member agency.

**Section 8.** That if any provision of this Resolution or the application to any member agency, property or person whatsoever is held invalid, that invalidity shall not affect other provisions or applications of this Resolution which can be given effect without the invalid portion or application, and to that end the provisions of this Resolution are severable.

**Section 9.** That the General Manager and the General Counsel are hereby authorized to do all things necessary and desirable to accomplish the purposes of this Resolution, including, without limitation, the commencement or defense of litigation and taking all necessary action to satisfy relevant statutes requiring notice by publication.

**Section 10.** That the Board Executive Secretary is hereby directed to transmit a certified copy of this Resolution to the presiding officer of the governing body of each member agency.

I HEREBY CERTIFY that the foregoing is a full, true and correct copy of a Resolution adopted by the Board of Directors of The Metropolitan Water District of Southern California, at its meeting held on April 8, 2025.

Join Forg-Jain-Secretary of the Board of Directors

Secretary of the Board of Directors of The Metropolitan Water District of Southern California

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

# **Board** Action

## • Board of Directors Legal and Claims Committee

#### 4/8/2025 Board Meeting

7-8

## Subject

Approve amendments to the Metropolitan Water District Administrative Code to conform oversight of the General Auditor and Audit Department duties and responsibilities to the current committee structure, to streamline reporting on professional services agreements, and make a minor non-substantive change; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

#### **Executive Summary**

The proposed amendments will transfer oversight of the General Auditor and Audit Department duties and responsibilities from the Executive Committee to the Audit Committee to conform to recent board-approved changes to the committee structure, including creating the Audit Committee to supersede the Audit Subcommittee of the Executive Committee. The amendments will also end dual reporting on professional services agreements to two committees by deleting reporting to the Legal and Claims Committee. Such agreements will now be reported to the Audit Committee, thereby consolidating the reporting of audit-related matters within the Audit Committee. The proposed amendments will make the foregoing changes to Chapter 7 of Division II and Chapter 4 of Division VI of the Administrative Code.

#### Proposed Action(s)/Recommendation(s) and Options

#### **Staff Recommendation: Option #1**

#### **Option #1**

Approve amendments to the Metropolitan Water District Administrative Code to conform oversight of the General Auditor and Audit Department duties and responsibilities to the current committee structure, streamline reporting on professional services agreement, and make a minor non-substantive change.

#### Fiscal Impact: None

**Business Analysis:** This option will allow the General Auditor and Audit Department to report to the Audit Committee instead of the Executive Committee and will streamline reporting on professional services agreements.

#### **Option #2**

Do not approve amendments to the Metropolitan Water District Administrative Code to conform oversight of the General Auditor and Audit Department duties and responsibilities to the current committee structure or to streamline reporting on professional services agreement.

#### Fiscal Impact: None

**Business Analysis:** This option will not allow the General Auditor or Audit Department to report directly to the Audit Committee or to streamline reporting on professional services agreements.

#### **Alternatives Considered**

Not applicable

## **Applicable Policy**

Metropolitan Water District Administrative Code Section 2700: Periodic Staff Reports to Board and Committees

Metropolitan Water District Administrative Code Section 6400: Officers

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

#### Related Board Action(s)/Future Action(s)

In March 2025, the Board approved changes to its committee structure, including the creation of the Audit Committee and deletion of the Audit Subcommittee of the Executive Committee. In November 2024, the Board approved changes to the Audit Committee charter as part of its annual review of the charter.

## California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

The proposed action is not defined as a project under CEQA because it involves organizational, maintenance, or administrative activities; personnel-related actions; and/or general policy and procedure making that will not result in direct or indirect physical changes in the environment. (Public Resources Code Section 21065; State CEQA Guidelines Section 15378(b)(2) and (5)).

#### **CEQA determination for Option #2:**

None required

#### **Details and Background**

#### Background

The proposed amendments will transfer oversight of the General Auditor and Audit Department duties and responsibilities from the Executive Committee to the Audit Committee to conform to recent board-approved changes to the committee structure, including, among them, creating the Audit Committee to supersede the Audit Subcommittee of the Executive Committee. The amendments will also end dual reporting on professional services agreements to two committees by deleting reporting to the Legal and Claims Committee. Such agreements will now be reported to the Audit Committee, thereby consolidating reporting on audit-related matters within the Audit Committee.

The proposed amendments will make the foregoing changes to Articles 1 and 2 of Chapter 7 of Division II regarding the General Auditor's quarterly and annual reporting duties and to Articles 2, 3, and 4 of Chapter 4 of Division VI regarding oversight of more specific duties and functions of the General Auditor and the Audit Department, as follows:

- 1. Amend Sections 2703, 6416, 6436(b), 6450(b), and 6451(d)(1) so that the General Auditor will report its annual business plan to the Audit Committee and no longer to the Executive Committee.
- 2. Amend Section 2722 so that the General Auditor will report on the general exercise of its power quarterly to the Audit Committee and no longer to the Executive Committee.
- 3. Amend Section 6450(a) to establish that oversight of the work of internal and external auditors and approval of the Audit Department's charter will be conducted by the Audit Committee and no longer by the Executive Committee.
- 4. Amend Section 6450(d) so that the General Auditor will report on internal audit assignments and transmit reports by external auditors to the Audit Committee and no longer to the Executive Committee.
- 5. Amend Section 6450(f) so that the specific audit requests by other committees are submitted to the Audit Committee and fix a minor spelling error.
- 6. Amend Section 6451(b) to establish that the General Auditor will be accountable to the Board of Directors and the Audit Committee rather than to the Board of Directors and the Executive Committee.

- 7. Amend Section 6451(d)(1), (2), (3), (4), (9) and (10) to establish that the Audit Department will provide an annual audit plan and various reports (i.e., status reports, audit reports, progress reports, and fraud investigation reports) and will convey emerging audit trends and best practices to the Audit Committee (no longer to the Executive Committee) and to District management, where specified in this section.
- 8. Amend Section 6451(e)(2) to establish that the General Auditor and Audit Department staff members have full and free access to the Audit Committee and no longer to the Executive Committee.
- 9. Amend the postamble to Section 6452 to establish that the Audit Charter will be reviewed at least annually by the Audit Committee and no longer by the Executive Committee.
- 10. Amend Section 6453 to establish that the General Auditor will inform the Audit Committee whenever they obtain the professional services of independent auditors or technical consultants, and will no longer report quarterly to the Legal and Claims Committee concerning said agreements entered into pursuant to this section.

The complete list of proposed amendments is set forth in **Attachment 1**, with overstrikes reflecting deletions and underlining reflecting additions. **Attachment 2** sets forth the sections as they will appear in the Administrative Code if the changes are approved.

All amendments are effective upon board approval unless specified otherwise.

#### GENERAL MANAGER

#### § 6416. Annual Report to Executive Committee

The General Manager shall annually submit to the Executive Committee a business plan containing the General Manager's key priorities for the coming year. The business plan shall be submitted in conjunction with similar plans by the General Auditor to the Executive

<u>Audit</u> Committee and the Ethics Officer to the Community and Workplace Culture Committee and the General Counsel to the Legal and Claims Committee.

#### Article 3

#### **GENERAL COUNSEL**

#### § 6436. Annual and Quarterly Reports to Legal and Claims Committee.

(a) The General Manager and General Counsel shall report quarterly to the Legal and Claims Committee the exercise of any power delegated to them by Sections 6433 and 6434. The General Counsel shall report quarterly to the Legal and Claims Committee the exercise of any power delegated to them by Section 6431.

(b) The General Counsel shall annually, in advance of the July Board meetings, submit to the Legal and Claims Committee a business plan containing the Legal Department's key priorities for the coming year for review and approval. The business plan shall be submitted in conjunction with similar plans by the General Manager to the Executive Committee and the General Auditor to the Executive Audit Committee, and the Ethics Officer to the Community and Workplace Culture Committee.

#### Article 4

#### **GENERAL AUDITOR**

#### § 6450. Powers and Duties.

(a) The District's independent internal auditing function is governed by provisions of the California Government Code and by policies established by the Board of Directors. The Executive Audit Committee is responsible for the oversight of the internal auditing function, approving the Audit Department charter (subject to review and approval of the Board of Directors), selecting and overseeing the work of external auditors, and reviewing reports issued by both the internal and external auditors.

(b) The General Auditor manages the District's Audit Department and is responsible for formulating departmental policies and procedures; directing and evaluating the performance of work done by employees within the department, administering the internal records of the department; and administering the District's contract for external audit services. The General Auditor shall, annually in advance of the July Board meetings, submit to the <u>Audit Executive</u> Committee an Audit business plan containing key priorities for the coming year for review and approval. The business plan shall be submitted in conjunction with similar plans by the General Manager to the Executive Committee, the General Counsel to the Legal and Claims Committee and Ethics Officer to the Community and Workplace Culture Committee.

(c) The General Auditor shall report the findings, opinions, and recommendations which result from the performance of the duties outlined in paragraph 6450(b) to the General Manager,

General Counsel and Ethics Officer for their information and appropriate actions. Whenever an audit report contains recommendations for corrective actions or changes in current practices, the General Manager, General Counsel, Ethics Officer or their designees shall respond to the General Auditor in an appropriate manner and within a reasonable time, indicating their views on the recommendations and proposed actions to be taken, if any.

7-8

(d) The General Auditor's reports on internal audit assignments shall be addressed to the <u>Executive Audit</u> Committee. The General Auditor shall have the discretion to determine the form and content of such audit reports, subject to guidance by the <u>Executive Audit</u> Committee. With the exception of those reports which the General Auditor deems to be urgent or confidential in nature, copies of all audit reports addressed to the <u>Executive Audit</u> Committee shall be submitted to the General Manager and General Counsel for review and comment simultaneously to their submittal to the <u>Executive Audit</u> Committee.

(e) The General Auditor shall transmit all reports issued by the District's external auditors to the <u>Executive Audit</u> Committee and any other committees of the Board as may be applicable. Such transmittal letters should include any comments on the external auditor's reports that the General Auditor deems necessary.

(f) The General Auditor may receive requests from time to time from the other executive officers or committees of the Board to perform audit assignments which are not included in the approved annual Audit Business Plan. Similarly, the General Auditor may identify a need to include new assignments in the Audit Business Plan during the year. The General Auditor shall have sufficient latitude and discretion to include those new assignments in the annual Audit Business Plan as the General Auditor deems necessary based upon their professional judgement and available resources. Requests from other committees of the Board and individual Board members desiring specific audit assignments shall be submitted to the Audit Committee for study, advicse, and recommendation, or if such subcommittee is not currently in place, the Executive Committee. Once the audit assignment is approved by the Board, the General Auditor reserves the right to determine how to best fit the directed audit assignment into the Audit Business Plan. The reporting process for assignments requested by either executive management, by committees of the Board, or by individual Board members shall generally follow the process outlined in paragraphs 6450(c) or (d) previously.

(g) The General Auditor shall manage the work of the Audit Department in accordance with the Audit Department Charter. The General Auditor shall assess annually whether the purpose, authority and responsibility, as defined in this Charter, continue to be adequate to enable the Audit Department to accomplish its objectives.

#### § 6451. Audit Department Charter.

(a) Mission and Scope of Work - The mission of the Audit Department is to provide independent, professional, objective assurance and consulting services designed to add value and improve Metropolitan's operations. It helps the District accomplish its objectives by using a proactive, systematic approach to evaluate and improve the effectiveness of governance, risk management, and internal control. The scope of work of the Audit Department is to determine whether the District's network of governance, risk management, and internal control, as designed and represented by District management, is adequate and functioning in a manner to ensure:

7-8

(1) Risks are appropriately identified, managed and monitored;

(2) Significant financial, managerial and operating information is accurate, reliable and timely;

(3) Employees' actions are in compliance with policies, standards, procedures and applicable laws and regulations;

(4) Resources are acquired economically, used efficiently, and adequately protected;

(5) Programs, plans, and objectives are achieved;

(6) Quality and continuous improvement are fostered in the District's control

process;

(7) Significant legislative or regulatory issues impacting the District are recognized and addressed appropriately; and

(8) Information technology is governed and systems and applications are securely deployed and monitored.

Opportunities for improving management internal control, efficiency and the District's image may be identified during audits. They will be communicated to the appropriate level of District management.

(b) Accountability - The General Auditor shall be accountable to the Board of Directors and the <u>ExecutiveAudit</u> Committee to:

(1) Advise on the adequacy and effectiveness of the District's processes for controlling its activities and managing its risks;

(2) Report significant issues related to the processes for controlling the activities of the District, including potential improvements to those processes, and provide information concerning such issues through to resolution; and

(3) Coordinate with other District control and monitoring functions (e.g., risk management, legal, finance, ethics, security, environmental).

(c) Professional Standards – The Audit Department shall govern itself by adherence to The Institute of Internal Auditors' mandatory guidance, including the Definition of Internal Auditing, the Code of Ethics, and the *International Standards for the Professional Practice of*  *Internal Auditing (Standards)*. This mandatory guidance constitutes principles of the fundamental requirements for the professional practice of internal auditing and for evaluating the effectiveness of the Audit Department's performance. These documents constitute the operating procedures for the department and constitute an addendum to the charter. The Institute of Internal Auditors' Practice Advisories, Practice Guides, and Position Papers shall also be adhered to as applicable. In addition, Audit Department staff shall adhere to Metropolitan's policies and procedures, the California Government Code; and the Audit Department's Policies and Procedures Manual.

7-8

(d) Responsibilities --- The Audit Department shall carry out the following responsibilities:

(1) Develop and present a flexible annual audit plan to the <u>ExecutiveAudit</u> Committee for review and approval. This plan should be developed utilizing a risk-based methodology and should include risks or internal control concerns identified by Management or the Board of Directors;

(2) Report periodically to the <u>ExecutiveAudit</u> Committee and District management the status of the current year's audit plan and the sufficiency of department resources;

(3) Submit audit reports to the <u>ExecutiveAudit</u> Committee and District management communicating the General Auditor's opinion regarding the internal control structure, identifying significant control issues, and providing related recommendations;

(4) Evaluate the adequacy and timeliness of District management's responses to, and the corrective action taken on, all recommendations noted in such reports. Conduct follow-up reviews as necessary and periodically report to the <u>ExecutiveAudit</u> Committee the status of District management's progress;

(5) Ensure the selection, development and supervision of competent and professional audit staff;

(6) Perform a quality assurance program by which the General Auditor evaluates internal auditing activities against professional standards. Obtain an external quality assurance review as required by the *Standards*;

(7) Perform advisory services to assist District management in meeting its objectives. Examples may include facilitation, process design, training, and assessment services;

(8) Evaluate additions or changes in internal control processes coincident with their development and implementation;

(9) Keep the <u>ExecutiveAudit</u> Committee informed of significant emerging trends and best practices in internal auditing and governance;

(10) Assist in the investigation of significant suspected fraudulent activities within the District. Assure reporting to the <u>ExecutiveAudit</u> Committee on the results, as appropriate; and

7-8

(11) Coordinate with external auditors to minimize duplication of effort and to ensure that issues raised as a result of their review, are appropriately addressed.

(e) Authority - The General Auditor and Audit Department staff members are authorized to:

(1) Have unrestricted access to all functions, records, property, and personnel, subject to the requirements of safekeeping, confidentiality, and applicable process;

(2) Have full and free access to the <u>ExecutiveAudit</u> Committee, subject to applicable law;

(3) Allocate resources, set frequencies, select the subject, determine scopes of work, and apply the techniques required to accomplish audit objectives; and

(4) Obtain the necessary assistance of personnel within units of the District where they perform audits, as well as other specialized services from within or outside the District.

The General Auditor and Audit Department staff are not authorized to:

(1) Perform any operational duties for the District;

(2) Initiate or approve accounting transactions external to the Audit Department; or

(3) Direct the activities of any District employee not employed by the Audit Department, except to the extent such employees have been appropriately assigned to auditing teams or to otherwise assist the internal auditors.

This Charter shall be reviewed at least annually by the <u>ExecutiveAudit</u> Committee and Board of Directors.

#### § 6453. Authority to Obtain Professional Services.

The General Auditor is authorized to employ the services of independent auditors or other professional or technical consultants to advise or assist them in performing their assigned duties as may be required or as they deem necessary provided that the amount to be expended in fees, costs, and expenses under any one contract in any one year shall not exceed \$100,000. External auditors, while employed as external auditors for Metropolitan, are prohibited from performing any other consulting work for Metropolitan or performing any work for other clients that conflicts, or may conflict, with their responsibilities as Metropolitan's external auditors. These prohibitions shall be included in Metropolitan's agreements with external auditors. The

Whenever the General Auditor enters into services agreements under the authority granted by this section, he or she shall inform the ExecutiveAudit Committee whenever they exercise the authority granted under this section and thereafter shall report periodically on such agreements to the committee. and they shall further report quarterly to the Legal and Claims Committee concerning any agreements entered into under this section.

#### § 6451. Audit Department Charter.

(a) Mission and Scope of Work - The mission of the Audit Department is to provide independent, professional, objective assurance and consulting services designed to add value and improve Metropolitan's operations. It helps the District accomplish its objectives by using a proactive, systematic approach to evaluate and improve the effectiveness of governance, risk management, and internal control. The scope of work of the Audit Department is to determine whether the District's network of governance, risk management, and internal control, as

designed and represented by District management, is adequate and functioning in a manner to ensure:

(1) Risks are appropriately identified, managed and monitored;

(2) Significant financial, managerial and operating information is accurate, reliable and timely;

(3) Employees' actions are in compliance with policies, standards, procedures and applicable laws and regulations;

(4) Resources are acquired economically, used efficiently, and adequately protected;

(5) Programs, plans, and objectives are achieved;

(6) Quality and continuous improvement are fostered in the District's control process;

(7) Significant legislative or regulatory issues impacting the District are recognized and addressed appropriately; and

(8) Information technology is governed and systems and applications are securely deployed and monitored.

Opportunities for improving management internal control, efficiency and the District's image may be identified during audits. They will be communicated to the appropriate level of District management.

(b) Accountability - The General Auditor shall be accountable to the Board of Directors and the Audit Committee to:

(1) Advise on the adequacy and effectiveness of the District's processes for controlling its activities and managing its risks;

(2) Report significant issues related to the processes for controlling the activities of the District, including potential improvements to those processes, and provide information concerning such issues through to resolution; and

(3) Coordinate with other District control and monitoring functions (e.g., risk management, legal, finance, ethics, security, environmental).

(c) Professional Standards – The Audit Department shall govern itself by adherence to The Institute of Internal Auditors' mandatory guidance, including the Definition of Internal Auditing, the Code of Ethics, and the *International Standards for the Professional Practice of Internal Auditing (Standards)*. This mandatory guidance constitutes principles of the

fundamental requirements for the professional practice of internal auditing and for evaluating the effectiveness of the Audit Department's performance. These documents constitute the operating procedures for the department and constitute an addendum to the charter. The Institute of Internal Auditors' Practice Advisories, Practice Guides, and Position Papers shall also be adhered to as applicable. In addition, Audit Department staff shall adhere to Metropolitan's policies and procedures, the California Government Code; and the Audit Department's Policies and Procedures Manual.

(d) Responsibilities - The Audit Department shall carry out the following responsibilities:

(1) Develop and present a flexible annual audit plan to the Audit Committee for review and approval. This plan should be developed utilizing a risk-based methodology and should include risks or internal control concerns identified by Management or the Board of Directors;

(2) Report periodically to the Audit Committee and District management the status of the current year's audit plan and the sufficiency of department resources;

(3) Submit audit reports to the Audit Committee and District management communicating the General Auditor's opinion regarding the internal control structure, identifying significant control issues, and providing related recommendations;

(4) Evaluate the adequacy and timeliness of District management's responses to, and the corrective action taken on, all recommendations noted in such reports. Conduct follow-up reviews as necessary and periodically report to the Audit Committee the status of District management's progress;

(5) Ensure the selection, development and supervision of competent and professional audit staff;

(6) Perform a quality assurance program by which the General Auditor evaluates internal auditing activities against professional standards. Obtain an external quality assurance review as required by the *Standards*;

(7) Perform advisory services to assist District management in meeting its objectives. Examples may include facilitation, process design, training, and assessment services;

(8) Evaluate additions or changes in internal control processes coincident with their development and implementation;

(9) Keep the Audit Committee informed of significant emerging trends and best practices in internal auditing and governance;

(10) Assist in the investigation of significant suspected fraudulent activities within the District. Assure reporting to the Audit Committee on the results, as appropriate; and

7-8

(11) Coordinate with external auditors to minimize duplication of effort and to ensure that issues raised as a result of their review, are appropriately addressed.

(e) Authority - The General Auditor and Audit Department staff members are authorized to:

(1) Have unrestricted access to all functions, records, property, and personnel, subject to the requirements of safekeeping, confidentiality, and applicable process;

(2) Have full and free access to the Audit Committee, subject to applicable law;

(3) Allocate resources, set frequencies, select the subject, determine scopes of work, and apply the techniques required to accomplish audit objectives; and

(4) Obtain the necessary assistance of personnel within units of the District where they perform audits, as well as other specialized services from within or outside the District.

The General Auditor and Audit Department staff are not authorized to:

(1) Perform any operational duties for the District;

(2) Initiate or approve accounting transactions external to the Audit Department; or

(3) Direct the activities of any District employee not employed by the Audit Department, except to the extent such employees have been appropriately assigned to auditing teams or to otherwise assist the internal auditors.

This Charter shall be reviewed at least annually by the Audit Committee and Board of Directors.

## § 6453. Authority to Obtain Professional Services.

The General Auditor is authorized to employ the services of independent auditors or other professional or technical consultants to advise or assist them in performing their assigned duties as may be required or as they deem necessary provided that the amount to be expended in fees, costs, and expenses under any one contract in any one year shall not exceed \$100,000. External auditors, while employed as external auditors for Metropolitan, are prohibited from performing any other consulting work for Metropolitan or performing any work for other clients that conflicts, or may conflict, with their responsibilities as Metropolitan's external auditors. These prohibitions shall be included in Metropolitan's agreements with external auditors. Whenever the General Auditor enters into services agreements under the authority granted by this section, he or she shall inform the Audit Committee and thereafter shall report periodically on such agreements to the committee.

Administrative Code Amendments to Committee Oversight of Audit Duties and Functions

Item 7-8 April 8, 2025

## Item # 7-8

Oversight of Audit Responsibilities

# Subject

Approve amendments to the MWD Administrative Code to conform oversight of the General Auditor and Audit Department duties and responsibilities to the current committee structure, to streamline reporting on professional services agreements, and make a minor non-substantive change

## Purpose

To conform to the current committee structure

Recommendation Board action is required to amend the MWD Item # 7-8 Administrative Code **Fiscal Impact** Overview No fiscal impact Budgeted Not applicable **Presentation Length** 5 minutes

Purposes

# Conform to New Committee Structure

- Transfer oversight of Audit-related duties and functions from Executive to Audit Committee
- Streamline reporting on professional services agreements to a single committee, the Audit Committee

Board Options

# • Option #1

Approve amendments to the MWD Administrative Code to conform oversight of the General Auditor and Audit Department duties and responsibilities to the current committee structure, to streamline reporting on professional services agreements, and make a minor non-substantive change

• Option #2

Do not approve amendments

## Staff Recommendation

# • Option #1

Approve amendments to the MWD Administrative Code to conform oversight of the General Auditor and Audit Department duties and responsibilities to the current committee structure, to streamline reporting on professional services agreements, and make a minor non-substantive change

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

## **Board** Action

7-9

## • Board of Directors Legislation and Communications Committee

#### 4/8/2025 Board Meeting

Subject

Express support if amended for AB 523 (Irwin) Metropolitan water districts: alternate representative

#### **Executive Summary**

As proposed to be amended, AB 523 (Irwin) (Attachment 1) would allow any Metropolitan member agency with only one representative on the Metropolitan Board of Directors the ability to appoint a proxy to vote on behalf of the member agency representative whenever they are unavailable to attend a meeting or meetings of the Board of Directors.

AB 523 seeks to ensure that member agencies with only one board representative are able to have a seat at the table and provide equity and continuity of voting at meetings of the Board of Directors.

#### Proposed Action(s)/Recommendation(s) and Options

#### **Staff Recommendation: Option #1**

#### **Option #1**

Express support if amended for AB 523 (Irwin) Metropolitan water districts: alternate representative

Fiscal Impact: Absorbable administrative costs for processing of proxy vote authority.

**Business Analysis:** Ensure member agencies with only one Metropolitan director maintain the opportunity to vote on issues before the Board in the absence of their director.

#### **Option #2**

Take no action **Fiscal Impact:** Unknown **Business Analysis:** May affect the ability of member agencies with only one Metropolitan director to maintain the opportunity to vote on issues before the Board in the absence of their director.

#### **Alternatives Considered**

A prior version of this measure would have authorized member agencies with only one board seat the ability to appoint an alternate representative to the Board of Directors for the purpose of participating, deliberating, and voting when the primary member is absent. This authority provided much broader discretion to member agencies, but raised several concerns that led to the sponsors adopting a proxy approach.

## **Applicable Policy**

Metropolitan Water District Act Section 52 [Additional Directors]

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

## Related Board Action(s)/Future Action(s)

Minute Item 47538, dated June 24, 2008, Metropolitan's Board approved a similar proxy proposal that was passed by the Legislature but vetoed by then-Governor Schwarzenegger.

## **Summary of Outreach Completed**

This concept was discussed at the Metropolitan Board of Directors Legislation and Communications Committee, Member Agency Manager Meeting, Member Agency Legislative Coordinators meetings, and several regional member agency venues.

## California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

The proposed action is not defined as a project under CEQA because it involves organizational, or administrative activities; personnel-related actions; and/or general policy and procedure making that will not result in direct or indirect physical changes in the environment. (Public Resources Code Section 21065; State CEQA Guidelines Section 15378(b)(2) and (5).

#### **CEQA determination for Option #2:**

None required

## **Details and Background**

#### Background

AB 523 (Irwin) is sponsored by Eastern Municipal Water District and seeks to allow any member agency that only has one representative on the Metropolitan Board of Directors the ability to appoint a proxy to vote for the member agency when their primary representative is unable to attend a meeting or meetings of the Board.

This concept originated out of discussions through the Climate Adaptation Master Plan for Water process, which is intended to serve as a foundation for Metropolitan's policy and investment decisions to strengthen resilience and reliability of water supplies collectively and for individual member agencies. Through these discussions, governance and equity have been a key topic of conversation, where board composition and representation have been raised as an area of focus. In exploring this issue in more depth, the opportunity to allow for proxy members on the Metropolitan Board of Directors elevated as a solution that would allow for greater participation and engagement, without delving into the issues of changing the weighted vote allocations or broader changes to board governance.

#### Purpose

Metropolitan's current board structure provides that each member of the Board is entitled to cast one vote for each ten million dollars, or major fractional part thereof, of assessed valuation of property taxable for district purposes in the member public agency service area. Each member agency gets one member on Metropolitan's Board of Directors, plus additional members for each full 5 percent share of Metropolitan's total assessed valuation. This weighed vote structure has resulted in an outcome where 21 of Metropolitan's 26 member agencies currently only have one board representative. For member agencies with more than one board representative, as long as one representative is present, that member's vote carries the entire weighted share of votes for that member agency. However, when a member agency only has one board representative, if that one representative is not present, the entire member agency's vote share is unaccounted for. This proposal would ensure that member agencies with only one representative maintain their ability to have representation while supporting the continuity of board engagement.

#### **Specific Provisions**

As proposed to be amended, AB 523 (Irwin) would allow member agencies with only one board seat the ability to appoint a proxy to vote on behalf of the primary representative when that representative is absent. Specific provisions include:

- 1. A proxy designation could only be assigned to an existing member of the Metropolitan Board of Directors.
- 2. The bill provides that in order for a proxy vote to be authorized, the member agency must notify Metropolitan of the proxy designation in writing at least one business day prior to a meeting.
- 3. Proxy participation does not include assuming any board officer positions. If the chair were to send a proxy in their place, the vice chair would assume the chair's role.
- 4. Any proxy appointed to serve on behalf of a member agency representative also assumes any conflicts of interest of the representative they are voting on behalf of.
- 5. This measure also does not include a sunset date and will ensure that the MWD Act is not required to be reopened for purposes of future amendments.

#### **Considerations of Future Amendments**

Staff's recommended support position would narrowly apply to the version of the bill with the promised amendments (**Attachment 1**). Any hostile amendments adopted that go beyond the scope of this proposal would lead Metropolitan to adopt an oppose position. Metropolitan's position would therefore be a "support if amended" as shown in the March 19, 2025 amendments (**Attachment 1**).

Metropolitan staff had meetings with the author's office, and they are fully aware of the importance of maintaining the limited scope of this proposal. The author has committed to not allowing hostile amendments to be adopted and Eastern stated that it would also oppose any language that went beyond the intended scope.

While the chance of hostile amendments being forced into the bill is highly unlikely, there is a consensus amongst the parties involved to protect against any expansion to the scope of this proposal.

#### **Benefits of this Amended Version**

Limiting this authority to a proxy vote assigned to another member of the Board removes concerns about eroding board continuity and confidentiality of closed session meetings.

The proxy option also reduces cost pressure for agencies by ensuring that only existing board members can participate, which also reduces logistical challenges of making arrangements for a completely separate member.

The proxy option avoids concerns about expanding the Board of Directors and, because of this reduced risk, does not warrant a sunset provision.

#### **Highlight of Concerns**

Significant concerns were expressed with the prior version of this bill. At this time, no concerns have been expressed about allowing for the appointment of a proxy as defined by the bill. The only remaining concern stated is the risk of opening Metropolitan's Act to potentially hostile bill amendments, which the author and sponsor agreed to oppose.

## PROPOSED AMENDMENTS

#### PROPOSED AMENDMENTS TO ASSEMBLY BILL NO. 523

CALIFORNIA LEGISLATURE-2025-26 REGULAR SESSION

No. 523

**Introduced by Assembly Member Irwin** 

February 10, 2025

An act to amend Section 52 of the Metropolitan Water District Act (Chapter 209 of the Statutes of 1969), relating to metropolitan water districts.

#### LEGISLATIVE COUNSEL'S DIGEST

AB 523, as introduced, Irwin. Metropolitan water districts: alternate representative. proxy vote authorization.

Under the Metropolitan Water District Act, the board of a metropolitan water district is required to consist of at least one representative from each member public agency, as prescribed. The act authorizes each member public agency to appoint additional representatives not exceeding one additional representative for each 5% of the assessed valuation of property taxable for district purposes within the entire district that is within the boundaries of that member public agency.

The bill would authorize each member public agency that is entitled to designate or appoint only one representative to the board of directors to designate or appoint one alternate representative for the limited purpose of participating in a meeting of the board of directors when the member public agency's designated or appointed representative will be absent from the meeting. assign a proxy vote authorization to a representative of another member public agency that permits the assigned representative to cast votes on behalf of the assigning representative for an assigned meeting or meetings, as provided. The bill would prohibit the alternate representative from assuming any

# ARNn25 13050 05 03/19/25 03:01 PM SUBSTANTIVE

AB 523

officer position at that meeting, would require the member public agency to be responsible for any additional costs of the alternate representative's meeting participation, and would condition the alternate representative's participation in a meeting of the board of directors on the corresponding member public agency providing the district notice by 5 p.m. on the 5th business day prior to the meeting. The bill would make these provisions inoperative on January 1, 2031. require a proxy vote authorization to be memorialized by a written instrument, as specified. The bill would apply all provisions of law relating to conflicts of interest that apply to the assigning representative to the representative authorized to cast a proxy vote. The bill would also apply any conflict of interest of the assigning representative or the representative that is assigned a proxy vote authorization to that assigned representative for any conflicted item.

-2-

Vote: majority. Appropriation: no. Fiscal committee: no. State-mandated local program: no.

#### The people of the State of California do enact as follows:

Page 2 1 SECTION 1. Section 52 of the Metropolitan Water District 2 Act (Chapter 209 of the Statutes of 1969), as amended by Section 3 1 of Chapter 71 of the Statutes of 2019, is amended to read: 4 Sec. 52. (a) In addition to one representative, any member 5 public agency may designate and appoint one additional representative for each full 5 percent of the assessed valuation of 6 property taxable for district purposes within the entire district that 7 8 is within the member public agency, in which event all representatives present at a meeting of the board of directors when 9 a vote is taken shall cast, or may abstain from casting, an equal 10 11 share of the total vote to which the member public agency is 12 entitled.

(b) A member public agency shall not have fewer than the
number of representatives the member public agency had as of
January 1, 2019. This subdivision does not affect Section 55.

16 (c) (1) (A) Each *A representative of a* member public agency 17 that is entitled to designate or appoint only one representative to 18 the board of directors may designate or appoint one alternate 19 representative for the limited purpose of participating in a meeting 20 of the board of directors when the member public agency's 21 designated or appointed representative will be absent from the

Legislation and Communications Committee

Express support if amended for AB 523 (Irwin) Metropolitan water districts: alternate representative

Item 7-9 April 7, 2025

# Subject

Express support if amended for AB 523 (Irwin) Metropolitan Water Districts: Alternate Representative. The proposed action is not defined as a project under CEQA.

# Purpose

To deliberate and vote on the Board's position on active legislation impacting the Metropolitan Board of Directors.

# Summary

Author: Assemblymember Irwin (D-Thousand Oaks) Sponsor: Eastern Municipal Water District

Current bill text: Authorizes the appointment of an alternate board representative.

As proposed to be amended: This bill would allow board members to designate a proxy.

# Proposed Amendment

As proposed to be amended, would allow each member agency that only has one representative the ability to designate a proxy representative to vote in their place when the primary representative is unavailable.

Proxy must be another current Metropolitan board member.

This would not include a sunset provision.

# **Specific Provisions**

Participation of the proxy does not include assuming any board officer positions.

The proxy designation shall be memorialized by a written instrument and filed with the board secretary one business day in advance of the meeting.

Any conflict of interest that applies to the designating representative also applies to the proxy for purposes of voting on any conflicted items.

# **Consideration for Future Amendments**

Assemblymember Irwin committed to protecting the limited scope of this bill.

Metropolitan and Eastern MWD to oppose hostile amendments.

# Benefits of Proposed Amendments

Assigning the proxy to another member of the Board removes concerns with eroding board continuity and confidentiality.

Proxy option reduces cost pressure on designating member agencies.

Avoids concerns about expanding the Board of Directors and removes need to reopen MWD Act via a sunset provision

# Concerns with Proposal

Opening up the MWD Act exposes Metropolitan to risk of hostile amendments.

# Options

Option 1:

Express support if amended for AB 523 (Irwin) Metropolitan water districts: alternative representative

Option 2: Take no action

## Board of Directors Organization, Personnel and Effectiveness

### 4/8/2025 Board Meeting

7-10

## Subject

Approve the Metropolitan Water District of Southern California's salary schedules pursuant to CalPERS regulations; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

### **Executive Summary**

Pursuant to the California Code of Regulations, Section 570.5, Metropolitan's Board of Directors is required to approve an annual Salary Schedule, meeting specific requirements as outlined in the Code.

### Proposed Action(s)/Recommendation(s) and Options

#### **Staff Recommendation: Option #1**

#### **Option #1**

Approve the attached salary schedule

**Fiscal Impact:** There is no fiscal impact associated with this board action. **Business Analysis:** If approved, Metropolitan will be in compliance with the California Code of Regulations, Section 570.5 and the negotiated MOUs.

#### **Option #2**

Do not approve the salary schedule **Fiscal Impact:** None **Business Analysis:** If not approved, Metropolitan will not be in compliance with the California Code of Regulations, Section 570.5 and the negotiated MOUs.

## **Alternatives Considered**

#### Not applicable

## **Applicable Policy**

Metropolitan Water District Administrative Code Section 6207: Positions Authorized.

Metropolitan Water District Administrative Code Section 6208: Pay Rate Administration.

Metropolitan Water District Administrative Code Section 6500: Hourly Pay Rate Schedule.

Metropolitan Water District Administrative Code Section 11104: Delegations of Responsibilities.

#### Related Board Action(s)/Future Action(s)

Not applicable

## California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

The proposed action is not defined as a project under CEQA because it involves organizational, maintenance, or administrative activities; personnel-related actions; and/or general policy and procedure making that will not result in direct or indirect physical changes in the environment. (Public Resources Code Section 21065; State CEQA Guidelines Section 15378(b)(2) and (5)).

#### **CEQA determination for Option #2:**

None required

### **Details and Background**

#### Background

Pursuant to CalPERS regulations, California Code of Regulations, Section 570.5, employee salaries must be delineated in a salary schedule that meets the following requirements:

- 1. Approved and adopted by the employer's governing body according to the requirements of applicable public meeting laws.
- 2. Identifies the position title for every employee position.
- 3. Shows pay rate for each identified position, which may be stated as a single amount or amounts within a range.
- 4. Indicates the time base.
- 5. Is posted at the office of the employer or immediately accessible and available for public review from the employer during normal business hours or posted on the employer's internet website.
- 6. Indicates an effective date and date of any revisions.
- 7. Is retained by the employer and available for public inspection for not less than five years.
- 8. Does not reference another document in lieu of disclosing the pay rate.

To comply with these requirements, The Metropolitan Water District of Southern California's Salary Schedules for the following dates are attached for the Board's approval.

Effective date:

- Metropolitan Water District of Southern California Salary Schedule effective June 26, 2022 (Attachment 1)
- Metropolitan Water District of Southern California Salary Schedule effective August 21, 2022 (Attachment 2)
- Metropolitan Water District of Southern California Salary Schedule effective June 25, 2023 (Attachment 3)
- Metropolitan Water District of Southern California Salary Schedule effective June 23, 2024 (Attachment 4)
- Metropolitan Water District of Southern California Salary Schedule effective January 29, 2025 (Attachment 5)

The approval of these salary schedules will ensure Metropolitan's compliance with the Code, the negotiated MOUs, and Administrative Codes. This will also ensure employee's retirement calculations will be based on the appropriate rate of pay.

# Organization, Personnel and Effectiveness Committee Approve Employee Salary Schedule Pursuant to CalPERS Regulations

Item 7-10 April 7, 2025 Purpose and Background

- Metropolitan's Board is required by CalPERS to annually approve and adopt a salary schedule.
- Doing so does not amend or revise Memoranda of Understanding (MOUs), which have already been approved by the Board.

Governing Authority

- California Code of Regulations, Section 570.5
- Pay rate for calculating pensions specifically limited to amount listed on a *pay schedule*
- Pay schedule must
  - Be approved and adopted by the Board
  - Identify the position title for every employee
  - Show the pay rate for each identified position
  - Indicate the effective date
  - Meet public posting requirements

Changes to Salary Schedule for 2025 • Implements changes from the Board-approved MOUs

• Implements Board-approved salary changes for Department Heads

• Implements any newly created job titles/classifications

# **Board Options**

• Option #l

 $\begin{array}{l} \mbox{Approve the attached salary schedules} \\ \mbox{Option $\#2$} \\ \mbox{Do not approve the salary schedule} \end{array}$ 

# Staff Recommendation

• Option #1 <u>Appr</u>ove the attached salary schedules.

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

## **Board** Action

## Board of Directors One Water and Adaptation Committee

#### 4/8/2025 Board Meeting

7-11

#### Subject

Authorize the General Manager to extend California Contractor Forbearance for Intentionally Created Surplus; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

#### **Executive Summary**

Staff seeks authorization for the General Manager to extend forbearance for Intentionally Created Surplus (ICS) to match the period of time covered by the 2007 Colorado River Interim Guidelines for Lower Basin Shortages and the Coordinated Operations for Lake Powell and Lake Mead. California forbearance for ICS currently terminates on December 31, 2025, for the creation of ICS and on December 31, 2035, for delivery of ICS. This extension would provide forbearance for ICS creation through December 31, 2026, and through December 31, 2036, for delivery of ICS.

#### Proposed Action(s)/Recommendation(s) and Options

#### **Staff Recommendation: Option #1**

#### **Option #1**

Authorize the General Manager to extend California Contractor Forbearance for Intentionally Created Surplus.

#### Fiscal Impact: None

**Business Analysis:** Metropolitan would extend its forbearance for ICS in the Lower Basin Forbearance Agreement to match the 2007 Interim Guidelines for Coordinated Operations of Lake Powell and Lake Mead.

#### **Option #2**

Direct the General Manager to not extend California Contractor Forbearance for Intentionally Created Surplus.

#### Fiscal Impact: None

**Business Analysis:** Metropolitan would not extend its forbearance for ICS which would increase uncertainty for ICS creation through 2026 and ICS delivery through 2036.

#### **Alternatives Considered**

No alternatives were considered.

#### **Applicable Policy**

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

#### Related Board Action(s)/Future Action(s)

By Minute Item 47327 in December 2007, Metropolitan's Board approved agreements that included forbearance of ICS Exhibits through December 31, 2025.

#### California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

The proposed action is exempt from CEQA because it involves an agreement associated with the operation of existing public water conveyance facilities, involving negligible or no expansion of existing or former use and no possibility of significantly impacting the physical environment. (State CEQA Guidelines Section 15301.)

#### **CEQA determination for Option #2:**

None required

#### **Details and Background**

#### Background

The Record of Decision for the 2007 Colorado River Interim Guidelines for Lower Basin Shortages and the Coordinated Operations for Lake Powell and Lake Mead (2007 Interim Guidelines) govern Colorado River water supply and reservoir operating decisions, including the creation of ICS. These guidelines terminate on December 31, 2025. However, since the Annual Operating Plan for 2026 is adopted in 2025, the operations for 2026 will be determined under the 2007 Interim Guidelines. Therefore, the 2007 Interim Guidelines will effectively govern the system through 2026, with the accounting and delivery of ICS through 2036. The 2007 Lower Colorado River Basin Intentionally Created Surplus Forbearance Agreement (2007 Forbearance Agreement), to which Metropolitan and other Colorado River contractors are parties, also terminates on December 31, 2025. However, the 2007 Forbearance Agreement does not have the same mechanism to effect 2026 operations. Thus, despite terminating at the same time, in practice, there is a one-year discrepancy between the 2007 Interim Guidelines and the 2007 Forbearance Agreement regarding the creation and delivery of ICS.

#### **Extending California Forbearance**

California contractor forbearance of ICS is necessary because, under the California priority system, Colorado River water conserved by a higher-priority user is available to the next lower-priority user. For additional background on the purpose and mechanics of forbearance by Metropolitan, please see the June 2024 presentation on that subject available at:

https://mwdh2o.legistar.com/View.ashx?M=F&ID=13012478&GUID=5C7533D3-F668-4FC6-A12E-EACEF0DF52DD. Therefore, to ensure Metropolitan's ability to create and deliver ICS through the period in which the 2007 Interim Guidelines effectively govern the Colorado River, staff recommends extending the period of time covered by the 2007 Forbearance Agreement. This extension would provide forbearance for the creation of ICS through 2026 and for delivery of ICS through 2036.

3/24/2025 Brandon J. Goshi Date Acting Manager. Water Resource Management 3/24/2025 Deven N. Upadhyay Date General Manager

### One Water and Adaptation Committee

Authorize Forbearance of Intentionally Created Surplus in 2026

Item 7-11 April 7, 2025 Item 7-II Authorize Forbearance of Intentionally Created Surplus in 2026

### Subject

Authorize the General Manager to extend California Forbearance for Intentionally Created Surplus; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

Purpose

To obtain Board approval to extend California Forbearance for Intentionally Created Surplus (ICS) in 2026

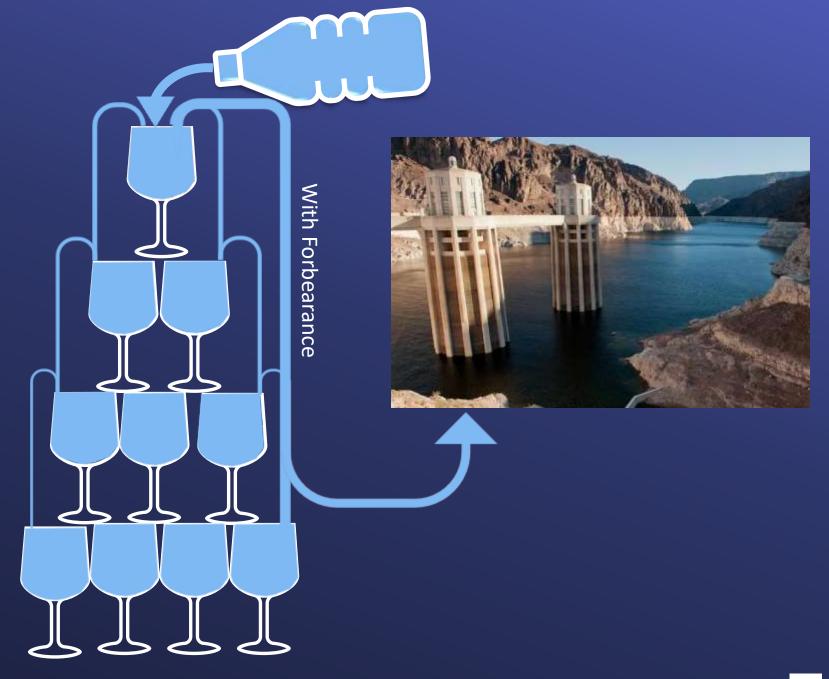

### Recommendation and Fiscal Impact

Authorize forbearance the General Manager to extend California Contractor Forbearance for Intentionally Created Surplus

Budget

No budget impact

Forbearance Allows Conserved Water To be Moved Out of Priority

# Metropolitan's Forbearance is Necessary

Forbearance agreements are the mechanism for ensuring conserved water stays in Lake Mead under the priority system

# Extend California Contractor Forbearance for ICS through 2026

	2007 Interim Guidelines	ICS Forbearance Agreement
Date Agreement Signed	December 13, 2007	December 13, 2007
Expiration Date	December 31, 2025	December 31, 2025
Does it Effect Operations post- Expiration?	Yes	No

Extension achieves consistency between agreements effective periods

# **Board Options**

### • Option #1

Authorize the General Manager to extend California Contractor Forbearance for Intentionally Created Surplus.

### • Option #2

Direct the not to extend California Contractor Forbearance for Intentionally Created Surplus

# Staff Recommendation

• Option #1

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

## **Board** Action

### Board of Directors One Water and Adaptation Committee

#### 4/8/2025 Board Meeting

#### 7-12

#### Subject

Authorize the General Manager to terminate the Foothill Area Conjunctive Use Program Agreement; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

#### **Executive Summary**

Staff recommends that the General Manager be authorized to enter into agreements to terminate six inactive Conjunctive Use Program (CUP) agreements. The six inactive agreements include Compton, Foothill Area, Live Oak Basin, Long Beach, Long Beach Expansion into Lakewood, and Orange County CUPs. The six programs have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes. Staff has coordinated with the member agencies involved with the listed projects, and the consensus of both member agencies and staff is to terminate the agreements.

The subject of this board action is to terminate the Foothill CUP agreement. Termination of the Foothill CUP agreement will reduce Metropolitan costs in the current biennium by approximately \$17,000 and \$35,000 in future years due to the elimination of administrative fee payments that would be made by Metropolitan if the agreement remains in effect. A summary of the CUP programs is provided in **Attachment 1**.

#### Proposed Action(s)/Recommendation(s) and Options

#### Staff Recommendation: Option #1

#### **Option #1**

Authorize the General Manager to terminate the Foothill Area Conjunctive Use Program Agreement.

**Fiscal Impact:** Terminating the agreement would relieve Metropolitan of administrative fees and result in a reduction of budgeted Supply Program costs of \$16,882 in FY2025/26 and a total reduction of \$51,923 through the term of the existing agreement.

**Business Analysis:** This action will reduce Metropolitan costs in the current biennium by approximately \$17,000 and \$35,000 in future years due to the elimination of administrative fee payments that would have been made by Metropolitan if the agreements had remained in effect.

#### **Option #2**

Do not authorize the General Manager to terminate the Foothill Area CUP agreement, which would allow the Foothill Area CUP agreement to terminate on its current schedule.

Fiscal Impact: Cost savings or increased revenue in this biennium will not be achieved.

**Business Analysis:** Not terminating now will leave this agreement on its original schedule, and no cost savings or increased revenue will be realized in this biennium. Revenue generation would be deferred to 2028.

#### **Applicable Policy**

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

Metropolitan Water District Administrative Code Section 4209: Contracts

Metropolitan Water District Administrative Code Section 4507: Billing and Payment of Water Deliveries

By Minute Item 43514, dated April 13, 1999, the Board adopted the Water Surplus and Drought Management Plan.

By Minute Item 43860, dated Jan. 11, 2000, the Board approved strategies for implementing Groundwater Storage Programs within Metropolitan's service area.

By Minute Item 44210, dated Oct. 17, 2000, the Board adopted Resolution 8706 to accept the grant for funds from Proposition 13.

#### Related Board Action(s)/Future Action(s)

By Minute Item 44427, dated April 10, 2001, the Board gave authority to finalize agreement terms for Groundwater Conjunctive Use Projects using Proposition 13 funds.

By Minute Item 44871, dated May 14, 2002, the Board approved the Long Beach CUP.

By Minute Item 45035, dated October 8, 2002, the Board approved the Live Oak Basin CUP.

By Minute Item 45205, dated February 11, 2003, the Board approved the Foothill Area CUP.

Board Report dated May 11, 2004, reporting on the selection of Groundwater Storage Programs using remaining Proposition 13 funds.

By Minute Item 46073, dated January 11, 2005, the Board approved the Compton CUP.

By Minute Item 46301, dated July 12, 2005, the Board approved the Long Beach CUP Phase 2 expansion into Lakewood.

#### Summary of Outreach Completed

Presented to Member Agency Managers Meeting on February 11, 2025

#### California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

The proposed action is not defined as a project under CEQA because it will not result in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment. (State CEQA Guidelines Section 15378(a)).

#### **CEQA determination for Option #2:**

None required

#### **Details and Background**

#### Background

The purpose of the CUP program is to store water during wet years and extract the stored water during dry years upon a call by Metropolitan. Since 2002, more than 350,000 acre-feet has been stored in the nine CUP programs. Also, the CUP program has generated a total of about 266,000 acre-feet of yield that has benefited Metropolitan during drought and emergencies.

Metropolitan seeks ways to streamline the current program and identify measures to reduce costs and generate revenue in the CUP program. To achieve this goal, Metropolitan proposes to terminate six inactive CUP programs during this fiscal year to reduce future administrative and reimbursement costs and to generate revenue. This proposed action would terminate the Foothill Area CUP agreement.

#### History of the CUP Program

The 1996 Integrated Resources Plan (IRP) identified groundwater storage as an important part of Metropolitan's future water resource mix. The IRP also identified that the remaining need for long-term storage is 450,000 acre-feet, with 150,000 acre-feet per year of dry-year production.

In January 2000 (Board Item 9-5), the Board approved a hybrid framework for the development of in-region dryyear CUP. This hybrid framework for CUP included two components:

- A case-by-case approach where member agencies could submit proposals to Metropolitan based upon their needs and expected benefits, or Metropolitan may approach a member agency based upon an assessment of potential regional benefits; and
- A request for proposal (RFP) approach where member agencies would submit proposals that would be competitively ranked against specific criteria. This approach tries to standardize all Groundwater Storage Programs; however, experience has shown that not all local groundwater programs are alike. Local issues such as water quality, basin adjudication or management, and local and regional benefits are all unique, making it difficult to rank projects using specific criteria.

In January 2000, the Board also established principles for the development of conjunctive use in the service area. These principles are summarized in **Attachment 1**.

In March 2000, 65 percent of California voters approved Proposition 13 (Prop. 13), authorizing the state of California to sell \$1.97 billion in general obligation bonds for water-related projects throughout the state. In May 2020, the Governor's Annual Budget Act appropriated to the Department of Water Resources local assistance grant funds from Prop 13. From these funds, the state allocated \$45 million to Metropolitan to help finance Southern state Water Reliability Projects targeting conjunctive use projects within the Metropolitan's service area.

In November 2000, Metropolitan released an RFP for the CUP Program. Nine CUP programs were selected and approved by the Board and received funding from Prop 13 in the amount of \$45 million and Metropolitan in the amount of \$27 million. These CUP programs included: the Chino Basin, Compton, Elsinore, Foothill Area, Live Oak, Long Beach, Long Beach Expansion into Lakewood, Orange County, and Upper Claremont CUPs. Each CUP agreement has a term of 25 years with termination between 2027 and 2031, depending upon when the agreement was executed. This proposed action would terminate the Foothill Area CUP. Without this action, the Foothill Area CUP would terminate on February 11, 2028. Each agreement also includes provisions for capital facilities needed to perform for the program. Program facilities included treatment facilities, new wells, conveyance systems, and recharge facilities. The final disbursement of the Prop 13 and Metropolitan funding for the completion of all funded CUP facilities was achieved in May 2009.

The total storage of the CUP programs is 211,889 acre-feet with a dry-year yield of 70,296 acre-feet per year. The current balance in the CUP program is 83,607 acre-feet. Storage amounts for all the CUP programs are shown in **Attachment 1**.

#### **Need for Action**

Six CUP programs have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes. Over time, Metropolitan has developed alternative approaches and programs for coordinated groundwater storage management that can continue to provide regional benefits that have previously come from these inactive CUP programs. Metropolitan has discussed the termination of these programs with the affected member agencies. As a result of these discussions, the program partners have expressed interest in terminating their programs early. The six inactive agreements include Compton, Foothill Area, Live Oak Basin, Long Beach, Long Beach Expansion into Lakewood, and Orange County CUPs. Regional dry-year storage levels are currently at a record high of 3.8 million acre-feet. The proposed action is not likely to significantly impact the availability of dry-year supplies. Further, termination of the inactive programs does not impact the requirements of the Prop 13 funding received and disbursed to the participating agencies for the development of the programs.

3/24/2025

Date

#### **Proposed Action and General Terms**

Staff recommends that the Board authorize the General Manager to enter into agreements to terminate six inactive CUP agreements. New agreements are currently required to allow for termination of the existing agreements. This proposed action would terminate the Foothill Area CUP agreement. The existing CUP agreements do not include standard termination language, which would have allowed the parties to initiate early terminations upon written notice.

#### **General Terms**

The following conditions will apply to the agreements:

- Metropolitan and the six participating member agencies will enter into individual agreements.
- Termination of the six agreements will be effective by June 30, 2025.
- The participating member agency would not be required to pay back any funds received from Metropolitan during the term of the agreement.
- No money would be due upon termination by either party unless there is water remaining in a CUP account.
- Since there is no water in the Foothill CUP account, no money is due.

#### **Project Milestone(s)**

Termination of the Foothill Area CUP will be effective June 30, 2025.

Bralldon J. Go**ś**hi Interim Manager, Water Resource Management

3/24/2025 Date even N. Upac General Manager

Summary of Conjunctive Use Programs

One Water and Adaptation Committee Authorize the General Manager to Terminate Conjunctive Use Program Agreements

Items 7-12, 7-13, 7-14, 7-15, 7-16, and 7-17 April 7, 2025

# Items 7-l2 through 7-l7

Termination of Six CUP Agreements

# Subject

Authorize the General Manager to terminate Conjunctive Use Program agreements; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA.

# Purpose

Request Board approval to terminate inactive Conjunctive Use Program agreements

# Next Steps

Execute Conjunctive Use Program termination agreements with member agencies

### Overview

The purpose of the **Conjunctive Use** Program (CUP) is to store water during wet years and extract

the stored water during dry years

9 CUP programs

Total contractual storage: 212 TAF

Total put: 53 TAFY

Total take: 70 TAFY

# History of Conjunctive Use Program (CUP)

### Approval

- Board adopted principles for CUP Program in 2000
- Voters approve Proposition 13 (Prop 13) in 2000
- Metropolitan releases RFQ for proposed CUP programs

### Agreements & Funding

- 9 CUP agreements are executed from 2002-2006
- 25-year term
- \$45 million from the Department of Water Resources (DWR) from Prop 13
- \$27 million from Metropolitan

### **Ongoing Operations**

- 350,000 acre-feet has been stored in CUP program since 2002
- 266,000 acre-feet of dry-year yield that has benefited Metropolitan during drought and emergencies.

# **Conjunctive Use Programs Proposed for Termination**

- Compton •
- **Foothill Area** •
- Live Oak  $\bullet$
- Long Beach Phase 1 •
- Long Beach Phase 2 (Lakewood) •
- **Orange County** •

# Need for Termination Agreements

- The six CUP programs identified for termination have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes.
- Metropolitan and the six CUP program participants have mutually agreed to early termination.
- The original agreements do not include Metropolitan's standard termination language, which allows either party to terminate early upon written notice. Therefore, a new termination agreement is needed.

# **Terms of Termination**

projected cost to extract the stored water.

# Benefits of Termination to Metropolitan in this Biennium

### Cost savings

- \$2.1 million
- Savings of future annual administrative fees
- Cost share of future O&M and power credits

- \$9.3 million
- Sale of remaining water in Long Beach CUP account (6,678 AF) in this biennium

Additional

Revenue

# Options

- Option 1 Authorize the General Manager to terminate the following Conjunctive Use Program agreements.
  - Compton
  - Foothill Area
  - Live Oak
  - Long Beach Phase 1
  - Long Beach Phase 2 (Lakewood)
  - Orange County
- Option 2 Do not authorize the General Manager to terminate the CUP agreements, which would allow the CUP agreements to terminate on their current schedule.

# Staff Recommendation

Option 1 •

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

## **Board** Action

### Board of Directors One Water and Adaptation Committee

#### 4/8/2025 Board Meeting

7-13

#### Subject

Authorize the General Manager to terminate the Live Oak Basin Conjunctive Use Program Agreement; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

#### **Executive Summary**

Staff recommends that the General Manager be authorized to enter into agreements to terminate six inactive Conjunctive Use Program (CUP) agreements. The six inactive agreements include Compton, Foothill Area, Live Oak Basin, Long Beach, Long Beach Expansion into Lakewood, and Orange County CUPs. The six programs have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes. Staff has coordinated with the member agencies involved with the listed projects, and the consensus of both member agencies and staff is to terminate the agreements.

The subject of this board action is to terminate the Live Oak CUP agreement with the Three Valleys Municipal Water District. Termination of the Live Oak CUP agreement will reduce Metropolitan costs in the current biennium by approximately \$4,000 and \$4,000 in future years due to the elimination of administrative fee payments that would be made by Metropolitan if the agreement remains in effect. A summary of the CUP programs is provided in **Attachment 1**.

#### Proposed Action(s)/Recommendation(s) and Options

#### **Staff Recommendation: Option #1**

#### **Option #1**

Authorize the General Manager to terminate the Live Oak Basin Conjunctive Use Program Agreement.

**Fiscal Impact:** Terminating the agreement would relieve Metropolitan of administrative fees and result in a reduction of budgeted Supply Program costs of \$4,000 in FY2025/26 and a total reduction of \$8,000 through the term of the existing agreement.

**Business Analysis:** This action will reduce Metropolitan costs in the current biennium by approximately \$4,000 and \$4,000 in future years due to the elimination of administrative fee payments that would have been made by Metropolitan if the agreements had remained in effect.

#### **Option #2**

Do not authorize the General Manager to terminate the Live Oak CUP agreement, which would allow the Live Oak CUP agreement to terminate on its current schedule.

Fiscal Impact: Cost savings or increased revenue in this biennium will not be achieved.

**Business Analysis:** Not terminating now will leave this agreement on its original schedule, and no cost savings or increased revenue will be realized in this biennium. Revenue generation would be deferred to 2027.

#### **Applicable Policy**

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

Metropolitan Water District Administrative Code Section 4209: Contracts

Metropolitan Water District Administrative Code Section 4507: Billing and Payment of Water Deliveries

By Minute Item 43514, dated April 13, 1999, the Board adopted the Water Surplus and Drought Management Plan

By Minute Item 43860, dated Jan. 11, 2000, the Board approved strategies for implementing Groundwater Storage Programs within Metropolitan's service area.

By Minute Item 44210, dated Oct. 17, 2000, the Board adopted Resolution 8706 to accept the grant for funds from Proposition 13.

#### Related Board Action(s)/Future Action(s)

By Minute Item 44427, dated April 10, 2001, the Board gave authority to finalize agreement terms for Groundwater Conjunctive Use Projects using Proposition 13 funds.

By Minute Item 44871, dated May 14, 2002, the Board approved the Long Beach CUP.

By Minute Item 45035, dated October 8, 2002, the Board approved the Live Oak Basin CUP.

By Minute Item 45205, dated February 11, 2003, the Board approved the Foothill Area CUP.

Board Report dated May 11, 2004, reporting on the selection of Groundwater Storage Programs using remaining Proposition 13 funds.

By Minute Item 46073, dated January 11, 2005, the Board approved the Compton CUP.

By Minute Item 46301, dated July 12, 2005, the Board approved the Long Beach CUP Phase 2 expansion into Lakewood.

#### **Summary of Outreach Completed**

Presented to Member Agency Managers Meeting on February 11, 2025

#### California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

The proposed action is not defined as a project under CEQA because it will not result in either a direct physical change in the environment, or a reasonably foreseeable indirect physical change in the environment. (State CEQA Guidelines Section 15378(a)).

#### **CEQA determination for Option #2:**

None required

#### **Details and Background**

#### Background

The purpose of the CUP program is to store water during wet years and extract the stored water during dry years upon a call by Metropolitan. Since 2002, more than 350,000 acre-feet has been stored in the nine CUP programs. Also, the CUP program has generated a total of about 266,000 acre-feet of yield that has benefited Metropolitan during drought and emergencies.

Metropolitan seeks ways to streamline the current program and identify measures to reduce costs and generate revenue in the CUP program. To achieve this goal, Metropolitan proposes to terminate six inactive CUP programs

during this fiscal year to reduce future administrative and reimbursement costs and to generate revenue. This proposed action would terminate the Live Oak CUP agreement.

### History of the CUP Program

The 1996 Integrated Resources Plan (IRP) identified groundwater storage as an important part of Metropolitan's future water resource mix. The IRP also identified that the remaining need for long-term storage is 450,000 acre-feet, with 150,000 acre-feet per year of dry-year production.

In January 2000 (Board Item 9-5), the Board approved a hybrid framework for the development of in-region dryyear CUP. This hybrid framework for CUP included two components:

- A case-by-case approach where member agencies could submit proposals to Metropolitan based upon their needs and expected benefits, or Metropolitan may approach a member agency based upon an assessment of potential regional benefits; and
- A request for proposal (RFP) approach where member agencies would submit proposals that would be competitively ranked against specific criteria. This approach tries to standardize all Groundwater Storage Programs; however, experience has shown that not all local groundwater programs are alike. Local issues such as water quality, basin adjudication or management, and local and regional benefits are all unique, making it difficult to rank projects using specific criteria.

In January 2000, the Board also established principles for the development of conjunctive use in the service area. These principles are summarized in **Attachment 1**.

In March 2000, 65 percent of California voters approved Proposition 13 (Prop. 13), authorizing the state of California to sell \$1.97 billion in general obligation bonds for water-related projects throughout the state. In May 2020, the Governor's Annual Budget Act appropriated to the Department of Water Resources local assistance grant funds from Prop 13. From these funds, the state allocated \$45 million to Metropolitan to help finance Southern state Water Reliability Projects targeting conjunctive use projects within the Metropolitan's service area.

In November 2000, Metropolitan released an RFP for the CUP Program. Nine CUP programs were selected and approved by the Board and received funding from Prop 13 in the amount of \$45 million and Metropolitan in the amount of \$27 million. These CUP programs included: the Chino Basin, Compton, Elsinore, Foothill Area, Live Oak, Long Beach, Long Beach Expansion into Lakewood, Orange County, and Upper Claremont CUPs. Each CUP agreement has a term of 25 years with termination between 2027 and 2031, depending upon when the agreement was executed. Each agreement also includes provisions for capital facilities needed to perform for the program. Program facilities included treatment facilities, new wells, conveyance systems, and recharge facilities. The final disbursement of the Prop 13 and Metropolitan funding for the completion of all funded CUP facilities was achieved in May 2009.

The total storage of the CUP programs is 211,889 acre-feet with a dry-year yield of 70,296 acre-feet per year. The current balance in the CUP program is 83,607 acre-feet. Storage amounts for all the CUP programs are shown in **Attachment 1**.

### **Need for Action**

Six CUP programs have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes. Over time, Metropolitan has developed alternative approaches and programs for coordinated groundwater storage management that can continue to provide regional benefits that have previously come from these inactive CUP programs. Metropolitan has discussed the termination of these programs with the affected member agencies. As a result of these discussions, the program partners have expressed interest in terminating their programs early. The six inactive agreements include Compton, Foothill Area, Live Oak Basin, Long Beach, Long Beach Expansion into Lakewood, and Orange County CUPs. This action would terminate the Live Oak CUP agreement. Without this action, the Live Oak CUP agreement would terminate on October 21, 2027. Regional dry-year storage levels are currently at a record high of 3.8 million acre-feet. The proposed action is not likely to significantly impact the availability of dry-year supplies.

Further, termination of the inactive programs does not impact the requirements of the Prop 13 funding received and disbursed to the participating agencies for the development of the programs.

#### **Proposed Action and General Terms**

Staff recommends that the Board authorize the General Manager to enter into agreements to terminate six inactive CUP agreements. New agreements are currently required to allow for termination of the existing agreements. The existing CUP agreements do not include standard termination language, which would have allowed the parties to initiate early terminations upon written notice.

#### **General Terms**

The following conditions will apply to the agreements:

- Metropolitan and the six participating member agencies will enter into individual agreements.
- Termination of the Live Oak CUP agreement will be effective by June 30, 2025.
- The participating member agency would not be required to pay back any funds received from Metropolitan during the term of the agreement.
- No money would be due upon termination by either party unless there is water remaining in a CUP account.
- No water is remaining in the Live Oak CUP account. Therefore, no reimbursement for extraction costs will be required.

#### **Project Milestone**

Termination of the Live Oak CUP will be effective June 30, 2025.

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

### **Board** Action

### Board of Directors One Water and Adaptation Committee

### 4/8/2025 Board Meeting

### 7-14

### Subject

Authorize the General Manager to terminate the Long Beach Conjunctive Use Program Agreement; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

### **Executive Summary**

Staff recommends that the General Manager be authorized to enter into agreements to terminate six inactive Conjunctive Use Program (CUP) agreements. The six inactive agreements include Compton, Foothill Area, Live Oak Basin, Long Beach, Long Beach Expansion into Lakewood, and Orange County CUPs. The six programs have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes. Staff has coordinated with the member agencies involved with the listed projects, and the consensus of both member agencies and staff is to terminate the agreements.

The subject of this board action is to terminate the Long Beach CUP agreement. Termination of the Long Beach CUP agreement will reduce Metropolitan costs in the current biennium by approximately \$26,000 and \$27,000 in future years due to the elimination of administrative fee payments, and approximately \$1.6 million in avoided costs related to the sharing of extraction costs that would otherwise be made by Metropolitan to Long Beach if the agreement were to remain in effect. This action will also result in \$9.3 million in additional revenue from the sale of the remaining water to Long Beach in the current biennium. A summary of the CUP programs is provided in **Attachment 1**.

### Proposed Action(s)/Recommendation(s) and Options

### Staff Recommendation: Option #1

### **Option #1**

Authorize the General Manager to terminate the Long Beach Conjunctive Use Program Agreement.

**Fiscal Impact:** Terminating the agreement would relieve Metropolitan of administrative fees and result in a reduction of budgeted Supply Program costs of \$26,409 in FY2024/25 and \$53,478 through the term of the existing agreement. In addition, the cost-sharing agreement for financial credits offsetting O&M and power costs will result in a total reduction of \$1.6 million in expected expenditures from the Supply Program budget. **Business Analysis:** This action will reduce Metropolitan costs in the current biennium by approximately \$1.7 due to the elimination of administrative fee payments and share of the extraction credits that would have been made by Metropolitan if the agreements had remained in effect. In addition, Metropolitan would generate an additional \$9.3 million in revenue due to the sale of the 6,678 acre-feet remaining in the account.

### **Option #2**

Do not authorize the General Manager to terminate the Long Beach CUP agreement, which would allow the Long Beach CUP agreement to terminate on its current schedule.

Fiscal Impact: Cost savings or increased revenue in this biennium will not be achieved.

**Business Analysis:** Not terminating now will leave this agreement on its original schedule, and no cost savings or increased revenue will be realized in this biennium. Revenue generation would be deferred to 2027.

### **Details and Background**

### Background

The purpose of the CUP program is to store water during wet years and extract the stored water during dry years upon a call by Metropolitan. Since 2002, more than 350,000 acre-feet has been stored in the nine CUP programs. Also, the CUP program has generated a total of about 266,000 acre-feet of yield that has benefited Metropolitan during drought and emergencies.

Metropolitan seeks ways to streamline the current program and identify measures to reduce costs and generate revenue in the CUP program. To achieve this goal, Metropolitan proposes to terminate six inactive CUP programs during this fiscal year to reduce future administrative and reimbursement costs and to generate revenue. This proposed action would terminate the Long Beach CUP.

### History of the CUP Program

The 1996 Integrated Resources Plan (IRP) identified groundwater storage as an important part of Metropolitan's future water resource mix. The IRP also identified that the remaining need for long-term storage is 450,000 acre-feet, with 150,000 acre-feet per year of dry-year production.

In January 2000 (Board Item 9-5), the Board approved a hybrid framework for the development of in-region dryyear CUP. This hybrid framework for CUP included two components:

- A case-by-case approach where member agencies could submit proposals to Metropolitan based upon their needs and expected benefits, or Metropolitan may approach a member agency based upon an assessment of potential regional benefits; and
- A request for proposal (RFP) approach where member agencies would submit proposals that would be competitively ranked against specific criteria. This approach tries to standardize all Groundwater Storage Programs; however, experience has shown that not all local groundwater programs are alike. Local issues such as water quality, basin adjudication or management, and local and regional benefits are all unique, making it difficult to rank projects using specific criteria.

In January 2000, the Board also established principles for the development of conjunctive use in the service area. These principles are summarized in **Attachment 1**.

In March 2000, 65 percent of California voters approved Proposition 13 (Prop. 13), authorizing the state of California to sell \$1.97 billion in general obligation bonds for water-related projects throughout the state. In May 2020, the Governor's Annual Budget Act appropriated to the Department of Water Resources local assistance grant funds from Prop 13. From these funds, the state allocated \$45 million to Metropolitan to help finance Southern state Water Reliability Projects targeting conjunctive use projects within the Metropolitan's service area.

In November 2000, Metropolitan released an RFP for the CUP Program. Nine CUP programs were selected and approved by the Board and received funding from Prop 13 in the amount of \$45 million and Metropolitan in the amount of \$27 million. These CUP programs included: the Chino Basin, Compton, Elsinore, Foothill Area, Live Oak, Long Beach, Long Beach Expansion into Lakewood, Orange County, and Upper Claremont CUPs. Each CUP agreement has a term of 25 years with termination between 2027 and 2031, depending upon when the agreement was executed. Without this action, the Long Beach CUP agreement will terminate on June 30, 2027. Each agreement also includes provisions for capital facilities needed to perform for the program. Program facilities included treatment facilities, new wells, conveyance systems, and recharge facilities. The final disbursement of the Prop 13 and Metropolitan funding for the completion of all funded CUP facilities was achieved in May 2009.

The total storage of the CUP programs is 211,889 acre-feet with a dry-year yield of 70,296 acre-feet per year. The current balance in the CUP program is 83,607 acre-feet. Storage amounts for all the CUP programs are shown in **Attachment 1**.

### **Need for Action**

Six CUP programs have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes. Over time, Metropolitan has developed alternative approaches and programs for coordinated groundwater storage management that can continue to provide regional benefits that have previously come from these inactive CUP programs. Metropolitan has discussed the termination of these programs with the affected member agencies. As a result of these discussions, the program partners have expressed interest in terminating their programs early. The six inactive agreements include Compton, Foothill Area, Live Oak Basin, Long Beach, Long Beach Expansion into Lakewood, and Orange County CUPs. This

action would terminate the Long Beach CUP agreement. Regional dry-year storage levels are currently at a record high of 3.8 million acre-feet. The proposed action is not likely to significantly impact the availability of dry-year supplies. Further, termination of the inactive programs does not impact the requirements of the Prop 13 funding received and disbursed to the participating agencies for the development of the programs.

#### **Proposed Action and General Terms**

Staff recommends that the Board authorize the General Manager to enter into agreements to terminate six inactive CUP agreements. New agreements are currently required to allow for termination of the existing agreements. The existing CUP agreements do not include standard termination language, which would have allowed the parties to initiate early terminations upon written notice.

#### **General Terms**

The following conditions will apply to the agreements:

- Metropolitan and the six participating member agencies will enter into individual agreements.
- Termination of the Long Beach CUP agreement will be effective by June 30, 2025.
- The participating member agency would not be required to pay back any funds received from Metropolitan during the term of the agreement.
- No money would be due upon termination by either party unless there is water remaining in a CUP account.
- If water is remaining in the CUP account, a lump-sum sale of the amount remaining in the account at the full-service rate would occur on June 30, 2025, with Metropolitan providing a share of the projected cost to extract the stored water. The Long Beach CUP currently has a balance of 6,678 acre-feet. The City of Long Beach would purchase the full 6,678 acre-feet at the full-service treated water rate. Metropolitan would agree to share the operations and maintenance, and power credits with the City of Long Beach for producing the 6,678 acre-feet of water remaining in the Long Beach account.

### **Project Milestone**

Termination of the Long Beach CUP will be effective June 30, 2025.

Summary of Conjunctive Use Programs

7-14

One Water and Adaptation Committee Authorize the General Manager to Terminate Conjunctive Use Program Agreements

Items 7-12, 7-13, 7-14, 7-15, 7-16, and 7-17 April 7, 2025

## Items 7-l2 through 7-l7

Termination of Six CUP Agreements

# Subject

Authorize the General Manager to terminate Conjunctive Use Program agreements; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA.

# Purpose

Request Board approval to terminate inactive Conjunctive Use Program agreements

## Next Steps

Execute Conjunctive Use Program termination agreements with member agencies

### Overview

9 The purpose of the Conjunctive Use Program (CUP) is to store water during wet years and extract

the stored water during dry years 9 CUP programs

> Total contractual storage: 212 TAF

> > Total put: 53 TAFY

Total take: 70 TAFY

# History of Conjunctive Use Program (CUP)

### Approval

- Board adopted principles for CUP Program in 2000
- Voters approve Proposition 13 (Prop 13) in 2000
- Metropolitan releases RFQ for proposed CUP programs

### Agreements & Funding

- 9 CUP agreements are executed from 2002-2006
- 25-year term
- \$45 million from the Department of Water Resources (DWR) from Prop 13
- \$27 million from Metropolitan

### **Ongoing Operations**

- 350,000 acre-feet has been stored in CUP program since 2002
- 266,000 acre-feet of dry-year yield that has benefited Metropolitan during drought and emergencies.

# **Conjunctive Use Programs Proposed for Termination**

- Compton •
- **Foothill Area** •
- Live Oak  $\bullet$
- Long Beach Phase 1 •
- Long Beach Phase 2 (Lakewood) •
- **Orange County** •

# Need for Termination Agreements

- The six CUP programs identified for termination have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes.
- Metropolitan and the six CUP program participants have mutually agreed to early termination.
- The original agreements do not include Metropolitan's standard termination language, which allows either party to terminate early upon written notice. Therefore, a new termination agreement is needed.

# **Terms of Termination**

# Benefits of Termination to Metropolitan in this Biennium

### Cost savings

- \$2.1 million
- Savings of future annual administrative fees
- Cost share of future O&M and power credits

- \$9.3 million
- Sale of remaining water in Long Beach CUP account (6,678 AF) in this biennium

Additional

Revenue

# Options

- Option 1 Authorize the General Manager to terminate the following Conjunctive Use Program agreements.
  - Compton
  - Foothill Area
  - Live Oak
  - Long Beach Phase 1
  - Long Beach Phase 2 (Lakewood)
  - Orange County
- Option 2 Do not authorize the General Manager to terminate the CUP agreements, which would allow the CUP agreements to terminate on their current schedule.

# **Staff Recommendation**

• Option 1

## **Board** Action

## Board of Directors One Water and Adaptation Committee

### 4/8/2025 Board Meeting

7-15

### Subject

Authorize the General Manager to terminate the Long Beach Expansion into Lakewood Conjunctive Use Program Agreement; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

### **Executive Summary**

Staff recommends that the General Manager be authorized to enter into agreements to terminate six inactive Conjunctive Use Program (CUP) agreements. The six inactive agreements include Compton, Foothill Area, Live Oak Basin, Long Beach, Long Beach Expansion into Lakewood, and Orange County CUPs. The six programs have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes. Staff has coordinated with the member agencies involved with the listed projects, and the consensus of both member agencies and staff is to terminate the agreements.

The subject of this board action is to terminate the Long Beach Expansion into the Lakewood CUP agreement. Termination of the Long Beach Expansion into Lakewood CUP agreement will reduce Metropolitan costs in the current biennium by approximately \$6,000 and \$7,000 in future years due to the elimination of administrative fee payments that would be made by Metropolitan if the agreement remains in effect. A summary of the CUP programs is provided in **Attachment 1**.

### Proposed Action(s)/Recommendation(s) and Options

### Staff Recommendation: Option #1

#### **Option #1**

Authorize the General Manager to terminate the Long Beach Expansion into the Lakewood Conjunctive Use Program Agreement.

**Fiscal Impact:** Terminating the agreement would relieve Metropolitan of administrative fees and result in a reduction of budgeted Supply Program costs of \$6,119 in FY 2025/26 and a total reduction of \$12,391 through the term of the existing agreement.

**Business Analysis:** This action will reduce Metropolitan costs in the current biennium by approximately \$6,000 and \$7,000 in future years due to the elimination of administrative fee payments that would have been made by Metropolitan if the agreement had remained in effect.

#### **Option #2**

Do not authorize the General Manager to terminate the Long Beach Extension into the Lakewood Conjunctive Use Program Agreement, which would allow the Long Beach-Lakewood CUP Agreement to terminate on its current schedule.

Fiscal Impact: Cost savings or increased revenue in this biennium will not be achieved.

**Business Analysis:** Not terminating now will leave this agreement on its original schedule, and no cost savings or increased revenue will be realized in this biennium. Revenue generation would be deferred to 2031.

### **Applicable Policy**

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

Metropolitan Water District Administrative Code Section 4209: Contracts

Metropolitan Water District Administrative Code Section 4507: Billing and Payment of Water Deliveries

By Minute Item 43514, dated April 13, 1999, the Board adopted the Water Surplus and Drought Management Plan

By Minute Item 43860, dated Jan. 11, 2000, the Board approved strategies for implementing Groundwater Storage Programs within Metropolitan's service area.

By Minute Item 44210, dated Oct. 17, 2000, the Board adopted Resolution 8706 to accept the grant for funds from Proposition 13.

### Related Board Action(s)/Future Action(s)

By Minute Item 44427, dated April 10, 2001, the Board gave authority to finalize agreement terms for Groundwater Conjunctive Use Projects using Proposition 13 funds.

By Minute Item 44871, dated May 14, 2002, the Board approved the Long Beach CUP.

By Minute Item 45035, dated October 8, 2002, the Board approved the Live Oak Basin CUP.

By Minute Item 45205, dated February 11, 2003, the Board approved the Foothill Area CUP.

Board Report dated May 11, 2004, reporting on the selection of Groundwater Storage Programs using remaining Proposition 13 funds.

By Minute Item 46073, dated January 11, 2005, the Board approved the Compton CUP.

By Minute Item 46301, dated July 12, 2005, the Board approved the Long Beach CUP Phase 2 expansion into Lakewood.

### **Summary of Outreach Completed**

Presented to Member Agency Managers Meeting on February 11, 2025

### California Environmental Quality Act (CEQA)

### **CEQA determination for Option #1:**

The proposed action is not defined as a project under CEQA because it will not result in either a direct physical change in the environment or a reasonably foreseeable indirect physical change in the environment. (State CEQA Guidelines Section 15378(a)).

### **CEQA determination for Option #2:**

None required

### **Details and Background**

### Background

The purpose of the CUP program is to store water during wet years and extract the stored water during dry years upon a call by Metropolitan. Since 2002, more than 350,000 acre-feet has been stored in the nine CUP programs. Also, the CUP program has generated a total of about 266,000 acre-feet of yield that has benefited Metropolitan during drought and emergencies.

Metropolitan seeks ways to streamline the current program and identify measures to reduce costs and generate revenue in the CUP program. To achieve this goal, Metropolitan proposes to terminate six inactive CUP programs during this fiscal year to reduce future administrative and reimbursement costs and to generate revenue.

### History of the CUP Program

The 1996 Integrated Resources Plan (IRP) identified groundwater storage as an important part of Metropolitan's future water resource mix. The IRP also identified that the remaining need for long-term storage is 450,000 acre-feet, with 150,000 acre-feet per year of dry-year production.

In January 2000 (Board Item 9-5), the Board approved a hybrid framework for the development of in-region dryyear CUP. This hybrid framework for CUP included two components:

- A case-by-case approach where member agencies could submit proposals to Metropolitan based upon their needs and expected benefits, or Metropolitan may approach a member agency based upon an assessment of potential regional benefits; and
- A request for proposal (RFP) approach where member agencies would submit proposals that would be competitively ranked against specific criteria. This approach tries to standardize all Groundwater Storage Programs; however, experience has shown that not all local groundwater programs are alike. Local issues such as water quality, basin adjudication or management, and local and regional benefits are all unique, making it difficult to rank projects using specific criteria.

In January 2000, the Board also established principles for the development of conjunctive use in the service area. These principles are summarized in **Attachment 1**.

In March 2000, 65 percent of California voters approved Proposition 13 (Prop. 13), authorizing the state of California to sell \$1.97 billion in general obligation bonds for water-related projects throughout the state. In May 2020, the Governor's Annual Budget Act appropriated to the Department of Water Resources local assistance grant funds from Prop 13. From these funds, the state allocated \$45 million to Metropolitan to help finance Southern state Water Reliability Projects targeting conjunctive use projects within the Metropolitan's service area.

In November 2000, Metropolitan released an RFP for the CUP Program. Nine CUP programs were selected and approved by the Board and received funding from Prop 13 in the amount of \$45 million and Metropolitan in the amount of \$27 million. These CUP programs included: the Chino Basin, Compton, Elsinore, Foothill Area, Live Oak, Long Beach, Long Beach Expansion into Lakewood, Orange County, and Upper Claremont CUPs. Each CUP agreement has a term of 25 years with termination between 2027 and 2031, depending upon when the agreement was executed. Without this action, the Long Beach-Lakewood CUP agreement will terminate on April 10, 2031. Each agreement also includes provisions for capital facilities needed to perform for the program. Program facilities included treatment facilities, new wells, conveyance systems, and recharge facilities. The final disbursement of the Prop 13 and Metropolitan funding for the completion of all funded CUP facilities was achieved in May 2009.

The total storage of the CUP programs is 211,889 acre-feet with a dry-year yield of 70,296 acre-feet per year. The current balance in the CUP program is 83,607 acre-feet. Storage amounts for all the CUP programs are shown in **Attachment 1**.

### **Need for Action**

Six CUP programs have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes. Over time, Metropolitan has developed alternative approaches and programs for coordinated groundwater storage management that can continue to provide regional benefits that have previously come from these inactive CUP programs. Metropolitan has discussed the termination of these programs with the affected member agencies. As a result of these discussions, the program partners have expressed interest in terminating their programs early. The six inactive agreements include Compton, Foothill Area, Live Oak Basin, Long Beach, Long Beach-Lakewood, and Orange County CUPs. This action would terminate the Long Beach-Lakewood CUP agreement. Regional dry-year storage levels are currently

at a record high of 3.8 million acre-feet. The proposed action is not likely to significantly impact the availability of dry-year supplies. Further, termination of the inactive programs does not impact the requirements of the Prop 13 funding received and disbursed to the participating agencies for the development of the programs.

#### **Proposed Action and General Terms**

Staff recommends that the Board authorize the General Manager to enter into agreements to terminate six inactive CUP agreements. This action would terminate the Long Beach-Lakewood CUP. New agreements are currently required to allow for the termination of the existing agreements. The existing CUP agreements do not include standard termination language, which would have allowed the parties to initiate early terminations upon written notice.

#### **General Terms**

The following conditions will apply to the agreements:

- Metropolitan and the six participating member agencies will enter into individual agreements.
- Termination of the Long Beach-Lakewood CUP agreement will be effective by June 30, 2025. •
- The participating member agency would not be required to pay back any funds received from • Metropolitan during the term of the agreement.
- No money would be due upon termination by either party unless there is water remaining in a CUP ٠ account.
- Since there is no water remaining in the Long Beach-Lakewood CUP account, no money is due.

#### **Project** Milestone

Termination of the Long Beach CUP will be effective June 30, 2025.

- Cost share of future O&M and power credits

- \$9.3 million
- Sale of remaining water in Long Beach CUP account (6,678 AF) in this biennium

Additional

Revenue

# Options

- Option 1 Authorize the General Manager to terminate the following Conjunctive Use Program agreements.
  - Compton
  - Foothill Area
  - Live Oak
  - Long Beach Phase 1
  - Long Beach Phase 2 (Lakewood)
  - Orange County
- Option 2 Do not authorize the General Manager to terminate the CUP agreements, which would allow the CUP agreements to terminate on their current schedule.

## Staff Recommendation

• Option 1

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

### **Board** Action

### Board of Directors One Water and Adaptation Committee

#### 4/8/2025 Board Meeting

7-17

### Subject

Authorize the General Manager to terminate the Compton Conjunctive Use Program Agreement; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

### **Executive Summary**

Staff recommends that the General Manager be authorized to enter into agreements to terminate six inactive Conjunctive Use Program (CUP) agreements. The six inactive agreements include Compton, Foothill Area, Live Oak Basin, Long Beach, Long Beach Expansion into Lakewood, and Orange County CUPs. The six programs have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes. Staff has coordinated with the member agencies involved with the listed projects, and the consensus of both member agencies and staff is to terminate the agreements.

The subject of this board action is to terminate the Compton CUP agreement. Termination of the Compton CUP agreement will reduce Metropolitan costs in the current biennium by approximately \$4,000 and \$19,000 in future years due to the elimination of administrative fee payments that would be made by Metropolitan if the agreement remains in effect. A summary of the CUP programs is provided in **Attachment 1**.

### Proposed Action(s)/Recommendation(s) and Options

#### Staff Recommendation: Option #1

#### **Option #1**

Authorize the General Manager to terminate the Compton Conjunctive Use Program Agreement.

**Fiscal Impact:** Terminating the agreement would relieve Metropolitan of administrative fees and result in a reduction of budgeted Supply Program costs of \$4,304 in FY2025/26 and a total reduction of \$22,623 through the term of the existing agreement.

**Business Analysis:** This action will reduce Metropolitan's costs in the current biennium by approximately \$4,000 and \$19,000 in future years due to the elimination of administrative fee payments that would have been made by Metropolitan if the agreement had remained in effect.

#### **Option #2**

Do not authorize the General Manager to terminate the Compton CUP agreement, which would allow the Compton CUP agreement to terminate on its current schedule.

Fiscal Impact: Cost savings or increased revenue in this biennium will not be achieved.

**Business Analysis:** Not terminating now will leave this agreement on its original schedule, and no cost savings or increased revenue will be realized in this biennium. Revenue generation would be deferred to 2030.

### **Alternatives Considered**

Not applicable

### **Applicable Policy**

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

Metropolitan Water District Administrative Code Section 4209: Contracts

Metropolitan Water District Administrative Code Section 4507: Billing and Payment of Water Deliveries

By Minute Item 43514, dated April 13, 1999, the Board adopted the Water Surplus and Drought Management Plan.

By Minute Item 43860, dated Jan. 11, 2000, the Board approved strategies for implementing Groundwater Storage Programs within Metropolitan's service area.

By Minute Item 44210, dated Oct. 17, 2000, the Board adopted Resolution 8706 to accept the grant for funds from Proposition 13.

### Related Board Action(s)/Future Action(s)

By Minute Item 44427, dated April 10, 2001, the Board gave authority to finalize agreement terms for Groundwater Conjunctive Use Projects using Proposition 13 funds.

By Minute Item 44871, dated May 14, 2002, the Board approved the Long Beach CUP.

By Minute Item 45035, dated October 8, 2002, the Board approved the Live Oak Basin CUP.

By Minute Item 45205, dated February 11, 2003, the Board approved the Foothill Area CUP.

Board Report dated May 11, 2004, reporting on the selection of Groundwater Storage Programs using remaining Proposition 13 funds.

By Minute Item 46073, dated January 11, 2005, the Board approved the Compton CUP.

By Minute Item 46301, dated July 12, 2005, the Board approved the Long Beach CUP Phase 2 expansion into Lakewood.

### **Summary of Outreach Completed**

Presented to Member Agency Managers Meeting on February 11, 2025

### California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

The proposed action is not defined as a project under CEQA because it will not result in either a direct physical change in the environment or a reasonably foreseeable indirect physical change in the environment. (State CEQA Guidelines Section 15378(a)).

#### **CEQA determination for Option #2:**

None required

### **Details and Background**

#### Background

The purpose of the CUP program is to store water during wet years and extract the stored water during dry years upon a call by Metropolitan. Since 2002, more than 350,000 acre-feet has been stored in the nine CUP programs. Also, the CUP program has generated a total of about 266,000 acre-feet of yield that has benefited Metropolitan during drought and emergencies.

Metropolitan seeks ways to streamline the current program and identify measures to reduce costs and generate revenue in the CUP program. To achieve this goal, Metropolitan proposes to terminate six inactive CUP programs during this fiscal year to reduce future administrative and reimbursement costs and to generate revenue. This proposed action would terminate the Compton CUP agreement.

#### History of the CUP Program

The 1996 Integrated Resources Plan (IRP) identified groundwater storage as an important part of Metropolitan's future water resource mix. The IRP also identified that the remaining need for long-term storage is 450,000 acre-feet, with 150,000 acre-feet per year of dry-year production.

In January 2000 (Board Item 9-5), the Board approved a hybrid framework for the development of in-region dryyear CUP. This hybrid framework for CUP included two components:

- A case-by-case approach where member agencies could submit proposals to Metropolitan based upon their needs and expected benefits, or Metropolitan may approach a member agency based upon an assessment of potential regional benefits; and
- A request for proposal (RFP) approach where member agencies would submit proposals that would be competitively ranked against specific criteria. This approach tries to standardize all Groundwater Storage Programs; however, experience has shown that not all local groundwater programs are alike. Local issues such as water quality, basin adjudication or management, and local and regional benefits are all unique, making it difficult to rank projects using specific criteria.

In January 2000, the Board also established principles for the development of conjunctive use in the service area. These principles are summarized in **Attachment 1**.

In March 2000, 65 percent of California voters approved Proposition 13 (Prop. 13), authorizing the state of California to sell \$1.97 billion in general obligation bonds for water-related projects throughout the state. In May 2020, the Governor's Annual Budget Act appropriated to the Department of Water Resources local assistance grant funds from Prop 13. From these funds, the state allocated \$45 million to Metropolitan to help finance Southern state Water Reliability Projects targeting conjunctive use projects within the Metropolitan's service area.

In November 2000, Metropolitan released an RFP for the CUP Program. Nine CUP programs were selected and approved by the Board and received funding from Prop 13 in the amount of \$45 million and Metropolitan in the amount of \$27 million. These CUP programs included: the Chino Basin, Compton, Elsinore, Foothill Area, Live Oak, Long Beach, Long Beach Expansion into Lakewood, Orange County, and Upper Claremont CUPs. Each CUP agreement has a term of 25 years with termination between 2027 and 2031, depending upon when the agreement was executed. Without this action, the Compton CUP agreement will terminate on June 30, 2030. Each agreement also includes provisions for capital facilities needed to perform for the program. Program facilities included treatment facilities, new wells, conveyance systems, and recharge facilities. The final disbursement of the Prop 13 and Metropolitan funding for the completion of all funded CUP facilities was achieved in May 2009.

The total storage of the CUP programs is 211,889 acre-feet with a dry-year yield of 70,296 acre-feet per year. The current balance in the CUP program is 83,607 acre-feet. Storage amounts for all the CUP programs are shown in **Attachment 1**.

### **Need for Action**

Six CUP programs have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes. Over time, Metropolitan has developed alternative approaches and programs for coordinated groundwater storage management that can continue to provide regional benefits that have previously come from these inactive CUP programs. Metropolitan has discussed the termination of these programs with the affected member agencies. As a result of these discussions, the program partners have expressed interest in terminating their programs early. The six inactive agreements include Compton, Foothill Area, Live Oak Basin, Long Beach, Long Beach-Lakewood, and Orange County CUPs. This action would terminate the Orange County CUP agreement. Regional dry-year storage levels are currently at a record high of

3.8 million acre-feet. The proposed action is not likely to significantly impact the availability of dry-year supplies. Further, termination of the inactive programs does not impact the requirements of the Prop 13 funding received and disbursed to the participating agencies for the development of the programs.

#### **Proposed Action and General Terms**

Staff recommends that the Board authorize the General Manager to enter into agreements to terminate six inactive CUP agreements. This action would terminate the Compton CUP. New agreements are currently required to allow for the termination of the existing agreements. The existing CUP agreements do not include standard termination language, which would have allowed the parties to initiate early terminations upon written notice.

#### **General Terms**

The following conditions will apply to the agreements:

- Metropolitan and the six participating member agencies will enter into individual agreements.
- Termination of the Compton CUP agreement will be effective by June 30, 2025.
- The participating member agency would not be required to pay back any funds received from Metropolitan during the term of the agreement.
- No money would be due upon termination by either party unless there is water remaining in a CUP account.
- Since there is no water remaining in the Compton CUP account, no money is due.

#### **Project Milestone(s)**

Termination of the Compton CUP will be effective June 30, 2025.

7-17

One Water and Adaptation Committee Authorize the General Manager to Terminate Conjunctive Use Program Agreements

Items 7-12, 7-13, 7-14, 7-15, 7-16, and 7-17 April 7, 2025

### Items 7-12 through 7-17

Termination of Six <u>CUPAgreements</u>

## Subject

Authorize the General Manager to terminate Conjunctive Use Program agreements; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA.

## Purpose

Request Board approval to terminate inactive Conjunctive Use Program agreements

### Next Steps

**Execute Conjunctive Use Program termination agreements** with member agencies

### Overview

9 The purpose of the Conjunctive Use Program (CUP) is to store water during wet years and extract the stored water

during dry years

9 CUP programs

> Total contractual storage: 212 TAF

Total put: 53 TAFY

Total take: 70 TAFY

# History of Conjunctive Use Program (CUP)

### Approval

- Board adopted principles for CUP Program in 2000
- Voters approve Proposition 13 (Prop 13) in 2000
- Metropolitan releases RFQ for proposed CUP programs

### Agreements & Funding

- 9 CUP agreements are executed from 2002-2006
- 25-year term
- \$45 million from the Department of Water Resources (DWR) from Prop 13
- \$27 million from Metropolitan

### **Ongoing Operations**

- 350,000 acre-feet has been stored in CUP program since 2002
- 266,000 acre-feet of dry-year yield that has benefited Metropolitan during drought and emergencies.

## **Conjunctive Use Programs Proposed for Termination**

- Compton
- Foothill Area
- Live Oak
- Long Beach Phase 1
- Long Beach Phase 2 (Lakewood)
- Orange County

### Need for Termination Agreements

- The six CUP programs identified for termination have been inactive for a variety of reasons, including lack of local agency support, groundwater contamination concerns, or leadership changes.
- Metropolitan and the six CUP program participants have mutually agreed to early termination.
- The original agreements do not include Metropolitan's standard termination language, which allows either party to terminate early upon written notice. Therefore, a new termination agreement is needed.

### **Terms of Termination**

projected cost to extract the stored water.

### Benefits of Termination to Metropolitan in this Biennium

### Cost savings

- \$2.1 million
- Savings of future annual administrative fees
- Cost share of future O&M and power credits

- \$9.3 million
- Sale of remaining water in Long Beach CUP account (6,678 AF) in this biennium

Additional

Revenue

### Options

- Option 1 Authorize the General Manager to terminate the following Conjunctive Use Program agreements.
  - Compton
  - Foothill Area
  - Live Oak
  - Long Beach Phase 1
  - Long Beach Phase 2 (Lakewood)
  - Orange County
- Option 2 Do not authorize the General Manager to terminate the CUP agreements, which would allow the CUP agreements to terminate on their current schedule.

### **Staff Recommendation**

• Option 1

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

### **Board** Action

#### • Board of Directors Legal and Claims Committee

#### 4/8/2025 Board Meeting

7-18

#### Subject

Authorize increase in the maximum amount payable under contract with outside counsel, Liebert Cassidy Whitmore, in the amount of \$200,000 for a total amount not to exceed \$450,000; the General Manager has determined that the proposed action is exempt or otherwise not subject to CEQA

#### **Executive Summary**

The General Counsel entered into a contract with the law firm of Liebert Cassidy Whitmore (Liebert Cassidy) on December 1, 2023, for \$100,000 to provide advice, as requested, to the Chair of the Board and serve as counsel to the Ad Hoc Committee of the Executive Committee relative to its duties pursuant to Section 2416 (f) (5) of Metropolitan's Administrative Code regarding the investigation of allegations of Equal Employment Opportunity violations against members of the Metropolitan Board, the General Manager, General Counsel, General Auditor and Ethics Officer.

The agreement was amended on January 30, 2024, to amend the scope of work to include representation of Metropolitan in responding to and, if required, defend Metropolitan relative to requests for documents pursuant to the California Public Records Act; on August 12, 2024, to increase the maximum amount payable by \$100,000 to an amount not to exceed \$200,000 and, on December 17, 2024 to increase the maximum amount payable by \$50,000 to an amount not to exceed \$250,000.

This letter requests an increase of \$200,000 to a maximum amount payable of \$450,000 so that Liebert Cassidy can continue to provide these legal services for Metropolitan. This agreement remains in effect until terminated. While the rate of expenditure is subject to the number and nature of matters requiring assistance from the firm, it is anticipated that the requested increase will be adequate for an additional one to two years.

#### Proposed Action(s)/Recommendation(s) and Options

#### Staff Recommendation: Option #1

#### **Option #1**

Authorize the General Counsel to increase the amount payable under contract with outside counsel, Liebert Cassidy Whitmore, in the amount of \$200,000 for a total amount not to exceed \$450,000.

**Fiscal Impact:** The sum of \$200,000 is added to this agreement for the provision of the authorized legal services, funded within the FY 2024/25 budget.

**Business Analysis:** Metropolitan will retain the expertise needed for the provision of advice and assistance to the Chair of the Board and the Ad Hoc Committee of the Executive Committee.

#### **Option #2**

Do not authorize an increase in the maximum amount payable under this agreement with Liebert Cassidy Whitmore, effectively terminating this contract when the current funds are exhausted.

#### Fiscal Impact: None

Business Analysis: Metropolitan will not have access to the valuable expertise and assistance provided by this law firm.

#### Alternatives Considered

Not applicable

#### **Applicable Policy**

Metropolitan Water District Administrative Code Section 6430: General Counsel's employment of attorneys to render special counsel services

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

Request to Authorize Increase in Special Counsel Contract with Liebert Cassidy Whitmore

Item #7-18 April 8, 2025

Item 7-18 Request for Contract Increase

### Subject

Authorize increase in the maximum amount payable under contract with outside counsel, Liebert Cassidy Whitmore, in the amount of 200,000 for a total amount not to exceed \$450,000

Purpose

Request additional funds to continue engagement of highly qualified counsel

**Recommendation and Fiscal Impact** Approve contract increase of additional \$200,000 funded within the FY 2024/25 budget

Special Counsel

# Request for Additional Funds for Special Counsel

- Request to increase existing contract with Liebert Cassidy Whitmore
- Retained in 2023 for maximum \$100,000
- Increased contract maximum in August and December 2024 to a maximum of \$250,000

Specialized Legal Support

# Liebert Cassidy Whitmore

- Advise the Chair of the Board
- Serve as counsel to the Ad Hoc Committee of the Executive Committee
- Respond to certain California Public Record Act (CPRA) requests

# Board Options

# • Option #l

Authorize the General Counsel to increase the amount payable under contract with outside counsel, Liebert Cassidy Whitmore in the amount of \$200,000 for a total amount not to exceed \$450,000.

# • Option #2

Do not authorize an increase in the maximum amount payable under this contract with Liebert Cassidy Whitmore, effectively terminating this contract when the current funds are exhausted.

# Board Options

# Staff Recommendation:

• Option l

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

### **Board** Action

### Board of Directors Engineering, Operations, and Technology Committee

#### 4/8/2025 Board Meeting

#### 8-1

#### Subject

Adopt the CEQA determination that the proposed action was previously addressed in the certified 2024 Program Environmental Impact Report and authorize an increase of \$12.4 million to an agreement with La Cañada Design Group Inc. for a new not-to-exceed total amount of \$16.8 million for final design to upgrade the Michael J. McGuire Water Quality Laboratory

#### **Executive Summary**

Metropolitan's Michael J. McGuire Water Quality Laboratory (Water Quality Laboratory) at the La Verne site conducts over 300,000 water quality analyses yearly to comply with treated water standards, support emerging contaminants studies, assess future treatment technologies, and optimize treatment and distribution system processes. Upgrades to the building are needed to increase its seismic resiliency and to efficiently address new and evolving water quality issues and regulations, by enhancing the reliability of Metropolitan's sample processing and water quality research functions.

This action authorizes an increase to an existing agreement with La Cañada Design Group Inc. (La Cañada Design Group) for final design services to upgrade Metropolitan's Water Quality Laboratory. See Attachment 1 for the Allocation of Funds, Attachment 2 for the List of Subconsultants, and Attachment 3 for the Location Map.

#### Proposed Action(s)/Recommendation(s) and Options

#### **Staff Recommendation: Option #1**

#### **Option #1**

Adopt the CEQA determination that the proposed action was previously addressed in the certified 2024 Final Environmental Impact Report and related documentation, and that no further environmental analysis or documentation is required and authorize an increase of \$12.4 million to an agreement with La Cañada Design Group Inc. for a new not-to-exceed total amount of \$16.8 million for final design to upgrade the Michael J. McGuire Water Quality Laboratory.

**Fiscal Impact:** Expenditure of \$16.0 million in capital funds. Approximately \$6.5 million in capital funds will be incurred in the current biennium and have been previously authorized. The remaining capital expenditures will be funded from the next Capital Investment Plan budget.

**Business Analysis:** This option will enhance the reliability and extend the functional service of the Water Quality Laboratory.

#### **Option #2**

Do not proceed with the project at this time

#### Fiscal Impact: None

**Business Analysis:** This option would forgo an opportunity to address the functional performance and seismic resiliency of this essential facility. Several future improvements would be required in the near future

to keep the facility's functionality up to modern industry standards which would increase costs and may diminish Metropolitan's ability to comply with water quality and laboratory requirements.

#### **Alternatives Considered**

Upon completion of preliminary design for the Water Quality Laboratory upgrades, staff reassessed the availability and capability of in-house Metropolitan staff to conduct final design, considering: (1) current work assignments for in-house staff to determine the potential availability of staff to conduct this work; and (2) specialized technical expertise needs.

After assessing the current workload for in-house staff, the relative priority of this project, and the specialized technical expertise required, staff recommends the use of professional services to perform final design of the subject project. This approach will allow for the completion of this project and other capital work within their current schedule and ensure the work is conducted in the most efficient manner possible.

#### **Applicable Policy**

Metropolitan Water District Administrative Code Section 8121: General Authority of the General Manager to Enter Contracts

Metropolitan Water District Administrative Code Section 11104: Delegation of Responsibilities

#### Related Board Action(s)/Future Action(s)

By Minute Item 51073, dated January 9, 2018, the Board authorized final design of seismic upgrades and building improvements to the Water Quality Laboratory and the Field Engineering Building.

By Minute Item 52702, dated February 8, 2022, the Board authorized two agreements to provide preliminary design to upgrade Metropolitan's Water Quality Laboratory, and environmental support services for the planned facility upgrades at the La Verne site.

By Minute Item 52778, dated April 12, 2022, the Board appropriated a total of \$600 million for projects identified in the Capital Investment Plan for fiscal years 2022/2023 and 2023/2024.

By Minute Item 53590, dated April 9, 2024, the Board certified the Final Program Environmental Impact Report for the F.E. Weymouth Water Treatment Plant and La Verne Site Improvements Program and awarded three procurement contracts to furnish water quality equipment for Metropolitan's Water Quality Laboratory.

#### Summary of Outreach Completed

Metropolitan staff has conducted several meetings with the city of La Verne to discuss building codes and other requirements applicable to the design of this project. Input provided by the city of La Verne has been incorporated into the current design.

#### California Environmental Quality Act (CEQA)

#### **CEQA determination for Option #1:**

On April 9, 2024, the Board adopted the F.E. Weymouth Water Treatment Plant and La Verne Site Improvements Program (Program Environmental Impact Report), Mitigation Monitoring and Reporting Program, associated CEQA environmental documentation (Findings, Statement of Overriding Considerations), made the necessary findings for the Weymouth Water Quality Laboratory Seismic Upgrades Project, and approved the project itself. The present board action does not involve any changes to the approved project. Therefore, the environmental documentation previously prepared and adopted in connection with the project fully complies with CEQA, and no further environmental analysis or documentation is required.

#### **CEQA determination for Option #2:**

None required

#### **Details and Background**

#### Background

The Michael J. McGuire Water Quality Laboratory is located on the grounds of the F.E. Weymouth Water Treatment Plant in the city of La Verne. The building houses Metropolitan's central laboratory that conducts over 300,000 water quality analyses each year to comply with treated water standards, support studies of emerging contaminants, assess future treatment technologies, and optimize treatment and distribution system processes.

The Water Quality Laboratory was constructed in two phases. The south wing of the building was constructed in 1985, and the north wing was added in 1998. Each wing was designed and constructed in accordance with the building code requirements and water quality needs of their time. Within the last 30 years, water quality requirements for safe water delivery have evolved significantly. Additionally, industry knowledge of earthquakes has greatly improved leading to the development of today's more stringent seismic design requirements. As a result, the building's internal configuration no longer meets current or future laboratory needs, and under the current seismic code, the building is vulnerable to damage in the event of a major earthquake.

In February 2022, Metropolitan's Board authorized an agreement with La Cañada Design Group for preliminary design to upgrade the Water Quality Laboratory, including laboratory functional capabilities, seismic resiliency, and expansion of the existing building footprint. During preliminary design, staff assessed required modifications of the existing structure, developed structural design criteria for the building as an essential facility, completed inspections of supporting infrastructure, and worked with the consultant to develop a layout for the expanded building footprint which incorporates enhancement of key laboratory features, including increased sample processing efficiency, reduced risk for sample cross-contamination, added laboratory space modularity, and improvements to building traffic for samples, staff, and visitors. Staff also developed a comprehensive staged approach to replace the most critical instruments for regulatory compliance, which were approaching the end of their service life.

Preliminary design activities to upgrade the Water Quality Laboratory are complete, and staff recommends proceeding with final design at this time. Temporary staff and equipment relocation is required to ensure that critical laboratory operations are not interrupted during construction. Planning activities for temporary relocations will be undertaken by staff as part of the final design phase.

#### Michael J. McGuire Water Quality Laboratory Upgrades – Final Design

Planned upgrades for the Water Quality Laboratory include building expansion with an approximately 60 percent footprint increase; strengthening of the existing structure to meet current criteria for essential facilities; building amenities and utilities improving laboratory space modularity and configuration potential; sustainability upgrades and revised landscaping; parking and accessibility improvements; and new specialized laboratory equipment.

Final design phase activities include: (1) development of a staff relocation plan; (2) preparation of drawings and technical specifications with a supporting 3D model and detailed renderings; (3) development of a construction cost estimate; (4) constructability review; and (5) advertising and receipt of competitive bids. Final design will be performed by La Cañada Design Group under an existing agreement described below. Metropolitan staff and La Cañada Design Group will collectively develop the relocation plan that will be implemented while the construction is underway. Metropolitan staff will also perform project management, technical oversight, and review of the consultant's work.

A total of \$16.0 million is required for this work. Allocated funds include \$12.4 million for the final design activities by La Cañada Design Group described above. Other allocated funds for professional services include \$100,000 for value engineering, which will be performed by an on-call consultant. Allocated funds for Metropolitan staff activities include \$1.9 million for technical oversight and design review of consultant's work; \$800,000 for environmental support, project management, relocation planning, permitting, and project controls; and \$800,000 for remaining budget. **Attachment 1** provides the allocation of the required funds.

As described above, final design will be performed by La Cañada Design Group Inc. Engineering Services' performance metric target range for final design of projects with a construction cost of more than \$3 million is

9 to 12 percent. For this project, the performance metric goal for final design is 9.5 percent of the total construction cost. The total estimated cost for design is \$14.3 million, which includes \$12.4 million for La Cañada Design Group and \$1.9 million for Metropolitan design activities. The estimated cost of construction to upgrade Metropolitan's Water Quality Laboratory is anticipated to range from \$150 million to \$170 million.

#### Engineering Services (La Cañada Design Group Inc.) – Amendment of Existing Agreement

In February 2022, Metropolitan's Board authorized an agreement with La Cañada Design Group for preliminary design to upgrade Metropolitan's Water Quality Laboratory. La Cañada Design Group was prequalified through Request for Qualifications No. 1182 and was selected based on the firm's expertise in the discipline-specific technical aspects of this project, and its extensive experience with new laboratories, retrofit of laboratories, and other essential facilities of comparable size.

This action authorizes an increase of \$12.4 million to the existing agreement with La Cañada Design Group for a new not-to-exceed total of \$16.8 million to perform the final design to upgrade Metropolitan's Water Quality Laboratory. For this agreement, Metropolitan has established a Small Business Enterprise participation level of 25 percent. La Cañada Design Group is a certified SBE firm and thus achieves 100 percent SBE participation. The planned subconsultants for this work are listed in Attachment 2.

D7 Consulting Inc. Newport Beach, CA	Building Envelope / Waterproofing	
Jacobs Engineering Irvine, CA	Security	

8-1

# Engineering, Operations, & Technology Committee La Verne Water Quality Laboratory Upgrades

Item 8-1 April 7, 2025 Item 8-1 La Verne Water Quality Laboratory Upgrades

### Subject

Adopt the CEQA determination that the proposed action was previously addressed in the certified 2024 Program Environmental Impact Report and authorize an increase of \$12.4 million to an agreement with La Cañada Design Group Inc. for a new not-to-exceed total amount of \$16.8 million for final design to upgrade the Michael J. McGuire Water Quality Laboratory

### Purpose

Enhance the reliability and extend the functional service of the Water Quality Laboratory for the next 30 years

### **Recommendation and Fiscal Impact**

Adopt the CEQA determination and authorize an amendment to an existing agreement for final design to upgrade Metropolitan's Water Quality Laboratory

Fiscal Impact – \$16 million

### Budgeted

### Location Map

# Water Quality Laboratory – An Essential Facility

- Compliance monitoring & testing
  - Bacteria, disinfection byproducts
  - Metals & minerals, organic chemicals
- General water quality monitoring
  - pH, temperature, TDS, alkalinity, taste & odor, color
- Distribution system integrity
  - Shutdowns & repairs/maintenance
  - Nitrification monitoring (nitrite, ammonia)
- Applied research
  - Treatment processes, emerging contaminants, analytical methods, alternative source waters

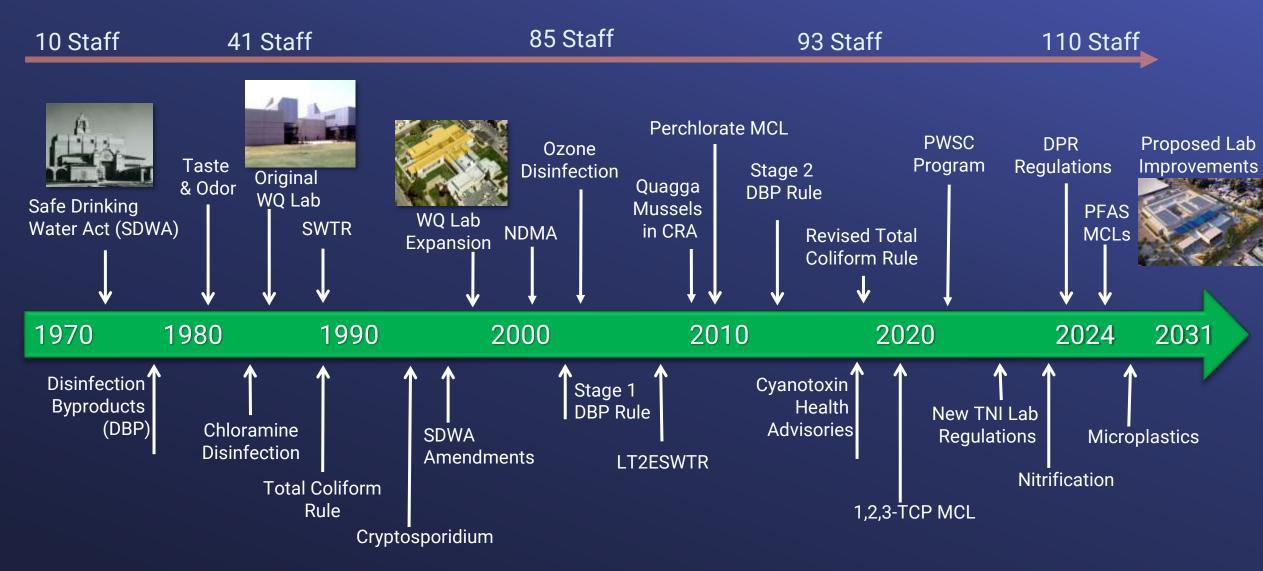

710

# Water Quality's Expanded Functions

# Water Quality – Looking Toward the Future

- New regulated monitoring
  - PFAS, microplastics
- New contaminants, emerging DBPs
- Impacts of climate volatility
  - Turbidity, cyanotoxins
- Maintaining water quality in the distribution system
  - Variable demand & low flow
  - Nitrification
- New sources & treatment processes

Celebrating 50 Years of Water Quality, 2024

Naming the Water Quality Lab in honor of Dr. Michael J. McGuire – February 2025

# **Current Building Limitations**

- Latest improvements to the lab completed in 1998
- Spaces fully utilized or beyond capacity
- Under-utilized and inefficient spaces
- Lab areas open to common areas
- Overlap between office & lab space
- Inadequate record storage
- Vulnerable to seismic events

Lab Spaces Beyond Capacity

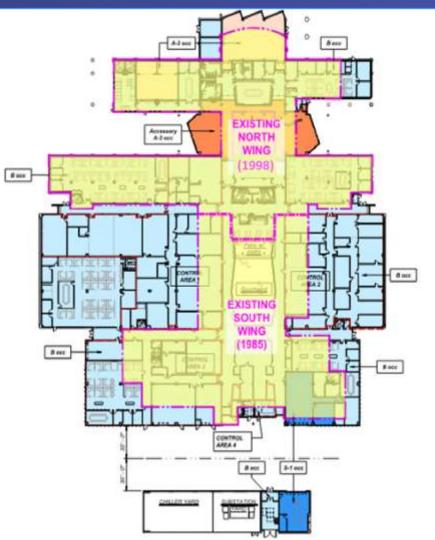

Cubicles and Documents in Hallway

# Planned Improvements – Laboratory Function

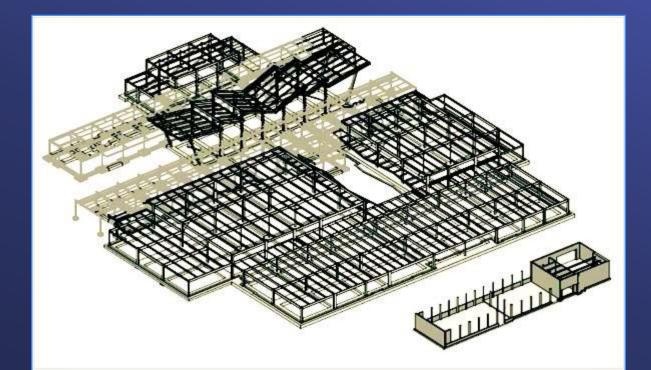

- Building expansion
- Layout optimization
  - Workflow & adjacencies
  - Public access & circulation
- Laboratory upgrades
  - Modularity & future reconfiguration
  - Reduced risk of cross-contamination
  - New specialized laboratory equipment

### Existing and New Building Layout

# Planned Improvements – Seismic Upgrades

- Meet essential facility requirements
  - Maintain operability
  - Immediate occupancy after major earthquake
- Seismic strengthening of
   existing structure
- New structural framing at expansions

Structural Analysis Model

### Final Design Approach

- Detailed design
  - Design as an essential facility with improved seismic resiliency
  - Integrates old & new construction totaling about 95,000 sq ft
    - Shoring & protection of foundation & structural framing, connection details for foundation, walls, & roofing
  - Upgrades building systems including HVAC, fire system, & mechanical, electrical, plumbing systems
  - Addresses unique laboratory requirements (room-by-room approach)
    - 70,000 sq ft for critical lab functions
    - Specialized & individualized room requirements for building systems
- Relocation planning
  - Design of temporary laboratory space 30,000 sq ft of swing space needed
  - Relocation of ~110 employees & equipment to support lab, office, & storage
  - Maintain laboratory accreditation

La Verne Water Quality Laboratory Upgrades

### Alternatives Considered

- Considered Alternative Metropolitan staff to complete all final design activities
  - Resource needs exceed staff availability, additional specialized expertise required
- Selected Alternative Use a professional services agreement to perform final design of the subject project
  - Allows for the completion of this project & other capital work within Metropolitan staff's current schedule & ensure work is conducted in the most efficient manner possible

La Verne Water Quality Laboratory Upgrades

### La Cañada Design Group Inc. – Agreement

- Prequalified and selected under RFQ No. 1182
- Board-authorized agreement for preliminary design
  - Preliminary design completed
- Recommended amendment for final design
  - Preparation of drawings & specifications
  - Construction cost estimate
- Amendment amount: \$12.4 M
  - New NTE amount: \$16.8 M
- SBE participation level: 25%

La Verne Water Quality Laboratory Upgrades

### Metropolitan Scope

- Provide project management, technical oversight & review of consultant's work
- Provide environmental support
- Relocation planning

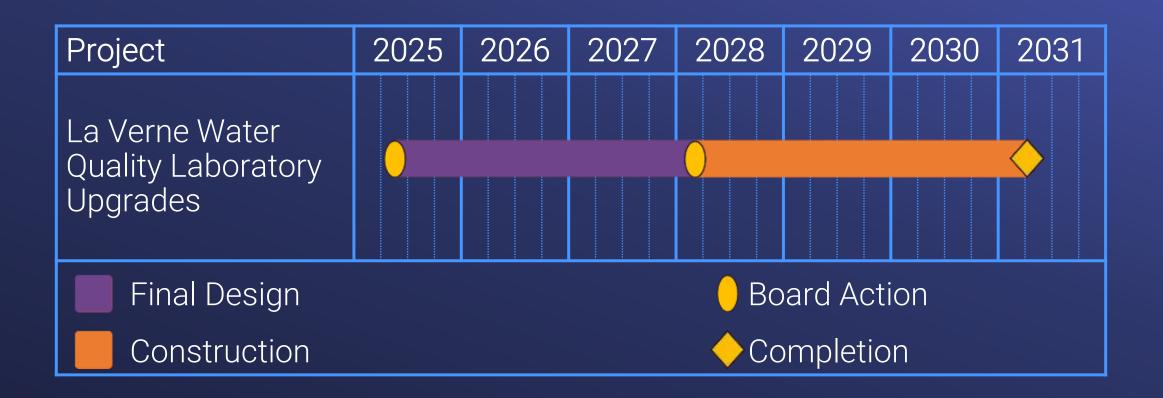

### **Allocation of Funds**

### La Verne Water Quality Laboratory Upgrades

Metropolitan Labor<br/>Final Design<br/>Owner Costs (Proj. Mgmt., Agreement Admin., Envir. Support)\$ 1,900,000<br/>800,000Professional/Technical Services<br/>La Cañada Design Group Inc.<br/>Value Engineering<br/>Remaining Budget12,400,000<br/>100,000<br/>800,000

Total \$ 16,000,000

### **Board Options**

• Option #1

Adopt the CEQA determination that the proposed action was previously addressed in the certified 2024 Final Environmental Impact Report and related documentation, and that no further environmental analysis or documentation is required and authorize an increase of \$12.4 million to an agreement with La Cañada Design Group Inc. for a new not-to-exceed total amount of \$16.8 million for final design to upgrade the Michael J. McGuire Water Quality Laboratory.

• Option #2

Do not proceed with the project at this time

### Staff Recommendation

• Option #1

THE METROPOLITAN WATER DISTRICT OF SOUTHERN CALIFORNIA

## **Board Report**

### Water Resource Management Group

#### • Conservation Board Report April 2025

#### Summary

This report provides a summary of conservation activities and expenditures for February 2025

#### Purpose

Informational

#### **Detailed Report**

#### Conservation Expenditures – FY2024/25 & FY2025/26<sup>(1)</sup>

	Paid <sup>(2)</sup>	Committed <sup>(3)</sup>
Regional Devices	\$2.5 M	\$1.0 M
Member Agency Administered	\$4.3 M	\$5.0 M
Turf Replacement	\$9.4 M	\$24.9 M
Advertising	\$0.1 M	\$0.9 M
Other	\$1.3 M	\$1.3 M
TOTAL	\$17.6 M	\$33.1 M

(1) The Conservation Program biennial expenditure authorization is \$98.2 million.

(2) Paid as of 7/1/2024 - 2/28/2025. Financial reporting on cash basis.

(3) Committed dollars as of March 10, 2025

#### Summary of Expenditures in February 2025: \$2,492,538<sup>(1)</sup>

Lifetime Water Savings to be achieved by all rebates in February 2025: 4,049 AF FY2024/25-FY2025/26: 34,200 AF lifetime water savings

(1) Expenditures may include advertising and Water Savings Incentive Program activity in addition to the incentives highlighted above.

# Engineering, Operations, & Technology Committee Annual Infrastructure Resilience Update

ltem 9-2 April 7, 2025 Item 9-2 Annual Infrastructure Resilience Update

### Subject

Annual Infrastructure Resilience Update

### Purpose

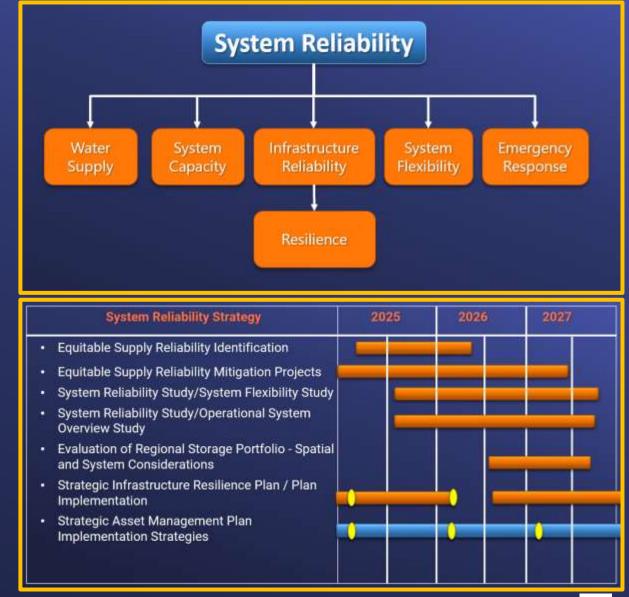

- Provide updates on:
  - Strategic Infrastructure Resilience Plan (SIRP) Seismic resilience activities

### Next Steps

- Continue development of the SIRP & inform CAMP4W
- Continue improvement of infrastructure seismic resilience

## Strategic Infrastructure Resilience Plan (SIRP)

- A component of Metropolitan's System Reliability Strategy
- SIRP component of an integrated process to identify activities to improve Metropolitan's infrastructure
- A joint activity between SRI & Engineering
- Identified projects, programs, or activities will inform the CAMP4Water process
  - Addressed in Working Memorandum 7

## Purpose of the SIRP

- Formulate strategies to improve infrastructure resilience
- Align organization-wide resilience efforts by defining vision, goals & strategies
- Guide the development of a comprehensive resilience program & its implementation
- Ensure integration of resilience program into existing operational framework & alignment with other core programs

### SIRP Development Road Map

#### Phase 1 Scope

- Initiate SIRP Development
- Identify Characteristics of Resilient Infrastructure Systems
- Identify Key Hazards
- Develop Maturity Scale
- SME Survey: Establish Resilience Maturity Levels

#### Phase 2 Scope

- Establish Target
   Maturity Levels
- Assess Resilience Gaps
- Develop Strategies to Close the Gaps
- Establish Infrastructure
   Resilience Goals

#### Phase 3 Scope

- Develop SIRP
   Implementation Plan
- Prepare SIRP final draft
- Present SIRP at the 2026 infrastructure resilience update

Improve Ability to Withstand, Adapt to & Recover From Hazard Strikes

Increasing

Threats &

Consequences

of Service

Disruption

### SIRP Phase 2 Development Updates

- Establish target maturity levels completed
  - Based on survey of subject matter experts (SME)
- Determine maturity gaps
  - SME survey conducted in Phase 1 development
  - Subjectivity affected consistency of survey results
  - Establishing resilience goals that align expectations & minimize subjectivity
  - Follow-up survey in planning
- Establish infrastructure resilience goals completed

## Maturity Gaps Assessment

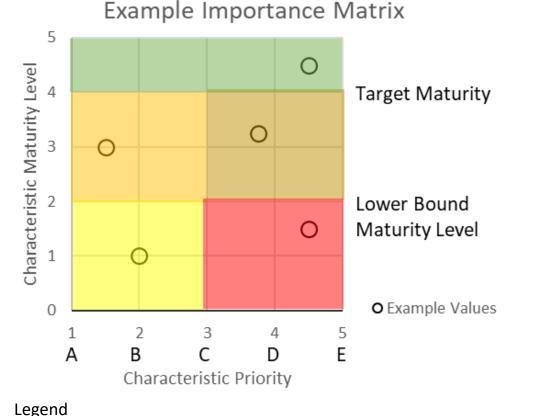

- Resilience against:
  - Natural hazards
    - Example: Earthquakes, floods, wildfires
  - Technical hazards
    - Example: Cyber attacks
  - Human-caused hazards
    - Example: Accidental infrastructure damage
  - Unanticipated Events
    - Example: Pandemic (pre-2020)
- Maturity gap analysis identifies key weaknesses in systems & prioritizes mitigation efforts

### **Hazards Evaluated**

- Earthquake
- Drought
- Wind
- Wildfire
- Flood
- Technical & Human-Caused Hazards
- General & Unanticipated Events

## Importance Matrix

- Developed for each hazard  $\bullet$ 
  - <u>Target Maturity Level</u>: all characteristics of a hazard should strive to achieve
  - Lower Bound Maturity Level: all characteristics of a hazard should meet
  - <u>Zones</u>: defining levels of urgency to place on improving characteristics
- Helps to identify maturity gaps & prioritize mitigations

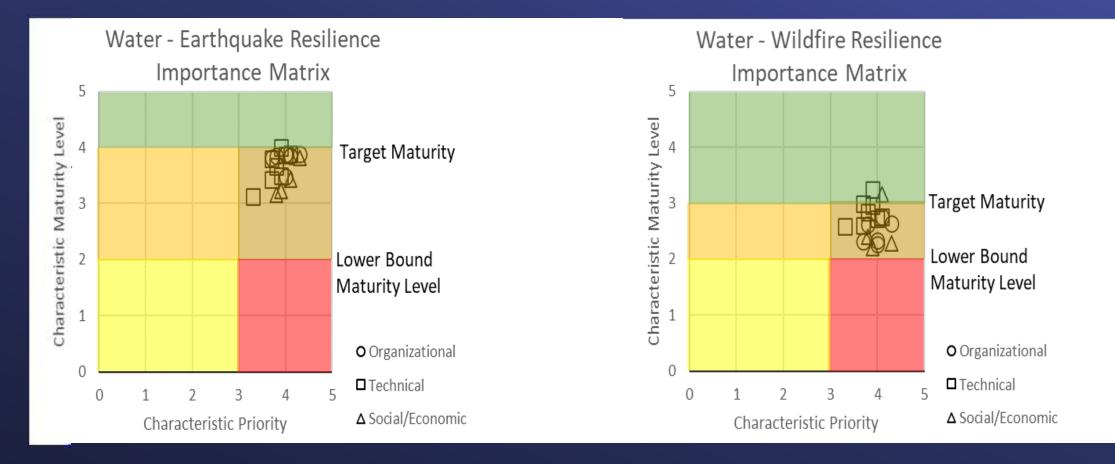

There is a moderately high need for additional emphasis

A high level of additional emphasis is needed

- Need for additional emphasis to reach or exceed lower bound maturity level
- Limited need for additional emphasis until higher priority actions are complete
- Maintain current emphasis, some additional effort may be warranted

### Importance Matrices Survey Results for Earthquake & Wildfire Resilience

## **SIRP** Resilience Goals Categories

 Drafted 18 goals (6-Organizational, 8-Technical, 4-Social/Economic) with clearly defined attributes to assess maturity levels

### Resilience Goal Example

<u>Organizational Goal 3 (O3)</u>: Adequate Resources <u>Definition:</u>

Metropolitan will ensure adequate support and resources to implement resilience measures.

#### Description:

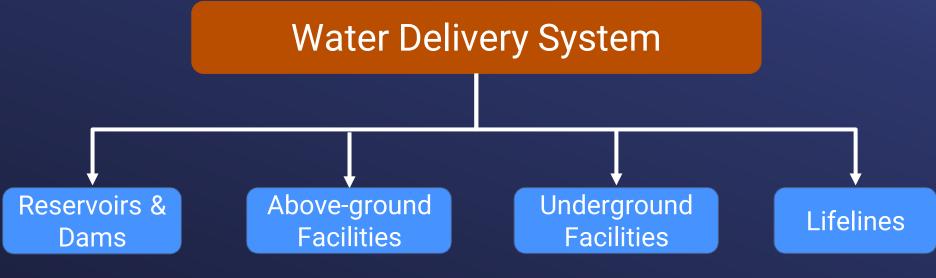

Metropolitan will create written plans for developing and implementing a hazard resilience program. Metropolitan will strive to maintain a resilience program that is encouraged and supported by all stakeholders. The program will embody *multi-hazard resilience* and incorporate all existing hazard resilience plans (e.g., earthquake). Metropolitan will endeavor to ensure it has adequate resources to implement resilience measures over time.

—GENERAL —EARTHQUAKE —DROUGHT —FLOODING —WILDFIRE —WIND —TECHNOLOGY AND/OR HUMAN-CAUSED HAZARDS

### Infrastructure Resilience Update – Seismic Resilience

- Approach to enhance resilience
  - Pre-event mitigation
    - Minimize impacts of seismic events on water delivery
  - Post-event restoration
    - Quickly restore system capacity to prevent lasting adverse effects

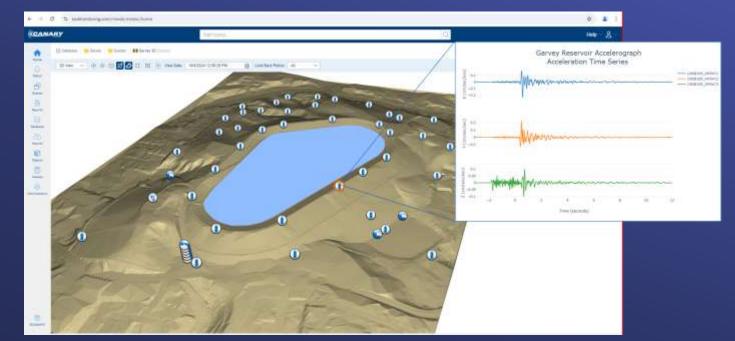

Categorization of Major Facilities for Seismic Program

Engineering, Operations, & Technology Committee

## Seismic Risk Mitigation Update – Reservoirs & Dams

- Dam Risk Assessments
  - Lake Mathews complete
  - Lake Skinner being finalized
  - Additional assessments planned
- Monitoring System Upgrades
  - Garvey Reservoir complete
  - DVL underway
  - Additional system upgrades planned

Garvey Reservoir Accelerograph Output

## Seismic Risk Mitigation Update – Above-ground Facilities

- Completed Activities
  - Construction of Foothill HEP/PCS seismic upgrade
  - Seismic assessment of Upper San Gabriel Tower
- Ongoing Activities
  - La Verne Water Quality Lab Rehabilitation
    - Preliminary design complete
  - Weymouth Admin & Control Buildings
    - Final design nearly complete

Column Strengthening of Foothill HEP/PCS

### Seismic Risk Mitigation Update – Underground Facilities

- Complete inspections of meter structures largely complete
- Develop app to standardize data collection in the field to prepare for subsequent data analytics

#### GIS Application of Meter Inspection Results

#### Condition Assessment App

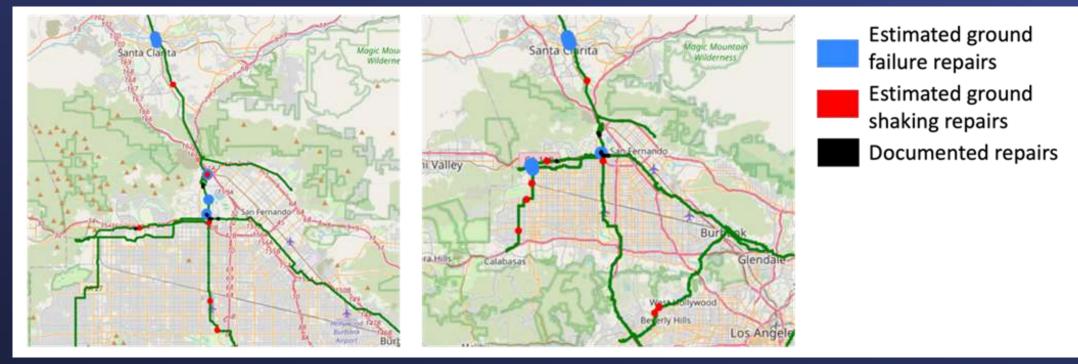

Engineering, Operations, & Technology Committee

## Seismic Risk Mitigation Update – Lifelines

- Update pipeline seismic vulnerability study
- Initiate CRA tunnels seismic evaluation
- Continue prestressed concrete cylinder pipe rehabilitation

Northridge Earthquake Hindcast Estimated Repair Scenarios

### Measures to Enhance Resilience against Extreme Events

- Build up emergency response capability
  - Maintain in-house resources & expertise
  - Completion of La Verne Shops Stage 5 Improvements
  - Promote inter-agency collaboration (Aqueduct Seismic Resilience Task Force)

Plasma Table Contractor Provided Training at La Verne Machine Shop

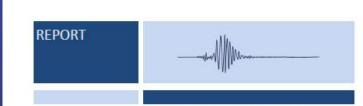

Task Force Emergency Response Exercise (CalOES, CalWARN, DWR, LADWP, MWD)

## Next Steps – Infrastructure Resilience

### • SIRP

- Refine maturity gap analysis
- Develop an SIRP implementation plan
- Prepare final draft of SIRP
- Present SIRP in Spring 2026
- Seismic
  - Continue implementation of seismic upgrade program to improve infrastructure reliability
  - Develop restoration strategies to supplement retrofit/upgrade efforts to plan for resilient infrastructure
  - Complete 2025 Seismic Resilience Report Update

SEISMIC RESILIENCE REPORT 2020 UPDATE

The Metropolitan Water District of Southern California 700 N. Alameda Street, Los Angeles, California 90012

Report No. 1551-1 February 2020

2020 Seismic Report

#### • Real Property Quarterly Report (Q3) January 1 to March 31, 2025

#### Summary

This report provides an update on real estate activities for the period of January 1, 2025, through March 31, 2025. During this reporting period, twelve (12) transactions were executed, including six (6) transactions for the acquisition of real property interests for Metropolitan use, six (6) transactions for the issuance of rights to use Metropolitan land by others, and zero (0) transactions for the disposition of Property and/or Property Rights by Metropolitan. These transactions include secondary compatible uses on Metropolitan property and the acquisition of property rights for construction and operational purposes.

#### Purpose

Metropolitan Water District Administrative Code Section 2720: General Manager's Quarterly Reports

Metropolitan Water District Administrative Code Section 8257: Quarterly Report

#### Attachments

Attachment 1 Fee properties, easements, leases, licenses, and permits acquired for Metropolitan use

Attachment 2 Easements, leases, licenses, and permits issued to others by Metropolitan

Attachment 3 Disposition of Property and/or Property Rights by Metropolitan

#### **Detailed Report**

#### Fee Properties, Easements, Leases, Licenses and Permits acquired by Metropolitan

A six-month entry permit was obtained from the Los Angeles County Flood Control District to conduct soil resistivity testing on two parcels in Bellflower as part of the Pure Water Southern California Program. The tests support geotechnical exploration to determine pipeline feasibility along the proposed alignment.

A one-week temporary entry permit was acquired from Southern California Edison to conduct soil resistivity testing on 16 parcels across ten cities in Los Angeles County in support of the Pure Water Southern California Program. This geotechnical exploration is used to help determine pipeline feasibility along the proposed alignment.

A four-month extension of a License Agreement was obtained from the Serrano Highlands Master Association to complete restoration activities incurred from the construction of the Allen McColloch Pipeline Urgent Repair Project.

A four-month Purchase and Sale Agreement extension was obtained from Scuderia Development LLC to complete construction on the Perris Valley Pipeline Project. This Agreement and temporary construction easement were necessary to accommodate the turning radius of heavy construction vehicles during construction.

Two license amendments were executed with Bcore Retail Heritage Hill LLC to extend the current licenses for one additional month. The licenses were necessary to provide temporary field office spaces supporting the Allen McCulloch Pipeline PCCP Urgent Relining project in the City of Lake Forest.

#### Easements, Leases, Licenses, and Permits issued to others by Metropolitan

Two entry permits have been issued to Brookfield and Masters University for potholing purposes along the San Diego Pipeline 4 and Foothill Feeder right of way in Temecula and Santa Clarita, respectively. The permits will help facilitate two distinct private development projects adjacent to Metropolitan's land as well as minimize potential impacts to Metropolitan's facilities.

A new lease has been executed with Bouldin Farming Company comprising the entirety of Webb Tract in the Bay Delta. The lease is for an eight-month term to allow the farming of a winter wheat crop and to offset Metropolitan's land maintenance costs. Staff is working towards securing a long-term lease through an RFP process.

Metropolitan recently entered into an option to lease agreement with a subsidiary of AES Corporation (AES) for a long-term lease of up to 6,742 acres of Metropolitan's Palo Verde Mesa property to be used for carbon-free energy production and storage, contingent upon further project permits, approvals and environmental clearances under CEQA. If AES successfully obtains the permitting and approvals and exercises its option to lease, Metropolitan and AES would execute a long-term for all or a portion of the 6,742 acres.

Lease amendments were executed to extend the tenancy of Dinelli Farms and Sierra Cattle on Bouldin Island for an additional one-year period and the option to renew for a second, one-year extension. Staff is continuing to assess the feasibility of rice farming and other uses on the islands with intentions to publish an RFP in 2025 or 2026.

#### Disposition of Property and/or Property Rights by Metropolitan

None

#### Annexations

None

#### Fee Properties, Easement, Leases, Licenses and Permits acquired for Metropolitan Use During 3rd Quarter of FY 2024/25 January 1, 2025 through March 31, 2025

GRANTOR	AREA	ТҮРЕ	TERM	USE	EXECUTED DATE	COSTS
Los Angeles County Flood Control District	3.43 acs	Entry Permit	6 months	To conduct soil resistivity testing	2/20/2025	\$1,723
